No. 1162-G.—Major C. F. Minchin, D.S.O., Superintendent, District Gazetteers, Baluchistan, has been granted furlough on medical certificate, under Article 311 (a) of the Civil Service Regulations, for the period from the 2nd January to the 24th February, 1907, both days inclusive.

No. 1274-F.—The services of Lieutenant E. G. Hume, 7th Lancers, are placed at the disposal of the Hon'ble the Chief Commissioner and Agent to the Governor General in the North-West Frontier Province, for employment with Frontier Militia.

The 26th April, 1907.

No. 1178-G.—Lieutenant F. H. Humphrys, a Political Assistant of the 3rd class, is granted privilege for three months combined with special leave for three months, with effect from the 13th April, 1907, under Articles 233 and 316 of the Civil Service Regulations.

No. 1179-G.—Lieutenant W. G. Neale, a probationer for the Political Department, is posted as Personal Assistant to the Chief Commissioner and Agent to the Governor General in the North-West Frontier Province.

No. 1183-G.—Lieutenant-Colonel R. Shore, Indian Medical Service (Bengal), an Agency Surgeon of the 2nd class, is posted, on return from furlough, as Residency Surgeon in the Western States of Rajputana.

No. 1527-I.A.—Under section 4 of the Bangalore Municipal Law, 1897, promulgated under Foreign Department Notification No. 2175-I.A, dated the 9th June, 1897, the Governor General in Council is pleased to declare that the area and limits of the Civil and Military Station of Bangalore shall be as under :

- I.—The boundary line of the Civil and Military Station of Bangalore will be assumed, for purpose of description, to start from the angle formed by the northern and eastern Revenue Survey boundary lines of the Kayamgutta village lands of Dodkunte. This point, marked on the ground by boundary stone No. 1, and lettered R on Revenue Survey Sheet 2, is the extreme north-eastern angle of the boundary limits now fixed for the Station. It is situated by the side of the Banasavadi road and on the centre of the ridge which divides the catchment basins of Lingarajpura and Narasampalyam tanks.
- II.—From this starting point the northern Station boundary hugs, for some distance, the Banasavadi road until it comes to the rocky hill known as "Machilgutte," round the southern base of which it sweeps, then following westward and coinciding with Revenue Survey boundary between the villages Dodkunte and Lingarajpura. It thus runs along the watershed and nearly parallel to the line of railway until it crosses the Kachakalli road at a point a short distance from, and due north of, the Native Cemetery of St. John's Hill. This point is marked on the ground by boundary stone No. II, and is lettered A on Revenue Survey Sheets 2 and 1.
- III.—Thence the Station boundary continues westward along the village boundary line until it reaches the north-western angle of the Dodkunte lands, which point is marked on the ground by boundary stone No. III.
- IV.—To the north of the boundary described in the above paragraph is an isolated piece of land attached to the Civil and Military Station for the purposes of a Hindu burial ground and a Municipal filth depôt comprising an area of 28 acres and 37 guntas and bounded as follows:—From boundary stone $\frac{II}{1}$, which is situated on the west side of the road leading to Hennur and 102½ yards north-east by north of stone II along the side of the same road for about 187 yards in a direction north-east by north to stone $\frac{II}{2}$; thence west north-west about 61 yards to stone $\frac{II}{3}$, then north-east by north about 6 yards to stone $\frac{II}{4}$; west by north about 311 yards to stone $\frac{II}{5}$ on the bank of a small stream; thence north by east about 60 yards along the east bank of the stream to stone $\frac{II}{6}$, thence west 212 yards to stone $\frac{II}{7}$ and in the direction west by north 121 yards to stone $\frac{II}{8}$, thence north north-east 153 yards to stone $\frac{II}{9}$, west by north 49 yards to stone $\frac{II}{10}$, south south-west 63 yards to stone $\frac{II}{11}$, south by west 100 yards to stone $\frac{II}{12}$, south by east 55 yards to stone $\frac{II}{13}$, thence in a slightly curved line south south-west 181 yards to stone $\frac{II}{14}$, south-east 70 yards to stone $\frac{II}{15}$, which is situated at a point 56½ yards north north-east of boundary stone III, thence 46 yards east south-east to stone $\frac{II}{16}$, thence north north-east 119 yards to stone $\frac{II}{17}$, thence south-east by east 91 yards to stone $\frac{II}{18}$, 143 yards further to stone $\frac{II}{19}$, and east by south 150 yards to stone $\frac{II}{20}$, thence south 30 yards to stone $\frac{II}{21}$, and east south-east about 168 yards to stone $\frac{II}{22}$.
- V.—At stone No. III, the line turns sharply and running south by west for some distance still follows and coincides with the village boundary of Dodkunte, until it meets the hedge of the large village known as "The Tanneries." This point is marked on the ground by boundary stone No. IV, and is lettered B on Revenue Survey Sheet 1.

VI.—Leaving Station boundary stone IV, the old boundary is followed up to the east of the Tannery road and is marked $\frac{IV}{1}$. From this point the boundary line runs north-east for a distance of 1,375 feet to stone No. $\frac{IV}{3}$ along east of the road. From stone $\frac{IV}{3}$ the boundary line runs 58½ feet north-east by east to stone $\frac{IV}{3}$, and from stone $\frac{IV}{3}$ it runs 79 feet north-west by north to stone $\frac{IV}{4}$, to the north of the Police outpost. From stone $\frac{IV}{4}$, the boundary line goes 73 feet south-west to stone $\frac{IV}{5}$. From stone $\frac{IV}{5}$, the boundary line runs 23 feet south-east by south to stone $\frac{IV}{6}$, completing the circuit of the Police outpost. From stone $\frac{IV}{6}$ the boundary line runs 155 feet south-west by west along west of the road to stone $\frac{IV}{7}$. From stone $\frac{IV}{7}$ the boundary line runs 376 feet south-west along west of the road to stone $\frac{IV}{8}$ meeting the Station boundary at the north east corner of the "Idga" near the road culvert. After this, the boundary follows the irregular outline of the Masjid immediately north of that village Survey block No. 671 on Revenue Survey Sheet I, until it meets to the west of the Tanneries, the northern boundary line of the Inam village of Byadarahalli. This point is marked on the ground by boundary stone No. V and is lettered C on Revenue Survey Sheet I.

VII.—From point C boundary stone No. V, the Station boundary follows the westerly course of the north village boundary of Byadarahalli until the angle formed by the northern and western village boundaries is reached, this angle being marked by boundary stone No. VI.

VIII.—From stone No. VI, the Civil and Military Station boundary line follows in zig-zag the west boundaries of the Byadarahalli fields until it crosses the Nullah at stone now marked $\frac{VII}{1}$. From stone $\frac{VII}{1}$, the boundary line turns to the west for a distance of 218 feet to stone $\frac{VII}{2}$. From stone $\frac{VII}{2}$, the boundary line runs south-west by west for 85 feet to stone $\frac{VII}{3}$. From stone $\frac{VII}{3}$, the boundary line turns south-west by south for 70 feet along the west of the Police outpost to stone $\frac{VII}{4}$. From stone $\frac{VII}{4}$, the boundary line runs east along south of Police outpost to stone $\frac{VII}{5}$. From stone $\frac{VII}{5}$, the boundary line runs north for 20 feet to stone $\frac{VII}{6}$. From stone $\frac{VII}{6}$, the boundary line runs 267 feet east to corner of present boundary line south of St. John's Hill cross road and opposite the S. B. stone VII, to which point the existing S. B. stone No. VII should be removed and refixed. Thence it passes down St. John's Hill cross road just outside the south-western side drain until it reaches the eastern corner of field No. 668, where boundary stone No. VIII is fixed.

IX.—Leaving St. John's Hill cross road at this point, the Station boundary runs south-west along the north-western boundary of Survey Nos. 667 and 668, and at the south-western corner of the latter No. 668, boundary stone No. IX is fixed.

X.—From boundary stone No. IX, the Station boundary runs south-west almost in a straight line just outside the south-east drain of Miller's road and the western side of Survey Nos. 474, 473, 464 and 455 till the south-western extremity of No. 455 is reached, where boundary stone No. X is planted.

XI.—From boundary stone No. X, the Station boundary meeting the north side of the High Ground runs west along the northern boundary of Survey No. 459 up to the north-western corner of that number and thence it passes south along Avenue Road and the western boundary of Survey Nos. 458, 129, 128, 127 till at the south-western extremity of No. 127 it meets the new boundary stone No. XI on Revenue Survey Sheet No. I.

XII.—From new boundary stone No. XI, the line runs east by south along the southern boundary of Survey No. 127 and thence turns to the south alongside the Nullah which is the eastern boundary of Survey No. 126, thence turning north through Survey No. 122 and east through the middle of Survey No. 124, it turns south-east, skirting the Government Press buildings to the southern extremity of Survey No. 40 where new boundary stone No. XII is fixed, adjoining the Pettah Road and to the south-west of the entrance to the Residency Park, which is almost opposite the south-west end of the Public Offices.

- XIII.—From new boundary stone No. XII, the line takes a northerly direction parallel with the fence of the Residency compound along the Pettah Road up to the stone pillar at which the wire fence of the Cubbon Park begins almost due south of the Post Office, where boundary stone No. XIII is placed.
- XIV.—The Station boundary line then proceeds along the Cubbon Park wire fence to the angle in the fence immediately opposite His Majesty's Post Office and thence follows the Park fence to St. Mark's Church or West Parade road, at which point boundary stone No. XIV is fixed, Point G on Revenue Survey Sheet I.
- XV.—From stone No. XIV, the boundary still keeping to the Cubbon Park fence runs along St. Mark's Road and curving round line of fence at Cubbon Park Police Station marked stone No. $\frac{XIV}{3}$, the boundary line turns almost due west for 139 feet along the north of the Cubbon Park Station to stone $\frac{XIV}{2}$ and from stone $\frac{XIV}{2}$ the boundary line runs south for 97 feet and along west of the Police station to stone No. $\frac{XIV}{3}$. From stone $\frac{XIV}{3}$ the boundary line turns to the east for 41 feet and south of the Police station to stone No. $\frac{XIV}{4}$, where it meets the Sydney Road and runs along front of the Museum to the cross roads, whence the causeway across Sampangi tank takes off. The change of direction which here occurs is marked by boundary stone No. XV, Point I, Revenue Survey Sheet I. From this point the boundary runs along the western edge of the Sampangi causeway until it falls into the Sampangi tank bund, boundary stone No. XVI being fixed at this point of intersection, Point J of Revenue Survey Sheet I.
- XVI.—Leaving boundary stone No. XVI, the line follows the curve of the compound wall of Revenue Survey Office and the roadside walls of Colonel Beresford's house until it reaches the corner of Lal-Bagh Road immediately opposite the gate of Langford House, which point is marked by boundary stone No. XVII, Point K, Revenue Survey Sheet I.
- XVII.—Passing down Lal-Bagh Road along the compound hedges of the adjoining houses, the line crosses the road near the porch of Sonnaiya & Co.'s flower garden, at which point boundary stone No. XVIII is fixed, Point L, Revenue Survey Sheet I, and runs due south along the hedge and ditch bordering the tope and gardens, which here extend from Lal-Bagh Road down to the bed of Sunnakal tank, at the end of this reach a re-entering angle is formed by the boundary, coinciding with the boundaries of the Survey numbers, and the corners are marked on the ground by boundary stones Nos. XIX, XX and XXI.
- XVIII.—From stone XXI the line runs due east along the northern wetted border of Sunnakal tank, adhering to the garden boundaries as marked on ground by the earthen Survey "Bandhs," in other words, along the southern village boundary of Hakkitimmanhalli. After passing between the south-western corner of the Cantonment cemetery and the northern end of the Sunnakal tank bund, it curves round south for a short distance so as still to follow the field boundaries of Hakkitimmanhalli until it crosses the Anekal District Road not far from where the latter takes off from the High Road to Oosoor.
- XIX.—From the Anekal road the line continues due east and crossing the Oosoor Road keeps to the boundary between the villages of Hakkitimmanhalli and Koramangal until it falls into the bed of Koramangal tank. The angle near the cemetery and end of Sunnakal tank bund is marked on the ground by boundary stone No. XXII, the points where the Anekal and Oosoor roads are crossed by stones Nos. XXIII and XXIV, and the point where the line on falling into Koramangal tank changes direction to the north-east by boundary stone No. XXV.

- XX.—From stone No. XXV, the boundary runs along the edge of the Koramangal tank to stone No. XXVI on the south side of the Nilasand, a road to the south-west of the Commissariat slaughter-house and thence along the south side of that road to stone No. XXVII, which is at the point where that road meets the road running along the west side of the Artillery Practice Ground.
- XXI.—Thence the Station boundary simply skirts the southern slopes of the Artillery Practice Ground, following the lines of stone posts which demarcate the range, until on its eastern side the point is reached where the boundaries of the villages of Chellagatta and Domlur meet. This is Point O on Revenue Survey Sheet 2, and is marked on ground by boundary stone No. XXX, the southern angles of the Practice Ground being shown by boundary stones Nos. XXVIII and XXIX.
- XXII.—From point O, boundary stone No. XXX, the Station boundary line bears away north-east above the bed of Chellagatta tank, and then, at a point marked by boundary stone No. XXXI near the Vartur District road, it turns north and follows from "Bondh" to "Bondh" the eastern field boundaries of Domlur and Dukanhalli villages. At the north-eastern angle of the village boundaries of Dukanhalli, marked on ground by boundary stone No. XXXII, the station line turns west along the Dukanhalli northern boundary, and then leaving the hamlet of Abbaraddipalyam on the left, runs into the village boundary of Binnamangal at point marked by boundary stone No. XXXIII.
- XXIII.—The southern and eastern village boundaries of Binnamangal are then followed until the line after passing close by the village tank falls into the Hoskote high road nearly opposite to Army Signalling Station No. 5, at which point boundary stone No. XXXIV is fixed.
- XXIV.—From stone XXXIV the Station line runs up the Hoskote road for a short distance to the Survey "Bondh" at side of road, from which mark it again runs due north across the fields, until the north-eastern angle of the village boundaries of Binnamangal is reached where boundary stone No. XXXV is fixed.
- XXV.—Thence the Station boundary bears west down the trough of the valley, crosses the low ground immediately above Binnamangal Tank, and runs up the slope to the Sapper Parade Ground on edge of which boundary stone No. XXXVI is placed, Point P on Revenue Sheet No. 2. Running then north along the Sapper Parade Ground to the corner marked on the ground by boundary stone No. XXXVII, it turns again west along the Parade Ground until it reaches the Dodkunte south-eastern limits. This point is marked on ground by boundary stone No. XXXVIII.
- XXVI.—The Station line then follows the village boundary north along the walls of the St. John's Hill Christian Cemeteries, Survey blocks 677 and 676 up to the point where it is intersected by the Madras Railway, outside the northern fence of which boundary stone No. XXXIX is fixed.
- XXVII.—From this last point the Station line follows the eastern village boundary of Dodkunte until it closes on the starting point boundary stone No. I.

MERCHANT SHIPPING.

The 25th April, 1907.

No. 3510—25.—The following Order in Council, dated the 1st March 1907, is published for general information :

ORDER IN COUNCIL.

AT the Court at *Buckingham Palace*, the 1st day of March, 1907,

PRESENT :

THE KING'S MOST EXCELLENT MAJESTY IN COUNCIL.

WHEREAS by Sub-section I of Section 238 of the Merchant Shipping Act, 1894, it is provided that where it appears to His Majesty that due facilities are or will be given by the Government of any foreign country for recovering and apprehending seamen who desert from British ships in that country, His Majesty may, by Order in Council stating that such facilities are or will be given, declare that that section shall apply in the case of such foreign country, subject to any limitations, conditions, and qualifications contained in the Order :

And whereas it has been made to appear to His Majesty that the Government of the Republic of Nicaragua will give due facilities for recovering and apprehending seamen who desert from British ships in that country :

NOW, THEREFORE, His Majesty, by virtue of the power vested in Him by the hereinbefore recited Sub-section I of Section 238 of the Merchant Shipping Act, 1894, and by and with the advice of His Privy Council, is pleased to order and declare that the said Section 238 of the Merchant Shipping Act, 1894, shall apply in the case of the Republic of Nicaragua.

Railway Board's notification No. 263, dated the 27th November 1906, and Railway Board's circular No. R. T. ^{80 F.}₃, dated the 16th November 1906.

Letter from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 771, dated the 4th February 1907.

Letter from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 1323, dated the 4th March 1907.

Railway Board's letter No. R. T. ^{122 A.}₃, dated the 22nd March 1907.

RESOLUTION.—The Agent of the East Indian Railway Company has recommended the adoption on the East Indian railway of the revised General Rules of 1906 for working open lines of railway in British India which were promulgated under Railway Board's circular No. R. T. ^{80 A.}₅, dated the 8th September 1906, and published under their notification No. 183, dated the 8th September 1906, and also of the addendum to Rule 86, Chapter III, Part I, of the said General Rules promulgated under Railway Board's circular No. R. T. ^{103 B.}₃, dated the 26th September 1906, and published under their notification No. 205, dated the 5th October 1906.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction with effect from 1st July 1907, under section 47, sub-section (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the General Rules of 1906 for working open lines of railway, and of the addendum to Rule 86, Chap. III, Part I, cited in paragraph 1 above, on such portions of the East Indian railway and to such portions of the lines worked by it, as are situate in British territory.

ORDER.—Ordered that this Resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), also that the General Rules, including the addendum, cited in paragraph 1, which have already been published in the *Gazette of India*, be kept at railway stations as directed by sub-section (6) of the same section and that this Resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information.

(a) Figures for the week ending the 13th April 1907.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 25th April 1907, based on the Indian Daily Weather Reports of the period.

Rain fell on every day of the week in some parts of northeast India and the Peninsula and light precipitation was reported from stations in the extreme north of India on the 21st and 22nd. Only a few scattered falls of rain occurred in other parts of the country. In northeast India rainfall was confined almost entirely to Assam, but nearly every station in the Peninsula received some rain during the week. The distribution of rainfall in northeast India was due probably to the winds from the Bay being deflected more to the east than usual. In the Peninsula the rainfall commenced in the eastern districts and gradually moved westwards, the largest amount being received in the western half of the division. Temperature continued in more or less defect during the whole week over the greater part of the country, but in northeast India it rose steadily and reached two degrees above normal on the last day.

Burma.—Port Blair reported rain on the 19th and 23rd. Skies were clear or lightly clouded, and temperature was normal or in defect in Upper Burma and practically normal in the southern districts of the province.

Northeast India and Orissa.—Rain was reported daily from stations in Assam but only a few falls occurred in the remainder of the division. Skies were cloudy in the area of rainfall and were nearly clear elsewhere. Temperature was in defect during the first part of the week but at the close was normal or in slight to moderate excess.

The United Provinces, Central India and the Central Provinces.—Light falls of rain occurred at Muktesar, Chanda, Seoni, Jubbulpore and Akola. Light to moderate cloud was reported from all parts of the division on the 23rd and 24th, but on the remaining days skies were almost clear in the United Provinces, while they were more or less thickly clouded in the Central Provinces and Central India. Temperature was in defect everywhere except from the 23rd, when it became normal in parts of the United Provinces.

Northwest India.—Precipitation occurred in the extreme north on the 21st and 22nd; and light rain fell during the week at Ambala, Sirsa, Sialkot and Jacobabad. Skies were cloudy on most days in Gujarat and Rajputana and on the 21st, 24th and 25th in the extreme north, but elsewhere they were generally clear or only lightly clouded. Maximum temperature was in more or less defect, but from the 20th the minimum was practically normal.

The Peninsula.—Nearly all parts of the division received rain, the largest amounts being recorded in the Deccan and on the west coast. Skies were lightly to heavily clouded. Temperature was nearly normal in the coast districts and in defect in the interior.

The rainfall of the past week was largely above the average in the Deccan and the Konkan. The rainfall of the whole period from the 30th November to the 25th April is in excess everywhere except on the Burma coast, in the subdivisions of Sibsagar, Burdwan, Calicut and Ahmedabad, and in Baluchistan; in these districts it is practically normal.

The following summarises the chief rainfall amounts of the week, as reported at 8 h. each day:

- April 19th. Silchar 0·95", Bellary 0·87" and Cuddapah 0·79".
- " 20th. Dibrugarh 0·81", Hyderabad 1·19" and Coimbatore 1·60".
- " 21st. Silchar 1·42", Murrce 0·78" and Raichur 0·85".
- " 22nd. Khushab 2·40", Nizamabad 1·05", Bijapur 1·52", Goa 1·00" and Mangalore 0·96".
- " 23rd. Goa 1·60" and Karwar 1·22".
- " 24th. Cherra Poonjee 3·20", Gulbarga 0·75", Mangalore 1·09" and Calicut 1·28".
- " 25th. Silchar 0·90" and Cherra Poonjee 5·68".

GEORGE C. SIMPSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 20th April 1907.

Burma.—Slight rain fell in eleven districts and in the Northern and Southern Shan States and Chin Hills. Reaping of dry weather paddy is completed in Tavoy and Myingyan and is in progress in Maubin and Sagaing. Sowing continues in Thayetmyo, Pakokku and Yamethin and transplanting in Minbu, Shweda and Lower Chindwin. Ploughing of hill-side paddy in Myitkyina and the Southern Shan States and transplanting of early wet weather paddy in Mandalay and Kyaukse are progressing. Harvesting of miscellaneous crops still continues. In Upper Burma the state of the standing crops is generally good except in Mandalay where rain is needed for dry weather paddy crops. The price of paddy has risen largely at Pegu and Maubin; considerably at Myaungmya and slightly in four districts; elsewhere it is stationary.

Eastern Bengal and Assam.—The weather is warmer. More rain has fallen in all districts. Plucking and manufacture of tea are in progress and prospects are good in Cachar and Sylhet and fair elsewhere. The harvesting of early transplanted rice continues, prospects are poor in Sylhet and fair to good in other places. Sowing of jute and rice is in progress. Pressing of sugarcane is nearly finished. Prices of common rice:— Manipur 15; Silchar 9 to 9½; Rangamati and Kohima 9; Comilla 8½; Mymensingh and Dinajpur 8½; Dacca 8½; Rampur Boalia, Dhubri, Gauhati, Tezpur and Sibsagar 8; Faridpur 7 to 8; Bogra 7½; Dibrugarh 7½; Jalpaiguri, Patna, Malda and Sylhet 7½; Barisal 7½; Rangpur and Nowgong 7; Tura 6 to 7; and Shillong and Aizal 6 seers per rupee. Prices have risen in four and remained stationary in the remaining districts. Sixty-four persons received gratuitous relief in Sylhet.

Bengal.—Rain as in the previous week was fairly general throughout the Province, the fall was light except in Puri, Sambalpur, Palamau, Cooch Behar and in parts of Purnea where it was somewhat heavy. The sowing of jute has commenced; the planting of sugarcane has almost been finished and germination has been satisfactory. In Darbhanga the number of persons on gratuitous relief was 10,369; on test works 2,760; and on relief works 25,631. The corresponding figures reported last week were 10,316, 2,210 and 23,875, respectively. The supply of fodder and water is reported sufficient in all districts. The price of common rice has risen in nine and has fallen in two districts.

United Provinces.—Rain fell throughout the Provinces accompanied by hail in some districts causing damage to the standing crops and to crops on threshing floors. Harvesting of spring crops is nearing completion and threshing and winnowing continue. Irrigation of sugarcane and extra crops is going on and ploughing for autumn crops has begun in places. Damage from rust is reported from Aligarh. Opium weighments continue. Supplies are adequate and fodder is sufficient except in Azamgarh. Prices are stationary.

Punjab.—Light to heavy rain has fallen all over the Province. There are slight fluctuations in the prices of food-grains; wheat is rising in Ambala and Sialkot and has fallen in Jullundur and Mianwali. Harvesting of spring crops is in progress; in Sialkot harvesting operations are retarded owing to the recent heavy rains. Sowings of extra spring crops as well as of cotton and sugarcane continue. The condition and prospects of the standing crops are good to average; the autumn is expected to be good except of gram and rapeseed in Amritsar. The recent rain has been beneficial to the extra spring sowings in Mianwali. The standing crops have been slightly damaged by hail in parts of Gurgaon and Shahpur. Locusts laid eggs in tehsils Mianwali and Isakhel and hoppers appeared in large numbers in the former; eggs of locusts and hoppers are being destroyed at Lyallpur. The harvested spring crops have been more or less damaged by the recent rains in several districts. The condition of cattle is good. Fodder is sufficient except in parts of Mianwali. There are no complaints regarding the water supply.

North-West Frontier Province.—Rain averaging from 33 cents in Peshawar to 66 cents in Bannu fell all over the Province. The standing crops are in excellent condition but gram is withering owing to excessive rain; wheat in some places in Bannu is suffering from rust; hail fell in the Nowshera tehsil of the Peshawar District but caused no damage. The destruction of locusts and their eggs goes on in Bannu, Dera Ismail Khan and Peshawar. Harvesting of gram on certain lands has commenced in Bannu. Sowings of extra spring crops and of sugarcane are in progress. Land is also being prepared for autumn sowings. The water-supply is ample; there has been much irrigation from hill torrents in the Daman tract in Dera Ismail Khan. Fodder is sufficient and the condition of

cattle is generally good except in some villages of Mardan tehsil in Peshawar District. Prices are fluctuating. Prices:—wheat $15\frac{1}{2}$ to 19; gram $16\frac{1}{2}$ to 25; maize $24\frac{1}{8}$ to $39\frac{1}{4}$; and *bajra* 21 to 25 seers per rupee.

Jammu.—There was good rain during the week. Prices are stationary. Prices:—wheat 16 to 24 and maize 15 to 36 seers per rupee. The condition of the standing crops is good. Fodder is sufficient except in the Ramban and Kishtwar tehsils where it is scarce. Land is being prepared for autumn sowings.

Kashmir.—The weather was generally bright except for two days when it was rainy. Prices are almost stationary.

Rajputana.—There were showers in Bikaner, Marwar, Jaisalmer, Bundi, Jaipur, Kishengarh, Alwar, Bharatpur, Dholpur, and Ajmer; the maximum fall was 75 cents at Jaipur. Harvesting is in progress except in Bharatpur where it is retarded by rain. Cattle are in good condition except in some places in Mewar. Pasturage and fodder are sufficient. Prices are rising in Marwar, Jaisalmer, Mewar, Jhalawar, Jaipur, Karauli and Dholpur; are falling in Kotah and Bharatpur; and are steady elsewhere; they are still high in places.

Central India.—Rain is general in Gwalior and slight in Bhopal and parts of Malwa and Bhopawar. Harvesting of spring crops is in progress in Bhopal, Bundelkhand, Baghelkhand and parts of Indore and has been finished in other Agencies. The standing crops and probable outturn are fair to good. Crops have been slightly damaged by rain in Gwalior and by hail-stones in Baghelkhand. Agricultural stock and pasturage are fair to good except in parts of Bhopawar, Indore and Rewa. Prices have risen in Jaora and Rutlam, are high in Baghelkhand, are falling in Bundelkhand and parts of Malwa, and are steady elsewhere. The collection of opium continues in Gwalior and Indore.

Central Provinces.—The weather is cloudy and comparatively cool; rain fell in sixteen districts. Mandla received $1\frac{1}{2}$, Chanda and Drug $1\frac{1}{2}$, Bilaspur $1\frac{1}{2}$ and Bhandara $\frac{1}{2}$ inches; in the remaining districts light showers under half an inch were received. The spring harvest is approaching completion and threshing and winnowing are in full swing but progress is slightly retarded by recent rain. Fourth picking of cold weather cotton in Warora tehsil (Chanda) continues. Preparation of land for autumn crops throughout the provinces and repairs to field embankments in rice districts are in progress. Fodder and water are sufficient everywhere but fodder is very dear in Nagpur and Yeotmal; prospects are generally favourable. Prices are stationary save in Chhattisgarh, Damoh and Jabulpore districts where there is a slight tendency to rise; prices are still equal to or above the scarcity level in Wardha, Chanda, Balaghat, Drug, Bilaspur and Amraoti.

Native States.—Bastar had 3 inches of rain, Kanker and Sarangarh $2\frac{1}{2}$, Kawardha, Chhuikhadan, and Khairagarh $1\frac{1}{2}$, Raigarh $1\frac{1}{2}$ and Sakti $1\frac{1}{2}$ inches and Rajnandgaon 35 cents. The recent rain has hindered threshing and winnowing operations and damaged the *mahua* flowers and grain on threshing floors. Preparation of land for autumn crops and picking of *mahua* continues. Fodder and water are adequate. Prospects are generally good. The price of *kodon* (millet) in Chhuikhadan fell and of rice in Sakti rose by 2 seers per rupee.

Bombay.—There was rain during the week in parts of Sind, Gujarat, Thana, Kanara, the Deccan, the Karnatak and Cutch. The standing crops have been slightly damaged by insects in parts of Karachi and by disease in parts of Hyderabad and Thar and Parkar and are generally in good condition elsewhere. Harvesting of spring crops is nearing completion and threshing continues. Cotton-picking is progressing in parts of Gujarat, the Karnatak, Baroda, Palampur, Rewa Kantha and Cutch. Preparation of lands for next season continues. Drinking water is sufficient except in parts of the Deccan and Bijapur. Water in irrigation tanks, canals and wells are running low in parts of Surat, the Deccan, Bijapur and Cutch. The fodder supply is sufficient. The quantity of food-grains purchasable per rupee is normal to 28 per cent below. Labourers get sufficient field employment in harvesting and threshing of spring crops, cutting and crushing of sugarcane and picking of cotton.

Hyderabad.—The rainfall registered was nearly 2 inches in four taluks to a few cents in several others. The late rice crop is in fair condition and the harvest has commenced in parts. Lands are being prepared for monsoon sowings. Prices:—wheat $7\frac{1}{2}$; coarse rice $7\frac{1}{2}$; and *juar* $15\frac{1}{2}$ seers per rupee.

Mysore.—There was slight rain throughout the State. Prices of food-grains are steady. The prospects of the season are good. Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall 11 cents. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—Rainfall good in the Vizagapatam littoral, Ganjam, Cuddapah, the Vizagapatam Agency, Malabar, and the Nilgiris; none in Chingleput, Madras and Trichinopoly; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of Godavari, Kistna, Bellary, Anantapur, Nellore, South Arcot, North Arcot, Salem and Madura. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally

fair but some in parts of Madura are withering. Harvests continue with outturn poor to normal. Pasture is sufficient except in parts of the Circars, the Deccan, Chingleput, North Arcot, Salem, Madura and South Canara. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in sixteen districts; has fallen in two; and has slightly risen in five. The prices of millets have fluctuated as follows:—*Ragi* is stationary in fourteen districts; has fallen in five; and has very slightly risen in one. *Cholum* is stationary in four districts; has fallen in five; and has slightly risen in five. *Cumbu* is stationary in seven districts; has fallen in four; and has slightly risen in four.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table:

| Name of province. | PRECEDING WEEK. (REVISED FIGURES.) | | | PRESENT WEEK. | | | Increase or decrease. |
|------------------------------|------------------------------------|--------------------|--------|---------------|--------------------|--------|-----------------------|
| | Relief works. | Gratuitous relief. | Total. | Relief works. | Gratuitous relief. | Total. | |

J. WILSON,
Secretary to the Government of India.

Circular No. ^{11-F.}
131-2

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

FORESTS.

Simla, the 20th April 1907.

Regulations for the appointment of Probationers to the Indian Forest Service, 1907.

 *Note.*—The Regulations for 1908 will be the subject of separate consideration by the Secretary of State in Council. An announcement will be made concerning them in due course.

1. *Appointments.*—The Secretary of State for India in Council will, in the summer of 1907, make **not less than eighteen appointments** of Probationers for the Indian Forest Service, provided that so many candidates are considered to be in all respects qualified.

In making these appointments, he will act with the advice of a Selection Committee.

2. *Applications for Appointment.*—Applications for appointment must be made on a printed form to be obtained from the Secretary, Judicial and Public Department, India Office, Whitehall, London, S. W., and to be returned to him not later than **Monday the 1st July 1907.**

3. *Age Limits.*—Candidates must have attained the age of 18 years on the 1st July 1907, and not have attained the age of 22 years on the 1st January 1907.

4. *Nationality, &c.*—Every candidate must be a natural-born British subject. He must be unmarried, and if he marries before reaching India he will forfeit his appointment.

5. *General Qualifications.*—Candidates must bring evidence, for consideration by the Selection Committee, to show that they have received a good general education.

Note.—This should be understood to include, at the least, a fair knowledge of English Composition, Mathematics—up to and including Plane Trigonometry,—Latin, and either German or French. A knowledge of Greek is not necessary, but is left to the option of the candidates.

The production of School Certificates granted by the examining authorities of Universities, or of certificates that a candidate has passed the Matriculation Examination of a University, in the subjects named, or of other certificates held by the Secretary of State in Council to be equivalent, will be taken to show that a candidate satisfies the requirements of this clause.

6. *Special Qualifications desirable.*—It is also desirable that candidates should possess a knowledge of Chemistry, and also of Mechanics and Physics, as indicated in the appended Syllabus.

If any candidate be selected for appointment who does not possess a knowledge of Inorganic Chemistry, he will be required to pass in it within six months after his selection.

7. *Medical Examination.*—Those candidates who are selected as Probationers will be required to undergo a strict examination by a Medical Board at the India Office, at which particular stress will be laid on good vision and hearing.

On passing this medical examination candidates will be deemed to be Probationers for the Indian Forest Service.

8. *Period of Probation.*—The period of probation will ordinarily extend over about three years. For the first two years the Probationers will be required to undergo a special course of study at Oxford and to become members of the University if not so already. During the third year of their probation they will receive practical instruction, visiting under suitable supervision such Continental forests as may be selected for the purpose. Excursions may also be made for purposes of study during the first two years, both in term-time and in the vacations.

9. *Shortened Probation in certain cases.*—In the case of any Probationer who has passed with Honours in a public examination in Natural Science held by a University in Great Britain or Ireland, the Secretary of State in Council reserves power, should he think fit, to sanction the reduction of the period of probation to two years instead of three, under such conditions as may be determined.

10. *Charges.*—The Probationers will be required to defray all expenses for lodging, board, tuition, and excursions within the limits of the United Kingdom which they may incur during the period of their probation at Oxford. To meet the cost of practical instruction on the Continent, each Probationer will be required to pay the sum of 180*l.*, in such instalments as may be determined from time to time.

Note.—Ordinarily a sum of 20*l.* will be due on the 15th June of the first year, and the balance in three instalments during the third year. In the case of Probationers whose term of study has been reduced (*see* paragraph 9), the payments must be made during the two years, as may be required.

11. *Course of Study.*—The prescribed course of study for the Probationers comprises the following subjects:—

I.—*Subjects auxiliary to Forestry.*

- (1) Chemistry of soils and Elementary Organic Chemistry.
- (2) Geology.
- (3) Elements of Zoology and Forest Entomology.
- (4) Botany.
- (5) Geometrical Drawing, and Elementary Engineering.
- (6) Surveying.
- (7) Book-keeping, in reference to Indian Forest Accounts.
- (8) German or French, as required.

II.—*Forestry, Theoretical and Practical, in all its Branches.*

Conduct and Medical requirements.—Every Probationer will be required to conduct himself during the period of probation in a manner satisfactory to the Secretary of State, and to give evidence of satisfactory progress in his studies in such manner as may be required, failing which, or in the event of serious misconduct, he will be liable to have his name removed from the list of Probationers.

A Probationer may also, at the discretion of the Secretary of State, be required from time to time to appear before the Medical Board, and, should the result be unsatisfactory, he will be liable to have his name removed from the list of Probationers.

13. *Diploma of Forestry, &c.*—During the period of probation, the proficiency of the Probationers will be tested by periodical examinations.

The Probationers who satisfy the Examiners in all these examinations, and complete satisfactorily the practical course in Forestry on the Continent, will receive the Diploma of Forestry of the University of Oxford. It is desirable that they should, if possible, also obtain a degree in the Honour School of Natural Science at the University.

14. *Appointment and Seniority.*—Probationers who obtain the Diploma of Forestry, and are of sound constitution and free from physical defects which would render them unsuitable for employment in the Indian Forest Service, will be appointed Assistant Conservators in the Indian Forest Department. Their seniority will be determined by the results of the examinations held during their two years' residence as Probationers at Oxford and the manner in which they have completed the practical course on the Continent. Probationers whose term of study has been reduced (*see* paragraph 9) will rank immediately below the successful Probationers of the previous year.

They will be allowed, at the end of the period of probation, to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India. Officers are, however, at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

15. *Riding.*—Every Probationer, before proceeding to India, will be required to satisfy the Secretary of State, in such manner as may be determined, of his ability to ride. It is desirable that this evidence should be forthcoming before the Probationer proceeds to the Continent for his final period of study.

16. *Articles of Agreement, &c.*—Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and must engage his own passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

17. *Allowance.*—An allowance will be granted to each Probationer on signature of his agreement, varying from 50*l.* to 100*l.*, according to the degree of proficiency and diligence shown by him during his practical course upon the Continent.

18. *Salary.*—An Assistant Conservator of Forests will draw pay at the rate of Rs. 380 a month (equivalent to 304*l.* a year, when the rupee is at 1*s.* 4*d.*) from the date of his reporting his arrival in India.

19. *Promotion, Leave, Pension, and Provident Fund.*—Promotion, leave, and pension will be governed by the Regulations laid down by the Government of India, and made applicable to Forest officers, such regulations being subject to any modifications or alterations which may be made in them from time to time by the Government of India, and their interpretation in case of any doubt arising being left to that Government. A copy of the existing regulations can be seen on application at the India Office.

Certain information regarding appointments in the upper controlling staff of the Indian Forest Service, the pay of which has been recently improved, will be found in Appendix II; a summary of information regarding Leave is contained in Appendix III, regarding Pensions and Provident Fund in Appendix IV.

INDIA OFFICE,
5th February 1907.

APPENDIX I.

(Referred to in paragraph 6.)

SYLLABUS OF SPECIAL SUBJECTS.

I.—CHEMISTRY.

The simpler chemical and physical properties of common substances, such as lime, salt, sugar, water, air.

The preparation (excluding details of technical processes) and properties of the following substances :—

The metals, tin, lead, iron, copper, zinc, magnesium, calcium, potassium, sodium; their simpler and more important compounds, especially such as occur naturally, and such compounds and alloys as are used in the Arts.

Hydrogen, oxygen, water, ozone, hydrogen-peroxide.

Nitrogen, ammonia, ammonium salts, nitrous oxide, nitric oxide, nitrogen peroxide, nitrates.

Carbon, carbon dioxide, carbonates, carbon monoxide.

Chlorine, bromine, iodine, chlorides, bromides, iodides, chlorates, hypochlorites.

Sulphur, sulphuretted hydrogen, sulphides, sulphur dioxide, sulphur trioxide, sulphites, sulphates.

Phosphorus, phosphoretted hydrogen, phosphorus trioxide, phosphorus pentoxide, orthophosphates, phosphorus trichloride, phosphorus pentachloride.

Silica.

The principles of chemical change; oxidation and reduction; combustion; flame. Allotropy. Methods* of purifying bodies. Methods of determining the composition of air and of water. Laws of chemical combination. Diffusion of gases. The atomic and molecular hypotheses. The simpler methods of determining equivalents. General considerations used in determining molecular weights and atomic weights. Chemical notation.

Alcohol, ethane, and the simpler ethylic compounds, considered in detail as typical bodies. Methylic alcohol and methane, and benzylic alcohol and toluene, considered briefly as analogues of alcohol and ethane. Characters of primary normal alcohols in general, and of their corresponding hydrocarbons.

Acetic acid, aldehyd and the simpler acetic compounds, considered in detail as typical bodies. Benzoic acid and benz-aldehyd, and formic acid and form-aldehyd, considered briefly as analogues of acetic acid and aldehyd. Characters of normal mon-acids in general and of their corresponding aldehyds.

Oxalic acid and the simpler oxalic compounds. Characters of normal di-acids in general.

Processes (i) for the detection of carbon, hydrogen, nitrogen, sulphur in organic compounds; (ii) for the estimation of carbon, hydrogen, nitrogen inorganic compounds; (iii) for the production and analysis of the silver-salts of organic acids and the platinum-salts of organic bases; (iv) for the determination of vapour densities by the V. Meyer method.

The determination of the formula of an organic compound.

PRACTICAL WORK.

The Practical Work should include :—

Simple experiments and preparations illustrating the properties of the inorganic substances named above.

Simple quantitative experiments, such as, the determination of the loss of weight on heating a body, the determination of the volume of gas evolved on the solution of zinc in acid. The volumetric estimation of acids and alkalies.

The qualitative analysis of simple salts containing not more than one of the following metals, and one of the following acid radicals:—Sodium, potassium, ammonium, calcium, magnesium, zinc, copper, iron, lead, tin, oxide, carbonate, chloride, sulphate, nitrate sulphide.

II.—MECHANICS AND PHYSICS.

Mechanics.

The principles of the lever, the inclined plane, the composition of forces, and virtual work, their experimental investigation and application to machines and other simple cases of equilibrium. Centre of gravity, couple, torque, velocity ratio, mechanical advantage, efficiency. Application to liquids and gases. Density. Boyle's law. Pump, siphon, barometer, manometer. Body moving in a straight line so that its velocity changes proportionally with the time. Body moving uniformly in a circle. Motion of pendulum-bob. Momentum, force, impulse of a force, energy, conservation of energy.

Heat.

Simple thermometry. Simple methods of determining latent heats; specific heats; expansion of gases, liquids and solids; vapour pressures. Change of state. Simple experiments on conduction, convection and radiation. Mechanical equivalent of heat.

Sound.

Direct determination of the velocity of sound in air and in water; the effect of change of temperature on the velocity of sound in air; mode of propagation of sound in air. Simple methods of determining the pitch of a note. Characteristics of musical sounds.

Light.

Laws of reflection and refraction. Simple methods of determining refractive indices, and the focal lengths of mirrors and lenses. The simplest form of the compound microscope and of the astronomical telescope. Dispersion, the spectroscope, spectra of different kinds. Simple photometry. Elementary notions of the determination of the velocity of light.

Electricity and Magnetism.

Properties of electrified bodies. Methods of electrification. Electric induction. The gold leaf electroscope. Elementary quantitative notions of electrical quantity, capacity, potential and specific inductive capacity. Condensers. Properties of magnets. Methods of magnetization. Magnetic induction. Simple methods of determining the declination and dip at a place and of comparing magnetic fields and moments. The construction of the batteries of Volta, Daniell, and Leclanché, and their theory. The secondary battery. The physical and chemical action due to a current. Simple galvanometers, ammeters, and voltmeters. Measurement of current-strength, electromotive force and resistance. The production of currents by electro-magnetic induction. The broad principles of the induction-coil and dynamo.

PRACTICAL WORK.

Simple experiments illustrating the principles stated above.

APPENDIX II.

LIST OF APPOINTMENTS IN THE UPPER CONTROLLING STAFF OF THE
INDIAN FOREST SERVICE.

NOTE.—This list shows only the existing number of sanctioned appointments, which is liable to alteration at any time. Forty-three of the appointments shown below in the various grades of Deputy and Assistant Conservators are being gradually transferred to the Provincial Forest Services, which are recruited in India. The rest of the appointments named are held by members of the Imperial Forest Service, which is recruited under these regulations.

| Number according to existing sanctioned scale. | Appointment. | Salary. |
|--|--|---|
| | | Rs. |
| 1 | Inspector-General of Forests | 2,650 a month. |
| 2 | Chief Conservators (Burma and Central Provinces). | 2,150 „ |
| * { | 19 Conservators, in three grades | { 1,900 „ } respectively. |
| | 136 Deputy Conservators | { 1,700 „ } |
| | 72 Assistant Conservators | { 1,500 „ } |
| | 9 Foreign Service appointments (four temporary). | } Rs. 380 a month, rising by annual increments of Rs. 40 a month to Rs. 700 a month; thereafter, by annual increments of Rs. 50 a month to Rs. 1,250 a month, in the twentieth year of service. |
| | 1 Assistant Inspector-General | |
| † 5 | Officers employed at the Forest Research Institute and College, Dehra Dun. | |

APPENDIX III.

LEAVE.

1. The following is a summary of the principal regulations relating to the leave admissible to officers appointed to the Indian Forest Service by the Secretary of State from the United Kingdom.

Long Leave.

2. Furlough is admissible to an aggregate amount of six years during the service. The amount "earned" is one-fourth of an officer's active service, and the amount "due" is that amount less any enjoyed.

* These 227 appointments are assigned to the various provinces as follows:—Burma, 71; Madras, 39; Bombay, 31; Central Provinces, 25; Bengal, 18; United Provinces, 19; Punjab, 14; and Eastern Bengal and Assam, 10.

† These draw an allowance of Rs. 150 a month in addition to their salary.

NOTE.—Under the improved scale of salary shown above, no Exchange Compensation Allowance is granted.

3. Furlough without medical certificate can, if due, be generally taken after eight years' active service, and again after three years' continuous service. It is limited to two years at a time.

4. Furlough on medical certificate may be granted (a) to an officer who has rendered three years' continuous service, for not more than two years, but capable of extension up to three years; and (b) to an officer who has not rendered three years' continuous service, up to one year in any case, and up to such longer period, if any, (but not exceeding two years in all), as the officer may have furlough "due" to him.

5. The allowances admissible during furlough are:—

- (1) During the first two years of furlough without medical certificate and during so much of furlough with medical certificate as may be "due,"—half average salary, subject to certain maximum and minimum limits.
- (2) After the expiration of the period for which the foregoing allowances are admissible,—one-quarter of average salary, subject to certain maximum and minimum limits.

Short Leave.

6. Privilege Leave is a holiday which may be granted to the extent of one-eleventh part of the time that an officer has been on duty without interruption; and it may be accumulated up to three months, earned by 33 months' service. During privilege leave, the officer retains a lien on his appointment, and receives the salary which he would have received if on duty. An interval of not less than six months must elapse between two periods of absence on privilege leave.

Privilege leave may be prefixed to furlough, special leave, or extraordinary leave without allowances. The whole period of leave thus taken in combination is known as combined leave. Combined leave may not be granted for a period of less duration than six months, nor, except on medical certificate, may it be extended beyond two years.

7. Special Leave may be granted at any time for not more than six months, with intervals of six years' service; allowances, calculated as during furlough, are given during the first six months only, whether taken in one or more instalments. This leave is included in the aggregate of six years' furlough admissible.

8. Extraordinary Leave without allowances may be granted in case of necessity, and, except in certain specified cases, only when no other kind of leave is by rule admissible. It may be granted in continuation of other leave.

9. Subsidiary Leave in India for a minimum of 10 days, usually with half average salary, is granted to an officer proceeding on or returning from leave out of India, or on retirement, to enable him to reach the port of embarkation or to rejoin his appointment. It is admissible only at the end and not at the beginning of combined leave.

10. Short Leave is also granted to enable officers to appear at examinations, etc.

General Rules.

11. Leave of absence, whether on furlough or on privilege leave, can never be claimed as of right, and is given or refused at the discretion of Government.

12. After five years' continuous absence from duty, an officer is considered to be out of the employment of Government.

13. When leave allowances are paid at the Home Treasury, or in a Colony where the standard of currency is gold, rupees are converted into sterling at

the rate of exchange fixed for the time being for the adjustment of financial transactions between the Imperial and Indian Treasuries, unless any other rate has been exceptionally authorised. But for the present the rate of conversion is subject to a minimum of 1s. 6d. to the rupee.

APPENDIX IV.

PENSIONS AND PROVIDENT FUND.

1. The following is a summary of the principal pension rules applicable to officers of the Indian Forest Service appointed by the Secretary of State from the United Kingdom.

An officer of the Indian Forest Service is eligible for a pension on voluntary retirement after completing 20 years' qualifying service or attaining the age of 55 years. If at an earlier date he is compelled to retire from the service through ill-health not occasioned by irregular or intemperate habits, he becomes eligible for an invalid pension or a gratuity according to the length of his service.

The amount of pension or gratuity is regulated as follows :

After a service of less than 10 years, an invalid gratuity not exceeding one month's emoluments for each completed year of service.

After a service of not less than 10 years an invalid pension not exceeding the following amounts :

| Years of Completed Service. | Maximum Limit of Pension. | | | |
|-----------------------------|--|---|---|--------------------|
| 10 | Rs. 1,000 a year or Rs. $83\frac{1}{3}$ a month. | | | |
| 11 | 1,400 | " | " | $116\frac{2}{3}$ " |
| 12 | 1,800 | " | " | 150 " |
| 13 | 2,200 | " | " | $183\frac{1}{3}$ " |
| 14 | 2,600 | " | " | $216\frac{2}{3}$ " |
| 15 | 3,000 | " | " | 250 " |
| 16 | | | | |
| 17 | | | | |
| 18 | | | | |
| 19 | | | | |

After a service of not less than 20 years, a retiring pension not exceeding the following amounts :

| Years of Completed Service. | Scale of Pension. | | Maximum Limit of Pension. |
|-----------------------------|----------------------------------|---|---|
| | Sixtieths of Average Emoluments. | | |
| 20 to 24 | 30 | { | Rs. 4,000 a year or Rs. $333\frac{2}{3}$ a month. |
| 25 and above | | | 5,000 " " $416\frac{2}{3}$ " |

Officers who have shown special energy and efficiency during an effective service of three years as Inspector-General of Forests or Conservator (First Grade) may, at the discretion of the Government of India, be allowed an additional pension of Rs. 1,000 a year.

Subject to certain prescribed conditions, rupee pensions are now issued to pensioners residing in countries where the Indian rupee is not legal tender at the rate of exchange of 1s. 9d. the rupee.

2. A Provident Fund has also been established on the following basis :

(a) The contribution is compulsory up to 5 per cent. on salaries, with voluntary contributions of a further 5 per cent. ; while on leave,

an officer may subscribe any sum he pleases, subject to a minimum of 5 per cent. on his leave allowances and a maximum of 10 per cent. on his salary.

- (b) Compound interest on such payments is annually credited by Government to each officer subscribing, the rate being at present 4 per cent. per annum.
 - (c) Receipts and payments are made in rupees only.
 - (d) The sum which will thus accumulate to the credit of an officer to be his absolute property, to be handed over to him unconditionally on quitting the service ; or, in the event of his death before retirement, to his legal representatives.
-

For Office use
only.

No.

INDIAN FOREST SERVICE.

FORM TO BE FILLED UP BY CANDIDATES FOR APPOINTMENT AS PROBATIONER, 1907.

No person will be considered as a Candidate from whom the Secretary, Judicial and Public Department, India Office, Whitehall, London, S.W., shall not have received, on or before Monday the 1st July 1907 at latest, an application on this form.

If Candidates who fill up and return the Application Form do not receive an acknowledgment of it within four complete days, they should communicate with the Secretary, Judicial and Public Department.

INDIA OFFICE,
5th February 1907.

1 Name in full.

2 Address. (Any alteration to be notified to the Secretary, Judicial and Public Department, India Office, Whitehall, London, S.W.)

3 Date of Birth. (Copy of Birth Certificate to be appended, or other satisfactory evidence as to date of birth to be supplied.)

4 Profession or occupation, and nationality of father.

-
- 5 The names of any near relatives who have been, or are now, in the service of the Indian Government, and the appointments at present, or immediately before retirement or decease, held by them.

-
- 6 All Institutions where educated, since the age of 15, with dates, distinguishing whether or not the Candidate was in residence at such Institutions.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

COMMERCIAL EXHIBITION.

Simla, the 25th April 1907.

RESOLUTION.

The following papers relative to the Franco-British Exhibition, which will be held in London in the year 1908, are published for general information. The Government of India have decided not to participate in the Exhibition.

FRANCO-BRITISH EXHIBITION, LONDON, 1908.

No international movement in recent times has given more profound satisfaction to the people concerned than the growth of friendship with our continental neighbours and the efforts made to extend our commercial relations with them, and specially with those whose industries are complementary rather than competitive with our own. Foremost amongst those nations whose commerce with the United Kingdom is of that satisfactory description is France, and the idea of increasing the commercial intercourse between the two countries and materialising their friendly relations was proposed by the French Chamber of Commerce in London towards the end of 1905, and was eagerly taken up on both sides of the Channel. The proposal was brought before the French Government through M. Cambon, then Ambassador in London, and met with the warm support of the French Minister of Commerce, M. Doumergue, who invited the opinion of the Comité Français des Expositions à l'Étranger, which acts as the official representative of the French Government and French exhibitors at all foreign exhibitions in which they take part. This body received the proposal with the greatest enthusiasm.

A crowded and representative meeting was held at the Mansion House on July 11th, 1906, with the Lord Mayor in the chair, and after the Duke of Argyll, the Honorary President, had explained the objects in view, a resolution was unanimously passed approving the steps already taken. It was also resolved that all profits should be devoted to some public purpose, and authority was given for the appointment of the necessary committees and the establishment of a guarantee fund.

A telegram sent by the Lord Mayor to the President of the French Republic informing him of the success of the meeting received a reply through the Ambassador, assuring his Lordship that the French Government would not fail to give its cordial support to the Exhibition. A deputation from the French Committee subsequently visited London, inspected the site selected at Shepherd's Bush, and expressed their high approval both of the grounds and of their accessibility from all parts of the metropolis and suburbs.

The French Minister of Commerce, who presided at a dinner given in Paris in October, 1906, by the French Committee to the Lord Mayor, repeated the assurance of support previously given, *vis.*, that the French Government had from the first associated itself with the project, which he was sure would have a great success. In the course of a banquet given by the Fishmongers' Company in honour of the Exhibition the Prime Warden, Sir Richard B. Martin, Bart., expressed his conviction that the Exhibition would be of the greatest importance in further cementing the interests of both nations. On the same day the British

Empire League held a meeting at the House of Commons, at which Viscount Selby, late Speaker of that branch of the Legislature, moved a resolution which was unanimously agreed to, which not only promised the support of the League to the Exhibition, but invited its members to do all in their power to ensure its success.

The Exhibition of Franco-British Arts, Manufactures, and Industries will be opened early in May, 1908.

The site originally selected at Shepherd's Bush contained 98 acres, and an adjoining 42 acres have since been secured. The principal entrance is immediately adjoining the station of the Central London Railway (popularly known as the Tube) and the Uxbridge Road station of the West London, London and North-Western, and Great Western Railways, the Metropolitan, Hammersmith and City Railway station, the Great Western, Ealing and Shepherd's Bush Railway new station, and in close proximity to the Shepherd's Bush station of the London and South-Western Railway, and in direct communication with the District, North London, Metropolitan London, Brighton and South Coast, South-Eastern and Chatham, and Great Central Railways. It is besides at the centre of a net-work of tramways and omnibuses connected with all parts of London and its suburbs, and capable of conveying to the spot 75,000 persons per hour, or nearly a million visitors per day, during the hours in which an exhibition is usually kept open.

The exhibits will be housed in twenty places, each of which will be a marvel of architectural beauty, and each will be thoroughly fireproof, not a particle of wood being used in its construction. Amongst the larger buildings will be the Machinery Hall, which will contain with its annexes 321,066 square feet of floor space and will be the largest ever constructed in this country. Other places will be devoted to Education, Fine Arts, Liberal Arts and various processes, Electricity, Science, Applied Arts, Music. The restaurants, cafés, garden-clubs, sports arena (which will occupy a considerable area), tracks for automobiles, cycles, etc., and attractions and amusements generally are contiguous to but apart from the Exhibition proper. Arrangements have been made for the erection, if required, of annexes, which will retain the same features of architectural beauty which belong to the buildings to which they form extensions.

The exhibition of painting, sculpture, and the fine arts generally, which will be housed in a palatial edifice, will be larger than at any previous exhibition in London, and visitors will be able to view the finest collection of French and British modern art which has ever been brought together.

One half of the entire space of the Exhibition will be devoted to the display made by France, which will be upon a more extensive scale than at any exhibition ever held by France outside Paris. When it is recollected that at St. Louis the French Exhibition occupied 77,212 square metres, more than 800,000 square feet, the magnitude of the French section of the Franco-British Exhibition will readily be realized. A special association has been formed to arrange for the representation of the French Colonies, and it is intended to send a comprehensive collection illustrating their produce and resources, which will be displayed in buildings showing the various styles of architecture peculiar to those countries, and reproducing the picturesque features of the French Colonies at the Paris Exhibition of 1900, and more recently at the Colonial Exhibition held at Marseilles during the present year.

British manufacturers and producers will be afforded the opportunity which they have not enjoyed since 1862 of being able to display in the Metropolis of the Empire the progress which has been made in every department of human invention and industry since the middle of the last century, and they will for the first time be able to exhibit with the aid of an organization similar to that enjoyed for many years past by French exhibitors, so that the display made by the United Kingdom will be presented in such a manner that the attention of visitors will be drawn to its excellence so irresistibly that they will not be tempted to leave it without a thorough examination.

Facilities will be given to exhibitors and visitors by the establishment of a system of commercial bureaux. The principal one, at the main entrance to the Exhibition, will contain a department by which a visitor can at once obtain full information as to the locality where every exhibit can be found, its nature and character, and any literature which has been prepared in connection with it. Any person coming to the Exhibition in order to see the display made by any industry will be able to gratify his wishes without any loss of time; and on the other hand persons attracted by any exhibit will be able to obtain all the information available about it with the smallest expenditure of time. Branch bureaux will be established in all the buildings of the Exhibition.

Negotiations are being conducted with all the British Colonies and Dependencies, and it is anticipated that they will take advantage of the Franco-British Exhibition to demonstrate that within the boundaries of the British Empire can be obtained all the necessities and luxuries demanded by modern civilisation.

Favourable arrangements for the conveyance of passengers and exhibits have been made with the various lines of railway by which continental travellers reach London, and excursion trains will be run direct to the grounds at Shepherd's Bush from the various provincial centres of population. A special committee will supervise the comforts of visitors from the country and abroad, protect them from overcharge, procure them accommodation at reasonable terms, and enable them to thoroughly inspect the Exhibition with the maximum of enjoyment, and at the minimum of fatigue.

Special attention has been given to the musical arrangements, which will be upon a scale of magnitude unprecedented at any exhibition ever held in London, and amusements of the most varied nature will be provided. But the area devoted to attractions will be apart from the Exhibition buildings.

The gastronomic fame of French caterers is a sufficient guarantee that the refreshment department of that portion of the buildings and grounds occupied by them will be worthy their high reputation. The British restaurants, tea rooms, etc., will be conducted on a scale of equal efficiency, and will be under the direct control of the Exhibition authorities.

A large area of space has already been applied for, and it is anticipated that the contributions of the British possessions beyond the seas will be larger than at any previous exhibition. British manufacturers and producers are therefore advised to send in their applications for space as speedily as possible, in order that they may be examined by the committee of the special group to which they belong, and which will decide whether they are worthy of admission, the charge for space, and all particulars.

FRANCO-BRITISH EXHIBITION, 1908.

SHEPHERD'S BUSH, LONDON, W.

Agreement for concessions.

AGREEMENT made this _____ day of _____ 190____,
BETWEEN THE EXECUTIVE COMMITTEE OF THE FRANCO-BRITISH EXHIBITION INCORPORATED, of London (hereinafter called the Association) of the one part, and _____
of _____ (hereinafter called the concessionaire), of the other part, WHEREAS both parties hereto are desirous of entering into the Agreement hereinafter contained. NOW THIS AGREEMENT WITNESSETH and it is hereby agreed by the Association on the one part, and by the Concessionaire on the other, as follows:—

1. The Concessionaire hereby agrees to accept and comply in every respect with the Rules and Regulations annexed hereto, and to provide and run at his

own cost and expense for the purpose of exhibiting, showing or demonstrating in the Exhibition Grounds at Shepherd's Bush, London, W., the following, which is hereafter called the Concession.

the Concessionaire is to bear all working expenses, also to pay the salaries and wages of all persons, performers, attendants and others, forming and being connected with the said Concession, and also to pay the wages of a Turnstileman, Cashier or Ticket taker, who is to be supplied by and to be the servant of the Association, commencing on the date of the opening of the Exhibition in or about the month of May 1908 and continuing during the continuance of the Exhibition Season, giving during all hours the said Exhibition is open to the public Entertainments or Shows daily.

2. The said Concessionaire further agrees to take out in a first-class Insurance Company, to the approval of the Association, a Third Party Risk Insurance Policy for the sum of £ _____ in the joint names of the Concessionaire and the Association.

3. The Concessionaire hereby authorises the Association to issue such Press and other Complimentary Passes or Tickets as the Association may think desirable, which it is understood shall be accepted for admission to the said Concessionaire's Concession without any charge whatsoever to the Association, and the Concessionaire agrees not to exhibit, show or represent elsewhere his said Concession in _____ before the _____ day of _____, 190____, or within six months after the termination of this Agreement.

4. In consideration of the faithful performance of the above, and the compliance with the annexed Rules and Regulations by the Concessionaire, the Association agree to permit him to use the site, or building, or portion of a building in its present condition marked red on the plan annexed hereto for the purpose of the said Concession, but for no other purpose or purposes whatsoever during the term above-mentioned, and to pay to said Concessionaire _____ per cent., of the gross receipts taken for or in connection with said Concession.

5. The charge of admission to the said Concession shall be _____ per person and admission shall only be obtained through registering turnstiles, or by tickets, to be provided by the Association, and all moneys for such admissions shall be collected daily by the Money Taker employed by the Association, a copy of such daily returns thereof shall be at the disposal of the Concessionaire, and the Association will pay to the Concessionaire _____ per cent. of the gross receipts of all moneys received by them for and in respect of the said Concession in the following manner:—

6. The Association will make up the accounts for the week on the Saturday of each week and pay to said Concessionaire all sums due in respect of said _____ per cent., on the Wednesday following in each week, less any deductions which may be authorised by the Concessionaire. The Concessionaire may, at all reasonable hours, inspect the Association's books of accounts in respect of moneys received by them in respect of the said Concession.

7. It is understood that the Association will make a charge to the public for entrance to the Exhibition, and no member of the public shall be admitted to the site, building, or part of a building used by the Concessionaire, except

persons who may be so or otherwise authorised to be admitted to the Exhibition by the Association, and the Concessionaire shall not be entitled to any portion of any moneys received by the Association for admission to the Exhibition or otherwise, except only in respect to admissions to his, the Concessionaire's Concession above specified.

8. The Concessionaire shall not, by virtue of these presents or otherwise, acquire any legal interest or estate in the said site, building or part of building to be used by said Concessionaire, but shall merely be permitted to use the same for the purpose of said Concession, during the period above mentioned.

9. It is hereby agreed that the following Rules and Regulations annexed hereto shall form part of this Agreement, and the parties hereto shall be bound by them accordingly.

IN WITNESS whereof the parties hereinbefore mentioned have herunto set their hands the day and year first above written,

GENERAL RULES AND REGULATIONS OF THE EXHIBITION.

For Concessions, Entertainments, Attractions and Shows.

1. It is intended that the Exhibition will be opened in or about May of 1908, from about noon to about 11 P.M. daily, except Sundays, and remain open for a period of about twenty weeks, but the Association reserve the right to extend or reduce this period or these hours. Due notice will be given as to the opening and closing of the Exhibition.

Opening and closing.

2. The Association, whilst intending to adhere as closely as possible to their published plans and General Rules, reserve the power to make any modifications or alterations they may desire.

Change of plan.

3. Concessionaires agree to pay all expenses of, conveying, delivering, arranging, fixing and removing everything connected with their concession, and also the costs of erection of all buildings (if any), structures, partitions, fixtures, screens, decorations, etc., required; and they must personally, or by their representative, superintend the transmission, reception, unpacking, installation, and (at the close of the Exhibition or expiration of this Agreement, whichever shall first happen) the removal of their goods at the expense of the Concessionaire, and all articles connected with their Concession. The Association reserve to themselves the right of doing at the expense of the Concessionaire whatever they may consider necessary unless this Regulation is strictly complied with.

Installation and removal.

4. No Concessionaire shall assign, transfer or underlet or part with the possession of any site or building or portion thereof allotted to him, or dispose of any part or interest in the concession, nor place thereon any other than his own duly approved Concession, and the Concessionaire hereby declares that no other person other than the name or names appearing in the above Contract is pecuniarily or otherwise interested with him, and he further agrees that he will not, after the signing of the above Contract, enter into partnership in respect of this Contract or his Concession without the written sanction of the Association, which consent the Association shall not be bound to concede. Any breach of this rule renders the Concessionaire liable to have such Contract forfeited, and

Underletting.

he shall not be entitled to any compensation, nor the return of any monies whatever from the Association.

5. No articles of alimentation, refreshment, food, drink or tobacco shall be either brought, sold, given away or consumed at, on or in any site, building, or part thereof used for the concession by any concessionaire or his employees without the written permission of the Association, or unless it is expressly provided to the contrary in the Concessionaire's agreement with the Association.

6. No deception of the public of any kind will be allowed. Anything which has not been clearly described, or which shall not be approved of by the Association, shall not be permissible for exhibition or display to the public, and the Association reserve the right to refuse the admission to, or to enforce the removal from, the Exhibition at any time of any article or object which they may deem unsuitable, dangerous, or in any way objectionable without assigning any reason, and the Concessionaire hereby exonerates the Association from any claim whatsoever in reference to any article or object so refused or removed.

7. All cases and goods for the Exhibition must bear on two sides the distinctive mark $\frac{C}{B} \frac{E}{E}$ together with the name of the Concessionaire and particulars of the Concession, as well as the name of the site or building which the same is intended for, and title of the Exhibition.

8. No goods or objects of any kind will be received earlier than four weeks before the date fixed for the opening of the Exhibition, unless special permission in writing has been obtained from the Association.

9. All cases must be unpacked immediately after arrival, and the empty cases and litter removed forthwith by the Concessionaire from the site, building and Exhibition grounds; otherwise the Association reserve the right of doing this at the expense of the Concessionaire. The Association will not take any responsibility in reference to cases.

10. All structural or other works, and everything else supplied by the Concessionaire, must at all times be in accordance with the regulations and subject to the approval of the London County Council, Local and all other authorities.

11. Any constructional work in connection with the Concession is at all times subject to the approval of the Association. And where the Concession is installed in any building no staple of other attachment shall be driven into the floor or wall, nor must the flooring, walls or roof be altered, removed or strengthened, except by the sanction in writing of the Association, and at the expense of the Concessionaire.

12. All constructions, fittings, decorations, designs, announcing boards, advertisements, flags and signs, etc., shall be new and subject in all respects to the approval of the Association, who may cause to be removed, or altered, anything they may deem objectionable. Concessionaires must not display advertisements or notices other than those referring to their own Concession.

13. The Association may appoint an official Contractor or Contractors for buildings and erections of every kind, stands, fittings, decorations and signs to attend the Exhibition to take orders. No other Contractor will be allowed to solicit orders on the Exhibition premises; Concessionaires can, however, employ their own contractor or fitter, who will be admitted on their written request, but he must be subject to the rules and regulations of the Exhibition, and the Concessionaire shall be responsible for all his work and actions.

14. Provision will be made where practicable at the Concessionaire's expense and risk for the supply of electric current, gas and water if application is made on the official forms provided for that purpose. Concessionaires must state the approximate amount of electric current, gas or water they may require, and the Concessionaire agrees to pay the Association for all work in connection with the fitting and installation of the electric current, gas or water, so required by him for his Concession at the usual local prices, and further agrees to pay such deposit as may be required to sufficiently cover the expense of all electric current, gas or water which may be consumed. The Concessionaire, his agents or servants are not allowed to interfere in any way with the electric, gas or water fittings or installations, nor is any work connected therewith allowed to be carried on except by persons duly authorised in writing by the Association.

15. If any damage or injury shall be caused or occasioned before the opening, during the season, or after the close of the Exhibition, by the Concessionaire or any person employed by him or by any apparatus, or by the erection, installation, use or removal thereof, or by any object connected with the Concession, or belonging to, or under the control of the Concessionaire, to any Visitor or Exhibitor or Concessionaire, or to any Officer, Servant, Employee or Tenant at the Exhibition, or to any person whomsoever, or to any object or thing, the Concessionaire shall indemnify and save harmless the Association from and against all damage or injury, and all claims, demands, actions, suits, costs and expenses in respect thereof.

16. Every concession shall be at the sole risk and responsibility of the Concessionaire, and the Association will not be responsible for the safety of any property or for loss or damage occurring from any cause whatsoever, whether by fire, the elements, theft or otherwise, to any Concession or other property belonging to any Concessionaire or any person, and Concessionaires shall insure their property against all risks. No Concessionaire shall do any thing to jeopardise the lease, current Insurances or Licenses of the Association, and they must comply with all requirements of the Association's Fire Insurance Offices and Local and all other Authorities.

17. No Concessionaire will be allowed to use unprotected lights, or fire or oil in any manner, unless special permission in writing has been first obtained from the Association, which permission may be withdrawn at any time. All fulminating, obnoxious, dangerous and explosive substances are absolutely forbidden. The Association reserve to themselves the right of examining, testing or having tested anything brought upon or to the premises.

18. It is intended to hold a press view seven days before the opening of the Exhibition, and it is essential that all the Concessions shall be ready and that the Concessionaire be present to give information as much in his own interests as in those of the whole Exhibition.

19. Spaces, sites or buildings not occupied three weeks previous to the opening of the Exhibition may be otherwise allotted by the Association, and shall be forfeited by the Concessionaire as well as all payments made in respect thereof, and any balance due by the Concessionaire shall be payable as if the space had been occupied by him.

20. No goods will be allowed to be delivered at or removed from the Exhibition grounds during the hours the Exhibition is open to the public, and all cases received during the early hours must be removed before the Exhibition opens each morning.

21. Non-transferable passes to the Exhibition will be issued to
Admission to Exhibition. Concessionaires and a reasonable number of attendants, which shall be forfeited and not reissued or replaced if used by any other person. These passes shall only admit at such hours and entrances as may be fixed by the Association from time to time.

22. Concessionaires shall not do or suffer to be done any act which may in
Nuisances. the judgment of the Association be or grow to be a nuisance or annoyance, cause damage or disturbance to the Association, any of their tenants, the public visiting the Exhibition, or the occupiers of any adjoining sites, stalls, Concession or property, and Concessionaires hereby agree not to tout or solicit the public in any way whatsoever nor permit their agents or employees to do so. The Association shall not be responsible to any Concessionaire for the acts or conduct of any other Concessionaire, nor for the consequences of any breach of these Rules and Regulations by any Concessionaire.

23. The Concessionaire shall not allow any employee, attendant or
Registration of employees. assistant to enter upon duties at the Exhibition unless and until his or her name and address has been registered in the office of the Association, and he or she has agreed to abide by the Rules and Regulations of the Exhibition.

24. All employees, attendants and other persons provided by or in the
Behaviour of employees. employ of the Concessionaire must be neatly dressed and at all times courteous and of seemly behaviour; they shall not solicit nor annoy the public or other Concessionaires in any way, and any assistant so doing may be expelled from the Exhibition premises by the Association and not allowed to re-enter. The Association also reserve the right to refuse admission to or remove from the Exhibition any person or persons without assigning any reason for so doing. Concessionaires and their attendants must leave the Exhibition premises each evening immediately after the close of the Exhibition.

25. All Concessions, buildings, sites, stalls, etc., must be properly cleaned
Cleanliness. and open for visitors before the hour of opening each day, and shall remain so during all hours that the Exhibition shall be open to the public, and if this is not done to the satisfaction of the Association, the Concessionaire hereby authorises and empowers the Association to do whatever they may deem necessary at the sole risk and expense of the Concessionaire.

26. The Concessionaires shall cause all articles left by visitors or others, or
Lost property. found by any of his employees, on any part of the Concessions or the Exhibition, to be immediately deposited in such offices or places as the Association may from time to time designate for that purpose.

27. The Association or any person or persons that they may appoint shall
Right of entry. at all times have free access and right of entry to all and any part of the space, site or building allotted to the Concessionaire.

28. No handbills or advertisements of any kind are allowed to be given
Advertisements. away or distributed in any manner from the Concession, unless special previous consent in writing has been obtained from the Association, which consent may be withheld or may be withdrawn by the Association at their sole discretion.

29. No Concessionaire shall cause or allow any article to be sold at or
Sale of articles. from the site or building or portion thereof occupied by the Concession without first obtaining the written permission of the Association for the sale of such articles, and paying the required fee therefor, which permission may be withheld or not granted, or if granted, withdrawn at any time by the Association without any cause or reason being given therefor.

30. The Association reserve to themselves the right to enclose any portion or portions of the Exhibition buildings or grounds, and to close or make a special charge for admission thereto whilst the Exhibition is open to the public, and no Concessionaire shall be entitled to demand any compensation or allowance or claim for damages from the Association by reason of their so doing.

Special charges.

31. Concessionaries must not, without the written consent first obtained from the Association, take down, or alter any part or parts of the building or Concession, or remove any part thereof.

No unauthorized removal.

32. Concessionaires shall immediately after the close of their Agreement with the Association, or the sooner termination of the same, remove from the Exhibition all their erections, fittings, decorations and goods whatsoever, and make good any damage done by them, and all charges incurred for electricity, gas or water, or damage occasioned by the Concessionaire shall be paid before the removal of any of the Concessionaire's goods from the Exhibition. Goods, cases, etc., not removed within fourteen days, or such other time as may in writing be allowed by the Association, after the termination of the agreement will be removed and warehoused at the cost and risk of the Concessionaires, or the Association may, at their discretion, sell the same by auction or otherwise, and apply the proceeds to defray the expenses incurred by them.

Removal of goods.

33. All goods, accessories, etc., shall be subject to a lien for any amount which may be due to the Association by the Concessionaires, and no goods will be allowed to be removed from the Exhibition until the written consent of the Association has been obtained for such removal.

Lien for payment.

34. No Concession or part thereof shall be photographed, drawn, copied, or re-produced in any manner, without the special permission in writing of the Association, except by Agents authorised by the Association.

Photographs.

35. The Association reserve to themselves the sole right of compiling, producing and publishing catalogues, guides, programmes, souvenirs and other publications, and any announcement of advertisement the Concessionaires may desire, can only be made or published through the Association or their authorised publishers and at the established rates.

Catalogues and guides.

36. All persons and firms becoming Concessionaires declare by so doing their compliance with the whole of these Regulations, together with such regulations, additions or variations as the Association may from time to time find necessary for the good government of the Exhibition.

Further Rules.

37. The Association may determine and Contract at any time on giving the Concessionaire, or leaving at or upon the site used for his Concession, one week's notice, expiring at any time, and the Concessionaire shall not be entitled to any compensation whatsoever in respect thereof. In case any Contract is determined through the Concessionaire by his own act or those of his employees, servants, etc., doing anything which may be improper, immoral or unfit for public view, or which may be contrary to the regulations of the London County Council or other authorities, or which may prejudice the License or Insurances of the Association, or be, or cause, annoyance, to visitors or neighbours, or cause, or be apt to cause disturbance, or by reason of any breach of his agreement with the Association or of these Rules and Regulations, or through fire, war, force majeure, no repayment or compensation shall be paid by the Association, or claimed by the Concessionaire, nor shall any amount paid by the Concessionaire be refunded. Any authorised permission or consent given by the Association may be cancelled or withdrawn at any time by the Association without any cause or reason being given for so doing.

Termination of Agreement.

38. On the termination of this Agreement the Concessionaire shall forthwith withdraw from the said site, building or portion thereof, and remove the Concession and everything connected therewith belonging to the Concessionaire therefrom, and in default the Association may re-enter and such goods may be removed by the Association, or their Agents, at the expense and risk of the Concessionaire.

Withdrawal at termination.

39. In the event of the Concessionaire committing any act of bankruptcy the Contract shall, if the Association so elect, be determined, and all monies due or paid by him under the Contract shall be forfeited and become the absolute property of the Association.

Bankruptcy.

40. The right to alter, amend, add to, or cancel any of these Rules, and to waive or grant relaxation from them in individual cases is reserved to the Association.

Right to amend Rules.

41. If any question or dispute arises on any matter not provided for in these Rules, or between the Concessionaire and his Neighbours at the Exhibition, the Association reserve to themselves the right to settle such question or dispute, and the Concessionaires hereby agree that the decision of the Association shall be binding and final.

Disputes not provided for.

42. If at any time hereafter any dispute, doubt or question shall arise between the Association and the Concessionaire touching the construction, meaning or effect of the concessions, these presents or any clause or thing herein contained, or the rights or liabilities of the said parties under any agreement with the Association, these presents or otherwise however, in relation to the premises, then every such dispute, doubt or question shall be referred to the arbitration of two indifferent persons, one to be appointed by the Association and the other by the Concessionaire, or an Umpire to be appointed by the Arbitrators in writing or by other lawful means before commencing the business of the reference, and the decision or award of the said Arbitrators or Umpire shall be final and binding on both the parties hereto, and these presents shall be deemed to be a submission to arbitration within the Arbitration Act, 1889, or any statutory modification of re-enactment thereof for the time being in force.

Arbitration.

43. In the above Rules and Regulations, the term Association shall mean the Executive Committee of The Franco-British Exhibition Incorporated; the term Exhibition, The Franco-British Exhibition, Shepherd's Bush, London, W.; Concessionaire, the firm, company, person or persons, whose signature or signatures is or are written at the foot of these Rules; Concession, the Attraction, Entertainment or Show belonging to the Concessionaire as set forth in the contract with the Association; the site, building, or portion thereof, any space allotted to the Concessionaire for his Concession by the Association under contract between the said parties.

Terms.

I/we have read the foregoing Rules and Regulations, and do hereby agree to, and accept the same.

Signature of Concessionaire _____

B. ROBERTSON,

Offg. Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MAY 4, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

Rates of subscription.

Rules and Notifications issued under Legislative Acts, and having the force of law, may be obtained separately at, per page, 2 pice.

By order of Government, all subscriptions must be paid in advance.

Applications for the supply of the *Gazette* on the public service should be addressed to the Home Department.

Complaints regarding non-receipt of any number of the *Gazette* should be forwarded within a week after the date on which it is due.

L. I. MEIKLE.

GOVERNMENT OF INDIA.
DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 2nd May 1907.

NOTIFICATIONS.

No. 1647 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 29th April 1907:—

- No. 222 of 1907.—Heinrich Klee, manufacturer, of Clausthal in the Hartz, Germany. *Method of manufacturing artificial stone plates from fibrous materials and hydraulic binding substances.*
- No. 223 of 1907.—Andrew Shirra Gibb, assistant engineer, Public Works Department, care of H. V. Williams & Co., of No. 14 Hare street, Calcutta, India. *A self-regulating apparatus for delivering a constant supply of water for irrigation or like purposes.*
- No. 224 of 1907.—P. C. Gilhooly, civil engineer, presently residing at Mussoorie, India. *Permanent sleepers for railways and tramways.*
- No. 225 of 1907.—Wilford Arthur Pèloquin Cosserat, engineer, Bengal-Nagpur Railway, of 24 Camac street, Calcutta, British India. *Improvements in signals having electrical control.*
- No. 226 of 1907.—Samuel Cleland Davidson, merchant, of Sirocco Engineering Works, Belfast, Ireland. *Improvements in stoves and apparatus for heating air.*
- No. 227 of 1907.—Arthur David Cotton, Lieutenant, Senior Assistant Surgeon, in charge Station Hospital, Fyzabad, British India. *Improvements in mosquito and like net frames.*
- No. 228 of 1907.—Alexander Austerlitz, manufacturer, of Győr, in the kingdom of Hungary. *Transportable open frame for seed crushing presses.*
- No. 229 of 1907.—James Robinson Hatmaker, gentleman, of No. 25 Rue de la Faisanderie, Paris, France. *Process of preserving animal tissues and mixtures of such tissues and other substances and the products obtained thereby.*
- No. 230 of 1907.—Alfred Charles Marchal, Administrateur-Directeur de la Société Anonyme des Usines A. E. Decouffe, 71 Rue Deparcieux, à Paris, France. *Improvements in or relating to cigarette machines.*
- No. 231 of 1907.—Julien Gueniffet and Jules Nicault, mechanics, 7 Rue Deparcieux à Paris, France. *Process and apparatus for applying a paraffine or other coating to cigarette tubes.*
- No. 232 of 1907.—Dorabjee Bajorjee Engineer, at present superintending engineer, in the New Mofussil Company, Limited, Bombay. *The economic bamboo and paper roller for the cotton gin.*

No. 1648 P.—THE undermentioned design has been registered, under the provision of the Inventions and Designs Act, 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma. This and other designs are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

- No. 12-D of 1907.—Aërotors Limited, sparklets manufacturers, of Angel Road, Edmonton, in the county of London, England. *A tyre inflater.*

No. 1649 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture,

United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

- No. 330 of 1906.—Krisna Chandra Dass, manufacturer, and Brindaban Chandra Moitra, tradesman, of 164 Upper Chitpur road, Calcutta. *An improved and simple form of automatic loom entitled "Krishna Brindaban's Patent Jahar Loom."* (Specification filed 17 April 1907.)
- No. 468 of 1906.—Frederich Wallis Stoddart, analytical chemist, of Grafton Lodge, Sneyd Park, Bristol, England. *Improvements in apparatus for distributing liquids especially suitable for sewage* (Specification filed 17 April 1907.)
- No. 475 of 1906.—William Daly, mechanist, care of H. V. Williams & Co., of No. 14 Hare street, Calcutta, India. *Improvements in gas generators for lighting, heating, and other like purposes* (Specification filed 24 April 1907.)
- No. 480 of 1906.—Decker Electrical Manufacturing Company, of 926 Market street, Wilmington, Delaware, United States of America. *Improvements in primary batteries.* (Specification filed 20 April 1907.)
- No. 63 of 1907.—James Ransome, consulting architect to the Government of India, Calcutta and Simla. *Ransome's patent adjustable sunshade for buildings.* (Specification filed 2 April 1907.)
- No. 124 of 1907.—Peder Oluf Pedersen, civil engineer, of 11 Monradsvej, Frederiksberg, in the kingdom of Denmark. *Improvements in transmitting apparatus for wireless telegraph.* (Specification filed 19 April 1907.)
- No. 131 of 1907.—The Chloride Electrical Storage Company, Limited, manufacturers, of Clifton Junction near Manchester, in the county of Lancaster, England. *Improvements in accumulator batteries.* (Specification filed 19 April 1907.)

No. 1650 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each —

- No. 380 of 1898.—N. Futehally & Company. *A machine for decorticating and extracting the fibre from the leaves of the aloe plant and other fibre bearing plants* (From 13 May 1907 to 13 May 1908.)
- No. 67 of 1900.—Francis Edward Elmore. *Improvements in separating metallic from rocky constituents of ores and apparatus therefor.* (From 6 June 1907 to 6 June 1908.)
- No. 442 of 1900.—Awdajee Radhujee Hadwale. *Improvements in machines for treating aloe and other fibres.* (From 20 May 1907 to 20 May 1908.)
- No. 219 of 1901.—Walter Grimes and Charles Cheers, Wakefield. *Improvements in sight-feed lubricators.* (From 3 July 1907 to 3 July 1908.)

No. 1651 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased:—

- No. 54 of 1902.—George Westinghouse. *Improvements in methods of treating copper ores* (Specification filed 26 January 1903.)
- No. 199 of 1902.—Nicolas Beck and Rene Dior. *An improved mode of and apparatus for preparing and utilising carburetted air for heating and lighting purposes.* (Specification filed 21 January 1903.)
- No. 238 of 1902.—William Chapman. *Improvements in or relating to the track construction of electric railways operated on the conduit system* (Specification filed 21 January 1903.)
- No. 241 of 1902.—Dr. Luigi Cerebotani. *Improvements in apparatus for reversing motion transmitted by electric current impulses through a single line to a body with the aid of motive power acting in a definite direction.* (Specification filed 21 January 1903.)

No. 242 of 1902.—Emile Maslin *Improvements in and relating to steam-boiler and other furnaces and heat-generating apparatus.* (Specification filed 21 January 1903.)

No. 261 of 1902.—Lewis Altord Brown. *A composition of matter for the production of cast or moulded articles, and the process of forming the same.* (Specification filed 26 January 1903.)

No. 451 of 1902.—Ethelbirt Richard D'Rozario, and Charles Clement Smith. *Improvements in furnaces of Lancashire boilers.* (Specification filed 21 January 1903.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

— — — — —

No. 387 of 1901.—William Walker *Improvements in fixings for railway rails.* (Specification filed 20 January 1902.)

No. 476 of 1901.—Charles Williamson Milne and Frederick Charles Haste. *Improvements in pumps.* (Specification filed 24 January 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (b) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

— — —

No. 215 of 1900.—Luis Christian Nielsen. *Improvements in burners for oil lamps having incandescing mantles.* (Specification filed 22 January 1901.)

No. 220 of 1900.—Fernand Boyer *Improvements in apparatus for the manufacture of knot-stitch carpets.* (Specification filed 24 January 1901.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

No. 218 of 1899.—Thomas Ashworth, Joseph Shaw Gaunt and George Andrew Robinson *Improvements in or relating to apparatus for spinning and doubling cotton and other fibrous substances.* (Specification filed 25 January 1900.)

No. 230 of 1899.—Thomas Ashworth Joseph Shaw Gaunt and George Andrew Robinson *Improvements in or relating to apparatus for spinning and doubling cotton and other fibrous substances.* (Specification filed 25 January 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (d) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

—

No. 363 of 1897.—John Meiggs Ewen *Electro-glazing for joining glass, tiles and the like.* (Specification filed 25 January 1898.)

No. 464 of 1897.—Charles Grey Hill and Rudolph Weiss. *Improvements in or relating to circular weaving apparatus.* (Specification filed 25 January 1898.)

Fee in respect of the continuance of an exclusive privilege—

4 (f) After the expiration of the eighth year and before the expiration of the ninth year from the date of the filing of the specification—

The sum of Rs 100 for each of the above inventions.

— — — — —

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable at *Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888.

C. STEWART-WILSON,
Director-General of the Post Office of India.

CIVIL ENGINEERING COLLEGE, SIBPUR. Engineer Department.

SESSION, 1907-1908.

Candidates for admission to the Engineer Department should apply to the Principal in the prescribed form stating their University Registration Number on or before the 15th May 1907. Each application must be accompanied by registration fee of Rs. 1, which will in no case be returned.

The session begins on Monday, the 3rd June 1907.

Candidates must furnish proof that they have passed one of the following tests:—

- (1) The B.Sc. or B.A. Examination in the B course in Physics and Chemistry of the Calcutta University. The candidate's age must be under 23 years.
- (2) The F. A. Examination of the Calcutta and Madras Universities.
- (3) The Intermediate Examination of Allahabad and Punjab Universities.
- (4) The Intermediate Examination for the degree of B.A. of Bombay University.
- (5) The High School Examination for Europeans and Eurasians.

The candidate's age in (2), (3), (4) and (5) must be under 21 years.

In selecting candidates who have passed the F. A. (all other things being equal), preference will be given to those who have passed in Sanitary Science in addition to the ordinary subjects of the F. A. Examination.

The maximum number to be admitted is limited to 40. The position in the University examination and the age of the candidate will be taken into consideration when selection is made, and such selection will be made by the Principal.

The tuition fee for students to the Engineer class is Rs. 10 a month for each month of the year, vacation included.

One junior scholarship of Rs. 20 a month, one of Rs. 15 a month, and six of Rs. 10 a month, tenable for two years, will be given to students who have been admitted to the College and who do not hold University Scholarships.

The selection will be made in the following order:—

- (a) B.Sc.'s;
- (b) B.A.'s who have taken up the B course; and
- (c) F. A. candidates (except those who passed in the third division).

There will be in addition one scholarship of Rs. 20 a month and one of Rs. 10 a month for Europeans and Eurasians who have been admitted to the College, tenable for two years.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Form of application for admission and any further particulars will be supplied upon application to the Principal.

B. HEATON,
Principal, Civil Engineering College.

SIBPUR;
The 5th April 1907.

CIVIL ENGINEERING COLLEGE, SIBPUR.
Apprentice Department.

SESSION, 1907-1908.

Candidates for admission to the Apprentice Department should apply to the Principal in the prescribed form on or before the 6th May 1907. Each application must be accompanied by a registration fee of ₹1, which will in no case be returned.

The session begins on Monday, the 3rd June 1907.

Candidates must furnish proof that they have passed one of the following tests—

- (1) Standard VII or Middle School Examination of the Code of European Schools
- (2) University Entrance Examination.

The candidate's age must be at least 15, and not more than 17 years.

There are 25 vacancies for Indians and 10 for Europeans and Eurasians. The selection of candidates for admission will be made by the Principal.

There will be one vacancy on the free list for Christian apprentices in June next and five on the reduced fee list. For natives there will be ten vacancies on the reduced fee list, available during the month of June. Election to those lists will be made by the Board of Visitors. Forms to be filled up for the consideration of the Board can be had on application to the Principal.

The tuition fee to students of the Apprentice Department is ₹3 monthly for each month of the year, vacation included, except for students on the free and reduced fee lists.

Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Before an applicant is admitted to the College his parent or guardian must sign an agreement in the prescribed form.

All applications from Christian candidates for admission to the free or reduced fee lists must reach the Principal not later than the 6th May, so as to enable the elections to be made by the Board of Visitors before the opening of the session.

The vacancies on the native list will be filled up after the opening of the session from those apprentices who have joined the College after admission. Forms of application for admission and further particulars will be supplied on application to the Principal.

B. HEATON,

Principal, Civil Engineering College.

SIBPUR;
The 5th April 1907.

**YEARLY EXAMINATION OF CANDIDATES FOR FOURTH
GRADE OF ACCOUNTANTS.**

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd July 1907 at 10-30 A M., both days :—

| SUBJECTS. | Full marks. | Minimum pass marks |
|---|-------------|-----------------------|
| Writing (neatness, clearness, and rapidity) | 100 | 50 |
| Dictation (spelling, punctuation, etc.) | 100 | 50 |
| Arithmetic (the whole) | 240 | 160 |
| Mensuration (a) (the whole) | 60 | 30 |
| Book-keeping (b) (mercantile) | 100 | 50 |
| TOTAL | 600 | ... |

Minimum required in all papers
collectively, 400.

(a) Todhunter's Mensuration for Beginners.

(b) "Book-keeping" by Ball and Hamilton.

"Book-keeping" by double and single entry, by W. Inglis (Chamber's Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in July. The examination will be conducted, either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam,

and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed; but the officer who will conduct the examination, may make his own arrangements, in regard to the *place* and *hour* of examination, with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct his examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of Rs 10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned:—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up, or employed or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth) not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's hand-writing.

NOTE.—A candidate already in Government service should, in like manner, submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination, or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts, in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an Examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants and over 25 years of age, are allowed to appear at the examination, at the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College, not later than 30 days previous to the examination; the application to be accompanied by the fee of Rupees ten.

B. HEATON,

Principal, Civil Engineering College, Sibpur.

SIBPUR;

The 1st May 1907.

**THE HON'BLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF
COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.**

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

No. 44 of 1903.—George Westinghouse. *Improvements in steam turbines.* (From 9 September 1907 to 9 September 1908.)

No. 1279 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 167 of 1902.—Louis Maiche and Charles Maiche. *An improved method of producing motive power.* (Specification filed 23 December 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for the above invention.

No. 195 of 1900.—William Charles Stephens. *Improvements in or connected with apparatus for drilling rocks and other hard substances.* (Specification filed 29 December 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable at Calcutta to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified or, if the 10th day is a holiday, till the evening of the office day next following

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 15. 12. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888

PART III.

Advertisements and Notices by Private Individuals and Corporations.

PROMISSORY NOTE.

LOST, STOLEN, OR DESTROYED.

The Government Promissory Note No. 042041 of the three per cent. of 30th June 1896-97 for Rs500 originally standing in the name of the Comptroller General and last endorsed to Lachmandas, Contractor, the proprietor, by whom it was never endorsed to any other person, having been lost, stolen, or destroyed at Bannu, notice is hereby given that payment of the above Note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for the issue of Duplicate in favour of the proprietor. The public are cautioned against purchasing or otherwise dealing with the above mentioned security.

Name of the Advertiser—LACHMANDAS, Contractor,
Residence—Bannu.

Lost.

I beg to announce for the information of the public, that the Promissory Notes amounting to Rs23,000 which were purchased through the care of Bank of Bengal, Lahore, have been lost by me in beginning of February 1905

It is most probable that my sons, named Devidass, Diwan Chand, Deena Nath and Hemraj, my hostile sons, with the object of giving me loss have misappropriated these Promissory Notes and they have taken a forcible possession of all my property earned solely by me.

I am not aware of the numbers of such Promissory Notes, hence I beg to advertize for the information of the public that any one purchasing any of the above Notes shall be lawfully treated under an offence punishable by the code rules.

These Promissory Notes are on the names of Nurput Rai, Devidass and Diwan Chand Doulat Ram, hence this advertisement.

I am the sole owner of both firms, the Notes were purchased solely of my own earning.

NURPUT RAI,
Merchant and Contractor.

LAHORE;
The 18th March 1907.

The Hon'ble Mr. H. A. Sim, C.I.E.

The Hon'ble Tikka Sahib Ripudaman Singh of Nabha.

The Hon'ble Dr. Rashbehary Ghose, C.I.E., D.L.

QUESTIONS AND ANSWERS.

The Hon'ble MUNSHI MADHO LAL asked :—

"Will the Government be pleased to mention if it is under contemplation to have fresh legislation on the protection and management of endowed properties all over India on the lines suggested by the Hon'ble Mr. Ananda Charlu in this Council, and whether the Provincial Legislative Council of the United Provinces of Agra and Oudh can be allowed to legislate on that subject for those Provinces?"

The Hon'ble SIR HARVEY ADAMSON replied :—

"The Government of India do not contemplate undertaking any legislation on this subject. The Bill introduced by the Hon'ble Mr. Ananda Charlu in the session of 1900-01 was withdrawn by him in consequence of the opposition it had aroused. The Governor General has received no application for sanction to the introduction of a Bill on the subject into the Legislative Council of the United Provinces."

The Hon'ble NAWAB SAIYID MUHAMMAD SAHIB BAHADUR asked :—

"(a) Has the attention of the Government been drawn to the memorial of the Simla House Proprietors' Association to the Punjab Government, regarding the Simla municipal elections, published in the *Indian Daily News* of January 1st, 1907?"

"(b) Will the Government be pleased to state if it is true, as therein alleged, that the Punjab Government have declined to confirm the election of several Municipal Commissioners who were duly elected so far back as October, 1905, on the ground that the question of the future administration of Simla has been referred to the Government of India?"

"(c) If so, will the Government be pleased to state when they propose to pass orders on the reference made by the Government of the Punjab?"

The Hon'ble SIR HARVEY ADAMSON replied :—

"The Government of India have within the last few days received a copy of a memorial, dated the 7th December 1906, addressed by the Simla House Proprietors' Association to the Lieutenant-Governor of the Punjab. The Association has also addressed a letter to the Government of India under date the 9th March 1907, regarding the future administration of the Simla Municipality. This letter will be taken into early consideration."

"The Government of India were informed in the commencement of 1907 by the Lieutenant-Governor of the Punjab that he had refrained from confirming or notifying the election of three candidates who had been elected to fill vacancies in the Municipal Committee of Simla which occurred in August 1905, on the ground that he anticipated that the decision of the Secretary of State on the question of the future administration of Simla might be expected at an early date. In February 1907 the Government of India informed the Government of the Punjab that no reply had yet been received from the Secretary of State on the question of the future administration of Simla, and left it to the Lieutenant-Governor to decide what action should be taken with regard to the vacancies."

[*Dr. Rashbehary Ghose.*]

DISCUSSION OF THE FINANCIAL STATEMENT FOR 1906-1907.

The Hon'ble Dr. RASHBEHARY GHOSE said:—"Your Excellency, I cannot open the debate without congratulating the Government of India on the reduction of the salt-tax. This great boon, I am sure, will be much appreciated in millions of Indian homes where even common salt is regarded as something in the nature of a luxury. In lightening the salt-tax the Government have lightened, in some small measure, the hard destiny of the toiling masses who constitute the real people and who ought to be their first care. The successive reductions of the duty have all been steps in the right direction. But the greatest still remains behind—the total repeal of a tax which is such a heavy burden on those who are the least able to sustain it. We all hope that crowning step will be taken by Your Excellency before you lay down your high office. By repealing this obnoxious tax Your Lordship would add fresh lustre to a historic name which would then be cherished by us with the same affectionate veneration with which the name of Aurelian, who gave the people free salt, was cherished by the citizens of the Roman Empire.

"The remarkable stimulus imparted to the consumption of one of the first necessities of life by the recent reductions in the salt-tax of which the Finance Minister spoke on Wednesday last is to my mind a conclusive argument against the retention of an impost which falls so heavily on the hunger-stricken masses. Speaking in 1903, my Hon'ble friend Mr. Gokhale said that the consumption of salt was not even ten pounds per head, whereas the highest medical opinion lays down twenty pounds per head as the standard for healthful existence. But this standard will not be reached till the tax is completely wiped out; though it may be said that where food is not over-abundant, the consumption of salt need not be so high as twenty pounds. The Hon'ble Finance Member observed, in defence, I presume, of the retention of the tax on salt that it is the only contribution towards the public expenditure that is made by a large number of the people. My Hon'ble friend Mr. Gokhale, I know, does not admit the correctness of this statement. I hope Mr Gokhale is right; for, if the Hon'ble Finance Member's assertion is well founded, what does it show? It only shows the hopeless, the unspeakable, poverty of the masses in India.

"My Lord, with the dark shadow hanging over our opium-revenue, the total repeal of the duty may seem to be a bold or even a rash step to take. There is, however, a well-known saying about threatened men, and I believe this will hold good of our trade in opium with China. But if the government of the country cannot be carried on without the revenue derived from salt, I would suggest the imposition in its stead of a succession-duty on the estates of deceased Hindus and Muhammadans.

"Our best acknowledgments are also due to Government for the provision which has been made in the Budget under review for enabling Local Administrations to meet a famine immediately without being obliged to do so with their own limited resources. The new scheme promises to relieve the various Local Governments of the strain on their exchequer when they are threatened with a famine. Under this system the greater part of the burden would fall on the Imperial revenues. But the real problem before the Government is not to meet a famine by doles, but to avert it. This can only be done by lightening the burden of taxation, by the construction of irrigation canals, the spread of improved methods of agriculture, the encouragement of manufacturing industries, and the growth of intelligence among the people by means of education. Without these neither Agriculturists' Relief Acts nor Land Alienation Acts would avert those terrible visitations which many intelligent foreigners regard as a standing reproach to the Government of the country. The evolution of the Famine Code may be a very excellent thing, but the evolution of agriculture and manufacturing industry would be more welcome. A hungry people, my Lord, can never be a very contented people, for hunger is a mischievous counsellor, more mischievous than the most

[*Dr. Rashbehary Ghose.*]

pestilent agitator or the most vocal loyalist whom it requires Ithuriel's spear to unmask.

"My Lord, it may be, as we have been told, that no Government in the world except the British is capable of doing what Britain is able to do in India in famine time, and that no Government that might be substituted for the British would attempt to undertake such a task. But the world and its Governments are rather censorious and might be tempted to ask awkward questions when Indian famines are made to adorn a peroration or to point what to an English audience must be an obvious moral. Every school boy knows the story of Aristides and the Athenians.

"I have no desire, my Lord, to play the part of the pessimist who refuses to be comforted. But though the youngest member here present, I am no longer young in years and have lost the robust optimism and together with it some of the illusions of the springtide. Trade returns and increasing revenues, like all statistics, may be made to tell a flattering tale, but the frequent recurrence of famines is an undeniable fact which is not adequately explained by rhetorical phrases about wresting the keys of the universe from Providence, and when I think in this Council chamber of my famished countrymen, I seem almost to hear their piteous cries which are as the 'moaning of the midnight sea', and am unpleasantly reminded of a passage in Heine in which that rather strident mocker describes the dismay of the Olympian gods at a ghastly sight on which I may not be more explicit; for this somewhat erratic genius who was engaged all his life in doing battle manfully with Philistinism did not write for the parsonage or the drawing-room.

"This is, however, not the proper place to discuss the question on which so much controversy is surging in our day, namely, whether the people of India are growing more and more prosperous notwithstanding the ever-increasing foreign drain for which Lord Salisbury, who was nothing if not cynically frank, substituted a stronger expression, which need not be repeated here. The reason why I do not enter upon the discussion is that I cannot compress it within the limits of a single speech. One thing, however, is clear. India is still a very poor country, and we must, to use a homely saying, cut our coat according to our cloth. And this leads me to say a few words on the military estimates. For though we cannot divide or even move a resolution, the lyrical function of speaking out our hearts is not denied to us. My Lord, it is our high office and privilege to be the interpreters between our countrymen and Government, and we should be wanting in our duty if we did not attempt according to our feeble lights to assist in the solution of the various questions suggested by the Budget on which depend the happiness and prosperity of one-sixth of the whole population of the earth. A great English minister whose name is dear to all lawyers told us the other day that he has no more control over these estimates than over the winds and tides, but we have yet not reached that stage of positive perfection which refuses to believe in the efficacy of prayers, and which in the present case need not be wafted across the seas.

"One of our poets who lived many centuries before Shakespeare and Milton, and whose name is quite familiar in Germany, if not in England, has said of an ancient Hindu King:

प्रजानामिव भूत्यर्थं स ताभ्यो बलिमग्रहीत् ।
सहस्रगुणमुत्तमदत्ते हि रसं रविः ॥

'For the welfare of the subjects themselves he used to take taxes from them; 'just as the sun takes water (from the earth) to return (the same) a thousandfold (in the shape of rain).'

"Peace and order are no doubt the greatest blessings which the king confers on his subjects in return for the taxes paid by them, and it would be puerile to complain of any expenditure reasonably incurred in defending the country and in maintaining peace and order, without which no progress is possible. But there is a very general idea in this country that the military estimates are excessive. In the time of the Mogul Emperors, when the soldiers were paid in land, only a few

[*Dr. Rashbehary Ghose.*]

estates, or rather their revenues—which I may mention in passing never left the country,—were set apart for the support of the army. At the present day, however, our military expenditure exceeds the whole of the land-revenue, so that not only has all India become one vast military feud, but even the poor man's salt must contribute to the maintenance of mountain batteries ready to take the field in any part of the world.

"My Lord, I may be told that I am a mere lawyer 'that never set a squadron in the field,' but there are some questions on which the man in the street may claim to be heard. Shortly after the Crimean War there was an interesting controversy between Lord Palmerston and Sir George Lewis on the proverbial saying that prevention is better than cure, which like all epigrammatic sayings contains only a half-truth. It may be a good maxim in medicine, but in its application to politics we must not forget that the system of insurance may be carried too far. If an evil is certain and proximate, prevention is certainly better than cure; but not so if the evil is remote and uncertain. For the evil may probably never occur and the cure, should it occur, may not be very expensive. 'Our foreign relations,' said Sir George Lewis, that most logical of reasoners, 'are so various and so intricate that if we insure against every danger which ingenuity can devise, there will be no end of our insurances. Even in private life it is found profitable for those who carry on operations on a large scale not to insure. A man who has one or two ships, or one or two farmhouses, insures. But a man who has many ships and many farmhouses often does not insure.' Most people will, I venture to think, admit the truth of these remarks; though they may not agree with Sir George Lewis that diplomatic agents whose time is generally only half employed are sometimes too apt to frighten their own Government with exaggerated reports of the ambitions and encroaching designs of foreign Powers, which I may add have sometimes a tendency to fulfil themselves. The real truth is the foreign relations of England are on too large a scale to allow her to insure systematically for all risks, however, remote and contingent. But she may always safely rely upon the valour of her sons and the goodwill and loyalty of a contented people.

"I repeat the answer to the question—is prevention better than cure?—must depend upon the magnitude, the certainty, and the nearness of the peril against which we have to guard ourselves, and I submit that the enormous military expenditure is too large a premium to pay to insure us against the off-chance of a foreign invasion; specially at the present moment, when our relations with our neighbours are most friendly, and there is not a speck of cloud in the blue sky. But some of us are too prone to anticipate the future, and in constantly watching the movements of other nations forget the humbler duties which lie near at hand.

"On such a question of policy as this, and, as Disraeli pointed out long ago, military expenditure depends upon policy, surely a civilian is entitled without presumption to form his own opinion. Indeed, in some respects he is likely to take a sounder view, as he would not be under the dominion of those idols of the den and of the market which are so apt to cloud our vision. 'All professions,' says Cardinal Newman, 'have their dangers; all general truths have their fallacies, all spheres of action have their limits, and are liable to improper extension or alteration. Every professional man has rightly a zeal for his profession, and he would not do his duty towards it without that zeal, and that zeal soon becomes exclusive or rather necessarily involves a sort of exclusiveness. A zealous professional man soon comes to think that his profession is all in all, and that the world would not go on without it. We have heard, for instance,' adds the Cardinal—he was speaking not in the twentieth but in the nineteenth century, 'a great deal lately in regard to the war in India, of political views suggesting one plan of campaign and military views suggesting another. How hard it must be for the military man to forego his own strategical dispositions, not on the ground that they are not the best,—not that they are not acknowledged by those who nevertheless put them aside to be the best for the object of military subjects,—but because military success is not the highest of objects and the end of ends,—because it is not the sovereign science, but must ever be

[*Dr. Rashbehary Ghose.*]

subordinate to political considerations or maxims of government, which is a higher science with higher objects,—and that therefore his sure success on the field must be relinquished because the interests of the Council and Cabinet require the sacrifice, that the war must yield to the statesman's craft, the Commander-in-Chief to the Governor General. Yet what the soldier feels is natural, and what the statesman does is just. This collision, this desire on the part of every profession to be supreme, this necessary, though reluctant, subordination of the one to the other, is a process ever going on, ever acted out before our eyes.'

"My Lord, I fear in my remarks on the Budget I have taken too wide a sweep and have overlooked the law of concentration of energy, but there remain two questions which call for immediate solution, and on which I trust I may say without much arrogance or presumption I have some claim to speak.

"My Lord, it is frequently said that India is held by the sword. This is perfectly true. But the sword by which the country is held has both a finer temper and a keener edge than the rude weapon of the soldier; for it is the sword of Justice. Whatever, therefore, is calculated to promote the proper administration of justice ought to engage the earnest attention of Government. Now, I am not going to discuss the capacity of our young Magistrates to deal out justice among a people with whose language they can have only a very imperfect acquaintance, and whose manners, customs, and sentiments must be a sealed book to them, for I know it is not always expedient to say things merely because one honestly believes them. But it is certainly not inexpedient to point out one most serious blot on the administration of criminal justice. Is it necessary to say that I refer to the union of judicial and executive functions in the same public servant? I admit that the fusion may have been necessary in earlier times, and may possibly be still necessary in the more backward parts, but it is certainly an anachronism at the present day in the advanced provinces. The memorial which was addressed to the Secretary of State in July 1899 by Lord Hobhouse, Sir Richard Garth, Sir Richard Couch, Sir Charles Sargent, Sir William Markby, Sir John Budd Phear, Sir John Scott, Sir William Wedderburn, Sir Roland Wilson, and Mr. Reynolds embodies everything that can be said on the question, and it would be a work of supererogation to travel over the same ground again. There are, however, some fallacies which, though doomed to death, are yet fated not to die. The opponents of reform still assert with a confidence not according to knowledge that the combination is essential to the prestige of a public officer in an oriental country; but, as pointed out in the memorial in question, is the prestige of the Viceroy less than the prestige which hedges in a District Magistrate, because the Magistrate may send a man to gaol and the Viceroy cannot? And this reminds me that prestige—which literally means an enchantment or illusion—is a word of evil parentage, as a distinguished conservative statesman said on a memorable occasion, and even in its best sense means something (I need not be more explicit) of which those who speak of their prestige have no reason to be proud. Lord Macaulay once said: 'I have often observed that a fine Greek compound is an excellent substitute for a reason.' In India, where a knowledge of Greek is not so common, and a new compound cannot be readily turned out, a sonorous word like 'prestige' serves the same useful purpose.

"It is also said by the opponents of the proposed reform that it is a mere counsel of perfection, as you cannot carry it out without doubling the staff throughout the country, and we are reminded of the condition of Indian finance. But Mr. Romesh Chunder Dutt, who rose to be the Commissioner of a Division, has shown that in the province of Bengal at least the separation of judicial and executive functions would not add materially to the cost of administration, and that any additional expenditure which it might entail could be easily met by savings or economies in other directions. The scheme formulated by Mr. Dutt was referred to with approval in the memorial submitted to the Secretary of State, and there is every reason to believe that it can be practically carried out. It is, however, unnecessary for me to labour this point; for the

[*Dr. Rashbehary Ghose.*]

plea of an empty exchequer is no longer tenable; but I fear that a bureaucracy always 'perplexed by fear of change' will find some other excuse for retaining their authority. The scheme, they will say, looks very well on paper, but any attempt to put it into practice will certainly end in failure. Readers of Sydney Smith will, however, remember the famous oration in which the greatest wit which the English Church gave to the nineteenth century gathered together the long catena of fallacies which were so ruthlessly exposed by that stalwart radical, Jeremy Bentham, whose name was once a bye-word for all that is hateful. 'I tell the honourable mover at once,' says the orator in Sydney Smith, 'his scheme is too good to be practicable. It savours of Utopia. It looks well in theory, but it won't do in practice. It will not do, I repeat, Sir, in practice, and so the advocates of the measure will find if, unfortunately, it should find its way through Parliament. (Cheers.)' The truth is, a reluctance to part with power is inherent in human nature, and there is a great deal of human nature in the members of that much be-praised service, the Covenanted Indian Civil Service, some of whom, whose knowledge of the East seems to have been drawn from the Arabian nights, would perhaps like to play the part of the Cazi sitting in the gate, administering patriarchal justice. 'Just the thing, you know, for these orientals.'

"My Lord, the country has been waiting for the proposed reform for years. The distinguished men who memorialized the Secretary of State in 1899 earnestly trusted that Lord George Hamilton would ask the Government of India to prepare a scheme for the complete separation of the judicial and executive functions, and to report upon this urgently pressing question at an early date. But nothing has yet been done. The question, we are told, is still under consideration. No reader of Dickens need however be surprised at this; specially when he remembers that red tape is now even cheaper than in the days of Little Dorrit.

"The union of judicial and executive functions in the same person is not the only anachronism to which I would invite Your Excellency's attention. In the administration of civil justice, too, we are weighed down by the dead hand of the past. The highest judicial offices with the largest salaries in the provinces have been reserved as a close preserve for the members of the favoured Civil Service. I freely admit that there are many among them distinguished by ability of the highest order; but ability, however great, cannot dispense with legal learning; for though administrative skill may come by nature, a knowledge of law is unfortunately not one of the gifts of fortune. The result is their incapacity is contrasted with the knowledge and training of those over whose judgments they sit in appeal, members of the Subordinate Judicial Service, as it is called, men of ripe experience and possessing the inestimable advantage of being natives of the country. Now it may be that the countrymen of Sir Salar Jung of Hyderabad, Sir Madhava Rao of Baroda, Dewans Poorniah and Ranga Charlu of Mysore, Sir Dinkar Rao of Gwalior, Kantichandra Mookerji of Jeypore, are not fit for high executive office,—the experiment has yet to be made, but our fitness for judicial office is acknowledged by everybody including Privy Councillors like Lord Selborne.

"So far back as 1842 the Indian Law Commissioners considered 'a more extensive employment of the natives of the country as a means both of increasing the efficiency of the Courts and of improving the moral condition of the people.' Again, the Public Service Commission, which included a retired Chief Justice of Madras and other distinguished members, in their report, which was published more than eighteen years ago, said:—'It may be observed that many witnesses examined before the Commission have urged that judicial offices should be made over more freely to natives of India, and some witnesses have gone so far as to recommend that the greater part, if not the whole, of the civil judicial work of the country might be usefully entrusted to native agency. In the expediency of employing duly qualified natives to a large extent in the judicial branch of the public service, the Commission fully concurs. The highest judicial offices in the country have already been filled by natives with marked ability, while the subordinate judiciary, which is composed almost exclusively of natives of India, has displayed very great aptitude for judicial office.'

[*Dr. Rashbehary Ghose.*]

" In 1869 a writer in the *Edinburgh Review*—it is an open secret that the author of the article was Mr. Justice, now Sir William, Markby—gave an extract from a minute of Mr. Justice Loch, who was formerly himself a District Judge, which shows pretty clearly the state of things in the sixties of the last century. 'An assistant' said Mr. Justice Loch (that is, a member of the Civil Service who has just come out from England), 'remains at the sudder station of a district for a very short period. In the course of a year from his joining it, he is liable to be sent to take charge of a sub-division. For the next fifteen years of his career, he is employed in the duties of a Magistrate and Collector.' That is the first part of his career, and the last part is described in these words:—' Without any training in the particular duties of a Civil Judge or *any knowledge of the law by which his proceedings are to be guided*, a man after fifteen or more years' service as Magistrate or Collector, or both, is transferred to the bench and expected to control a number of subordinate Courts, the judges of which may have commenced and continued their judicial career before he entered the service.' It would be impossible to give a complete idea of such a career, says the *Edinburgh Reviewer*, to any one who is not acquainted with the administration, or rather the mal-administration, of justice in India. Suppose, says the writer, a man who had divided fifteen years of his life between the duties of chief constable of a county, a land-agent, a justice of the peace, and a clerk in Somerset House, were to be suddenly placed as a Judge in the Court of Queen's Bench, you would have something of the same kind in England and not more absurd.

" I must not here omit to refer to a letter addressed nearly fifty years ago by Mr. Howard, Director of Public Instruction of Bombay, to the Government of that province, in which he said ' The time is fast approaching when lawyers trained in this country will be procurable in such numbers, and possessed of such professional attainments and practical experience, as to constitute a formidable body of rivals to the untrained Judges of the Civil Service. I am well aware that many members of the Civil Service believe that a Judge in this country need have no law; that "common sense" is enough for him illuminated by practice and a knowledge of the people. To this it would certainly be replied, with unanswerable force, that the question is not between knowledge of the law on the one hand and practical experience on the other, but between law and no law, practical knowledge being equal on both sides. The question then will present itself before many years.—' Can Government exclude from the highest judicial offices the only men who are especially educated and competent to fill them? And if the answer is in the negative, the result will sooner or later be to give natives a monopoly of the Judicial Bench.'

" If Mr. Howard had belonged to the household of bureaucracy, he would not have been filled with these misgivings. The existing order of things may not be altered according to their law, which altereth not. They may be convinced, but they will not be persuaded; mere routine and prescription, if I may venture to say so without offence, playing a large part in moulding their opinions; for the dyer's hand is subdued to what it works in. But the minds of men are widened with the process of the suns and I am not without hope that the reforms which I am advocating will be carried out in due time. I say, due time, for I have no hope of taking by storm the stronghold of officialdom. I know too that reform is always slow-footed, and nowhere more so than in India. But I have no hesitation in saying that the time has now arrived when the civil judicial work in the more advanced provinces may and ought to be entrusted to Indian agency. I should add that since Mr. Justice Loch wrote, and the *Edinburgh Reviewer* exposed the absurdity of the whole system, things have grown very much worse. For we now find boy-magistrates, as they are sometimes called by an irreverent public, of only seven or eight years' standing, promoted to the bench of the District Court. On the other hand, the universities are annually sending forth a large number of lawyers with the best legal training. The evil, therefore, instead of being on the wane, is constantly on the increase, and any delay in reforming the system would only lead to the contrast between the Judges of the Civil Service and the trained lawyers being more and more marked. Surely, surely this is a grave scandal which ought not to be any longer tolerated, though its removal may trench on the vested interests of the Indian Civil Service.

[*Dr. Rashbehary Ghose.*]

"Again, the work of administration is gradually assuming such vast proportions that if the country is to be better governed, Indian agency must be more and more largely employed as we cannot sustain the cost of importing our public servants from England, except under absolute necessity. The admission of one or two Indians annually to the Covenanted Civil Service will not solve the problem, nor the promotion of a few men to the Provincial Service. It is no longer a question of generosity or even of justice but, as many distinguished Englishmen have said, an absolute financial necessity. This may be said to be a truism, but the enunciation even of truisms is sometimes not altogether unprofitable.

"Both economy and increased efficiency therefore call for the change for which I am pleading. It is also demanded by other and perhaps higher considerations. A new movement, my Lord, is in progress which threatens to sweep aside the moderate party who are described as dark Feringees whose sole ambition is to please their English masters. It is no secret that our young men, not merely in Bengal but also in the other provinces, not merely Hindus but also Muhammadans, are drifting further and further away from that party to which I have the honour to belong, and which they charge with having fallen under the spell of 'political hypocrisy' and 'transparent subterfuges,' utterly unable to withstand the subtle arts of those 'who would keep the word of promise to the ear and break it to the heart.' In the bitterness of their hearts they forget all that they owe to Government, British peace and British order, British freedom of speech and British freedom of public meeting. They forget too that if the dead bones have begun to stir, it is English science and English literature that have breathed the breath of life into them. But these men who claim to be the very salt of India can find nothing good in a foreign Government and are continually mourning over the destruction of their arts and their industries, their exclusion from their legitimate share in the management of their own affairs, their physical as well as political enervation, their poverty and what they call their more than Egyptian bondage.

"I do not mean to hold this out as a threat; for I know the English character too well to imagine that our rulers would make any concession to groundless disaffection. I mention it only to induce them to look facts in the face. My Lord, men whose minds have been nourished on the strong meat of English history and of English literature cannot long be refused a proper share in the administration of their own country. Here is an opportunity of redeeming the pledge given by Parliament in 1833 and repeated in the Queen's Proclamation, which lays down the principle that the people of India have a right to share with their fellow English subjects, according to their capacity for the task, in the administration of the country, a principle which has since been repeatedly affirmed by the Government of India. Those who are jealous of the honour of England and feel any stain on her good name as a wound—and we as her adopted children can claim to be among them—must keenly desire that these promises should not remain a dead letter.

"In the name, therefore, of economy, in the name of increased efficiency, by the solemn pledges given by the Parliament of Great Britain, by that Proclamation which is at once our trust and our charter, the Proclamation of the good Queen whose name will be cherished by us longer than the most enduring hall in marble or effigy in bronze, I invite, I implore, I beseech Your Excellency to throw open the judicial service to trained lawyers in India, and thus satisfy in some measure our legitimate aspirations.

"I have already given so much good advice to Government that I feel some hesitation in giving more. But our rulers are civilised men, and I am not likely to come to any harm if I venture to add that the income-tax, although an essentially equitable tax as falling on those who are best able to bear the burden, is in one respect open to objection. The incidence of the tax is the same whether the income is precarious—as, for instance, professional income—or permanent, earned or unearned.

"My Lord, I began by thanking Government for the reduction of the salt-duty, and I will conclude by expressing our deep gratitude for the grant of 303 lakhs for

[*Dr. Rashbehary Ghose ; Tikka Sahib of Nabha.*]

the encouragement of education as well as the promise which is held out of free primary education. What the country wants is a network of schools for primary as well as secondary education, and above all the very highest kind of technical education ; for the industrial development of the country with its vast resources is the problem of problems of the present day. We know how difficult it is to build up an industry without protection. But to ask for protection for our nascent industries would be to cry for the moon. We cannot regulate our tariffs ; we can only suggest and implore. And this is the real secret of the strength of the Swadeshi movement. We know that the industrial supremacy of England was first established under a policy of strict protection which had such a disastrous effect on our own industries. We know, too, how Germany and the United States have prospered under a similar policy. The Government of India have expressed their sympathy with the Swadeshi movement. If they cannot show their sympathy by abolishing the excise-duties on our cotton manufactures, let them show it by endowing a central polytechnic college on the model, I will not say of the institutions which have been established in the United States or in European countries, but on those which have been established in Japan. But though we want more than Government are now in a position to give us, I repeat we are deeply thankful for the liberal provision made in the Budget for the wider diffusion of education. And here let me congratulate the Hon'ble Finance Minister on the Budget he has been able to lay before us. If it is true that 'a sorrow's crown of sorrows' is remembering happier things, it is equally true that a joy's crown of joys is the memory of unhappier times. And I remember the dark days when, owing to the financial situation of the Government, the construction of important public works had to be suspended, when all branches of the administration were starved, and when even the cry of the military authorities, 'Give, give,' not unfrequently met with a blunt refusal. And I also remember how that good man Sir James Westland struggled manfully against adversity, and that the only redeeming feature in his Budget was the grant of exchange compensation allowance, against which, however, I had the hardness of heart to protest in the interest of the not very lightly taxed people of this country.

"I have now, my Lord, come to an end. I trust in the few remarks which I have ventured on the Budget I have not shown a censorious spirit. If I have not extenuated anything or played the rôle of an indiscriminate panegyrist, an easy rôle to play, no one can say that I have deliberately set down aught in malice. Perfect impartiality, we all know, cannot be expected from any man, not even from an official bronzed by fifty Indian summers. But one thing I may claim for myself without boasting, and that is honesty of purpose—an honesty of purpose which is perfectly compatible as well with fidelity to Government as with fidelity to the best interests of India, our mother-land, a land of which we have every reason to be proud."

The Hon'ble TIKKA SAHIB RIPUDAMAN SINGH OF NABHA said :—"My Lord, I heartily congratulate my Hon'ble Colleague the Financial Member on the satisfactory budget which he presented to the Council this day last week. It is a matter of sincere pleasure that the present Financial year has closed with a large surplus in excess of the budget estimate of the last year.

"For the third year in succession the Hon'ble Member has been able to announce a reduction of the salt-tax to Re 1 a maund throughout the whole of India. This measure is estimated to cause a loss of 190 lakhs of rupees in 1907-08, but we sincerely hope that this loss to the State Treasury will be more than repaid by the increase in consumption of salt, as has proved to be the case on past occasions whenever tax was reduced in this direction.

"The reduction in the postal charges and the raising of the weight of articles carried by post will be welcomed by the educated class of people in this country, who will be benefited by this change.

"The grant of 22½ lakhs of rupees to Local Governments for Police reform will be considered satisfactory on all hands, and it is hoped that the reforms advocated by the Police Commission will be thoroughly carried out.

[Tikka Sahib of Nabha.]

"The recasting of the system of Famine Relief is a measure that will enable Local Governments to meet this calamity—wherever it unfortunately befalls the country—with greater energy and better equipment.

"My Lord, as a Sikh I naturally feel inclined to think first about the defence of my country, and I beg to be allowed to offer a few observations on the subject. It is a matter of satisfaction that our army has of late been brought to a higher standard of efficiency and placed on a more secure footing, so that our forces are now ready to take the field at a moment's notice. But, my Lord, I am afraid that even now they are not adequate to meet all emergencies, and for that reason I would beg leave to say a few words.

"It is true that even in Europe people are now thinking of reducing armaments, and conferences are held at the Hague to promote universal peace; thinkers like Tolstoi preach to us non-resistance to evil by violence as the only means of securing national peace and prosperity; but I beg to submit that in my humble opinion all these things sound well only in theory, but cannot be brought within the range of practical politics. In my opinion, the best guarantee of peace is not passive resistance, but armed force, and so it is not only necessary, but imperative, that our army should be strong enough, both for offensive and defensive purposes. My Lord, I am not going to suggest that our regular army should be increased. I am rather of opinion that mercenary troops alone cannot be relied upon in a moment of grave danger to defend the interests of a great country. Therefore I beg leave to suggest that a scheme should be worked out to create a national militia and large reserve force ready to serve with the regular troops whenever required. I don't mean to say that a large proportion of the population should be armed: all that I suggest is that a larger number of able-bodied young men should receive military training and form a reserve force. We gratefully acknowledge the great boon of education, the security of life and property, and other great benefits conferred on the people of India by the British Government; but, my Lord, it would be a matter of deep regret and disappointment to the well-wishers of the country if the people deteriorate in physical strength and the martial instincts of the warlike races of India are allowed to die out. I am sorry to confess that with the spread of civilization people are to a great extent, losing their energy, activity, and manly habits; their love of luxury is making them more and more effeminate. I know, my Lord, that the problem is difficult of solution; but as it has to be faced, some practical steps should be taken in this direction, though nothing need be done in a hurry. It would not be perhaps advisable to begin with the scheme on a large scale, and hence I beg leave to suggest that in the beginning an experiment should be made in the Punjab, and it can be extended to other Provinces of India when it proves successful, as I believe it will if properly carried out. This will serve many other purposes also. First, the difficulty of recruiting for the regular army will disappear, as trained men from this reserve shall always be available for the regular army. Secondly, this force will serve as a reserve and, in the time of war, will be available to fill the vacancies in the Indian Army caused by losses of war. Thirdly, these forces will be always at hand for independent action. And thus we shall have at our disposal a body of fine men at a comparatively small cost. I am not going to present a cut-and-dried scheme in this matter—that should be and must be left to the Military experts to work out. I have merely expressed the thoughts which have occurred to me. My Lord, I don't know in what light the Council will take these suggestions of mine, but for my own part I assure you that they are coming from the heart of one whose sole aim is the stability of the British Raj in India, and the prosperity and security of his own country. Lord Curzon in one of his speeches spoke of the Punjab as 'the home of a race that produces not merely men but heroes,' and these words of Lord Curzon will justify my suggesting that the experiment should be first tried in the Punjab. Moreover, the loyalty of the Sikhs is a proved fact. Their devotion to the British Raj is formed on the well-known prophecy of their ninth Guru, and so they consider their interests as one with those of the English Government.

[Tikka Sahib of Nabha.]

" My Lord, I must acknowledge here with deep gratitude on behalf of the Sikhs the kind and sympathetic treatment which they have always received at the hands of the Government, and more especially the deep interest recently shown by Government for their intellectual advancement by promoting and patronizing the spread of education among them. In this respect our best and warmest thanks are due to the Hon'ble Sir Charles Rivaz, who did all that he could to put the Khalsa College on a firmer and more secure basis than it had been before.

" I wish to God that the day may never come when the Sikhs grow incapable of wielding their swords for their beloved Emperor and country and become so void of martial spirit as to bring shame on their past history. For this end, side by side with mental training, physical and military instruction are necessary. One is just as important and essential as the other, and it is to meet this end that I venture to suggest that each able-bodied Sikh youth should receive military training. I cannot do better than to conclude my remarks on this subject, by quoting the words of Your Excellency's predecessor, who said in reply to a Sikh deputation at Lahore as follows:—

' I am pleased to learn that the Khalsa College, which was founded in the time of Sir James Lyall, has already attained to a high standard of excellence, and I hope that it may continue to receive the active support of the Sikh Princes of the Punjab, *and may turn out a number of young men, who, like Lord Lawrence in the famous statue which stands in this city, may be competent to wield the pen, at the same time that their hand rests confidently upon the hilt of the sword.*'

" My Lord, now I shall pass on to another subject, I mean the Imperial Service Troops. From the Statement which was laid on the Council table in reply to my question, it appears that 23 States in all keep these troops. To any one who is a true patriot, and more especially to the Indian Princes, nothing can be more pleasant and honourable than being associated with the defence of their country and their homes; but, my Lord, if I am not mistaken, the burden seems to me not to be equally divided among them in this respect. I have appended a statement* which will show that the annual cost of upkeep of these troops against the annual income of each State is not uniform, but varies from 1 per cent. to 14 per cent. It is true that these troops are the result of voluntary offers of Indian Princes, but I cannot help thinking why the Government, in view of their other pressing requirements, should not consider it proper and advisable that a rule should be laid down in this matter, in order that every one of them should bear an equal share of the burden in proportion to their respective resources. The expenditure of the State for the upkeep of its Imperial Troops, in my humble opinion, should not exceed 5 per cent. on its annual net income, which will be found adequate for all such purposes. My Lord, it is hoped that 'the sound principles that were formulated in the first place by Lord Dufferin and Lord Lansdowne more than fifteen years ago' at the time of formation of these troops, the principles which 'are essential to its vitality' will be ever adhered to, and that these troops will 'not be swept into the Indian Army, or treated as though they were the mercenaries of the Crown.' These are the words of Lord Curzon; for my part I can only say that whenever the occasion arises not only these Imperial Troops but every available resource of each State will be at the disposal of the Government.

" My Lord, I want to say a few words about the Imperial Cadet Corps. When this Corps was formed great hopes were entertained. It was thought that a move had been made in the right direction, that the most honourable military posts had been thrown open to the young noblemen of this country, that the Government had done well in thus taking the people into their confidence, and, what was above all, Your Excellency's illustrious predecessor assured us more than once that all the cadets who passed the required examinations would be given commissions in the Indian Army. This was surely a statesmanlike step which Lord Curzon took to solve a pressing problem of the day. Let us hope that this Corps will not only remain as an ornament to the Indian Army, to add to the brilliancy of processions on State occasions, but will also fulfil the real object for which it was formed by the late Viceroy.

*Vide Appendix C.

[*Tikka Sahib of Nabha.*]

"My Lord, before I pass on to other subjects, I consider it my duty to draw the attention of the Government to the constitution and privileges of the Legislative Council of the Punjab, the Province which I have the honour to belong to and represent on this Supreme Council.

"Now that the question of the reform of Indian Legislative Councils is under the consideration of the Government of India, I cannot let the opportunity pass without praying that the rights and privileges now enjoyed by the Legislative Council of the United Provinces of Agra and Oudh may be extended to the Punjab. The Punjab cannot be considered in any way less advanced or less intelligent than its sister and neighbouring province.

"My Lord, I cannot help drawing your attention to the social condition of my country, and a few words about it will not perhaps be considered out of place. I am sure that when I plead for the rights of women of India I will not plead in vain. I know that the Government cannot directly do much in the matter of certain social reforms, but, my Lord, in my humble opinion, it is social backwardness which has helped and is still helping to check the progress of India to a great extent. The caste system, the neglected condition and ignorance of women, the early marriages, etc., all these things combined are doing more mischief than anything else to the country and its people.

"It is true that with the spread of Western education people have realised the uselessness and absurdity of some of the old and deep-rooted customs, and have begun to improve gradually, and the people of the educated class mix with each other now more freely than before on social occasions. But may I be permitted to point out that centuries before the spread of Western education great teachers of India, like Guru Nanak, realised and not only preached—in those days of great religious intolerance, when people used to be persecuted for telling the truth—but took practical steps to abolish the caste system of India, to raise the status of women equal to that of men, along with many other things.

"My Lord, in the matter of education our women are still left far behind. It is the mother who first moulds the character of her children. Female education is of as vital importance as the education of boys. One of the difficulties which stood in the way of this reform was the apathy of the people shown towards it. The purdah system also unfortunately stood in its way. It is a good sign that people are now beginning to feel the necessity of this reform. Whenever the Government or the liberality of some private person starts an institution for the education of girls, it is welcomed on all hands and people are now ready to take advantage of this boon. The Punjab offers a very good field for this reform, where the purdah system is not so strictly observed as in some other provinces, and where the people are free from many prejudices. An adequate sum out of the educational budget should be appropriated to promote the education of women which must bear a reasonable proportion to that which is spent for the education of boys. Unless we take up this question earnestly in hand I am afraid every other effort done to improve the condition of the people will be fruitless. It is a pleasure to see that a proper move has been made in this direction in the Punjab, and the proposal to establish a girls' school at Lahore is now engaging the attention of the Government; and we have once more to thank Sir Charles Rivaz, whose interest in the education of girls has enabled the Punjabis to form a scheme for the establishment of a good school for girls which has received the support of all classes. The provision of 304 lakhs of rupees in the budget for education—the highest ever yet made—is very encouraging, and free primary education, for which hopes are held out, will prove a great boon to many poor students who could not avail themselves of the benefit of education of even this standard owing to the scanty means of their parents.

"My Lord, the curriculum of our schools requires to be carefully revised. The things which merely tax the memory of the students without awakening their curiosity and training their faculties of reasoning and observation should be avoided. The system of examinations should be made more elastic than it is at present, and students should be allowed to pass examinations by compartments.

[*Tikka Sahib of Nabha.*]

" My Lord, as it is the duty of the Government to look to the education of the country, so it is their duty to look to its moral well-being. Under this head I beg to draw your attention to an important matter which requires early reform. The endowed institutions of this country play a great part in influencing the minds of the people and creating higher or lower standards of morality among them. These institutions were endowed by the donors for charitable and educational purposes, and it is a sad thing to see these institutions changed now into dens of vice. Their funds have become the private property of the priests of the temples and such like folk, who have no moral right to them. As long as these institutions remained in the hands of able and virtuous persons they proved a blessing to the people of the country, and served as fountains of knowledge and havens of rest for the poor, but now the same institutions, which have come under the control of worthless, immoral and selfish people, are proving a veritable curse to the country. It would be a great boon to the country if the Government would take up the matter of the reform of these endowments, and it would only be just to devote these endowments to educational and charitable purposes. If such a drastic measure seems to be impracticable for the present, then I would suggest that the people in charge of these institutions should be compelled to spend considerable portions from their income for the purposes for which they were intended.

" My Lord, there is another important matter to which I would like to draw the attention of the Government, *i.e.*, the question of intoxicating drugs. I need not dwell here at length on the bad and demoralizing effects produced by their use. Many murders, other crimes, insolvencies and other disasters can be traced to intemperate habits. Many good families and happy homes we see are every day brought to ruin by addiction to intoxicating drugs. There is no doubt that Temperance Associations are doing useful and good work in this country to root out the evil habit, but still a great deal remains to be done which cannot be accomplished without the co-operation and help of the Government.

" Some time ago Government very wisely took practical steps to check the habit of cocaine-eating amongst the people of this country which was very rapidly spreading. Something of the sort is desirable in the case of opium and country liquor. Their use should be checked by passing some preventative enactment and by raising their prices so high that they may not be within easy reach of men of ordinary means, and also their use should be allowed only at the advice of medical men as is the case with other poisons now. My Lord, I am doubtful that until some drastic measures are taken we will be able to root out this evil habit from the country. I have read in the budget with much satisfaction that orders have been issued to reduce the cultivation of opium in the ensuing year. This step has been taken in a right direction. I know that opium and excise duties are two great sources of revenue to the Government, but I may be allowed to remark that this revenue is collected at the expense of the cause of morality. There was a time when the consideration of the loss of revenue that was derived from these sources was a great impediment to their abolition. Fortunately now our financial position is prosperous, and the remarks of the Financial Member in this matter are very encouraging and it would be better for me to quote them here :—

' Twenty years ago or even less, the prospect of losing a revenue of 5½ crores a year would have been a cause of very grave anxiety. Even now, if the whole or a great part of the revenue should be struck off at a blow, the dislocation of our finances would be serious, and might necessitate recourse to increase of taxation. But if, as we have a clear right to expect, the transition is effected with a due regard to our convenience, and is spread over a suitable term of years, the consequences may be faced, if not with equanimity, at least without apprehension.'

" My Lord, if the Government are prepared to meet the loss in the opium-revenue when it is inevitable, it would be still more generous and noble if we check and suppress the bad habit of opium eating that is taking hold of the Indian population and demoralising it.

" My Lord, the third class passengers in this country suffer great inconvenience in the railway journey. We see them frequently struggling for a seat in the already overcrowded compartments, where they are thrust

[*Tikka Sahib of Nabha ; Mr. Sim.*]

without any regard to the authorised number of passengers allowed to travel in a compartment. Again, the sheds at the stations which are provided for third class passengers as waiting rooms afford no shelter against sun or the inclemencies of the weather. There are no latrines attached to the third class carriages, and the sufferings of the passengers can be easily imagined. If they go to the latrines at the stations, they are often left behind, and thus they experience a great deal of hardship. They are treated very badly and their condition is very deplorable indeed if they happen to travel by rail at the time of large gatherings held at several places in connection with the religious festivals. On such occasions they are not treated like human beings, but are huddled together as if they had no feelings. It is an awful sight to see them loaded in goods wagons with no proper ventilation at all. Several of them fall victim to diseases for want of pure air, while others carry germs of diseases, which play havoc in such gatherings. My Lord, now as the Railway Board have made a provision of 568 lakhs of rupees for rolling stock for the year 1907-08, it is most desirable in the interests of humanity and justice that the inconveniences of the third class passengers should not be lost sight of, who contribute so largely to swell the railway surplus every year.

"It is gratifying to see that some useful changes have been made in the form of railway accounts from this year to show the net revenue. The old system used to inflate unduly the accounts and suggest misleading comparisons. It is also pleasing to note that the orders are issued by the Railway Board for the adoption on all railways in India of the type of communication between the passengers and guard now in general use in England—a thing which was urgently required in the interests of the safety of the travelling public of this country."

The Hon'ble MR. SIM said :—"My Lord, may I congratulate the Government on the continuing prosperity and gratefully acknowledge the uses to which it has been put? By us in Madras, which is still in the main a country of small land owners and small incomes, the striking series of measures, calculated to help the agriculturist and the poorer classes, set out in paragraph 36 of the Financial Statement, will be heartily appreciated.

"The reduction in the *Salt-tax*—a reduction which the Hon'ble the Finance Member shows does reach the consumer—will be welcomed; so will the new and liberal contribution from Imperial funds for *Famine Relief*; the improvement in the pay of *Forest-officers* is a well-deserved concession to a hard-worked service; *Free Primary Education*, in sight, will be a boon to Madras, where education is so much in demand; *Police reform* is as much needed there as elsewhere; the loss of the *Opium* trade, a dead loss to India, as the Finance Member points out, of 5½ crores, will be less welcome; but the Indian taxpayer, on whom it will fall, has confidence the British and Indian Governments will make no sacrifice of India's interests without corresponding sacrifice on the part of China. The Hon'ble Member's summary in paragraphs 66 and 67 and Mr. Meyer's Memorandum on *Military Finance* show effective control of and good value for the expenditure under that head.

"Grateful as we are, however, for these measures, may we still ask for more; and first, for an increase in the proposed contribution from Imperial Funds for *Famine Relief*? The Hon'ble Member proposes to give Bombay and the Central Provinces more than five times as much as Madras; the United Provinces are to get nearly twice as much; even Bengal receives more than Madras. It is hard to believe that this represents the real condition of things and that the other Provinces are so much more liable to famine than Madras, as these proposals would suggest: they may have spent more, but some Governments are more liberal than others, and, in any case, the period chosen for the calculation greatly affects the result; a period of thirty, instead of twenty-five, years, for instance, would have included the great Madras famine of 1876-77, and added considerably to the famine expenditure there. As I have said, the hearty thanks of all are due to the Hon'ble Member for his present proposals, but if opportunity should arise for increasing the contribution to Madras I trust that he will take it.

[*Mr. Sim ; Mr. Reynolds.*]

"As quite relevant to such a request the Hon'ble the Finance Member will no doubt remember the words in which last year he described the Provincial Settlement made with the United Provinces—words which, he said, applied equally to the Provincial Settlement made with Madras: 'It is quite true,' he said, 'that as a whole the Provincial Settlement is distinctly less favourable than that of any other Local Government, conspicuously so as compared with those of Bombay, the Punjab and the Central Provinces.' I trust that the Hon'ble Member will consider that a 'distinctly less favourable' Provincial Settlement combined with a 'distinctly less favourable' Famine Relief grant constitute very strong grounds for the amendment of one or the other at an early date.

"A second point, also connected with Famine protection, is the provision of funds for new *Irrigation*. The inducement to prefer works that will pay 10 per cent. to works that will pay little or nothing is obvious, but if credit is taken in the account for famine relief saved and human suffering averted the difference is not so great as appears at first sight. The Government of India has not been illiberal in dealing with Madras irrigation in the past: I ask for a continuance of the same consideration in the future.

"A third point—also, in the opinion of many, connected with Famine protection—is money for *Forest* establishment and works. Much of our reserved area in Madras lies in tracts of precarious rainfall, in scattered blocks and near cultivation: regrowth on such areas is particularly necessary, and particularly difficult; a sufficient staff and a generous outlay on works are essential. If proposals to this end should reach the Government of India, I trust they will be sanctioned. They are much needed, and to stint either is to give both Government and the public the maximum of inconvenience with the minimum of benefit.

"We are not without other needs, also. In time, we trust, the hour and the money will come for them, too, but we recognise the limitations of the year and all that has already been done. Nowhere, indeed more than in Madras, will there be a more cordial appreciation of the efforts which have been made by the present Finance Member and his predecessor during the past five years to simplify, reduce and rearrange the taxation of the country or of the success which has attended those efforts. We trust that the prosperous years may continue, and with them, with continuing success, this policy of financial organisation on similar lines."

The Hon'ble MR. REYNOLDS said:—"My Lord, this time last year we in the United Provinces were suffering in parts from the effects of the failure of the rains in the previous monsoon. These were the more serious as they had followed immediately on the widespread damage caused to the previous spring crop by the frost of 1905. The financial situation at that time was the cause of much anxiety, for we anticipated that the Provincial balances would be depleted by nearly 28 lakhs, and that we should end the year with 14 lakhs less than our minimum balance. Fortunately the rains last June set in in the most timely manner, and though they closed rather prematurely, yet the autumn crops were on the whole good. Over the greater part of the country too the present spring crops promise well, though they have been damaged to some extent by hail, and to a greater degree by rust.

"The fears of a further large expenditure on famine relief which hung over us this time last year have vanished, and thanks to Your Excellency's liberality the burden of debt due to the amount that had to be spent on famine relief has been removed. That expenditure has been approximately 28 lakhs, and had we been forced to meet it from our own resources, we should have been nearly bankrupt. Your Excellency's liberality in taking this expenditure as an Imperial charge, and in starting a scheme of famine insurance to meet such contingencies in future, has relieved the Local Government of much anxiety.

"I have only one criticism to make with regard to this scheme. Last year we had a minor famine extending over parts of two Divisions only and lasting for about a year, and yet we spent a little over 28 lakhs in famine relief. The maximum therefore of 30 lakhs fixed for the United Provinces will clearly be quite

[*Mr. Reynolds.*]

insufficient in case of a serious famine extending, as in 1896, over every part except that protected by canal irrigation, and will be dangerously small even in 'a year of moderately severe famine.'

"In spite, however, of the relief afforded to our Provincial finances, I am bound to point out that they might well be in a more satisfactory condition. When the quasi-permanent financial contract was drawn up in 1904, it was expected that the heads of income made over to the Provincial Government would be sufficiently elastic to meet the growing wants of the Province. Unfortunately practical experience shows that this is far from being the case, and our financial arrangements are to a certain extent still further hampered owing to the fact that in the present year 16 per cent. of our income is, and in the coming, year 13 per cent. will be, derived from fixed duties incapable of any expansion while practically our whole expenditure is progressive.

"In the first two years of our existing contract the expenditure exceeded the income. In the present year, thanks to a larger opening balance, to the help given by Your Excellency's Government, and the abnormally high receipts from irrigation, the revised estimates show the satisfactory surplus of 62 lakhs instead of the 6 lakhs originally estimated. Our budget for the ensuing year, however, shows a probable expenditure of nearly 5 lakhs in excess of our income.

"I would briefly call your attention, my Lord, to what our more pressing wants are.

"In addressing this Council last year my predecessor pointed out that the immediate needs of the Provinces were better housing for the subordinate police, increased expenditure on education, and aid to the Municipalities to enable them to carry out sanitary reforms. On looking at the last published Finance and Revenue Accounts, namely, those for the year 1905-06, I find that in the United Provinces the total expenditure on education amounted to Rs 37,05,689, or Rs 78 per thousand of population. In only one other Province was the expenditure per head so low, while in one it was nearly three times as much. For the coming year the expenditure will be raised to nearly 47 lakhs, or Rs 99 per thousand, which is an improvement but still far below our wants.

"Under the heading of Medical, again, the expenditure was Rs 17,55,445, or only Rs 36 per thousand, and in no other Province throughout India was the allotment for this purpose so low in proportion to the population. The allotment for the ensuing year is 19½ lakhs, but more could well be spent on the improvement of the existing institutions and, in addition, the new Medical College at Lucknow will require much assistance from Government to equip and maintain it.

"For public works more money is needed for the housing of the subordinate executive and police staff, and for the enlarging of the District and Tahsili offices, nearly all of which are now terribly cramped, and afford nothing like enough space for the growing staff which the annual increase of work in all departments necessitates.

"We want therefore more money for public works, for education, and for hospitals, and there can be no doubt that municipal needs are growing every year, while the limit of taxation has been nearly reached and the borrowing powers of several Municipalities are all but exhausted.

"Seven Municipalities have improvement schemes, costing between one and two lakhs each, for which they expect to provide or borrow the necessary funds, but other important centres such as Agra, Benares, Allahabad and Lucknow will require very material assistance to enable them to carry out their now urgent projects. If the wants of these and other important Municipalities are to be met, it is becoming clearer every year that the Provincial Government will in some way or other have to come to their assistance. Lucknow, for instance, has a drainage project estimated to cost about 12 lakhs, for which it cannot provide funds, and taking the larger Municipalities alone, rough estimates show that half a crore could be usefully spent on drainage and water-supply.

"I need not point out that it is most important that the large pilgrim and commercial centres of the United Provinces should be maintained in good sanitary

[*Mr. Reynolds ; Sir Steyning Edgerley.*]

condition. In past years they have acted as centres whence cholera has spread far and wide over India. Plague is with us now, and until city sanitation is perfected there will always be the risk of similar disasters. The needs of these places are not, I think, a mere local matter, but one of Provincial and even Imperial concern.

"Turning now to local finance, this has been put on a firmer footing, and contracts have been made with each District Board for the next three years. The Boards have definite sums placed at their disposal and can draw up their own budgets.

"Some of these budgets have come before me as Commissioner, and it is to my mind quite clear that in a very short time the local authorities will be imitating the example of the Local Government, and asking for more generous allotments.

"There is, for instance, a loud demand for more money for primary education. School buildings everywhere want enlarging and improving, and boarding houses are required. Railways, again, have been pushed in all directions, and roads at right angles to them now require to be metalled. These are wanted not only as feeder roads to the railways, but they also act as most important distributing agencies in case of famine. One very noticeable feature, for instance, in the prices last year was that in the Muttra District prices were higher in the village bazars than in the large marts at head-quarters. This was simply due to the difficulty experienced in getting the grain from the railways over the deep sandy roads.

"Taking Provincial finance as a whole it seems that, without allowing for any extravagant expenditure in the ensuing year, the budget shows a deficit of 4½ lakhs, and as matters stand at present it will be nearly impossible to meet the ever-growing demands for the purposes I have indicated.

"I have already mentioned the financial result from year to year of our present contract, and the urgent need of its revision has been pressed on the Financial Member. We have received from Your Excellency's Government the assurance of a full consideration of our claims in the near future. It only remains therefore for me now to again press our wants on the Financial Department and to respectfully urge a very early and liberal settlement of our requests."

The Hon'ble SIR STEYNING EDGERLEY said:—"My Lord, I am glad to open what I have to say by expressing the acknowledgments of the Bombay Government in the matter of the settlement of the incidence of famine charges. Provincialisation on fair terms for the future and a frank acceptance of past charges as Imperial, involving, as that decision does, a refund of 12'32 lakhs spent on famine relief since the opening of the currency of the settlement, is a conclusion with which the Local Government is well content. The past ten years have left heavy arrears of public works expenditure to make good in all departments, and the necessity of spending on famine relief so large a sum out of the initial lump grant of the new settlement had been regarded with some dismay.

"The provincialisation of famine responsibilities does not at present extend to famine relief in Political Agencies, but, though they have no share in the small revenue which comes in from such areas, the Bombay Government are prepared to accept responsibility in the future for such charges in the Agencies on the same principles and as part of the general settlement subject to consideration of details. There are in the Bombay Agencies a large number of jurisdictional States which are normally solvent. The Government of India are of course under no liability for actual expenditure in their territories, but the Chiefs may be driven to Government for help in serious and prolonged famine. I presume that, as in the famine just past, the Government of India will always feel it right to help them in such circumstances. If that be so, the Government of India must I think recognise, in working out a scheme, that they occupy towards such States rather the position of bankers than that of strict controllers of famine relief. Capital will have to be available not for expenditure, but for loan in

[*Sir Steyning Edgerley.*]

somewhat larger measure than would be necessary for a strict famine programme in a British district. The Chiefs ought to be dealt with as friends coming to Government to be tided over a period of stress under a full sense of their own responsibilities. They should not, I submit, be subjected to inquisitorial enquiries or to demands for returns, reports, or adoption of British standards of relief. It will be for the Local Government to share the responsibility in this field by seeing that bad debts are not made. Such loans have meant in the recent famine locking up for the time being a capital of rather more than a crore of rupees. Many of the Bombay Chiefs are my personal friends, and I am in a position to know how grateful the Chiefs of Kattiawar and the Guzerat Agencies have been to the Government of India for the help extended to them since 1900. So far as I know at present, the whole of the advances falling into this category will sooner or later be fully recovered. I am glad to notice from paragraph 212 of the statement that repayment is already taking place faster than had been estimated. There will, should such severe and prolonged famine unfortunately recur, be some difficulty in placing so large a sum at the disposal of the Local Government in case of need, and a solution of that problem must be found. The other great difficulty which will need solution is the treatment of relief expenditure in what are known as Thana Circles

" I wish to utilise this opportunity to ask the consideration of the Government of India on behalf of a section of the people of the Presidency who suffered terribly during the recent Guzerat famine, and who are not likely to be able to make themselves heard. The landholders in the Thana Circles are owners of small estates and at no time wealthy. At no time are they able to exercise individually their theoretical rights of magisterial civil or police jurisdiction or to meet other obligations which should naturally devolve on persons of their status. So it has come about that these areas, called Thana Circles, have been formed, that the powers of the petty Talukdars resident in the Thana Circles have been, so to speak, put in commission and are now exercised by the Political Agent and subordinates under his control, while the costs of the joint administration are recovered rateably from the Talukdars concerned. When the calamity of 1899 fell on Kattiawar and Guzerat, the resources and credit of this class of landed gentry were speedily exhausted, and provision had to be made to save the lives not merely of the labourers and other residents in these villages, but of these small Talukdars themselves and their families. The Agents had to act promptly and on their own responsibility, and large amounts were spent on famine relief in these Thana Circles without it being possible to obtain the concurrence or even consult those at whose cost the expenditure was theoretically being undertaken. Nor when once relief works were started was it possible to confine their benefits to the immediate residents of these villages and the dependants of these Talukdars. People flocked to them from outside and some came even from British districts. The result is that when it became possible to turn from the urgent strain of saving life to the necessary counting of the cost, the Talukdars of these areas have been held liable for a debt of some 23 lakhs on which interest is running. I need not weary this Council with details, but I should like to ask the Government of India to recognise that before their aid was invoked the resources of these people were utterly exhausted, and they themselves on the brink of starvation ; that the whole of the debt is in no case fairly chargeable to these petty landholders ; and that, having regard to the history of the Bombay Thana Circle, the principle should be accepted that when famine is so severe in these areas as to render Government relief unavoidable the expenditure should be treated not as loans, but as direct Government famine expenditure. I would therefore ask the Hon'ble Member in charge Finance Department in his own good time to write off past expenditure and, in the meantime, to permit the amount to remain free of charge on account of interest.

" If this request can be granted as to the past, and the principles above indicated can be accepted as to the future, there would, I believe, be no difficulty about extending the system of Provincialisation of future famine expenditure which has been introduced for British territory to the Political Agencies under the Bombay Government.

[*Sir Steyning Edgerley.*]

" I must confess to a little disappointment that the Government of India have not been able to move faster towards what I may perhaps call the settlement figure for police expenditure. The increased cost involved in the proposals of the Police Commission in the Bombay Presidency was estimated in round figures at 26 lakhs. The Commission did not deal either with Aden or with Agency Police, and my recollection at the moment is that the total did not provide fully for Bombay City ; but the Bombay Government cannot omit any of these areas in forming their anticipations of necessary expenditure on reorganisation. It is true that it was not possible to spend on recurring expenditure within those years the whole of the grants made available by the Government of India last year and the year before. It was necessary to obtain the sanction of the Secretary of State to detailed proposals, and that takes time. But when I left Bombay in November last sanctions had been received which enabled the Inspector-General of Police to estimate that in 1907-08 he could work up to an expenditure of some 13 or 14 lakhs out of the total. That will not now be possible. I am afraid the suggestion that balances of previous grants should be utilised to permit of higher recurring expenditure during the coming year will seem very dangerous to the Financial Department of the Local Government unless the Government of India can give some definite forecast of their intentions as to the grant to be made next year. Furthermore a considerable part of the balance has been utilised in Bombay to press on the building of the Central Police Training School which institution is the keystone of the reorganisation and which in view of famine anticipations would otherwise have had to wait. Any of the changes advocated by the Commission which affect large bodies of the subordinate force cost large sums, and I venture to press the view that the grant made available each year should, if possible, be such as to permit these reforms to be pressed through as rapidly as the details can be matured. The efficiency of the Police is a matter which affects the daily life of the whole population.

" There is only one more subject on which I wish to dwell, and that is to suggest that the Government of India can neither reap the full fruits of the semi-permanent financial contracts recently concluded, nor control the ever-increasing cost of Secretariat establishments, whether Imperial or Provincial, without a complete revision of the rules and orders which govern the relations of the Local Government with the Government of India. With the completion of these contracts a position is reached whence considerable progress might be made in the direction of decentralisation.

" I do not propose to dwell on the evils of centralised administration. They are, I think, generally admitted. Nor do I think it fitting that I should in this Council use my official experience to illustrate the progress of the evil in the Indian body politic. I also believe that to be unnecessary, for the Government of India are, I trust, anxious for all devolution of authority which may be found possible within safe limits. I am, however, so impressed by the magnitude of the danger to the wholesome administration of the country, and by the rapidity of the progress of the evil in recent years, that I think it is the bounden duty of any one who has given attention to the subject to offer such suggestions as he thinks practicable for consideration and with a view to promote further discussion of possible remedies. Therefore I venture to press for decided action in the direction of decentralisation, and I would suggest that, if necessary, a strong Committee be appointed to work out a scheme of devolution of financial and other departmental control. In the meantime the following suggestion is, if approved, easy of immediate adoption, and while giving some relief will perhaps help to bring to notice matters requiring more deliberate and formal action. There are at the headquarters of every Local Government financial officers of the Government of India—Accountants-General and Examiners of Public Works Accounts. I suggest, firstly, that all Local Governments should be given discretion themselves to dispose of all particular cases either of infringement by past action of financial rules of control, or indeed of all cases of any kind which do not involve the enunciation of new principles of administration or involve sanction of fresh expenditure beyond the limits imposed from time to time, *provided* that the Accountant-General or the

[*Sir Steyning Edgerley.*]

Examiner concurs in the proposed disposal as reasonable and as being such as his experience shows that the Government of India are likely to sanction ; secondly, that quarterly or six-monthly returns of all such cases should be submitted by the Accountant General or Examiner to the Finance Department of the Government of India. The object of this return is twofold, firstly, to enable the Government of India to check any tendency of which they disapprove without re-opening particular cases in correspondence with the Local Government ; secondly, to lay before them material which will enable them to ascertain without difficulty the rules and orders of control which are found in practice to be uselessly strict. I need not elaborate the suggestion in this place and would content myself with pointing out that with necessary modifications the same system can further be applied with great advantage to the work of all Departments. It is a system which I believe is already in operation as between Secretaries in the Government of India Departments and Members of the Government, and I venture to urge that the Presidency Governments and the Lieutenant-Governors of Provinces may be fully trusted not to abuse a confidence which for years past has been safely entrusted to officers of less-r position. I also venture to submit that directly the decision of the Government of India on any particular case can be so confidently anticipated by a Secretary that he can himself deal with a letter from a Local Government seeking the orders of the Government of India, that fact alone is ample evidence that the rule or order requiring the reference to the Government of India is ripe for cancellation, and I suggest that some system should be inaugurated whereby continual watchfulness for such opportunities of lessening unnecessary correspondence should be maintained.

" In many cases, however, Acts of the Legislature require references for sanction, and for such cases the above proposal is inadequate. As regards this sphere I venture to call attention to Act V, 1868. It is a short Act of three sections which authorises the Bombay Government to delegate to the Commissioner in Sind powers conferred by legislation on Government alone. It has been in force nearly forty years, and I venture to assert that, in spite or, as I should prefer to think, because of the generality of its phraseology, neither in the records of the Government of India nor in those of the Bombay Government is there any established complaint as to its operation. I have been in close touch with the working of the Act for over a quarter of a century, having served since 1881 for nearly eight years in Sind, both as a District Officer and as Assistant to the Commissioner and having since those days held appointments in Bombay which gave me special opportunity of watching the working of the Act. My evidence is that it has been continually used to the great benefit of the people of Sind and with considerable resulting relief to the Sind Administration and the Bombay Secretariat. The Bombay Government have definitely asked for the extension of the provisions of the Act to other Divisions of the Presidency, and I believe that that proposal is still under consideration. I trust it may be approved, but I wish now to make the suggestion that an Act, the same in principle, should be passed by the Government of India for all India whereby the Government of India could delegate to Local Governments and Local Governments to their chief heads of departments down to officials in charge of districts such powers as it may from time to time seem possible and desirable to devolve on lower authorities. It is obvious that when some new legislation is enacted prudence may compel Government to keep the interpretation of its policy in their own hands. Gradually, however, a body of case law grows up, the policy of the Act becomes known and understood, and it becomes desirable to relieve the people of the delays and all offices of the work inherent in references to a central authority which are no longer necessary. If I am told that it is improper to take an indefinite power by legislation, I would ask consideration, firstly, of the concrete experience of Act V, 1868 ; secondly, of the fact that in the published correspondence regarding relief to an overloaded administration in another part of India the Secretary of State drew attention to this Act and suggested that an extension of its provisions might provide a remedy ; and, thirdly, of the history of the Bombay proposals above alluded to which indicates that any other method of procedure would involve

[*Sir Steyning Edgerley; Mr. Chitnavis.*]

constant petty legislation, would be dilatory in the extreme, and would therefore be practically useless for the purpose in view. An instrument of devolution, if it is to be practical, must be flexible so that it may suit conditions in different provinces and must also be easy of use.

"Assuming such an Act to have been passed, I offer a further suggestion for its practical working which incidentally may go some way to disarm the criticism I have above indicated. I have above suggested devolution of executive authority coupled with the submission of certain periodical returns. I would further suggest that all officers of the status of officers in charge of districts and upwards and all non-official Members of Council in the provinces be encouraged to place before the Local Governments any proposals for devolution of authority such as may be suggested to them by their own daily experience. Such of these suggestions as may require higher sanction and as the Local Governments may approve should be sent up to the Government of India. Every November the whole of this material together with any Secretariat departmental notes thereon recorded and also all independent suggestions by offices of the Supreme Government for decentralisation might be collected and be submitted for examination and consideration to a strong Committee of this Council constituted from the representatives of the provinces under such presidency as Your Excellency might direct. Beside formulating conclusions on the material so submitted the Committee should have power themselves to originate suggestions and should examine the Acts of a previous year—say the tenth year previous—with an express instruction to secure the devolution of authority and the relief of the Central and Local Governments wherever the consolidation of the policy of the Act has rendered that course possible. I suggest that the Government of India could act with some confidence at the close of each Calcutta session on the recommendations of such a Committee and that a system would thus be established which would operate year by year almost automatically to counteract and minimise the growing evils of centralisation.

"There is one more possibility in such legislation. In October last, when replying to an influential deputation, Your Excellency said that 'the initial rungs in the ladder of self-government are to be found in the Municipal and District Boards and that it is in that direction we must look for the gradual political education of the people. If the Act which I have suggested were to contain a clause allowing, where thought possible, mixed Committees of officials and non-officials to be associated with Commissioners or heads of districts under such rules of procedure as the Local Government concerned might with the sanction of the Government of India approve, then there would be brought into existence a safe way of tentative and experimental progress towards District or Divisional Councils, not merely advisory, but exercising with ever-increasing finality those powers of control over Municipalities and Local Boards which have been hitherto reserved solely to Government or their officers.

"I must apologise for the length of these remarks and the freedom of suggestion used. I have strictly avoided all illustration and have compressed the presentation of my suggestions as far as I felt able. I cannot hope that I have offered the solution of this difficult problem which will be adopted ultimately, but I shall be more than repaid if I have been able to get the subject taken up seriously and dealt with as the wider experience of those in authority may dictate."

The Hon'ble MR. CHITNAVIS said—"My Lord, I must congratulate the Hon'ble the Finance Minister upon his luminous Financial Statement as also upon his achievements. The remissions granted by Government will be widely appreciated. It is a matter of joy that the Salt-tax has been further reduced. The measure will afford sensible relief to the poorest classes, and will enable them to make a larger allowance of salt to their cattle. The people of the country are therefore under special obligation to Your Excellency for this additional relief in the Salt-tax. The other concession will facilitate mercantile

[*Mr. Chitnavis.*].

correspondence. While I accept the gift in a thankful spirit, I must point out that it will relieve only the commercial classes, and will fail to reach the general body of the people. A reduction in the charge for an ordinary letter weighing half-a-tola from half-an-anna to a-quarter-anna would have conferred a greater boon upon them, and would have evoked a warmer feeling of gratitude among them. And the Hon'ble the Finance Minister knows very well that the suggested reduction in the rates does not necessarily entail a permanent loss of revenue. Revenue of this sort has a recuperative energy in it, and any immediate loss is sure enough amply compensated within a few years by the extra income from the increased volume of correspondence. I trust this point will not be lost sight of in the appropriation of any surplus that a continuance of the existing happy conditions and his singular good fortune may place at the disposal of the Hon'ble Member next year.

"My Lord, the budgetted surpluses both for the current year and the year about to begin are satisfactory so far as they go, but the accounts must induce serious thoughts in the minds of the people. An examination thereof will shew that of the sources of revenue Excise and Stamps are fairly important; and far from being demonstrative of a healthy state, they afford proof, the one of moral degeneracy among the people, and the other of growth of litigation. It would be a nice thing if a sounder source of revenue could be found than Excise. The increase in litigation which must account for the expansion of the Stamp-revenue, must suggest lugubrious thoughts to all who have the well-being of the society at heart. Indeed, the effort of statesmanship has everywhere been to prevent people being bled to death by litigation. British Indian administrators also have been fully alive to the necessity of arresting the growth of litigation. With that object, what are known as 'Conciliation Proceedings' have been introduced into the Central Provinces, and the scheme has worked well. The time has now come for developing this panchayeti system on a much larger scale.

"The Hon'ble Finance Member has himself fully dealt with the disquieting item—Opium. The income from this source may become *nil* at no distant future; and however much the opium policy of the Government of India may appear reprehensible on moral grounds, no Finance Minister can view with equanimity the loss of so much as 5½ crores of rupees a year. The Hon'ble Mr. Baker, with his robust optimism, generated perchance by a succession of prosperous years, hopes to be able to forego this large income without having resort to additional taxation, provided there is no sudden crash. The Indian public respond cheerfully to those hopes; but they go further. In view of the fact that the threatened success of the anti-opium movement will depend upon the policy of the British Government over which this Government has no control, they expect that India will be recouped by the British Exchequer for the inevitable loss of revenue. England has spent money like water in the past for conscience sake; she has spent millions for the emancipation of slaves; will she be unkind on the present occasion to poor India—India that, notwithstanding her phenomenal poverty, unaided, has, on so many occasions, borne burdens that should have fallen upon England's shoulders? At least the people here have a right to expect a money compensation from England for the restoration of financial equilibrium in the country.

"As regards expenditure, I regret so little has been allowed for internal reform. Barring the reorganisation of the Police Force, nothing great has been achieved by Government during the year about to close. Nor is anything great going to be attempted next year. And yet reform is needed in more than one Department. It is high time the question of, what is technically called, the Separation of Judicial and Executive Functions engaged the earnest attention of Government. There is no question about the desirability of the reform. Years ago it was recognised as 'a counsel of perfection' by British Indian administrators. Apparently, nothing could be done so long for want of funds. But, fortunately, financial difficulties have now ceased to disturb the calculations and hamper the operations of Government. Government has been passing through a succession of prosperous years. The time has thus come for the wishes of the people in the matter of the separation of Judicial and Executive Functions to be satisfied.

[*Mr. Chitnavis.*]

We in the Central Provinces were especially backward in this respect until my friend the Hon'ble Mr. Ismay, whose retirement from the Service all people there regret, by a series of wise measures, purified the administration of justice, but he could not overstep the limitations of the administrative machinery. A step has no doubt been taken so far as my Province is concerned, but the larger problem of separation of the functions necessarily remained unsolved. This reform is now considered a necessity all over India by the educated classes, and it behoves Government to take practical steps for its trial. It is doubtful if a well-devised scheme will really entail a large addition to the expenditure. Inexpensive schemes have from time to time been formulated by private individuals, and they are well worth trial. I hope, now that its financial difficulties have disappeared, Government will approach the subject with spirit and determination, and earn the lasting gratitude of the people by carrying out the reform in the near future.

"I am glad Government has at last made a large grant for a matter of Education. The larger grant under this head is matter for congratulation as a sort of pledge for greater liberality henceforward in the support of Education. The grant, by itself, may not go far enough, but it must be hailed with joy by the people as marking a wholesome advance in the policy of Government. It is hoped Government will increase the grant year after year until it reaches the ratio which the educational grants of the most advanced European States bear to per head of population. The promise of the introduction of Free Primary Education is additional matter for congratulation. For the greater encouragement of Education and Vernacular Literature, it will be well to have a system of Literary Pensions or Fellowships similar to those granted to poets and distinguished literary men in England. This will give a stimulus to vernacular literature in the country and create a better class of literary men.

"While I felicitate Government on its Educational grant I cannot but regret the omission from the Financial Statement of all reference to the important subjects of Technical Education and Indian Industries. Financial, even more than political, expediency imposes a duty on this Government to see that the people of India have proper facilities for earning an honest livelihood; and what is more lucrative than the industries and the technical arts? The industries support the nation; hence they are an Imperial concern in every civilised country. Some of the Continental Governments support their industries by a system of bonuses. But not to speak of bonuses, this Government has not yet formulated a comprehensive scheme of Technical and Industrial Education. No progress can be made without expert knowledge, and the sooner provision is made for the diffusion of such knowledge the better it is for both the State and the people. True it is, a beginning has been made in the Central Provinces. A Technical Institute has been established at Nagpur under the fostering care of the Hon'ble Sir Andrew Fraser, whilom Chief Commissioner, and thanks to the efforts of the Hon'ble Sir Frederick Lely a School for Handicrafts has been sanctioned. But these are only beginning. What is needed is an adequate system of Technical Education for the whole country. The introduction of a well-devised and comprehensive scheme of Technical Education, supplemented by a system of Technical Scholarships tenable in foreign countries, is urgently needed. I admit Government has sanctioned a few scholarships but they are practically limited to one branch of industry—mining. The number should be increased, with special regard to other branches of technical and industrial knowledge.

"As for the village industries and handicrafts, proper measures for their maintenance and development should be made by Government after a preliminary survey on the lines suggested last year by the Hon'ble Sir John Hewett. And in this connection I will ask Your Excellency to consider how far fixity of the State demand upon land is likely to encourage the industries. With the rent payable by the cultivator fixed equitably and security given him against enhancements, there will be more of capital in the village, which, in the natural course of events, will support the industries. And as an auxiliary to this measure, Government should devise means to foster in the villager

[*Mr. Chitnavis.*]

a desire to invest his small savings in reproductive works. The establishment of Co-operative Credit Societies has been great step forward; but for the improvement of communication in the interior, it can do much to attract the hoarded wealth of villagers into remunerative channels by guaranteeing metre gauge or light railways. A concrete example will perhaps convince Government of the truth of my remarks. Sometime ago the Hon'ble Mr. Craddock, whose appointment as Chief Commissioner of the Central Provinces has given such genuine satisfaction to the local people as securing to them the rule of a sympathetic Governor who knows them so well and a continuity of policy in the local administration, and for which they are under special obligations to Your Excellency, proposed that a metre gauge line should be run from Nagpur to Pandhurna, and the villagers shewed commendable alacrity in promising to take up shares, provided the railway was guaranteed by Government and worked by one of the established companies. The Bengal-Nagpur Railway Company agreed to work the line, but the venture failed because some other conditions were not fulfilled. It is necessary therefore for Government to guarantee small ventures like this, if only to provide remunerative employment for the locked-up capital of the villagers. I must also point out that, in order to create confidence in the breast of the small Indian capitalist, Government should further assume control over Banks and Firms having Deposit Accounts, periodically audit their accounts, and appraise their assets. The introduction into India of the English laws of Entail and Primogeniture, with the necessary modifications, coupled with a limitation of the Land-revenue to 50 per cent. of the gross collection in consonance with the principles underlying para. 12 of the Resolution No. 1—56-2, dated the 16th January 1902, of this Government, is likewise calculated to be productive of the greatest good to the village economy by encouraging accumulation of wealth in the hands of landlords, and increasing the capital of the country, which, sooner or later, will be utilised for industrial development.

"There is another point to be seriously considered in this connection: The countervailing Excise-duty on cotton goods manufactured in India, imposed by an unwilling Government for the satisfaction of the clamant Lancashire manufacturer, has been a clog to the Indian cotton-industry. It has also caused some irritation among the people, who feel that their interests are sacrificed for the convenience of the English producer. On political grounds this feeling should be removed. I trust the present Government is sufficiently courageous to do the right thing by abolishing the duty, which has yielded the small income of 27½ lakhs of rupees in the current year, and is expected to bring in 29 lakhs of rupees next year, in defiance of Lancashire.

"Agricultural industry again is as important to India as manufacturing industry. Government, I am glad, is doing a deal to develop it by the establishment of a special Department, with subordinate Provincial bureaus; but I have some misgiving about the efficacy of counsel only. Here, as in every other matter, example is better than precept. It might be said that the Agricultural College at Pusa and the various Experimental Farms supply the requisite object lessons; but I doubt if a large number of agriculturists have either the will or the opportunity to avail themselves of them. It would be far more helpful to the ordinary agriculturist if Government were to distribute among cultivators of small means through the Co-operative Credit Societies and principal headmen of villages improved mechanical appliances. Once cultivators are convinced of their utility and get acquainted with their manipulation—and the high price of plough cattle and labour is sure to make their usefulness urgently felt—they will form themselves into organisations under the guidance of these Societies and headmen for their importation and adoption in every-day use.

"The question of the supply of plough-cattle has not yet been, I regret, adequately dealt with by Government. It promises to become one of the most difficult questions connected with agricultural improvement in the near future. The price of plough-cattle is going up rapidly and the total stock in the country does not appear to be sufficient. Add to this the depletion of the stock by disease and poisoning, and the impediment to agriculture from want of an adequate supply of cattle will become obvious. Government can do much to

[*Mr. Chitnavis.*]

minimise this difficulty by the exercise of greater vigilance in the matter of cattle-poisoning by the establishment of Veterinary Hospitals at important centres, by providing commons in villages, by reducing grazing-fees in Reserved Forests, and by encouraging cattle-breeding in the country. Government is doing much in this direction, but I hope and trust all this will be done on a more comprehensive scale than is being done at present.

"There is yet another serious difficulty in the way of Indian industrial development. There is a growing dearth of labour at industrial centres, and more than one industry suffers in consequence. Appreciable relief can be afforded by Government in this matter by encouraging emigration of the surplus population of the congested areas into these centres, by checking emigration out of India so long as the internal needs are not fully supplied, and interdicting beggary except in the case of the aged, the infirm, and the disabled. Beggary, as a profession, is on the increase in certain parts of India, and I think the time has come when the strong arm of the law should intervene to arrest its further progress.

"If these subjects are momentous and claim adequate treatment at the hands of Government, there is one other matter which, for its lethal effects and its growing danger to the Commonwealth, has assumed the importance of an Imperial question. Plague, my Lord, is doing havoc among the people year after year; hundreds of thousands of our fellow-countrymen have succumbed to it; like the upas-tree it is overshadowing the whole Peninsula, blotting out from the view gleams of hope and encouragement. I do not think it can be successfully combated by Local Governments; at any rate, their efforts must be largely supplemented by those of the Imperial Government. In this view of the matter, it was the clear duty of this Government to provide money liberally for the extirpation of plague by the opening out of congested areas and rat-killing—the only means experience shews are effective. The Hon'ble Mr. Miller, I may be allowed to express, has however done much to combat the plague in our Province during his term of office, and I take the opportunity of expressing on behalf of the people our great regret at losing such a strong and sympathetic ruler.

"Speaking of the special needs of the Central Provinces, I must gratefully acknowledge the extraordinary grant for Famine Relief. It is a liberal grant and, I am sure, will go a great way to relieve the periodical distress of the Province—a Province which has suffered extremely from famine of late and whose inhabitants still remember with gratitude the great help then given them by Government under the auspices of their Chief Commissioner, Sir Andrew Fraser. The Hon'ble Finance Member must be congratulated upon his ingenious, withal simple, scheme.

"There are, however, other directions, my Lord, in which an Imperial subsidy is needed. Communication is difficult in the Central Provinces, good roads are wanted; hospitals are few and far between; and the needs of Nagpur are equally large and pressing. The City is congested in parts, and, in view of its growing mill population and the factories, a larger number of open spaces are absolutely required for its health and safety. There is also great need for structural improvement. It is desirable to have guest-houses in it for the accommodation of Feudatory Chiefs and Mufassal leaders, interchange of thoughts between whom and the Chief Commissioner is calculated to render administration at once easy and popular. The Provincial Government is alive to the necessities, but the means at its disposal are limited. People therefore look up to Your Excellency's Government for a substantial pecuniary help in each of these directions, and I have every hope they will not be disappointed.

"My Lord, every servant has a right to expect considerate treatment at the hands of his employer. Disappointment breeds discontentment, and discontented servants render at best indifferent service. The interests of both the employer and the employed are thus blended together, and are in a certain manner identical. It is only meet and proper that servants should share in the master's prosperity especially when it is in a large measure due to their devoted service. But I regret that, notwithstanding the fact that a net surplus from the Postal revenue of a trifle less than 16 lakhs of rupees, bating the 11 lakhs of rupees which the fresh

[*Mr. Chitnavis.*]

concession in Postal rates involves, has been budgetted for next year, not a sou has been granted for the relief of the hard-worked, needy underlings whose loyalty and honesty under the most trying circumstances are alike conspicuous. The Hon'ble Mr. Finlay challenged my statement recently that the salaries of Postal employes below the rank of Superintendent and above that of peons were fixed more than thirty years ago. Government at least will admit this much, that the scales of pay in question have not undergone material change during recent years. It will also be admitted, I presume, that prices and wages have appreciably gone up of late. Is it not then just and fair that the poor subordinates should have some consideration shewn them by Government? Your Excellency, with your sympathetic nature, cannot remain irresponsible to the appeals of these officers long, and I feel sure the day is not distant when their case will receive a sympathetic treatment at the hands of Government.

" My Lord, so far I have pleaded for larger expenditure for internal reform and development. The present state of the finance is perhaps not the most propitious for a large additional outlay. The Government, in spite of its large and successive surpluses and its apparent prosperity, is barely paying its way; but the importance and urgency of the reforms suggested and their wholesome influence on the administration and the material and moral progress of the people might well justify, even under present conditions, extravagance, not to speak of unavoidable expenditure. Nevertheless, to remove all cause of complaint and nervousness, I beg to point out that a large amount of cash can be easily made available for expenditure on more ambitious measures of internal reform by the adoption of a more liberal policy in certain directions. The freer association of Indians with the Administration and their larger employment in the Services must prove both economical and politically expedient. The far-sighted policy initiated by Lord Bentinck has been justified by its results, and their excellence demonstrates conclusively the desirability, nay the necessity, of its expansion. I must, however, say that in this respect we are perhaps already ahead of other Provinces in India, as a Commissioner's appointment was lately conferred upon a Parsee gentleman of Berar by the Hon'ble Mr. Miller, and for which the people of the Province no doubt owe an obligation both to Your Excellency and to him.

" The purchase of stores in India and a preferential use by Government of articles made here must conduce to economy and conservation of means. The course is sure to set free annually a large amount of money.

" My Lord, I do not understand why an increasing amount of money should be locked up every year as Gold Standard Reserve. I do not appreciate the principle; I am doubtful about its utility. I do not think it is necessary; nor do I believe that the present satisfactory Exchange is due to it, or that there should be some Reserve by way of insurance against a low and variable Exchange. The present Exchange policy of Government has been determined by its belief in the efficacy of a restricted currency. It has so far succeeded by creating an artificial scarcity of the rupee. The result may also have been partially due to an appreciation in the value of silver, independent of the action of Government. Government has thus the key to the situation. The volume of the currency is dependent upon its will, and if ever Exchange conditions become disquieting in the future, it can give tone to the market by a timely restriction of the currency. If that measure fails, the richest Gold Reserve will fail even more signally. Can hoarded cash alone stop Exchange from falling? How long can Council Bills be withheld? The experiment was tried in the past in vain, until the artificial rupee famine acted as a restorative. Why should it then be necessary for a large amount of money to be funded each year against a contingency which, if it happens at all, will swamp Reserves at the first touch? There is the less justification for this policy when money is wanted for pressing needs in other directions.

" My Lord, I will not say much about military expenditure, but I will say this much, that everywhere within the British Empire next year will be signalled a reduction in the Army and the Military Expenditure. England has got a reduction of £2,000,000, and whole battalions have been abolished in most of the

[*Mr. Chitnavis.*]

Colonies. The Indian Military Expenditure of next year must swallow up the whole of the gross income from so expansive a source as Land-revenue and a million pounds sterling more ! It is stated that there is a decrease in the Budget of half-a-million pounds sterling under this head. The decreased expenditure will still exceed the expenditure of 1905-1906 by over 33 lakhs of rupees !

" However, in view of the fact that large reductions in the Army have been made in the Empire, it may not be considered feasible to effect any reduction here ; but it can well be imagined that the Indian Army will have henceforth extra work thrown on it for the protection of Imperial interests in consequence of the measure ; and, that being so, the British Exchequer ought in common fairness to recoup this Government at least a reasonable portion of the cost of maintenance. Here is a direction, my Lord, in which a large retrenchment in expenditure is possible without detriment to efficiency.

" I must take this opportunity to point out that, as a measure for fostering the martial instincts of the people throughout the length and breadth of the Peninsula, Government ought to extend the area of recruitment for the Army. Whole tracts are now marked off and whole classes branded as unfit. I do not know what justification there is for this sweeping denunciation. Prudence requires that the people rejected as disqualified should be given a fair trial.

" My Lord, the loans of recent years must be a puzzle to many. We have them simultaneously with surpluses justifying reduction in taxation. The National Debt increases with national prosperity as disclosed in Prosperity Budgets. That is a position which is more or less of an enigma. The Railways are clearly responsible for these loans. The Hon'ble Mr. Baker observes that Railways in India are constructed from loan funds. Loans become therefore necessary for the expansion of Railways. We have for the next year a modest estimate of a sterling loan of £3,500,000 and a rupee loan of £2,000,000 ; and this moderation in the estimate has been forced upon the Government by the state of the Money Market both here and in England. But, as it is, the Estimate is bad enough, judged by the loss it will entail. The loans would strike one as objectionable and impolitic, assuming that the policy of Government in making Railways a State concern and of providing for them from loan funds is wrong. But of this more later on. Meanwhile, I will only point out that, apart from their undesirability on principle, the budgetted loans will prove commercially unproductive. They cannot possibly yield the full amount, and there is bound to be a heavy deficit which will have to be made good from other sources, possibly from the cash balances. Our present loss will be half-a-crore of rupees. The last sterling loan was floated at an average rate of £94 16s. 5d. against the rate of £97 18s. 6d. obtained in the previous year. There has since then been a further drop in the market rate of the 3 per cent. India Sterling Stock, and according to the Budget it stands now at £90. Unless, therefore, the stringency in the market is suddenly relaxed, money becomes plentiful, and the rate improves considerably, for which contingency there is not much prospect at present. The accepted rate of tender should be less than £90 ; at any rate, it cannot very much exceed that figure. But suppose the rate improves, and the loan is successfully floated on the market at £93 ; even then the loss in present value upon the sterling loan will be £245,000, besides an annual loss in interest upon this sum of £7,350. The loss in present value upon the rupee loan of Rs. 3,00,00,000 will be Rs. 9,00,000, allowing for a discount of 3 per cent., besides a loss in interest of Rs. 31,500 a year. That is, upon the two loans our immediate loss will be Rs. 45,75,000, plus a recurring loss of Rs. 1,41,750 a year ! And this present loss must be made good from the cash balances, which will be depleted to that extent.

" The capital charge for Railways at end of the present year is estimated at £260,356,500. The net surplus budgetted for 1907-1908 is £2,149,700, or less than one per cent. upon this capital. This would hardly be considered sufficient from a commercial point of view. The enterprise is of problematical value. But whether profitable or unprofitable, in my opinion, Railways should be constructed, owned, and managed by private capitalists. If the business is remunerative, as the official statement gives one reason to suppose it is, there will be no lack of

[*Mr. Chitnavis.*]

capital to work it ; if not and the State has perforce to take it in hand, the Railway programme must be considerably curtailed to suit financial conditions. The Railways can with advantage be made over to private companies. I do not conceive there will be any difficulty in making satisfactory arrangements for their transfer, with due regard to facility of transport of troops and stores in times of war and of grain during famine. That will relieve Government of much of its present embarrassments, and will shift the responsibility of efficiently working the lines on individuals whose outlay will be determined by considerations of remunerative employment only. This will also have the effect of bringing into existence a much larger development of railway enterprise, and competition will help to facilitate this development still further. For the protection of the interests of the public, Government can reserve to itself the rights of sanction and supervision. It is conceivable that there will always be lines—for instance strategic and protective lines and metre gauge feeder lines constructed with a view to attract village capital—which will still require Government initiation and support ; but they form an exception. As a rule Railway enterprise should be a private enterprise. There may have been a time when from the exigencies of the situation Railway construction became a State concern ; but with greater intercommunication between the West and the East and the increase in the world's capital wanting employment, this necessity has vanished. There is now no justification for State support of Indian Railways ; on the contrary, expediency requires that encouragement should be given for country and foreign capital to come forward and assist Government in this great work of development. When they are so worked, State supervision will be more careful, searching and effective. But so long as existing circumstances continue, there will be an ever-increasing volume of dissatisfaction among merchants, millowners and mineowners at the drawbacks to quick transmission. I sympathise with the commercial classes in their complaints about the impediments. These constitute a real grievance. Only a few weeks ago complaints came from Raipur that a large quantity of grain became damaged at the station through delay in transmission, and many dealers were said to have suffered heavy loss in consequence. The solution of the difficulty, however, lies, not in a more liberal supply of borrowed capital by the State, but in an early transfer of the concern to private agency.

“ From a scrutiny into the Railway policy of Government to an examination of its Irrigation report is a refreshing transition. The Irrigation Works are satisfactory indeed. The annual yield of 9 per cent. upon the capital outlay justifies their extension to those numerous tracts where the soil is arid and the water-supply is deficient, the convenience, the interests, and the feelings of the inhabitants of populous villages always consulted. Irrigation surely deserves a more liberal treatment at the hands of Government.

“ All said, my Lord, the Budget under discussion is a satisfactory one. It gives proof of the benevolent intentions of Government, and of its desire to promote the well-being of the people. I frankly acknowledge the fact that Government is as anxious for our material and moral progress as we can be. Responsibility goes hand in hand with power, and I am glad Government fully recognises this principle. There are occasions, however, on which the action of Government, not being suited to the circumstances, raises a storm of opposition, and, as often as not, is attended with unhappy results. Such mistakes are inseparable from human institutions, and more so from the proceedings of a Government like this which has not always correct information about the actual needs and wishes of the people. Previous consultation with Advisory Councils of their real leaders will minimise the evil and make Government action more conformable to the public wishes. Division of responsibility between the Government and the people is a distinct gain from an administrative point of view. For more practical results, the non-official Members of this Council should be given an opportunity of discussing the Budget with the Hon'ble Finance Member before its presentation. I am happy to observe the Hon'ble Sir Andrew Fraser has introduced this simple plan into his Council. There is nothing like harmonious co-operation ; and the objective of both Government and the people being the same, a little more of consideration, a little more of mutual apprecia-

[*Mr. Chitnavis ; Munshi Madho Lal.*]

tion, a little more confidence in the popular representatives, will allay irritation, secure greater contentment, increase the prestige of Government, and promote the moral and material prosperity of the country."

The Hon'ble MUNSHI MADHO LAL said :—" My Lord, after what has fallen from my learned and Hon'ble Colleagues before me, I have no desire to take up Your Excellency's valuable time nor that of the Hon'ble Members of the Council, but on an occasion like this it is difficult for me to forget the wants felt and burdens borne by my Provinces—the United Provinces of Agra and Oudh ; and the first point that suggests itself in this connection is the adjustment of the amount of funds to be left to the Local Government of these Provinces for expenditure in the various branches of its administration ; but we need not go into the figures, as my Hon'ble Colleague Mr. Reynolds has very ably explained to this Hon'ble Council. It need hardly be said that these funds are allowed to be spent by the Government of India in the Provinces out of the revenues raised by them, and the problem that awaits solution is whether our Provinces have been getting enough to spend in the various Departments of its administration.

"The general complaint in my part of the country, official and non-official, is that in spite of our paying the largest contribution to Government, the sum allotted by the Imperial to our Provincial Government is not adequate and the latter Government is compelled to cut down every item of expenditure to the lowest possible limit. The allotment made to the Local Government does not bear a fair proportion to the revenue which it realizes from the people of those Provinces. It does not bear a reasonable proportion to the surplus. So far back as 1897 the Hon'ble Sir A. P. MacDonnell, late Lieutenant-Governor of our Provinces, in his speech delivered in the Provincial Council observed :—

'From an examination of (these) figures I draw two inferences. The first inference is that the surplus contributed by the North-Western Provinces and Oudh (now termed the United Provinces of Agra and Oudh) to the general account is larger than that of any other Province. It is even more than a quarter of the contribution of all the Provinces put together. It is more than double that of Bombay and it exceeds that of rich Bengal by over ten millions of rupees. The second inference I draw is that the largeness of surplus which we contribute to the Government of India is due to the fact that we are permitted to spend provincially only a disproportionately small amount of revenue which we raise. According to the Financial Department figures all Provinces but two spend provincially over half of their revenue. The two exceptions are Madras and these Provinces, but compared with Madras we come off a bad second, for while Madras is allowed to spend 48 per cent of its revenue provincially, the expenditure in the North-Western Provinces and Oudh is kept down to 42 per cent.'

"In 1902, the Hon'ble Mr. Hardy, representative of the United Provinces in this Council, remarked :—

'The necessity of aiding the large Municipalities in completing drainage schemes and in carrying out other sanitary reforms is specially urgent in view of the inroads of plague. Many of the Municipalities of the United Provinces have large populations, but they are not wealthy as a rule and the expense of introducing water-works has hampered their finances.'

"The condition in which the present Indian education stands has been ably discussed by my learned colleague, the Hon'ble Mr. G. K. Gokhale, in previous years, and the clear comparison with the education of other civilized countries which he has given need not be repeated. But even in this respect our Provinces have not yet been able to achieve what other Provinces in India have been enjoying for many years.

"From what I have submitted it is clear that though our Provinces have been contributing the largest amount to the Imperial Exchequer, they have not been receiving for Provincial Expenditure that proportion of its share from it which other Provinces have got. I am afraid it would take the Imperial Government years to make up the deficiency of the previous years so as to place our Provinces in the position which the more advanced provinces enjoy so far as education, sanitation, medical aid to the rural public, the construction

[*Munshi Madho Lal.*]

of other works of public utility, such as wells, reservoirs and canals for irrigation purposes and water-works and good roads in hill districts for traffic and convenient marching of troops at places where they are badly wanted.

"As regards primary education it is now conceded that it should be free, and it is further conceded that all education according to Oriental notions ought not to be a matter of purchase and sale ; but what stands in the way of the diffusion of knowledge among the masses? The reply invariably is want of public funds to help the people in this direction.

"As regards higher education in the country it is not, as in Europe and America, confined to the rich and well-to-do classes only. On the contrary, it is the monopoly of the high born though poor classes in the Indian sense who care more for plain living and high thinking than riches or wealth, but who can get education without paying for it. It would, as a consequence, be a mistake to suppose that if fees in high schools and colleges continue to be what they are the better-to-do and wealthier classes would be educated. On the contrary, there are many people who apprehend that high education might suffer hereafter for the simple reason that the classes who go in for it would not for want of means get an opportunity of receiving it, whereas the richer and well-to-do classes, as usual, may not care to receive it. It is a peculiarity of this country that from time immemorial education has been very cheap to those who cared to receive it. During the Hindu period of its history the students not only got education free, but were provided with board and lodging, books, stationery, etc., by their teachers and professors or by the State. Instances of such education and training can be found at Benares even to this day. During the Muhammadan period and nearly up to the last quarter of the 19th century it remained so during the present rule, when the want of funds stood in our way and we had to make a new departure from the time-honoured rule of providing inexpensive education. It is a pleasure to see that the country is awakening to the need of primary education for males and females, but so long as the Government has not got the means to provide it, the desire of giving free primary education to all boys and girls of the country will not, I am afraid, be an accomplished fact. We are extremely grateful to Government for making us a large grant for education : but, my Lord, our difficulties will continue so long as it does not please the Hon'ble Finance Member to be more liberal to our Provinces in settling the terms of the provincial contract. Having regard to the unprecedented loss of lives that the plague has been causing every year to our Province it would appear not only desirable but necessary to secure the poorer classes of the population from its attack by giving them every opportunity of saving their lives by having recourse to voluntary segregation, disinfection, etc., at the public cost. Any amount of money spent in this direction would not be thrown away. The remarks of the Hon'ble Mr. Hardy who represented the United Provinces in the Council in 1902 apply with equal force now as they did then to Benares, of which I am a resident. It appears that the Hon'ble Member was thinking of its condition when he made the remarks, and it seems to me that he was perfectly correct in what he said.

"Drainage and Sanitation for the town of Benares.

"My Lord, the town of Benares is the oldest and most thickly populated one in the United Provinces. The area called the sewerage area is the oldest part of it and contains all the important ancient temples and shrines of the Hindus. It is to this place that pilgrims from all parts of India go in large numbers every day. It has become insanitary and very unhealthy and requires drainage works and roads to open up the most congested quarters which have become the home of plague and pestilence. Small grants doled out by the local municipality are barely enough to keep it in its present condition. Benares, it may be said, is the centre of Sanskrit learning from time immemorial, and since the establishment of the Queen's College and the Central Hindu College and other educational institutions has also become one of the well-known centres of Western education and culture for all Hindu students from all

[*Munshi Madho Lal.*]

parts of India. During the administration of His Honour Sir Auckland Colvin, Lieutenant-Governor of the Provinces, grants were made and subscriptions realized for the purpose, but the whole amount had to be devoted to an equally important object, *vis.*, the construction of the water-works for the town and of a portion of the drainage-works outside the sewerage area. As the question affects the health of the whole of the Hindu population of India and our Municipal and Provincial grants would not be enough for the purpose, I hope it would not be deemed out of place to mention the fact especially as the plague has been raging throughout the country for a period of more than eight years and has been destroying a large number of our people, and the only way of stamping it out appears to be the introduction of good sanitary measures for the town and completion of drainage works. It may, therefore, be submitted, my Lord, that the question is fit to be treated as an Imperial one.

"I have been informed, my Lord, that the present Benares water-works are in need of repairs and that the municipality of that town is to apply to Government for a loan of three lakhs of rupees. We are afraid that if they are not cared for in time we shall be deprived of a sufficient supply of good water which people have been accustomed to use for many years past.

"Construction of cart-road from Khyrna to Almora.

"My Lord, besides the construction of drainage and water-works for every town in the United Provinces, there are many schemes of Provincial and Imperial importance which have been awaiting completion for want of Local, Municipal and Provincial funds, such as the gap in the cart-road communication from the town of Nainital or the terminus of the Rohilkhand and Kumaon Railway to the town of Almora. My Lord, the districts of Almora and Nainital were annexed in 1815, and the old and historical town of Almora is the headquarters of a district and possesses a fort and contonments in which a full battalion of a Gurkha regiment is stationed. The want of a cart-road direct to Almora is greatly felt by all travellers going to and coming from Almora. The construction of the road for 19 miles or so is not likely to cost much and will be of great use to all officers, Civil and Military, to the battalion located at Almora, and to all people engaged in trade or dealing with reserved forests and the produce thereof.

"My Lord, we are very grateful to the Hon'ble Finance Member for his kindly seeing his way to reducing the salt-tax by eight annas per maund and making the postage cheaper. He should be congratulated also on his reducing the Military expenditure by about half a million, though temporarily, and granting thirty-three lakhs more for education. There is one thing more to which his attention may be invited. There should be an adequate stock of silver coin to suit the requirements of the money market.

"Military Expenditure.

"My Lord, the question of Military expenditure in connection with the Budget debates is a very important one, and so far as our financial difficulties are concerned it may be safely called an all-absorbing one. No item in our Budget estimates is so large as the one relating to it; besides it is an item which will probably go on expanding to the satisfaction of neither the Military authorities nor the Indian tax-payer.

"The reason is not far to seek. According to the modern system of maintenance of army viewed in the light of the progress which the science and art of war have made in this direction, no amount of money however large would seem to suit the requirements of the times. A military officer who cares for the efficiency of the army would not remain satisfied with what he possesses in the face of the progress that is made by the civilized Powers of the world. The increase of military expenditure under the circumstances may be commensurate with the necessity of keeping ourselves up to date in everything. All this would require a good deal of money. Now the question arises—what should be done so as to insure the highest state of

[*Munshi Madho Lal.*]

efficiency in the army by reducing the present expenditure? In this connection I beg to submit that the question of India's defence can, to a considerable extent, be solved by the raising of Militia. This is the opinion of many Englishmen interested in the matter. A paper was read last year in England by Mr. Thorburn, late Financial Commissioner of the Punjab, at a meeting presided over by Sir Lepel Griffin in which the question was fully discussed, and the remarks made on the occasion support my humble opinion.

"India is an agricultural country and the majority of our Indian soldiers come from the agricultural classes. They may be engaged as members of the Militia on feudal tenure as was done in ancient times and is done in Nepal at the present day. This can solve the numerical difficulty to a considerable extent without affecting much the Imperial Exchequer. To begin with, experiment may be made with the agricultural and other warlike people fit to do the work upon such conditions as to Government may seem fit. The next thing that the present Government may duly consider is this, that England should pay a fair share of military expenditure incurred in India in maintaining the troops that are sent now and then from India to engage in wars waged for the maintenance of prestige of the British nation, such as the last Boer War and the Chinese War. In the future too, if such warfare ever takes place, a similar contingency might arise. Under these circumstances would it not be fair to fix a proportion say, one-ninth or one-tenth or even less, of the expenditure incurred in maintaining the British troops in this country that should be borne by England?

"My Lord, I would not waste Your Lordship's time on further details and I am confident that if the humble suggestions submitted by me commend themselves to the consideration of Your Lordship most of the difficulties connected with this all-absorbing question will vanish to a considerable extent.

"Remission or Suspension of Home Charges.

"My Lord, next in importance to the subject of curtailment of Military expenditure, the question of Home charges is one that requires careful consideration not only by the India Council and by both Houses of Parliament but by every member of the whole of the British nation who feels the responsibility of maintaining the Empire. It is an admitted fact that India is the brightest jewel in the crown of our Lord the Sovereign of which both England and India and every sensible and genuine member of the Empire should be proud. When India under the patronage and encouragement of the British nation becomes strong, well-educated, rich and prosperous, the whole of Great Britain and the British Empire would directly or indirectly be benefited by dealing with her; but so long as she remains poor and weak, the best way of practically showing genuine sympathy on the part of the inhabitants of Great Britain towards their Indian fellow-subjects would be to share the financial difficulties connected with the better administration of India at least for some years, so that they may be able to stand on their own legs and be able to march with the times by superior general and technical education extending to all classes of people and the masses and by the latest improvements in all arts, sciences, commerce and industries. It is hardly necessary to submit that there would be no better way of discharging the sacred trust that Providence has reposed on Great Britain, and no time for doing so is more favourable than the present one.

"If all Government functionaries here and in England interested in the welfare of the British Empire could be induced to direct their attention and practical sympathy towards the Indians by remitting or suspending or otherwise softening the rigour of the Home charges to a reasonable extent for a dozen years or more according to the circumstances of the case, most of the financial difficulties that have been staring us in the face would, it is hoped, be solved automatically.

"My Lord, in this connection I may be allowed to give expression to the general feeling of the people, both literate and illiterate, in this country which is generally described by a simile which making every allowance for the fertile imaginative

[*Munshi Madho Lal; The Maharaja of Darbhanga.*]

faculty of the Orientals, would, I trust, be kindly listened to with attention even in this dignified chamber. India, my Lord, is compared by us to a bride of peerless beauty whom Great Britain, her lord and master, has got by centuries of continued attention, after years of jealousy and rivalry with other European races, such as the Dutch, the Portuguese and the French. She is a country the fame of whose charms from time immemorial has reached every creek and corner of this planet : but like a coy maiden when courted most she has retired the farthest : now that she has grown up she says in confidence to her Lord :

'You have succeeded in courting me by attention, but now win my heart too. Make me happy, healthy, wealthy and wise, never grudge me any comfort or even luxury I may have a fancy for ; the responsibility connected with the maintenance of your Indian bride is sacred. In matters like this money is no consideration. Besides, in the land of the Orient, Government is always associated with generosity and magnanimity of the highest order and not with cold calculation of pounds, shillings and pence which does not inspire a feeling of warmth, large-heartedness and devotion. If you even like me, I shall love you in return. Would it not look odd, if you send me a bill for every service, large or small, done to me or anything supplied for my comfort or convenience ? What say you to all this ? Viewed from this standpoint, what are twenty or even fifty millions of pounds if spent every year by the British nation out of its pocket for the good of India ?'

"My Lord, such is and has been the standard of judging questions of the kind of the Eastern people, and the ideas which I have taken the liberty to express are a part and parcel of their constitution. It is difficult to say how long it will take them to consider the subject from the point of view adopted by the English people, but that such a feeling does exist there is not the least doubt.

"We have every reason to believe, my Lord, that under such circumstances the British nation, which has always helped even those depressed races who had nothing to do with England, if properly acquainted with our real difficulties, will come to our rescue and will very cordially help us in rearing a superstructure of a class that for its strength, beneficence, success and grandeur, would serve as a model for all Asia which no foreign ruling race in the annals of Government of the Empires of ancient or modern times has yet been able to see either in the old world or the new from the coasts of the Mediterranean to the shores of the Pacific."

The Hon'ble MAHARAJA OF DARBHANGA said:—"Your Excellency, I congratulate the Hon'ble Mr. Baker on the excellent Budget he has presented to the Council, and for the clear, concise, and lucid manner in which he has arranged its details for our consideration. The fairly good harvests have given him a substantial surplus which has enabled a substantial relief to be given to the people in two directions, inviting universal approval by all. The increased postal facilities for internal communication, by allowing one tola of letter correspondence to be carried for a half-anna stamp, and three tolas for one anna, will prove a great boon to the country, and will tend to oil the wheels of our internal commerce. May I respectfully suggest that the Government might also take into consideration the case of the smaller newspapers, and allow journals of not more than three tolas in weight to be carried for one-half the present rate. A cheap Press, provided it is a good one, ought to have as much facility for reaching the masses as possible, for it would tend to disseminate the kind of knowledge which would make for contentment, and chase away the ignorance which is so often the cause of unrest and discontent. I hail with satisfaction the further reduction of the Salt-tax, and trust the day is not far distant when the increasing prosperity of the country will enable the Finance Minister to announce its entire abolition. The poorer millions of the land require all the aid which Government can give them to improve the general health and afford a protection against those epidemics which now and again scourge the country. The proper use of salt in diet is a necessary condition of health. The cheapening of its price has always improved its consumption. The abolition of the remaining rupee per maund and the liberation of Salt not only for dietary use but for a great many other purposes in Commerce and Industry may well be the ambition of any Financial Minister in India. The opium question is one which I touch on but

[The Maharaja of Darbhanga.]

lightly, merely remarking that if we in India can help the great Empire of China to effect a great moral improvement in its people, we may well afford to look forward to the gradual extinction of the export-duty derived from the drug during the next ten years.

"One great pressing question of the day is the expansion of our railway system and the bringing facility of transport into line with the increasing demands arising out of the development of the agricultural and mining industries. It would not be true to affirm that the Government are not keenly alive to the exigencies of the situation, and I am convinced that as soon as money can be provided and can be profitably spent, it will be forthcoming for the further development of our railway system. But meanwhile, I would strongly urge that possibly a great deal more might be made out of our present rolling stock, if it was indeed kept rolling to some purpose, and not kept idle in sidings, or employed as godowns, when the wagons ought to be quickly used for transport purposes only. The railway expert, the late Mr Robertson, when examining into this question on the spot, made a criticism something to this effect that in many instances there was no want of wagons, but only of administrative brains to know how to use them. He said that in cases like this, the more wagons the more muddle. I am not aware that subsequent events have dulled the sharpness of this criticism. We have now a board of three Railway experts, and we look to them to straighten out the crooked things in the administrations so far as this is practicable at the present time.

"There is one point, Your Excellency, which I would like briefly to touch upon, and that is our food-grain supply. Your Excellency is aware that the export of food-grains from India especially in times when the people in many districts have scarcely enough to eat, or may be looking forward to a season of actual famine, is at this time greatly perturbing the minds of men who are real lovers of their country. I do not pretend to be able to point out the precise manner of dealing with this question as it is a complex one on its economical side; but it seems to me, if the Government will adopt my humble suggestion, that a small expert Commission might be very profitably appointed to examine into the whole question of our national food-supply, the regulation by Government of food-exports in time of threatened scarcity or actual famine, and other related subjects; and then the report and recommendations of such a Commission might enable the Government to deal with the matter in a satisfactory way. Speaking of famine and the fact that even in normal times there are still millions of the people to whom a full daily meal is an utter stranger, I rejoice at the increasing interest that is being taken by the Government in the development of scientific agriculture throughout the land. Agriculture is the first and foremost interest of India, and the Government who will teach the cultivators of the soil, by improved methods, through experimental farms and agricultural teaching in our common schools and colleges, to improve the quality of the produce and greatly increase the fertility of the soil, will earn the enduring gratitude of posterity, and will effectually extirpate famine from the land. Let the interest of scientific agriculture be fostered as one of the primal needs of India.

"Another closely related question is that of the development of the Fisheries along our vast stretches of coast, and in our internal waters. The wealth to be obtained from our seas and rivers is fabulous in its extent. And when Fisheries in India are put upon a proper footing the food-supply of the people will be hugely augmented, and the comfort, well-being and wealth of the country will be vastly increased. I am well aware of what the Madras Government are doing in this matter, and of the beginning that is being made in Bengal for an investigation along the same lines; but surely the time is now come for the establishment of an Imperial Board of Fisheries as a Department of the Government of India to exploit this hitherto neglected but splendid asset of the Empire, and under the direction of a Minister chosen because of his experience and expert knowledge of the subject, guide the Provincial Governments in their work of exploitation. Our great ally, Japan, is showing Asiatic peoples what can be done in the fishing industries. Why should India be behind?

[The Maharaja of Darbhanga.]

"Your Excellency, we have waited long and are waiting still for the production of that comprehensive scheme for the cleansing and the beautification of the Metropolis of the Indian Empire. Your eminent predecessor, Lord Curzon, was anxious that Calcutta should have been converted into the Queen of the East before his term of office expired. I will be thankful if Your Excellency can give us any hope that the scheme will at least be begun to be put into execution, if it cannot indeed be largely completed, before your own term comes to an end. The city reeks with pestilential spots which harbour the growth and spread of fell diseases which so swell our mortality returns. I would humbly urge that the improvement of Calcutta should be taken in hand without any more delay.

"My Lord, I observe there is to be a Colonial Conference held in London next month, and Sir James Mackay has been appointed by the Secretary of State to represent India at the said conference. I trust that our country's interests will be so safeguarded that India will have a free hand, without any handicap whatever, to develop her international trade with other countries in such a manner as she deems best for her own interests. But, my Lord, there is one proposal which the Colonial Premiers are to bring forth and urge upon the British Government, and that is the establishment of an Imperial Intelligence Bureau, by means of an all-Empire Cable, for the daily dissemination of all important news by wire to every part of the British dominions. This is a proposal which I think deserves our hearty support, and I trust Your Excellency's Government will lose no time in expressing their thorough sympathy with the proposal just indicated. We are starved in India for telegraphic news of an accurate nature. The establishment of an Imperial Intelligence Bureau would alter the present unsatisfactory state of affairs for the better; would bring us into immediate daily touch with all our fellow-subjects throughout the world, and would thus tend to foster the solidarity of our mutual interests. I trust therefore, my Lord, that the proposal for the establishment of an Imperial Intelligence Bureau will receive your hearty support.

"May I allude for one moment to the Victoria Memorial Hall? We have heard with great concern that after spending ten lakhs of rupees on the foundations and other expenses, it is still a moot point whether the said foundations, which have already sunk to some extent by their own weight, will be able to sustain the proposed great superstructure. As a humble subscriber to the proposed Memorial, and as one who will be absolutely loyal to whatever may be determined upon after the report of the experts appointed to examine the foundation have been received and considered, yet seeing that three years have already gone by and little progress has been made and a considerable sum has already been spent, it may turn out to have been in vain, I would suggest that there should be no great hurry in spending more money in carrying out the original design, even if that course is recommended, until the wishes of the subscribers and the opinions of the leading associations in this country are fully ascertained. In whatever way the money is destined to be spent it will be in honour of the memory of the great Queen, and I think there is a growing feeling amongst the public that instead of one Victoria Memorial being erected in Calcutta of the Museum order, it would be better if the money were divided *pro rata* amongst the different Provinces according to the amount of their subscriptions for the erection in each of a Victoria Memorial of such a description as would prove to be a fountain of perennial benevolence to the deceased and distressed amongst the poor of the people. I merely throw these suggestions out as a hint. There will be no squabbling about the matter. I and those whose opinions I express will be perfectly loyal to the wishes of the majority.

"My Lord, it is scarcely possible for me on an occasion like the present not to take some notice of the present state of public feeling nearly all over the country. I do not refer to outbursts of race hatred in the Press or on the platform, or to ill-advised declamations against Government. Mere ill-feeling, founded not on real grievances, is not a factor to be reckoned with. I desire to

[The Maharaja of Darbhanga.]

ask Your Excellency's attention not to passing manifestations of the kind, but to a deep and settled feeling, a consciousness, that solemn pledges given by our rulers, remain, to use the words of one of our most brilliant Viceroy, 'inadequately redeemed,' and that there is not scope enough for aspirations which have been created and fostered by more than a century of beneficent English rule. Even the masses have commenced to take an increasing interest in the present situation, and the educated classes appear to be pervaded by a growing discontent with the limited range of public life open to them. My Lord, I am anxious not to be misunderstood. I do not mean to deny that rights and privileges have been conferred from time to time, and the sphere of employment and influence widened. The present discontent I regard as an expression of the conviction that the opportunities open to the people are not proportionate to their present capabilities. The intelligence, the accomplishments, the capacity of the people have been expanding, and it is felt that there has been no corresponding enlargement of their spheres of action, and no sufficient recognition of their talents and energies. If I understand the public feeling rightly, there is at the same time however a widespread conviction at the present moment that the Government of India is fully alive to necessities of the situation, that it will shape its policy with due regard to the altered circumstances of the country. The few suggestions that I proceed to make relate to reforms which, I believe, are most urgently needed by my countrymen. The separation of judicial and executive functions is a reform that is demanded on no mere abstract principles but on the very practical ground of the efficient and independent administration of justice. I am not sure if it is likely to prove at all expensive; but even if it was, the reform is of a character which would justify any expenditure that might be bestowed on it. It is not necessary for me to go into details and attempt a vindication of the reform. Lawyers of great eminence in this country and England have pronounced in its favour, have in fact declared it to be imperative. Opinion, official and non-official, has been collected upon it. Government is in a manner pledged to an acceptance of its principle, and I believe the only thing waiting is a definite scheme. The subject is one which is in every way ripe for reform, and every day of needless delay in dealing with it only prolongs an unquestioned evil and adds to the popular discontent. Laws and Courts have a peculiar importance in this country. They are regarded as the one check on the executive. What is needed to improve the administration of justice and inspire public confidence in it, is an entire severance of the judicial and executive branches of the administration and an emancipation of the judiciary from the control of executive officers. For this purpose it seems to me that not only should the Civil Service be bifurcated, but that the judicial branch of it should be liable to recruitment from the legal profession as well. Judicial work is essentially one for trained and professional lawyers, and Government would be taking a step in the right direction by reserving to itself the power of appointing members of the legal profession directly to some of the judicial offices.

"Another reform which is of no less importance and which demands immediate consideration of the Government of India is that relative to the expansion of Local Self-Government. Self-governing bodies are instruments for the training of the people in the arts of administration, and they supply an outlet for the energy and ambition of the people. They lighten the burden of officials and bring home to the people the responsibilities of government. I earnestly hope that at no very distant day the Government will be able to see its way to increase their strength, powers and responsibilities. Local bodies offer the only opportunities open in this country for developing practical capacity and acquaintance with the affairs of public life. I should very much wish that gentlemen belonging to the commercial and landholding classes might be drawn to these bodies and fitted by the training which they might thus receive for responsible work in higher spheres of public life. I hope to see our Provincial Councils of the future largely recruited from gentlemen who have distinguished themselves in district or municipal work.

[*The Maharaja of Darbhanga.*]

"The time has also come when our Legislative Councils stand in need of expansion so that they may become more representative; but that is a subject on which I need not dwell at any length, for it has recently been under the consideration of Your Excellency's Government and will in due course be dealt with by the Right Hon'ble the Secretary of State. I only hope that whatever measure of reform may be passed it may be of a substantial character, that it may communicate more of life to the Councils and may to some extent gratify national aspirations.

"In reply to a suggestion my Hon'ble friend, the Financial Member, was good enough to promise last year that Government would take in hand the subject of free primary education. I am glad to observe that the Hon'ble gentleman has redeemed his promise, and progress is being made in the direction of establishing a complete system of free primary education. The country ought to feel deeply grateful to the Hon'ble Financial Member for the assurance he has given us in regard to free primary education and for the liberal provision made in the Budget for education in general. I find that at the instance of the Government of India the Local Government has had to take up the subject of Secondary Education in schools, and I am sure something will be done towards improving and developing the present system. I trust also that the generous attitude taken up by the Government of India towards higher education will be maintained, and that such grants will be made from time to time to the University as will enable it to extend the sphere of its usefulness and improve the efficiency of its colleges. Technical education stands on a special footing. It is necessary not merely as a training of the mind and the hand, but as a bread-winning accomplishment. India is at once poor and backward in the industries. Technical education is, therefore, one of the more urgent needs of the country. Government is alive to its importance and it has done much to promote it, but a great deal more remains to be done. It seems to me that the first thing necessary is a large, well-organised Central Technical Institute. The requirements of such an institute will be large and expensive, and it will probably not be desirable to fritter away resources by having a large number of small institutions. There is now a widespread movement for the development of arts and industries in all parts of the Empire. Your Excellency has declared your sympathy with the movement and has given it your active assistance. The Indian Industrial Exhibition recently held in this city would scarcely have been the success it was, if it had not been for Your Excellency's aid and patronage. I hope Your Excellency will be able to see your way to have an Exhibition of Indian wares organised under Government auspices, say two years hence. These Exhibitions prove themselves to be always great educational factors in stimulating the progress of commerce, industry, science and art, and nowhere else are these factors more required than in our Indian Empire. I trust the Hon'ble Minister for Commerce and Industry will take this matter into his sympathetic consideration.

"Before concluding I would like to allude to the recent visit of His Majesty the Amir of Afghanistan, and to the far-reaching results which will ensue from it in the interests of peace, friendship, and good understanding, along with freer intercourse between Afghanistan and British India. The visit has proved that kind words are more than shot and shell, and for the promotion of enduring peace, personal contact and the friendly intercourse of opinions and hospitalities are of more avail than any number of military expeditions. We are all, I am sure, grateful to His Majesty for the fine spirit he exhibited during his visit, and for the words of conciliation he spoke in the interests of concord between the Hindus and their Muhammadan brethren. My Lord, the spirit of reconciliation is in the air. The people of this country belong to diverse creeds; but why should we bring such diversities, with their acute angularities, into the region of political and social life? Amidst all diversities of creeds, there is one religion penetrating all, the aim of which is to produce good men. And whenever and wherever good men meet with an honest desire to know one another, they soon find out that the things they have in common which make for lasting friendship are more than the mere externals which divide them. I am, there-

[*The Maharaja of Darbhanga ; Nawab Saiyad Muhammad.*]

fore, delighted to learn of the movement in Calcutta for the bringing together of cultured gentlemen of all creeds into the club land of fraternal intercourse, and I trust it will be but the beginning of better things to come. Your Excellency will also be pleased to hear that it is intended to form a Hindu and Muhammadan League having its head-quarters in Calcutta with branches all over India for the purpose of promoting friendship among the two communities and for taking united action in furthering the common weal of the people and for the development of all that makes for social, political and moral progress. I would bespeak the gracious benediction of Your Excellency on such movements as I have indicated. And I am sure I am expressing a universal conviction that if the fine spirit of sympathy and kindly consideration for all classes of the people which so eminently marks your rule, becomes the inspiration of all the officers of your Government, from those who immediately surround you in Council down through all ranks, even penetrating those who come into more immediate contact with the daily life of the common people, Your Excellency, during your term of office, will have done more to cement the loyalty, and to sweeten the lives of the millions, than by the passing of any number of so-called heroic measures, and you will have the supreme satisfaction of being able to hand over to your successor a loyal, happy and contented people."

The Hon'ble NAWAB SAIYAD MUHAMMAD said :—" My Lord, I desire, in the first place, to be permitted to congratulate the Hon'ble the Finance Member on the eminently satisfactory character of the Financial Statement presented to the Council. The country will welcome with gratitude the announcement of a further reduction, making the third instalment, of the Salt-tax, reducing the duty to one rupee a maund. As was fully expected, each reduction of the duty on salt has been followed by a large increase in consumption, and although for the present it may appear that a large amount of revenue has been sacrificed, it may be safely predicted that increased consumption will steadily restore this source of revenue to a normal level. But what appears to me to be the chief satisfaction to Your Lordship's Government and the country at large is that such a necessary of life and health as salt will be now freely within the reach of the whole population. It is gratifying to note that the Hon'ble the Finance Member is disposed to look cheerfully at the prospect of the gradual diminution of the opium-revenue. We could have nothing but sympathy for the Chinese Government in its earnest resolve to grapple with the opium habit of the Chinese people, and if that Government contracts its home-grown opium, the British Government should help it by a gradual contraction of the export of opium from India to China. It must necessarily be a slow process spread over a number of years. Nor can the economic effect of the absolute discontinuance of poppy cultivation be entirely overlooked. But so long as the change is gradual, and is not likely to be sudden, I venture to think there is no apprehension of a serious financial dislocation.

"Far-seeing and beneficent as are the changes introduced in the financial system, permit me, my Lord, to express my strong conviction that it is not merely by changes in the fiscal system but by a judicious and wise economy in expenditure that the future can be faced calmly. The relief to the tax-payer can be but temporary unless the Government enters on a bold policy of retrenchment, so that the reduction of revenue which we anticipate may be met without embarrassment. Looking back over many years, if not decades, of our financial history, I am unable, my Lord, to indicate any point of departure from the settled policy of increasing the expenditure. Your Excellency has worthy precedents to follow in the examples of Lord Mayo and Lord Ripon. The claims of the Services are insistent and oftentimes overpowering. But the new situation forced on the Government by circumstances beyond their control—I refer more especially to the possible extinction of our opium-revenue—indicates the path along which progress must be made, so as to bring revenue into reasonable correspondence with expenditure. The curtailment of expenditure, especially on the Services, is both an economic and a political necessity. I cannot, within the limits of such a speech as time and patience of the Council would permit, go into

[*Nawab Saiyad Muhammad.*]

details. Let me say, my Lord, that overgrown expenditure should be curtailed in many directions. Nothing less than a partial re-adjustment of the whole administrative machinery will meet the situation.

"The new scheme by which each Local Government, whose territories are liable to famine, will be enabled to build up a reserve of credit with the Imperial Government is equitable, and will be appreciated by the Local Governments. The Government of India have rightly recognised that the old arrangement by which the cost of famine relief was made wholly a Provincial charge was open to serious objections, and such expenditure would in future be shared by both the Provincial and the Imperial Governments. While on this subject, I beg to draw the attention of the Government to the serious proportions the plague is attaining and how it threatens to bring on a grave administrative crisis. I am fully aware of the attempts that are being made to trace the etiology of the disease and to bring it within the sphere of rational and scientific treatment, either by way of prevention or cure. But the rapid depletion of towns and villages and the consequent decrease in population are grave facts that cannot be overlooked, and must ultimately affect the revenue as well as the administration. While therefore the Committee of experts is at work the Government might well make an experiment on hygienic principles and encourage the evacuation of affected villages in rural areas by helping the villagers to build new houses on new sites. A grant to Provincial Governments for this purpose may well find a place in the Financial Statement.

"In the forty-second paragraph of his Statement, the Hon'ble the Finance Member refers to the increase in the expenditure on education provided in the estimates for the next year, and a pointed reference is made to free primary education. The assurance that the Government are keen about it and the Secretary of State is prepared to sanction a scheme, even though no budget provision is made, is most gratifying. But the reservation about the financial position is not so assuring. I trust that it will be possible for the Hon'ble Member to make a definite announcement as to whether the scheme is likely to come into operation during the next financial year. The need for the scheme is so palpable and pressing that it is unnecessary to discuss that point. And I hope the financial position would admit of this scheme being carried out in the course of the year.

"The decision to raise the weight of letters carried for half an anna from $\frac{3}{4}$ of a tola to one tola and that for one anna from $1\frac{1}{2}$ tolas to 3 tolas will be welcomed by the entire community as an advance in the right direction, testifying to the success with which the Post Office in India has been worked. A vexatious controversy has arisen over the prospect of the further reduction of telegraph charges, both Indian and foreign. I am aware that the whole question, at all events in its Indian aspects, is before the Telegraph Committee, to whose report and the Government orders thereon we are looking forward. I should be very glad to hear from the Hon'ble Member in charge of the Department of Commerce and Industry that endeavours are being made to minimise the inconveniences resulting both to the public and the Press in the matter of quick transmission of messages. Lord Curzon's concessions in this respect to the public and the Press can be but a failure if there is no adequate staff to carry out the onerous duties cast on them. The question as regards foreign cables stands on a different footing. But there are considerations of overwhelming moment why foreign cable charges should not be reduced still further. And I venture to express the hope that ere long these desirable reforms would be introduced.

"My Lord, I should like to suggest that political and territorial pensions may be exempted from income-tax. These pensions are of the nature of a free grant made for special services and considerations, and it would be both graceful and wise to exempt them from the tax to which other ordinary incomes are subject.

"In conclusion, my Lord, let me reiterate my profound conviction that all our hopes for the future are bound up not so much with measures that tinker the administrative machinery here and there, but with lasting

[*Nawab Saiyad Muhammad; Nawab Bahadur Khwaja Salimulla of Dacca.*]

reforms which go deep down to the bases of life of the great Indian communities. I shall not be doing my duty as a member of this Council if I do not bring to Your Lordship's notice the necessity for timely and well-considered measures being taken to widen the basis of Local Self-Government, and increase the popular representation on this and the Provincial Councils. This reform, as well as the wider association of Indians with the higher branches of the administration, is obviously called for to meet the growing discontent and disappointment in the country. My Lord, I should like to say a word endorsing the view of the Hon'ble the Maharaja of Darbhanga, that there can be no nobler aim of statesmanship than the promotion of amity and good feeling between all classes of His Majesty's subjects. Your Lordship's personal influence has been consistently exerted in this direction, and we hope the efforts of the Government also will be directed to the same end. May Your Excellency's *régime* be signalised by measures calculated to widen the beneficent scope of the influences that tend to promote the union and peaceful progress of the races who own willing loyalty to His Majesty the King-Emperor!"

The Hon'ble NAWAB BAHADUR KHWAJA SALIMULLA OF DACCA said:—
 "My Lord, I join the happy company that I see around me in bestowing the well-merited praise due to my Hon'ble friend the Finance Minister in again presenting us a most satisfactory Budget, and save that I desire to add my tribute of gratitude to Your Excellency for the further reduction of the Salt-tax and the Postal charges, which will be appreciated by everyone in this country, and for the handsome grant made under Education, and, above all, for the resolution of the Imperial Government to bear in future the lion's share in famine relief. I refrain from criticism of the Budget because I feel it is presumptuous in us laymen, without the actual facts and materials before us, to attempt to fault-find, much more to advise Government as to what the Budget should contain; for we are ignorant of the policy and circumstances on which, from the expert information at command, Your Excellency in Council determines what the Budget of the coming year should be; and where my Hon'ble friend Mr Gokhale last year failed, it is not within the province of such an humble individual as myself to suggest what should and what should not be the lines on which the annual financial needs of the country should be based. Such criticism, I am humbly of opinion, virtually implies that the authorities take no consideration or thought, and never weigh the pros and cons of any measure of policy, and, if not regardless, are totally ignorant of the needs of the people and the methods of civilised Governments. The absurdity of such an assumption on our part was clearly brought to our notice in the reply my Hon'ble friend Mr. Baker gave last year in this Council to the speech of, I have no hesitation in saying, the most able of our non official colleagues. That reply showed how Government had fully thought over most of the schemes in his—to use the Hon'ble Mr. Baker's expression—'overwhelming programme of economic and administrative reform'—and how these had been fully considered by Government without any outside aid or advice, and why such of them as had been deemed desirable Government had been unable to bring into operation. It is criticism on our part of this kind which is like tilting at a windmill. But what should be our duty towards Government is to bring concrete cases we come to know of which may have escaped the attention of the authorities, and which have only to be brought forward by us to receive the consideration of the experts at the command of Government which the importance of what we may have to urge deserve. It is on these lines that, with Your Excellency's permission, I propose to confine the remarks I have to make on this occasion. I do not want for a moment to indicate that the Government of this country is perfect, that it does not make mistakes; indeed, my Lord, it is a trite saying that even Homer is found at times nodding, and therefore what we have to do is to bring to Your Excellency's notice facts which show the inconvenience and hardships felt by the public, and also such matters as come to our knowledge which appear to retard the prosperity of the country, so that they may be remedied by Government.

"[It is with this view that I had put certain questions in this Council, but to which the answers given have not been satisfactory; and I therefore avail of

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

this opportunity to animadvert on these matters in the hope that I may secure further elucidation at the hands of Your Excellency's Government. For instance, to my question whether Government will take steps to see that the English Parliament contribute towards making good the loss of revenue which will accrue if, owing to the persistent efforts of the opium party in England, the total amount derived by Government from the opium revenue is abolished, the Hon'ble Mr. Baker was pleased to reply 'that the Government of India think there will be no advantage in anticipating any such result from the proposals of the Chinese Government now under consideration.' While in the concluding paragraph of this reply, I admit that it may be that, in the particular speech of the 30th May last mentioned by the Finance Minister, the Secretary of State has not made any statement of the kind on which my question was based; but I beg to point out that in my question I have referred to no particular speech of Mr. Morley; on the other hand, I beg to submit that the Right Hon'ble gentleman has stated something to the effect I had mentioned on another occasion in the House, as will be found by a reference to the *Pioneer* of the 25th November last. And the remarks of my Hon'ble friend in introducing and explaining the Financial Statement do not help us much further, save that they foreshadow a loss of opium-revenue to the extent of some Rs 96,00,000 (Rupees ninety-six lakhs) in the coming year—a loss this country is to suffer to please a few faddists in the House of Commons on the supposed idea that the Chinese Government have resolved to prevent opium consumption in that country. But, my Lord, no one is inclined to put much faith in the assurance of the Chinese Government, and we fear that this assurance may be used as a plank by the anti-opium party in Parliament to get the Secretary of State to commit himself to a line of policy which may hereafter be difficult to withdraw from, and which will simply benefit the Chinese Government at the expense of a legitimate source of revenue of this country; and I see the comments in the public Press are entirely of the view I ventured to suggest by my question, that Government should endeavour to strengthen the hands of the Secretary of State, so that 'if in a virtuous moment Great Britain decides that the industry must be abolished, then she should bear the cost. It would be the height of meanness and hypocrisy to saddle the tax-payer of this country with a cost of British rectitude.' I therefore trust that Your Excellency's Government in what has been addressed to the Secretary of State has brought forward the right of this country to be compensated, even for the 96 lakhs which are to be given up to please the English Parliament. My Lord, Your Excellency's Government cannot be ignorant, but I desire for the information of this Council just to state that out of the 30 thousand tons of opium consumed by the Chinese, only 3 thousand tons are Indian opium, and that since the opium edict of the Chinese Government of the 20th September last, it has been reported that the sale of the drug in China has not only not in any way been decreased, but has gone on increasing by leaps and bounds; while out of our total income of revenue one-tenth is derived from opium. And just to take the concrete case of Patna, we find some 16 million souls live by the occupation of the opium industry, and thus we can imagine what we will suffer by a total abolition of this revenue. While with reference to the reply of Your Excellency's Government, given me on this subject, I take the liberty to quote Your Lordship's own views, so aptly applied to the Hon'ble Mr. Gokhale's criticism of last year on the Army Expenditure that: 'He advises us to hang up our military re-organization, till a more disquieting situation arises; that is to say, *wait till the moment of danger arises before we put our house in order.*' My Lord, I respectfully urge that we should not wait, but take time by the forelock and put our house in order before we find ourselves deprived by a radical Parliament of a revenue of six crore rupees from an industry which is the means of livelihood of a countless number of the inhabitants of the country.

"In the same manner, the answer of the Hon'ble Sir Harvey Adamson to my question regarding the Urdu Lexicon, the Amir-ul-Logat, is disappointing, that the Government of Your Excellency should be taking no interest in the advancement of Oriental studies, as 'to have no information regarding this

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

Urdu Lexicon.' But from enquiries I have subsequently made, I learn there is some information forthcoming regarding this valuable work in the Secretariat. And what has grieved me in the answer I received is, that while the German Government spends money with no stinted hand for the encouragement of Oriental studies, and the Society established in London for this purpose sent a deputation headed by Lord Reay to the present Secretary of State and received much encouragement from the Right Hon'ble gentleman, yet he has been the very person to withhold the sanction of the paltry sum of £400 (four hundred pounds) per annum recommended by the Madras Government for the publication of Dr. Pope's Tamil Lexicon. May I beg Your Excellency to interest yourself in this question, and put us not to shame at what a foreign Government is doing for Oriental studies.

"Again, my Lord, the answer of the Hon'ble Mr. Finlay to my question of whether it is the intention of Government to take measures to legalise the negotiability of railway receipts, that "If Commercial opinion ever asks for the change in the law with some approach to unanimity, the Government will be willing to consider the question.' Now, my Lord, the necessity of railway receipts being negotiable affects more the trade and business of individuals carrying on small and petty trades in up-country and out-of-the-way places. If this facility were given them they would become more enterprising, and the unknown places in which they carry on business may soon become emporiums of large flourishing trade centres; but it is possible this may affect big mercantile houses who have the chief voice in our Chambers of Commerce, and the want of unanimity of commercial opinion is probably due to the interest of these up-country and out-of-the-way native traders (whose enterprise may lead to the opening of the country) not being brought to the notice of Government. But whether or not Chambers of Commerce will with any approach to unanimity ever move Government, yet the recent judgment delivered by the Karachi Court in *The Delhi and London Bank v. North Western Railway*, is evidence of how desirable it is in the interest of banks that these railway receipts were legally declared negotiable.

"My Lord, the Hon'ble Sir Denzil Ibbetson, whom while we are all glad of his promotion, yet regret his absence from among us, in answer to my question of the desirability of the Bill for the amendment of the Bengal Tenancy Act being withdrawn from the Bengal Legislative Council and introduced into Your Excellency's Council, has not been to me and others who are connected with Bengal convincing, namely, that it will avoid the delay which will be involved by its consideration at Your Excellency's hands. But, my Lord, the Bill is of so contentious a character, so seriously affecting the interests of the zamindars and raiyats, and that considering there will have to be two Bills to engage the time and attention of two legislatures, and further, that the Bengal Tenancy Act has now been in force since the last 25 years, any delay of even a year or more by its introduction into this Council will not so seriously affect the interests of the people of the two Provinces affected by the Bill; while the reasons advanced by the Hon'ble gentleman that the Imperial Council should be relieved of legislation which a Provincial Council is competent to undertake, were not applied in the case of the Sindh Encumbered Estates Act and other Acts of legislation which now adorn the Statute Book of this Council.

"To my request to be furnished with a statement showing the approximate number of men employed in the subordinate and ministerial services, and the date when the number and pay in each grade of the service were last increased, I was referred to a statement published in the Gazette of India of the 4th June 1904; but, my Lord, this statement, which thanks to the courtesy of my Hon'ble friend Sir Harvey Adamson I managed to obtain, I find does not meet with the requirements for which I had troubled Government. This statement admirably fulfils the object for which Lord Curzon had caused it to be made, namely, to show the falsity that European and Eurasians were, at the sacrifice of the natives of India, being unduly appointed in the public service. But, my Lord, I have no intention to discuss class legislation; my object (and I may

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

say from the information asked for and given to my Hon'ble friend Mr. Chitnavis in the matter of one particular branch of the public service, namely, Postal Department) and his is the same, namely, to ameliorate the pay and relieve the hard-worked subordinates in the public services, who are drawing the same pay which their predecessors in the posts now held by them used to draw a quarter of a century ago. My Lord, on receipt of the statement to which I had been referred, I ventured to write for a further statement which could enable us to trace the exact increase in number and pay in the various subordinate and ministerial services, and I have received a statement which, however, I am sorry to say, does not help us much further, for unless we know what was the number of men drawing the salaries, say, in the seventies, we cannot make out whether the increase we are shown in the statement furnished to me as having been made in every department of the public service during 1906 is in proportion to the accumulation of work in all the branches of the public service during the last 30 years. But even this statement, interesting as it is, helps to show how inadequate are the establishments at present in existence. I will only take a concrete case, for instance, the Postal Department, though the same reasoning applies to every other branch of the public service. From this statement we find that throughout the whole of India, the total number of employes drawing from Rs. 30 to Rs. 1,001 and upwards is 9,794 hands. Now, my Lord, of all the administration reports none is more appreciated than the one issued by the Postal Department of India, and one stands aghast at the countless ramifications and work done by this Department; but it is hardly possible to conceive that this huge work can be carried on by only some ten thousand men, except at the sacrifice of great hardship, loss of health and comfort to these hands; and when I see from the Finance and Revenue Accounts of 1905-1906, the net revenue, after deducting all charges of the Postal service, is a surplus of some 12 lakhs of rupees, I respectfully urge that the establishment ought to be strengthened both in number and pay by as early a date as possible. My Lord, those who have served under Government will assure Your Excellency that the amount of work the subordinate and ministerial establishments of the various departments of the public services have to do has been quadrupled within the last 25 years; while, my Lord, the standard of expenses of living in these days has increased in the same ratio, if not more; while the rate of wages in other walks of life have similarly increased. I therefore confidently say that it is the paramount duty of Government to improve the pay and prospects of these men. My Lord, the chief ground of Lord Cornwallis in placing the Civil Service on the satisfactory footing he did was to have a contented and an honest service; and though I am proud to declare that no service in the world can boast of a more loyal and honest set of servants as a whole than the subordinate and ministerial servants of Your Excellency, yet, my Lord, the burdens these men have now to bear can no longer be allowed to remain unrelieved. I know of men in the Postal, Revenue, Secretariat and various other departments of the public services, who have to work something like 14 hours a day, including Sundays. Such is the increase of work now-a-days in the various Government offices, that Your Excellency will forgive me if I parody the famous lines of Thomas Hood:—

"It is not pens and paper
You are wearing out,
But human creatures' lives."

"My Lord, I confidently assert that we have read with pleasure the resolution of Your Excellency's Government regarding house allowance to high officials in Calcutta, and to the clerks who have to go to Simla, and all we urge Your Excellency to do is to further extend that policy and principle of keeping hardworking, zealous public servants happy and contented to the lower and other grades of the public services. My Lord, those who have been in the Revenue service of Government can alone appreciate the honesty of our native subordinate and ministerial servants; revenue of lakhs and lakhs of rupees is brought from village to village to the headquarters of many a district in India, by men whose

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

monthly pay or enrolment does not exceed 8 to 10 rupees a month ; our postal messengers are entrusted with lakhs and lakhs of rupees belonging to the public, who do not draw more than 8 rupees a month ; our schoolmasters and teachers of our young, are drawing the wage of a coolie earned at some of our docks. My Lord, I will not draw further on this harrassing picture. But, my Lord, there is another class of public servants whose claim it is impossible to overlook, and they are the Deputy Collectors and Magistrates, the Munsifs and Subordinate Judges ; and a more hardworking, diligent and straightforward class of men it will be difficult to find in any part of the world—all these branches of the public services need to be strengthened both in number and pay. I would rather, my Lord, see that our future surpluses are utilized for this purpose, to ameliorate in some measure the lot of these most deserving public servants, than even a remission or reduction of taxation.

“ My Lord, I confess of all the replies given me to the series of questions put by me, the most satisfactory was the one given by the Hon'ble Mr. Finlay regarding British Indian subjects in the Transvaal. I had put that question with the view to show our people that the Government of India is quite as regardful of the rights and privileges of the natives of India in the Transvaal as those who are independently advocating their cause ; and it is a great pleasure to me to find that the policy and action of Lord Curzon's administration on this subject is being supported and maintained by Your Excellency's Government. It is one of the unfortunate peculiarities of the method adopted in the Government of this country, that what is being done by the authorities is never made public until the matter is finally disposed of, and this leads ill-disposed people to mislead the ignorant masses, and to induce them to believe that the present-day Government takes no interest in the people ; and therefore the answer of the Hon'ble Mr. Finlay has been received with great satisfaction by those amongst whom I live, move, and have my being. But while this answer has been hailed with satisfaction, it has brought to light a curious state of affairs, that these Transvaal Indians—whose cause is taken up and advocated by the Congress, and whose representatives recently went to England, found it necessary to secure the co-operation and support of the Secretary of State for India, and on whom they waited in deputation—should have been so shamefully disregarded of Your Lordship's Government as not to have sent to the Government of India even a copy of the memorial which has been published in some of the newspaper of this country ; and this answer shows that Your Excellency's Government has, uncalled and unasked for, done your duty by the people of this country ; and I have not the slightest doubt that in spite of this ignoring of Your Excellency's Government, it will continue to take that interest and will safeguard the rights and privileges of the British Indian subjects in the Transvaal as has always been done, and that Your Excellency will take all the measures in your power to see that the British Authorities in England see that the new Legislative Assembly, which has unhappily for us, so scandalously abused its powers by passing the Asiatic Ordinance, by reading it three times at one sitting, will not be allowed to abuse with impunity the powers and privileges with which the new Assembly has been vested, and especially now that we learn that Lord Selborne has reserved his sanction to the Ordinance subject to the King's approval, and that British Indian subjects will not be made to suffer the indignity of being less than the meanest of the subjects of foreign States who have secured a footing in that country. And here I beg to draw the notice of Your Excellency to the reply reported by Reuter to have been given by the Secretary of State in the House of Commons, that the subject of the treatment of Indians in the Colonies was not included in the agenda of the Colonial Conference, *but if there were time he would invite the Conference to consider the matter.* My Lord, I can hardly believe that Your Excellency's Government will allow a matter of time to be permitted to burke the serious consideration by the Colonies at the Conference of this important question : and, my Lord, the recent discussion in the House of Lords initiated by Lord Ampthill is full of hope. I have therefore no hesitation in saying that if Your Excellency's Government were to urge by telegram (for there is hardly time left to do so in writing) that it is the wish

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

of the people of this country that this important question should not only be included in the agenda, but should be one of the chief questions to be fully considered and definitely settled in the forthcoming Colonial Conference; and now that the plea of Lord Lansdowne of there being no representatives from India in the Conference being set aside by the appointment of Sir James Mackay, Your Excellency can safely urge for the discussion on the status of the British Indians in the Colonies; and if Your Excellency's Government will do this, Your Lordship will secure the everlasting gratitude of the people of India. My Lord, I do not for a moment deny that self-governing British Colonies, like Foreign Governments, have the sole right to legislate for that which they think best for themselves; and we natives of India, if we with our eyes open choose to domicile amongst them, that we must submit to the laws of the land; but what I contend is that British Colonies cannot put a stain of inferiority on, or put the British Indian subjects on a lower status than that bestowed on the commonest foreigner, and that there should be no difference in the treatment by reason of his colour of one who is a British subject by birth right. My Lord, I feel very keenly on all that affects and reduces the British Indian subject in the estimation of his fellowmen, but I have to confess that I cannot command that eloquence of language which can exhilarate and rouse people to a sense of their duty, and therefore when I find views in consonance with my own, expressed in language which cannot but command the approbation of Your Excellency's Council, I trust I may be permitted to make a small quotation from such. Some Mrs. Stobart has, in the *Fortnightly Review* for February, given to the world the case on behalf of the Transvaal Whites as against the British Indian subjects, and the writer in the *Statesman* has admirably exposed her fallacies as follows:—

'Mrs. Stobart follows the discourteous South Africa practice of using the word 'coolie' as synonymous with 'Indian.' The case that she here puts forward resolves itself into a demand that Indians should be excluded from South Africa in order that white persons may have the privilege of charging high cash prices to Kaffirs, and giving long credit to Boers, and still have a balance over to pay for Churches. This is the ultimate basis of the "free evolution" and the "constructive sociology" on which she lays so much stress. If Mrs. Stobart is thinking only of Polish Jews who are permitted free ingress into the Transvaal, doubtless she is right in arguing that this petty trading is important for them; but as Englishmen we object to the assumption that the English race has no higher rôle to play than to maintain country stores for selling cheap goods to Kaffirs and Boers at fancy rates of profit. It is just because we hold that Englishmen have a far higher rôle in the world that we demand equal rights for Indians in all parts of the Empire. We do not for a moment contend that Indians in the mass have yet reached the same level of civilization or of intellectual capacity that the better classes of Europeans have reached; nor have we the slightest desire to interrupt the elevating work which the influence of the white races upon the coloured races is effecting. Our whole argument has always been that white men must prove their superiority by their actions and not by their assertions. Here in Calcutta white shopkeepers are able to carry on business in competition with Indian shopkeepers, white barristers and doctors in competition with Indian barristers and doctors. They are able to do it because of their own efficiency, and if that fails they will inevitably go down, and will deserve to go down. No race can permanently maintain supremacy except by maintaining superior efficiency, and the whites of the Transvaal, in asking for Anti-Indian legislation, in effect confess that they are unfit for the supremacy which they claim.' With these remarks I feel confident every Member of this Council is in agreement.'

"My Lord, it has been a matter of equal satisfaction to me that Sir Harvey Adamson has informed us on the question put by me regarding the much talked of subject of the separation of the magisterial and executive duties of Revenue-officers, that 'the matter is still under consideration of Your Excellency's Government, that the mass of evidence that has been collected is still to be digested by the Government of India.' But it is because I fear that this evidence is antiquated, and that, less Your Excellency may be induced by the spurious agitation of a bastard public opinion, that I have respectfully urged Your Lordship to stay your hand from putting the axe to the root of the tree which has grown with ages, and rendered protection and shelter to the countless and illiterate during these years, and that we may well wait to see how the experiment works out which has been introduced by some of our Native States, the Chiefs

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

of which have been so enamoured with the glamour of the Congress platform oratory. My Lord, from such of the literature on this subject that I have come across, I see that goodnatured Englishmen, brought up from their childhood with the system of jurisprudence in vogue in England, hold it monstrous that a man can be a judge and a prosecutor at the same time, and this is what has led them to believe the Collector-Magistrate to be. But is it so? I ask any one who has any personal knowledge of our administration to state whether this idea is not erroneous? Because the District Collector and Magistrate is the head of and responsible for the police administration of his district, does he thereby *ipso facto* assume and perform the function of a public prosecutor? Is it not rather in his capacity under the Criminal Procedure Code as a District Magistrate that he issues his orders to the Magistrates subordinate to him? Does he, and can he, interfere in the course of justice simply by virtue of his office of being the head of the police administration of the district? Why, the Collector has so much work to do that he has seldom the opportunity, in the course of his official duty as head of the police administration, of knowing of any police prosecution till long after his Assistant or Deputy-Collector-Magistrate has disposed of the case, when it may come before him in appeal or in the monthly criminal return. I do not from this desire to state that there are not instances where a Collector-Magistrate may not have interested himself in a particular case; but will he not be in a position to do so even if he were to be deprived of being the head of the police administration? Do we not see and know of officials unconnected with any particular branch of the administration occasionally interesting themselves in what has been done therein? The most recent instance in Bengal of this presumed influence of officials to subvert the course of justice, I need not say, is the order of the High Court transferring the case against Messrs. Emerson and Kemp from the Civil Court of Backergunj on the application of the plaintiffs, who are all intimately connected with the law, on the ground that they are afraid that these officials (though they have no connection whatever with the *Civil Courts*) will be able by their official position in the district to cause a miscarriage of justice. Now here, my Lord, there is no question of Collector-Magistrate; it is simply because the defendants are officials in the district. I, however, do not deny there are some glaring instances of miscarriage of magisterial justice, but this has been made by designing persons to appear as if this is the universal result of the administration of criminal justice by our Collector-Magistrates. But, my Lord, if a thorough and searching enquiry were to be made, if the poor and helpless raiyat in the far-off and out-of-the-way places of the country could be got to give his *untutored opinion* as to what he would prefer, or if the district officer who is in close daily touch with the people in his charge were to be asked, for the moment, to set aside the delicacy which naturally affects his giving an opinion on a matter which personally affects his work and character, to conscientiously state what he really thinks of the substantial justice meted out to the people, coming, as Your Excellency does, from the free atmosphere of England and Canada, Your Excellency will then know what a sham and a delusion is this cry of the iniquities of the Collector-Magistrates of this country. While the great question of impairing the usefulness of the Revenue-officer if deprived of his magisterial power is absolutely lost sight of by those who have no idea in England of our system of revenue collection, my Lord, I fully agree with W. C. M., whose identity we can hardly miss, in his letter of the 14th February in the *Englishman* of the 18th idem, that 'no one who has ever been either a Mufassal Judge or a Mufassal Magistrate can require to be reminded that British Judges in this country, being aliens in it, require to be brought for some time in their career into close contact with the people in order to understand them and their habits and mind. No man can be a good Mufassal Judge who is only a good barrister trained at home I recognize that there is much both here and at home in the structure of the administration which is very valuable, and is worth preserving; and those who would rush over precipices, running after butterflies with bag nets, with their noses tilted in the air, had better be restrained in their own interest and those of

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

others.' My Lord, I cannot command the facile gift of the ready-writer of W. C. M. I therefore cannot express all I wish to do on this subject as happily as he has done; but fully agreeing with all he states, I earnestly commend the perusal of his letter to Your Excellency and Your Lordship's colleagues. But you will forgive me if I enlarge a little more on what I wish to impress on this Council. The main reason of the advocates for this separation is that of the miscarriage of justice that occurs under the regime of the Collector-Magistrate; but, my Lord, any one who is acquainted with the manner of the administration of civil and criminal justice in this country, if honestly disposed to say what he really feels, cannot but state that *it will be disastrous to the life and liberty of the subject* if criminal justice is entrusted to a class of men who can have no means or opportunities of coming into contact with village life, or with the people in their every-day avocation, who have not the means of knowing what is going on in a village or district, which the Revenue-officer, in the course of his natural duties, moving about from village to village, gets cognizance of, and which no amount of perjured evidence, obtainable in the doorways and porches of our Civil Courts, with the knowledge at his command, can ever mislead him; but if we have the Subordinate Judges to perform magisterial duties, we will see enacted what is commonly to be found in their judgments of acting on 'the preponderance of the weight of evidence.' They have no means of knowing that the man who has deposed on oath has a grudge or motive which will aid and help him in any matter or purpose in which he is interested in his village. But, my Lord, are we ignorant of the miscarriage of justice that takes place in countries where criminal justice is administered in the manner, those who now seek its introduction in India? We have before us that terrible miscarriage of justice in the case of that unfortunate Swede, Alfred Beck, again in the case of the miserable Edaljee, and in the more recent case of the man Lewes sent to three years' imprisonment on the perjured evidence of the woman Millie Marsh, while the case of Drefus has made our blood curdle cold, and I need not enumerate the cases of miscarriage of justice in America. And is there not miscarriage of justice in our own Civil Courts? While under our Code of Criminal Procedure, our system of revision, supervision and appeal is so complete, and last, though not the least, our native Press ever watchful to bring to light where injustice occurs under British administration, what danger is there, my Lord, for any one in this country now-a-days to suffer in his liberty of person, to necessitate a change which will materially reduce the importance, usefulness, and utility of a great branch of the public service, and can only benefit pleaders and lawyers.

" My Lord, it was with a touch of regret I heard the reply of Your Excellency's Government to my question regarding the taking the public into its confidence as to what Government propose to do in the matter of the future constitution of the Legislative Council, that 'Government is not at present prepared to make any pronouncement on the subject,' and the reply furnished by His Excellency the Commander-in-Chief regarding the 'Councillors of the Empire' makes it necessary for me to trouble Your Excellency again on this subject; for ever since it was mooted that the question of amending the Legislative Council is under the consideration of Your Excellency's Government, great has been the consternation amongst my community that if the amendment is to consist of a further extension of the educational franchise, we Muhammadans will be completely swamped by those of the more educationally advanced communities in the country; and while we felt assured by Your Excellency's gracious reply to the deputation that waited on Your Lordship at Simla, yet we feel that the time has come when we should know something more definite as to what is in store for us, and it was with a view that in case the committee appointed by Your Excellency come to a conclusion which may still further handicap the less educationally advanced races of India that we desire to be permitted to be fully heard before an irrevocable decision has been arrived at by Government. My Lord, from the public papers I find that Your Excellency's Government has forwarded its recommendation to the Secretary of State, and we find that the Right Hon'ble gentleman has from his seat in Parliament declared his

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

intention of submitting the proposal to a discussion in Parliament. Under these circumstances I respectfully submit it is but fair to the people of India, if this Council had also an opportunity of discussing this subject before final orders were passed. My own idea is, that instead of the microscopic minority of English-speaking natives alone being invested with increased power of guiding and advising Government, if the Princes, Chiefs, and the landed gentry were taken into consultation by Government and given greater facilities of being heard and consulted, there would be a greater chance of Government arriving at a policy of administration which would be more conducive to the peace and prosperity of the country. For the Princes, Chiefs, and large landed proprietors of the country, having a larger stake in the country and interest in the well-being of the people than pleaders, lawyers and members of other professions who predominate amongst the educated classes, are in as great, if not better, position to aid and advise Government than these self-constituted representatives of the people. And even if it is the intention of Government to give wider opportunities of local self-government to the people by making over to the educated classes the administration of Municipal, District, and Local Boards, free of the control now exercised by Government officials, such an arrangement should be so hedged in as to enable the landed proprietors to get a preponderate share in these administrations, and the rights and interests of the backward classes should be safeguarded. For, my Lord, in spite of the existing official check and control, judging from the almost universal scandalous mismanagement of the municipalities and local boards of the country, I confess that property holders who have a large stake in the country look with dismay at the possibility of having their interest handed over to a body of men who in the past, in the name of progress, have scandalously misused their powers, incurred liabilities, and spent public funds entirely out of proportion to the benefit and advantages accruing to the public; and seeing the exposures which are coming to light in the management of these corporate bodies in Europe and America, the landed proprietors cannot look with composure on a similar state of affairs coming into existence in this country.

" My Lord, these matters which I have brought to the notice of the Council do not by any means exhaust the subjects that need to be brought to Your Excellency's notice, some other matters have already been brought forward by my Hon'ble Colleagues, and I am sure those who will follow me will do likewise, and I do not intend to trespass on their grounds, but it is probable that one or two matters which I deem should not escape Your Excellency's notice on this occasion, and to these I now beg your permission to briefly allude. My Lord, the question of purchase of stores required by Government from England is one I desire to draw the attention of Government to. We all know the commendable efforts made from time to time by Government to purchase the requirements of Government whenever possible from manufacturers in India, and the last act and resolution on this subject of His Excellency Lord Curzon has done more for Swadeshi than all those who are talking so loudly about it; but it is in Your Lordship's power to still go further, and while the trade must be grateful to Your Excellency for the recent resolution on the jail industries, yet what I respectfully desire to bring to your notice is the claim of the trade, of men who maintain and keep up extensive business establishments and who could supply the articles which are not manufactured in this country, if commissioned, more expeditiously than the India Office Store Department. These gentlemen have become a valuable asset of the country and have a right and a claim upon Government to be assisted in their business since they substantially help the revenues of the country in the payment of custom-duties and income-tax. I however know, my Lord, that it is difficult to tackle the Store Department of the India Office, but if we go on pegging away Your Excellency's successor may succeed in doing justice to a deserving class of the citizens of the Empire.

" My Lord, it is with much satisfaction that we have seen Your Excellency's appointment of the Ganges Bridge Commission. The evidence recorded by it has been read by all of us with great interest, and wherever it is decided upon to bridge

[*Nawab Bahadur Khwaja Salimulla of Dacca.*]

the river I trust the claims of the Province, I have the honour to belong to will be taken into consideration by the Railway Board, and a line will be built which will facilitate the great jute and other rising industries of the Province, and if it is decided upon to bridge the river at Sara, the project, so long kept hanging, of a branch of the broad gauge line from Sara to Serajgunj will be taken in hand as soon as possible. While on the subject of Railways I will only make a passing allusion to the great inconvenience caused by the shortage of wagons; for I feel certain this subject will be more ably dealt with by those more competent to deal with the subject than I am. I however earnestly beg that amongst their other requirements, proper arrangements be made on railway platforms for the ingress and egress of the third class passengers, and greater facilities and assistance afforded to these passengers to obtain information as to how and where they have to go about, in the midst of the labyrinth that has come into existence with our palatial railway stations.

"My Lord, we were all satisfied when through the genius of Lord Curzon the trade secured a stability in the matter affecting the customs administration which was assured by the inauguration of the Imperial Custom Service, and though the service is likely to be in a manner detrimental to the interest of the natives of India in the public service, yet native public opinion was prepared to accept this inconvenience on account of the greater good and benefit to be derived from an uniform and systematic service, and those utterly ignorant of customs work and requirements of the trade being no longer foisted on as *kam chalaos*. But, my Lord, serious cries are coming from Bombay that the Collector of Customs of that Province has been allowed to take up the appointment of the Private Secretary to the Governor within the period he was bound under the rules of the Imperial Custom Service to remain in the Department. If thus well-digested and well-considered schemes are to be allowed to run over rough-shod the trade will lose all confidence in Government, and it will be well if the public come to think that the Imperial Customs Service is not to be merely a warming-pan for rising and brilliant Civilians.

"Nowadays we hear much about the growing discontent and unrest in India. One well-intentioned, but, I think, ill-advised, Englishman, instead of keeping his thoughts to himself, has gone on to give a lecture on '*If there were another Mutiny*,' which has been thoroughly misconstrued by the native public; the same may be said of the sayings of the worthy Prelate and of the Padre who, with the globe-trotters we have the pleasure of receiving every cold season, in their goodness of heart, discarded on the growing aloofness and want of association and sympathy between the rulers and the ruled. But, my Lord, may I beg to tender you my humble experience derived from the close connection we possess between the masses and our rulers, that while there is some truth in the allegation, I honestly believe the saddle is put on the wrong horse—in short, the blame is put on the wrong party. When we find officers, who conscientiously discharge their duties, as we have seen in the time of plague and famine amongst us, calumniated, and maligned, insults heaped upon them in the public Press and such conduct defended and even lauded by those who ought to know better, how can you blame these officers and their comrades in the service if they keep themselves aloof, as is charged against them? But, my Lord, I would only ask these good-natured Englishmen who have innocently roused a spurious disregard amongst the people for the good and honest work done by those in authority, to state amongst which of the masses of India have they moved? Do they know anything of the feelings and sentiments of the Bhils, the Santals, the Garhos, the Lushais, the Chins, the Nagas, the Manipuris and even of the raiyats; are not their views and opinions the second-hand, self-interested ideas of a microscopic minority? When have these good-natured Englishmen come into real contact with the district life of the district officer, and when have they come into contact with the people? Have they not taken their cue from what they have seen and read in irresponsible papers? But, my Lord, if we take a lesson from what we see around us, it seems to me that the attempted supremacy of Demos is coming to an end; the common sense of the people is fast returning, and the people are prepared to once again trust in and abide by what is done by the authorities as done with the best intention of being for the

[Nawab Bahadur Khwaja Salimulla of Dacca.]

ultimate good of the country and the people. We see the revolt against the progressive party in Germany, in Russia, in the Labour Conference at Belfast, in the County Council elections in London; and last, though not least, comparing great things with small, in the recent municipal election in Bombay we find the violent agitators and their friends in the Press are being discredited. My Lord, I feel sure it is a pure fiction this cry of unrest in India, but we cannot shut our eyes to the unscrupulous writers in the Press and frothy orators fanning the flame of sedition and openly preaching it under the cloak of self-government. My Lord, it was only a cloud no bigger than a man's hand in the old days that, being ignored by the officials, ultimately brought about a revolt.

"We have had our disturbances lately, my Lord. I use no language of exaggeration when I speak in this Council of the exemplary conduct of Muhammadans during these times of trial. There is no denying that the martial characteristic of the Muhammadans is not extinct and it must be said to their credit that they have displayed a calmness and obedience which marks them as a people worthy of the sincerest consideration of Your Excellency's Government. My Lord, I deem it right to just make a passing allusion to the great question which has disturbed this country, namely, the partition of Bengal. Though it is an established fact, yet, my Lord, it is my duty to state that during the recent Muhammadan Educational Conference at Dacca, Muhammadans from all parts of India were present, and they were convinced, from what they saw and heard, of the advantages which have accrued from the partition to this once neglected part of Bengal in general and to the Muhammadans in particular; and with the exception of a few who, for their own selfish interest, have joined the opposite camp, I assure Your Excellency that the whole Muhammadan community of India view with the greatest satisfaction the partition of Bengal; and indeed it will be a sorry day for India if the tactics of the home rulers of Ireland, now being introduced into India, lead to this great act of public policy to be reversed or set aside. The loyally disposed Hindus and Muhammadans feel that Government must with a strong hand put down at once, and *once for all*, what is going round about us. My Lord, I know that I shall be taken as an alarmist, but, my Lord, 'tis the coming events that cast their shadows before,' and I am prepared for all the contumely and odium that will be cast on me, if only I succeed in inducing Government to pause in the course of putting unlimited confidence in the lip-loyal sayings and doings of ill-natured people, and allowing them a free hand so long as they keep outside of the pale of what is defined in the Penal Code as sedition and treason. We only appeal to Government to put down with a firm hand every attempt to sow the seeds of disaffection and to seduce the people from their faith and belief in Your Excellency's Government. These remarks I have, with some diffidence, ventured to bring to the notice of Your Excellency's Council, for knowing as I do of the contumely I shall receive from these newspapers for making them, yet I feel that when we see the standards of the enemy floating from their platforms, and the war cry of Swaraj proclaimed from the house-tops, we cannot remain mere lookers on. And while it is necessary for us to ask the authorities to remedy any inconvenience or hardship the people may be suffering of which we may become aware, yet we feel it our duty to thus publicly protest against good-natured and well-intentioned Englishmen being made the innocent instruments of men who are brewing mischief the consequence of which they have no thought of; and at the same time to declare our confidence in the Government of the country and our faith that it is incapable of knowingly doing the people an injury or a wrong, and that the powers with which Government is vested, to check and put down the act of lawlessness which is rampant in the country, will no longer be allowed to be a dead letter.

"My Lord, I apologise for the length of these remarks, but this meeting is the only opportunity we have of publicly bringing to the notice of Government what the people with whom we are in daily touch, feel and think, and it needs be that in a year's course we have much to place for the information of Your Excellency's Government."

[*Mr. Hall.*]

The Hon'ble MR. HALL said :—" My Lord, I congratulate the Hon'ble Finance Member and the Government on the reduction of the tax on salt and of the postal rates. Burma does not share in the larger change, as the rate which is now to be in force in other Provinces already prevails there, but the more favourable postal rates will be much appreciated.

" The increase recently sanctioned to the Forest establishment and the generous treatment accorded to the Police in the matter of special pensions and otherwise have been received with gratitude in Burma.

" When the Financial Statement was being discussed in March 1906, I ventured to plead for liberal treatment of Burma under the new Provincial Contract. The Hon'ble Finance Member quite agreed that liberal expenditure in Burma was likely to prove productive, and he added that it would be the object of the Government of India to accord it both just and generous treatment. In some respects the new settlement is not unsatisfactory, but taken as a whole, and in one very important particular, it falls far short of our expectations—so much so that if the present arrangement is adhered to the development of the Province will be greatly retarded. The item to which I especially refer is that of expenditure on Civil Works which is 80 lakhs, or 35 lakhs less than the expenditure of the current year and 20 lakhs below the figure recommended by the Local Government.

" The Province is young and expanding. It is still very ill equipped with roads and public buildings. The area of Burma exceeds that of any other Province in the Empire; and though there are large tracts which will never become available for cultivation, yet the area of culturable waste is very much larger than that of any other Province—and waste it will for the most part remain if expenditure is now to be reduced as proposed. It would be easy for me to mention one district after another in which progress has undoubtedly been retarded owing to the expenditure on public works being inadequate; but it will suffice now to take as an instance one portion of the Province which, as it happens, has been under British rule for eighty years.

" The total area of the three southernmost districts of the Tenasserim Division is 22,159 square miles, the cultivated area is barely 600,000 acres, while the culturable waste is nearly 5 million acres. Now, this is not a tract in which the rainfall is uncertain or the soil barren. On the contrary, the rain has never been known to fail and the land is exceedingly fertile, but communications are so difficult that progress cannot be expected without free expenditure. In the delta of the Irrawaddy a network of navigable creeks facilitated extension of cultivation without heavy expenditure of public funds on roads and bridges. Further, inland cart tracks were available over the level plains throughout the long dry season, but this is not the case in the lower part of Tenasserim, nor in other parts of Lower and Upper Burma where lie the millions of acres of culturable waste. People will refrain from bringing such land under cultivation until they see some good prospect of being able to convey the produce to market at a reasonable cost.

" Again, the state of the existing roads in the Province has been a byword and reproach for many years—and this in spite of the fact that a larger percentage of the Public Works grant is being spent on repairs than in any other Province. I do not suggest that the Public Works Department is responsible for these defects—the money allotted has been insufficient.

" Then, as regards buildings Burma is still very ill equipped. Not only are there many large buildings now under construction while estimates for others are under consideration, but there are hundreds of smaller buildings, mostly of timber now more or less dilapidated, which should be replaced by permanent masonry structures.

" Owing to the high cost of living the cost of administration is necessarily high—so, too, are the rates of labour. It is estimated that the cost of Public Works in Burma is double that in India—for every rupee that we spend in Burma we get no more than can be got in India for eight annas. Although, therefore, the standard figure for expenditure on Civil Works is higher than that

[*Mr. Hall.*]

of Indian Provinces, the allotment is not really on a more liberal scale. It appears to provide for the cost of the work being double what it is in India, but not for the equipment of the Province being in a very backward state. If expenditure on Public Works is curtailed expansion and development must be retarded, and it is to be regretted that this great and valuable estate should not be developed to the full extent of its capacities to the benefit of the people and of the Empire at large.

"The revenue is increasing it is true, and the Province will be entitled to a share of the increase; but this will not suffice to cover the growing wants under other heads, and also to maintain Public Works expenditure at a proper level. Nor can this expenditure over and above the standard figure be fully met from the balance. The closing balance this year includes 50 lakhs received as a contribution on starting the new settlement. Without this the closing balance would be at a very low ebb, and the Provincial and Local balances taken together would in the current year have been reduced by 30 lakhs, while the Budget Estimate for 1907-08 provides for expenditure which will reduce the balance by 15 lakhs. The requirements of the Province have not been always fully met. They are increasing steadily and may be expected to increase at least as fast as the revenue. It is indeed unlikely that the large expansion of revenue that we have witnessed in recent years in Burma will continue. Even the Financial Statement which is now under discussion affords ground for supposing that the advance may not be so rapid and so steady as formerly. Thus in paragraph 17 the following passage occurs:—'In Burma, on the other hand, mainly in consequence of floods in some districts, the expansion of the (land) revenue has been less rapid than was expected.' That remark refers to the figures for 1906-07. In 1907-08 a large increase is expected (paragraph 163), but a considerable portion of that increase will consist of 'arrears of the current year due to floods and unfavourable agricultural conditions in some parts of the Province.' Now, this destruction of crop by flood is not wholly the result of abnormally high floods in the Irrawaddy. It is partly due to the decision of Government to prevent systematic bunding on the eastern bank of that river, on the ground that embankments on that side endanger the large and very remunerative works on the west bank. It may, therefore, be anticipated that for many years, even when the rise of the Irrawaddy is normal, a considerable area of rice-land lying to the east of that river will be submerged.

"From the Financial Statement it is also clear that it is not safe to conclude that revenue under other heads will expand in Burma without any check. For instance, in paragraph 19 it is stated that 'the improvement under stamps and excise has been fairly general throughout the country, except in Burma and the United Provinces.' Again (paragraph 128), 'The growth of assessed taxes in Burma has received a check in the current year.' On the other hand, as regards Land Revenue Charges, 'the budget estimate in Burma has proved too low and there is an increase of Rs. 94,000.' And here it may be noticed that while the Province retains only half its land-revenue receipts it has to bear the whole of the land-revenue charges.

"I would further represent that Burma Provincial Revenue suffers in an exceptional degree from the export-duty on rice. Over 80 lakhs of rice export duty are paid annually in Burma, and this is more than 70 per cent. of the total amount so levied in the Empire. Under the Provincial Settlement the whole of this money is Imperial; but one result of the duty undoubtedly is to reduce the price of rice in the Province, and this again leads to the land-revenue being settled on a lower level than would be the case if exports were free. Burma gets a half-share of the land-revenue, and so the export-duty on rice leads directly to loss of Provincial Revenue.

"I would recommend that some compensation be made to Burma on account of its exceptional contribution to this head of Imperial Revenue, and that the additional assignment be such as to render possible an increase of the Civil Works standard figure on the expenditure side from 80 to 100 lakhs.

[*Mr. Hall; Mr. Apar.*]

"Whether one looks at the Provincial Settlement as a whole or solely at this one important item, I can only apprehend that unless the suggested alteration of the Civil Works standard figure is made the already long delayed development of some of the most fertile portions of the Province will be still further retarded, while such districts as are already well populated and extensively cultivated will remain ill equipped with buildings and roads.

"In conclusion I desire to express regret that a settlement more liberal and more in consonance with the needs of the Province has not been accorded."

The Hon'ble MR. APCAR SAID:—"My Lord, I will not take up the time of the Council by repeating at any length what has been said in every part of India regarding the shortage of rolling-stock on our railways. There is hardly a report issued by a Coal Company in Bengal that does not contain some reference to the same thing, and if matters go on as at present, we shall have serious complaints from our local Jute and Cotton mills of the increasing difficulties they labour under consequent on the shortage of coal, entirely occasioned by an insufficiency of rolling-stock. So far as Bengal is concerned the feeling is unanimous. At a meeting of our Chamber of Commerce, held on the 27th February, the representative of the Bengal Coal Company, our premier concern, stated that the Indian Mining Association had lost no opportunity of urging, during the past twelve years, the necessity for ample transport being provided for the coal industry and had been warmly supported by the Chamber; that many of our principal lines of railway are within a few days of stoppage, our mills and other industries are forced to live from hand to mouth, our steamers visiting this, the principal, port of India are forced to leave short of their bunker requirements. Strong words, my Lord, but true in every detail. At the same meeting I had to refer to the same subject in my address.

"Speaking strangely enough on the same day, the President of the Bombay Chamber of Commerce in the course of his able address said:—

'At the present moment there is one bitter cry going up from all over India for wagons to carry the produce of the country. Only a few months ago we heard of the Karachi shippers being unable to get their wheat down on account of an insufficient supply of wagons, the result being heavy losses on account of demurrage, etc. Now we hear of stations filled with cotton and no wagons to take it away; thousands of tons of manganese lying at the stations in the Central Provinces waiting for wagons which do not come. Indeed, it is not necessary to refer to any particular trade as all are suffering alike, and it is difficult to estimate the loss this inability on the part of the railways to supply wagons means to firms and merchants, but it must be very large.'

"I could go on quoting indefinitely complaints on the same subject, but I have no doubt Your Excellency has noted them and no useful purpose would be served by my taking up further time of the Council.

"The Financial Summary and Statement for 1907-1908 has been welcomed by the trading interests of Calcutta on account of the important provisions contained in it towards making up the deficiency in this matter of rolling-stock. The large grant of Rs. 568 lakhs, or 3½ millions sterling, calls for and is receiving the cordial appreciation of the Bengal Chamber of Commerce. We note that the Railway Board report that the provision of 568 lakhs has met in full the demands of all railways for grants for rolling-stock for the year 1907-1908.

"There are, however, two important points to which, in our opinion, prompt attention is necessary, while the Budget does not show signs of meeting them. These are, firstly, a programme for expenditure on rolling-stock over a longer period than one financial year of twelve months; and, secondly, the liberal treatment of what are termed, in the Financial Statement and the Railway Board's memorandum, 'open line requirements,' which we look upon as the provision of facilities other than rolling-stock in order to enable railways to move with despatch and promptitude the increasing traffic. It is shown in paragraph 73 of the Financial Statement that the receipts from the carriage of passengers, goods and minerals on railways have increased during the last eight years from 16½

[*Mr. Apcar.*]

millions sterling to over 27 millions sterling, or by 70 per cent. It is known that during this period charges for carriage have been reduced, so that it is safe to assume that in numbers of passengers carried, and in weight of goods and minerals, the figures have been more than doubled during these last eight years. As rolling-stock represents but a small share of the total initial cost of a line of railway so, as development occurs, must the line as a whole be increased and not its rolling stock only.

"During the coming year on new lines already taken in hand and under construction only $2\frac{1}{2}$ millions sterling will be spent, as compared with nearly $3\frac{1}{2}$ millions in the financial year 1906 1907; while nothing whatever is to be spent on additional lines sanctioned but not commenced, or on lines at present under consideration but not sanctioned. An explanation of the reasons for this decision—want of money and inability to raise it on reasonable terms—is given in paragraph 71 of the Financial Statement; and in paragraph 72 we are told that the Government is considering whether it may not be practicable to dispense with some of the restrictions which now hedge round their railway policy; and, further, that if this can be done, there is hope that a greater degree of elasticity can be imported to the Railway programme. I can only say that the trading community look with every confidence to means being devised to prevent for the future the retardation of Railway progress which is to mark the coming financial year. Such retardation is not permitted either in England or in the United States, or in our own colony of Canada; and in neither of these countries is the return on the capital invested so high as it is in India. I do not think that we in India have so far appreciated the marvellous prosperity of our Railway system. Up to about ten years ago Government was incurring an annual deficit so far as concerns Railways. In the financial year 1899-1900 a profit was made of £76,756, and since that year the increase has been to all intents and purposes continuous, so that there has been a surplus for the year 1905-1906, after paying all charges, of over 2 millions sterling, giving a net return—after paying all charges—of 5·41 per cent on 253 millions sterling capital expended on open lines. 'All charges' include not only interest paid on the capital cost, but also Sinking Fund payments in liquidation of the purchase price of certain lines which have been bought by Government, as explained in paragraph 76 of the Financial Statement. What sums are being expended in this Sinking Fund we are not told, but we know that purchase-money is still being paid for the East Indian, the Scind-Punjab, the Bombay-Baroda, the Oudh and Rohilkhand, the Eastern Bengal and other lines. If such Sinking Fund charges are excluded, as they should be, in ascertaining what percentage railways are paying, that percentage will be considerably more than 5·41 per cent. shown in the Financial Statement.

"Remarking now on the first point to which it is desired to draw attention, we are told in paragraph 74 that it is far from certain whether it will be possible to spend the large sum of 568 lakhs of rupees on rolling-stock, and that if this should prove to be the case, the grant will be redistributed; or, as we understand, spent on open line requirements other than rolling-stock.

"In other words, the liberal grant of 568 lakhs of rupees is only to be paid if it can be spent by the 31st March 1908, and what cannot be spent by that date will be taken away from the rolling-stock provision. Now, it is evident that a large proportion of the grant has only recently been decided upon, and advice given to the Railways concerned; and to this extent these railways can only now be making their arrangements for purchase. The experience is that a full year elapses between rolling-stock being indented for and its supply, and with every effort to expedite supply under the present sanction, part of the orders will undoubtedly be uncomplished with by the 31st March 1908.

"This raises the question as to whether means should not be devised whereby a grant of this character may be saved from lapsing or redistribution by allowing Railways to place orders for delivery in the subsequent two, three or even more financial years, should it be found that makers are so fully booked

[Mr. Apcar.]

with orders that it is impossible for them to deliver all the wagons indented for within the financial year ending 31st March 1908.

"In times like the present, when there is an abnormal demand for new rolling-stock for Railways in Europe and America, it becomes a matter of difficulty to get early delivery of the wagons ordered. Purchasers who are not limited by considerations of 'Budget Allotment,' 'Financial Years' and the various restrictions which the stereotyped procedure of the Government of India imposes on the freedom of Indian Railways, are enabled to place their orders some time ahead of requirements and so ensure delivery when the wagons are actually required. Instead of indenting for the coming financial year only, the Railways ought now to be in a position, should the state of the market render this expedient, to contract for a considerable portion of the rolling-stock required for the next three or four years, so that delivery may not be delayed owing to makers having meantime become filled up with orders from other quarters.

"Two Engineering Firms in Calcutta have recently put down wagon constructing plant, and were there an assurance of increased orders they would doubtless be prepared to extend their workshops. But it is unreasonable to expect firms in India to increase their Capital outlay unless they can rely on keeping their men and machinery fully engaged. There seems every likelihood that the growing trade of India will demand large annual increases to the rolling-stock of the Railways for some years to come. I consider it to be desirable that manufacturers in India should be encouraged to extend their works. This may be accomplished by assuring them of increased and continuing orders if they are prepared to increase their wagon-producing capacity. As about 60 per cent. of the cost of wagons is expended in the purchase of materials in Europe and about 40 per cent. on labour and materials in India, it is expedient in the interests of India and the purchaser that a larger share of the orders should be placed in this country. Manufacturers in India do not ask for preferential treatment as regards price; but being limited to one market, whilst European manufacturers have many outlets for their production, they require an assurance of steady employment for a series of years before facing a large capital expenditure in the extension of their workshops.

"I would suggest, therefore, that such an alteration should be made in our Railway financial arrangements as would enable the various Companies to forecast their requirements beyond the limits of one Budget, and to receive sanction to place orders for more than one year. If it is considered advantageous to look ahead in the matter of construction of lines, it is no less necessary to do so with regard to the equipment of the lines already opened, the growing traffic of which makes it certain that further large additions to the stock of wagons will be required. What would be regarded as prudent procedure in the case of private enterprise may safely be commended as worthy of imitation by the Government of India in arranging for the purchase of rolling-stock.

"The question of open line requirements other than rolling-stock seems to have been somewhat neglected in the anxiety to deal satisfactorily with the rolling-stock problem itself. With nearly 1,000 miles added to the railway system, and a rolling-stock provision more than 50% greater than ever before, railways have nearly 20% less to spend in keeping pace with the growth of traffic. Although it may be the case that with new lines substantial increases may be made to the rolling-stock without corresponding improvements in terminal arrangements, in doubling where a single track has previously existed, in marshalling yards, in quarters for staff, and the like, on older and established lines there must be expenditure on such items to ensure that the additional rolling-stock shall be made proper use of. So far the average work obtained from rolling-stock on Indian Railways has exceeded that on English and American lines, and this may be due to greater foresight in arranging that the lines shall be developed in their entirety, instead of excessive regard being paid to rolling-stock only.

"There have been indications that terminal and junction facilities, and in some cases running line accommodation, have not on the older lines been sufficient to carry the rolling-stock without delays. Two notable instances were

[*Mr. Apcar ; Mr. Gokhale.*]

brought prominently forward in a report made last year by Mr. Wynne, member of the Railway Board. Naihati was found to be totally incapable as a junction to pass traffic through it with anything approaching efficiency, and a new junction on a new site was recommended to cost many lakhs of rupees. The arrangements for serving collieries promptly from loading sidings were characterised as insufficient for the stock then to be dealt with. There is already congestion on the older lines in busy times, and unless there are developments to keep pace with additions in rolling-stock, these cases of congestion must increase and become more serious.

"Another matter of considerable importance to the commerce of Bengal is the question of a Railway Bridge at Sara. The public are not always of one mind, but they are pretty unanimous in their desire for a bridge at Sara and for a broad-gauge railway thence to Calcutta. It came as a surprise to the commercial community when it was known that the Railway Board had recommended a bridge at Rampore Beaulia with a metre-gauge line to Calcutta. I cannot conceive how the Railway Board could persuade themselves to recommend this scheme without further reference to the commercial interests involved. At a meeting with representatives of the Chamber, on the 13th July last, we gave the Board our views on the subject, but were met with a reticence difficult to explain, and which led us to represent the matter to the Secretary of State. On behalf of the Chamber, whom I have the honour to represent, I place on record our appreciation of the assistance our delegates, Sir Ernest Cable and Mr. J. D. Nimmo, experienced from the Private Secretary to Mr. Morley on this subject, and to your Government, my Lord, at the appointment of the Ganges Bridge Commission. The report of this Commission has not yet been published, but on the evidence recorded it is generally anticipated that it will be in favour of a bridge at Sara and prohibition of any metre-gauge line into Calcutta.

"I drew attention last year to the incidence of the Income-tax, and suggested that, as at Home, there should be an abatement or rebate of Rs. 1,500 up to incomes of Rs. 3,600. My Hon'ble friend the Finance Minister joined issue with me on the subject and appeared to consider that a man on Rs. 1,000 a year in this country, if not highly favoured, was not badly off. Neither of us very fortunately have had to try the experiment, but I still adhere to my opinion, and though the matter may not be one of great or general importance, it is quite as worthy of consideration as a reduction in the Salt-tax."

The Hon'ble MR. GOKHALE said:—"My Lord, it is a matter of deep and sincere satisfaction to me that the Government has effected a further reduction in the duty on salt, which will now stand at the uniform rate of Re. 1 per maund both in India and in Burma. In view of the language employed by the present Secretary of State for India, in speaking of this impost last year, such action on the part of the Government has not been wholly unexpected. I only wish the Hon'ble Member had spoken of this reduction with more enthusiasm than he has done. I know my Hon'ble friend holds what may be called orthodox official views on this subject. The Council will remember that last year he told us in his concluding remarks on the Budget that he 'never believed that the tax pressed with undue severity even on the poor.' Again this year he says that 'the salt-tax is the only contribution towards the public expenditure that is made by a large number of the people.' Now the former statement is contradicted by the rapid rise in the consumption of salt which has taken place in response to each successive lowering of the duty and which the Hon'ble Member himself describes as 'remarkable.' No one is ever likely to stint himself in regard to a prime necessary of life such as salt, unless driven to do so by sheer inability to buy the required quantity. No one, again, is likely to purchase more of it than he needs, simply because it is cheaper than it was before. And I think that the remarkable expansion of consumption that has taken place since the duty was first lowered in 1903—from 36½ million maunds, the average for three years immediately preceding 1903, to 43½ millions, which is the Hon'ble Member's cautious

[*Mr. Gokhale.*]

estimate for the coming year, an increase of nearly 20 per cent. in five years—is conclusive evidence of the fact that a high rate of duty entails serious privation and suffering to the poorer classes of the people. As regards the second statement of the Hon'ble Member, *vis.*, that the salt-tax is the only contribution which the poorer classes make to the Exchequer, with all deference I must dispute altogether the correctness of the contention. Why, my Lord, so far from this being the case, the fact is really the other way. I think there is no room for doubt that even now, after these successive reductions of salt-duty, our poorer classes contribute, relatively to their resources, much more than their fair share to the revenues of the State. These classes consist almost entirely of a broken and exhausted peasantry, without heart and without resource and sunk hopelessly in a morass of indebtedness. It is from this peasantry that, over the greater part of India, the land-revenue of the State is derived, and it is the same with Provincial rates. Then the bulk of the revenue from drink comes from these classes. The excise-duty on cotton-goods falls almost exclusively on them. Under Stamps and Registration they pay, certainly, their fair share, and probably more than their fair share, since the bulk of our litigation is about small amounts. Under Forests they have been deprived of their immemorial right to free grazing and free fuel, and the proceeds of these are the only burdensome part of forest-receipts, the rest being fair value realized for timber and other products. Even under Customs, where their contribution is expected to be the least owing to their excessive poverty, the Hon'ble Member's predecessor, Sir Edward Law, once calculated that they paid between 20 and 25 per cent. The only tax from which they are altogether free is the income-tax, and the proceeds of this tax are comparatively small, being under 1½ million sterling a year. Now these, together with the salt-tax, of which the main burden is admittedly borne by them, and the Opium revenue, which is contributed by the foreign consumer, are our principal heads of revenue, and I repeat there is no justification for the assertion that the salt-tax is the only contribution which the poorer classes in India make to the Exchequer of the State. It may be mentioned that Mr. O'Connor, late Director-General of Statistics, in a paper read by him three years ago, described the poorer section of Indian cultivators as a class that 'contributed most largely to the finances of the State.' My Lord, I have made these observations, not in a spirit of mere controversy, but because Mr. Morley's pronouncement of last year on the subject of the salt-tax encourages the hope that we may now look forward to the time when this tax may be done away with altogether, and this consummation is not likely to be forwarded if the Hon'ble Member's views in the matter are allowed to pass unchallenged.

"I am glad to see that my suggestion of last year that, in the general statements of revenue and expenditure, the figures under Railways and Irrigation (Productive works) should be given net has been met more than half-way in this year's Statement by the working expenses on Railways being brought over to the revenue side and deducted there from the gross Railway receipts. This is satisfactory as far as it goes, but it does not go far enough, and I think that the Hon'ble Member, having once begun this reform, must now complete it. He still leaves the interest on Railway debt where it was in the accounts. The result is that the figure of Railway revenue, and through it that of our total revenue, continues to be unjustifiably swollen by the amount of this interest, which already stands at about 10 millions sterling and which will increase from year to year as the capital outlay on Railways advances. The Hon'ble Member observes in this connection :—' We have left the Interest on Railway debt in its original place: to have brought it over to the Revenue side of the account as a deduction from its gross-receipts would have necessitated a large *minus* entry in the column for revenue accruing in England.' And such a *minus* entry the Hon'ble Member wishes to avoid, as it would be unintelligible to the ordinary reader. But there are *minus* entries in several other places in the Financial Statement, and if the ordinary reader does not mind them I do not see why he should mind one more. And in any case it is better to be unintelligible than to be unscientific or misleading. Again, the Hon'ble Member has left the figures under Irrigation as they were before. He says :—' We have not thought it essential to go so

[*Mr. Gokhale.*]

far as the Hon'ble Mr. Gokhale suggested and to show the Irrigation revenue net. I quite admit that the same general principle applies to the Irrigation as to the Railway figures : but the former are not yet sufficiently large to cause any serious distortion of the true revenue and expenditure of India.' But I would respectfully ask—why allow the figures of true revenue and expenditure to be thus distorted at all ? Moreover, it introduces a new element of confusion if Railway receipts and Irrigation receipts, which are both exactly in the same position, are treated in the accounts in two different ways. In these matters it will not do to alter the prescribed forms repeatedly, as that must make a correct comparative view of the financial position over a series of years extremely difficult. And, therefore, now that the Hon'ble Member has already taken in hand this reform, I earnestly hope that he will not stop half-way but will proceed to the end, and place the matter once for all on a proper scientific basis.

"Another suggestion which I had ventured to make last year was with reference to the separation of Local revenue and expenditure from Provincial and Imperial. In his reply the Hon'ble Member had stated that he himself was in favour of the proposal, as the balance of advantage lay in favour of making the suggested change and that the matter was under consideration. I am, therefore, disappointed to find that the old practice is still there, and that there is no indication in the Financial Statement as to what has been the decision of the Government in the matter. The present practice is responsible for a good deal of unnecessary and avoidable misapprehension. Especially is this the case with reference to educational expenditure. Thus in the Financial Statement we are told that the educational expenditure for next year will be 2 millions sterling. I understand that out of this about £800,000 will be Local. But there is nothing in the Statement to show this, and one is apt to imagine that the whole amount of 2 millions will come from Imperial and Provincial revenues. Last year Mr. O'Grady, a prominent member of the Labour party, made an inquiry in the House of Commons as to the amount spent in India from the Indian Exchequer on Elementary Education. The Secretary of State's reply, instead of stating the amount spent from Imperial and Provincial revenues—which for 1904-1905 was, according to a return laid by the Home Member on the table of this Council the other day, only £160,000—gave the figure of expenditure from 'Public funds,' which necessarily was much larger. Mr. O'Grady, not being satisfied with the answer, put after a few days another question asking the Secretary of State to specify how much of that total expenditure from Public funds came from Provincial and Imperial revenues. The reply to this was that the Secretary of State was not in a position to state the amount, but that he would make inquiries ! Now, my Lord, this is not at all a satisfactory state of things. Surely the accounts of the Government of India ought to show what is the State expenditure on Education apart from Local expenditure. I earnestly trust, therefore, that the suggested separation, which the Hon'ble Member himself regards with favour, will soon be carried out and that the Financial Statement for next year will not be open to criticism on this account.

"Coming now to larger questions, I find that I must renew my earnest and emphatic protest against the manner in which our surpluses still continue to be expended as capital outlay on Railway construction. My Lord, I have spoken repeatedly on this subject in previous years, but I feel the injustice of the present arrangement so strongly that I must ask the Council to bear with me while I urge once again, as briefly as I can, my reasons why a change of policy is immediately called for in this matter. This is the ninth successive year when a substantial surplus of revenue over expenditure has been realized, and it is clear that the era of surpluses has not yet come to an end. The total of these surpluses during these nine years stands at the high figure of 37 crores of rupees, or about 25 millions sterling, and nearly the whole of this amount has been spent as capital on Railways. Now a surplus is so much more money taken from the people, either through miscalculation or in other ways, than was needed for the requirements of the Government. And as it is not possible to return this money to the tax-

[*Mr. Gokhale.*]

payers in a direct form, what the Government is bound to do with it is to apply it to purposes which are most calculated to benefit the mass of the people. And the question that we must consider is this—what is the most urgent need of the mass of our people at the present day? Judging from the manner in which the surpluses are applied year after year to Railway construction, one would conclude that in the opinion of the Government what the people needed most was a vigorous extension of Railway facilities. Now, my Lord, I respectfully submit that such a view of the situation is not justified by the circumstances of the country. The claims, for instance, of Sanitation on the attention of the Government are at the present day infinitely stronger and more urgent than those of Railway construction. Already an enormous sum—no less than 400 crores, or 260 millions sterling—has been spent on Railways in India, while next to nothing has so far been expended on the construction of sanitary works. With so many towns in the country decimated by plague year after year, with cholera and malaria committing their havoc in other parts, with the death-rate of the country as high as 35 per thousand as against 16 per thousand in England, I do not see how the Government can continue to leave Sanitation practically to take care of itself. Let the Council consider what difference it would have made to the country if the surpluses of the last nine years—37 crores of rupees—had been devoted to sanitary works instead of to Railway construction! My Lord, we all know that by spending the surpluses as capital on Railways the Government is able in the final adjustment to reduce by a corresponding amount the unproductive debt of the country. And it may be contended that though the surpluses are in the first instance devoted to Railway construction, they are in the end virtually utilised for the reduction of debt. My answer to this is that our debt, by which I mean the unproductive debt of the country—for that is the only real debt—is so small in amount that its further reduction is not an object of much importance. Taking the year 1904-05, we find that this debt then stood at the figure of 60 millions sterling. The 'other obligations' of the Government of India, such as Savings Banks deposits, Service funds, and so forth, amounted in that year to 17 millions. Against this there were cash balances in the Treasuries, here and in England, amounting to 21 millions, and the loans and advances by the Government stood at 12 millions. Our net debt thus is about 44 millions sterling, or less than two-thirds of a year's revenue. This is almost a paltry figure compared with the huge debts of European countries, and the position may no doubt be regarded with satisfaction. But it must not be forgotten that such a result has been rendered possible only by throwing on current revenues for a quarter of a century the burden of all manner of extraordinary charges, which in other countries are usually met out of loan funds. The further reduction of this small debt, therefore, is not a matter of urgency and can well wait, when the money devoted to it may be far better employed in saving the lives of the people. My Lord, it will not do for the Government to say that sanitation is the concern of Local Bodies and it is for them to find the money required to improve it. Most of our towns are extremely poor and the present distribution of the resources between the Government and the Local Bodies is of a most unsatisfactory character. How unsatisfactory it is may be judged from the fact that while there has been a plethora of money in the Government Exchequer for the last nine years, most of our Local Bodies have all the time been struggling with serious financial difficulties and some of them have been in a state not far removed from bankruptcy. Without substantial assistance, therefore, from the Government in meeting the large capital outlay which modern sanitary works require, Local Bodies will never be able to grapple with the problem of improved sanitation: and to my mind there can be no more desirable object on which the Government might expend its surpluses. The Supreme Government should call upon the Provincial Governments to assist sanitary projects liberally out of their own ordinary revenues, and whenever a surplus is realized, it should, as a rule, be placed at the disposal of Provincial Governments for pushing on the construction of sanitary works. I know there is the standing pressure of the European mercantile community to spend every available rupee on Railways,

[*Mr. Gokhale.*]

and these men are powerful both in this country and in England. But, my Lord, the Government must resist this pressure in larger interests, so far at any rate as the surpluses are concerned. 'Time was, not long ago, when the Government never thought of spending more than four or five crores a year on Railways. And ten years ago Sir James Westland protested sharply against the manner in which programme after programme of Railway construction was being pressed on him in breathless succession. It is true that in those days the Railways were worked at a net annual loss to the State, and that in that respect the position has now undergone a change. Still 13½ crores is a very large amount to spend in any one year on Railways, and yet the Hon'ble Member has thought it necessary to be apologetic in making the announcement! My Lord, I have no objection to the Government using its borrowing powers as freely as possible to push on Railways, which now rest on a sound commercial basis. But it seems to me most unfair that the loans thus raised should be supplemented by the proceeds of taxation. Moreover, judging from certain observations made by the Hon'ble Member last year, I believe that another resource, and that a large one, will probably be soon made available for Railway construction, and that will be a strong additional ground for devoting surpluses in future years to the improvement of sanitation.

"This resource is the profit now annually realized by the State from the coinage of rupees. For the current year it has amounted to the large sum of 4 millions sterling, or 6 crores of rupees. Last year it was nearly as large, being 3½ millions sterling, or 5½ crores. Hitherto these profits have been allowed to accumulate at compound interest, and this Fund, which will in future be known by the name of Gold Standard Fund, stands at present at over 16 millions sterling. I think, my Lord, the public has a right to ask that the Government should now state definitely what limit they propose to assign to this fund and how the profits from coinage will be dealt with when that limit is reached. This is necessary in view of the fact that the statements hitherto made on this subject by those in authority have been more or less vague and, in some respects, even conflicting. Sometimes the purpose of the fund has been stated to be merely the ensuring of the stability of exchange, and sometimes the much more ambitious purpose of preparing for a gold currency has been avowed. When the fund was first constituted in 1900, it was in accordance with a recommendation of the Fowler Committee of 1898—which recommendation had been made with a view to the maintenance of a stable exchange. In 1901-02 Sir Edward Law, in speaking of the Reserve, leaned to the view that it would serve as 'a guarantee for the conversion into gold, if required, of the rupee token coinage.' Lord Curzon, however, merely described it as a means of maintaining the exchange value of the rupee at 1s. 4d. In 1902-03 Sir Edward Law again referred to this Fund, and this time he also stated its purpose to be the maintenance of a stable exchange. In 1904 Lord Curzon reaffirmed the same view. In 1905 the Hon'ble Mr. Baker also gave this view prominence in his statement. Last year, however, the Hon'ble Member pushed the other and more ambitious view to the front, and spoke of the time when the rupees would have to be converted into sovereigns. Again, as regards the amount that is required for ensuring stability of exchange, different statements have been made by different authorities. Lord Curzon said that 10 millions sterling would suffice for the purpose. Sir Edward Law put the limit at 20 millions. The Hon'ble Mr. Baker has put it still higher. In 1905 the Hon'ble Member said:—'I should like to see it (the Fund) raised to such a figure as would enable us, in the event of extreme and continued emergency, to reduce the Secretary of State's drawings by one-half for three years in succession, i.e., to something between 20 to 30 millions sterling.' Now, my Lord, all this is somewhat confusing, and the Hon'ble Member will recognize the necessity of making a full and definite statement of the intentions of the Government both as regards the purpose which the Fund is to serve and the limit up to which it is to grow. This is the more necessary because the Fund was created under mere executive sanction without having recourse to the authority of the Legislature, and also because the annual profits from coinage are now far larger than had been anticipated. I think the Government ought to adhere to the idea of the fund merely serving

[*Mr. Gokhale.*]

as a guarantee for the maintenance of a stable exchange. In that case, even the high limit contemplated by the Hon'ble Member would soon be reached and the profits from coinage—a matter now of five or six crores a year—would be available before long to be employed more usefully than at present. On the other hand, if the more ambitious purpose avowed by the Hon'ble Member last year is to determine the policy of the Government, no limit can be foreseen to the accumulation of the Fund. Such a course, in my humble opinion, would not be justified, and I would venture to urge the following objections against it :—

- (a) That a gold currency for India has never been authoritatively proposed as a definite object to be attained. A stable exchange at a reasonable rate is all that successive authorities have sought to ensure.
- (b) That it is wrong to pile up a huge gold reserve in pursuit of an object never proposed or defined or even regarded as attainable within a measurable distance of time.
- (c) That it is looking too far ahead into the future to anticipate the introduction of a gold currency into India.
- (d) The present margin between the value of bullion and the token value of the coin will not suffice to ensure the conversion of rupees into gold, for the moment demonetization is proposed, silver will be depreciated still further.
- (e) Even on the Hon'ble Member's assumption the Reserve can suffice only for the conversion of rupees coined since 1900. The stock of rupee coin of previous years—estimated at about 130 crores by Mr. Harrison the expert—will not be covered by it.

"I trust the Hon'ble Member will set all doubts in the public mind at rest by making a definite announcement of the intentions of the Government in the matter, if not in the course of this debate, at any rate in the Financial Statement of next year.

"My Lord, besides the reduction of the Salt-tax, there are four other interesting and gratifying features of this year's budget. They are the new arrangement for meeting Provincial Famine expenditure, the prospect of an abolition of the Opium traffic, the reduction by half a million sterling of the special annual grant for Army Reorganization and the announcement made on the subject of Free Primary Education. Of these the first does not require more than a passing reference. I think the scheme outlined by the Hon'ble Member is an equitable one and ought to work well in practice. I only hope that the commendable liberality with which the Imperial Government has treated Provincial Governments in this matter will be extended by the latter in their turn to Local Bodies, and that these Bodies, whose resources, even in prosperous years, are meagre and inelastic, will now be relieved of all responsibility for famine relief altogether. This responsibility was thrust on them when the Government of India itself had to struggle, owing to falling Exchange and other difficulties, with a chronic state of deficits. Now, however, that the very tradition of a deficit has been forgotten, no time should be lost in definitely freeing Local Bodies from a burden which should never have been imposed on them.

"My Lord, I have read with sincere pleasure the important statement which the Honourable Member has made on the subject of the Opium-revenue, coupled as it is with a reduction in the area under cultivation for the ensuing year. I confess I have always felt a sense of deep humiliation at the thought of this revenue, derived as it is practically from the degradation and moral ruin of the people of China. And I rejoice that there are indications of a time coming when this stain will no longer rest on us. I have no wish to go to-day into the historical part of this melancholy business. The Secretary of State admitted freely in his speech last year on this subject that there were few things which Englishmen had reason to regard with less pride than this. The only practical question now is, how to put an end to this morally indefensible traffic with the

[*Mr. Gokhale.*]

least derangement in our finances? It has been suggested in some quarters that the British Exchequer should make a grant to India to compensate her for the loss of revenue which would be entailed by the extinction of this traffic. Now, apart from the fact that there is not the slightest chance of England making such a grant, I think the proposal is in itself an unfair one and ought to be strongly deprecated. No doubt there are important questions like the Army expenditure, in regard to which India has to bear serious financial injustice at the hands of England. Then the cost of the civil administration ought to be substantially reduced by a large substitution of the Indian for the European agency in the public service. And if only justice were done to us in these matters, we could let the whole Opium-revenue go at once and yet not feel the loss. But these questions have to be fought on their own merits and they must not be mixed up with this Opium question. So far as the Opium-revenue is concerned, whatever may be the measure of England's responsibility in forcing the drug on China, the financial gain from the traffic has been derived by India alone, and we must, therefore, be prepared to give up this unholy gain without any compensation from anybody—for that would be only another name for charity—when in the interests of humanity this wretched traffic has got to be abolished. Of course we have a right to urge and we should urge that we must be allowed to spread our loss over a certain number of years—say ten years—so that our finances should not be suddenly disorganised. That would be a fair position to take up, and we should have there the support of all right-minded people. But the traffic itself must go and we must cheerfully co-operate in any reasonable scheme for its final extinction.

“My Lord, I am glad to see that the special grant of over two millions a year for the Army Reorganization scheme has been reduced this year by half a million sterling. Considering that the money comes out of the iron grip of His Excellency the Commander-in-Chief, I think we have reason to feel thankful even for this small reduction. Of course, since the total initial outlay on the scheme is a fixed sum, this reduced grant only means that the execution will be spread over a longer period than the five years originally contemplated. Still it sets free for purposes of internal improvement a sum of half a million sterling a year out of current revenues. The Hon'ble Mr. Baker describes the circumstances which have led to this reduction in the following words:—‘The present political situation and the reduced receipts we anticipate from Opium have led us to reduce the normal grant to £1,666,700 during the coming year.’ I am glad to see the reference to the ‘present political situation,’ by which the Hon'ble Member no doubt means the improved aspect of affairs on the North-West Frontier. This is partially endorsing the view of those who have objected to the carrying out of His Excellency's scheme on the ground that it added largely to the burdens of the people at a time when, in view of the improvement that had taken place in the position of things, they were entitled to substantial relief. My other objection to the scheme was on account of its throwing on current revenues a heavy extraordinary charge which should have been met out of borrowings. The surpluses of the last nine years were more than sufficient to meet this non-recurring charge twice over, and as they had been for the most part employed in a way which eventually resulted in a reduction of our debt, it was only an act of bare justice to the tax-payers that this heavy non-recurring charge, instead of being spread over a number of years and thrown on current revenues, should have been met out of loan funds. However, I see in the papers that Mr. Morley has finally accepted the scheme. That being so, I fear no useful purpose is likely to be served by my continuing the controversy in this Council. I only trust that the view which I understand is held by the Government that the scheme will in the end make for economy will be found to be justified, when the time for judging of its correctness arrives. Meanwhile, as there is still much vagueness in the public mind about the nature and scope of the scheme, may I respectfully suggest to His Excellency that it will help to clear away unnecessary misapprehensions, if he will see his way to make an authoritative statement on the subject—as far, of course, as a public statement can be made in a matter of this kind.

[*Mr. Gokhale.*]

" My Lord, the military problem in India may be looked at from four points of view. There is first of all the standpoint of the military expert—the soldier—whose principal idea is to raise the efficiency of the Army to as high a state of perfection as possible, and who wants to take for this purpose all the money he can get. Then there is the standpoint of the average Englishman, who wants to feel safe about India and who is comparatively indifferent as to what burdens are imposed on the people of this country in order that he may feel so safe. That is the way the ordinary member of Parliament looks at this question. Thirdly, there is the standpoint of the Indians themselves—those who have to bear the burden, but have hardly any share in the privileges of the present arrangement. Lastly, there is a standpoint which in a way comprehends or should comprehend all these three, though not necessarily in the same degree, and that is the standpoint of the Government of India. Now, my Lord, when we, the Indian members of this Council, speak at this table on this question, we necessarily approach it from the Indian point of view. It is to express that view that we are here, and though we know that our voice is weak and that what we say is not likely for a long time yet to influence the practical decisions of the Government, that does not absolve us from what is after all our duty to ourselves in the matter. We should be guilty of presumption if we extended our remarks to technical details relating to the Army, on which we are not qualified to express an opinion. But there are certain broad questions of policy—also questions connected with the progress of humanity—which all men of average intelligence may claim to understand and discuss. My Lord, I do not believe that any serious war cloud is likely to appear on our horizon in the near future. I am fortified in this opinion by the high authority of Mr. Balfour and Mr. Haldane. The triumph of Japan in the late war, and the gradual waking up of China and even of Persia—these, if not the overthrow and exhaustion of Russia, are bound to discourage European aggression in Asia for many years to come. Moreover, wars between the great Powers of Europe—and the only war that can touch us is one between England and Russia—are daily growing less and less likely. A comparison of the history of Europe in the 19th century with that in the 18th will show in what direction things have been moving. And the 20th century is bound to be even better than the 19th. The people in Europe are no longer mere pawns on the chess-board of Kings and Ministers. And they are realizing more and more what horrors a war means to them. I think, therefore, that India may well ask to be relieved now of a part of her present Army expenditure. Further, the injustice of the present arrangement, whereby a disproportionate share of the cost of military defence of the whole Empire is thrown on her, must be remedied. Then the status of the Indian officers in the Army, which at present is admittedly most unsatisfactory, must be improved, and higher careers thrown open to them. Lastly, the wrong inflicted on all classes of the Indian community indiscriminately by keeping them compulsorily disarmed—thereby slowly crushing all manhood out of a whole race—must be cautiously but steadily set right. My Lord, I have spoken time after time on these subjects in this Council, and last year His Excellency the Commander-in-Chief, with perhaps a touch of impatience, observed that he had heard my arguments and assertions every year for three years. But, my Lord, is it *my* fault that these things have to be pressed again and again on the attention of the Government? If His Excellency would like to hear less of these complaints, the remedy lies to a certain extent in his own hands. A way must be found out of the present situation, which is no doubt difficult and delicate, but which must not be allowed to continue as it is, simply because it is difficult and delicate. Otherwise His Excellency may raise the Army to the highest pitch of efficiency and yet he will have left the larger military problem in India as unsolved as ever.

" I now come to what is in some respects the most gratifying feature of the present budget—I mean the statement which the Hon'ble Member makes on the subject of Free Primary Education. The statement is brief, but it says enough to indicate clearly the resolute purpose that lies behind it. My Lord, the whole country has reason to feel grateful to Your Lordship's Government for taking up this question in this earnest spirit. The circular letter

[*Mr. Gokhale.*]

of November last and this paragraph in the Financial Statement taken together leave no doubt in my mind that before the hudget for next year is presented, primary education will have been made free throughout India; for I cannot imagine any Local Government standing in the way of the adoption of this measure, since the Government of India is going to find all the money required for it. I am sure we owe much in this matter to the Hon'ble Mr. Baker's active support of the cause. I cannot help recalling that last year when this question was raised in this Council, my Hon'ble friend expressed his sympathy with the proposal in most cordial terms. 'I have', he said, 'the keenest sympathy with every one of the objects on which the Hon'ble Member desires to see public money expended. In particular, I am greatly interested in his proposal for making primary education free with the intention of ultimately making it compulsory. I hope and believe that some great scheme of this nature will eventually be carried into execution.' This was in marked contrast to the reception which the appeal met with at the hands of another member of Government, who, by what must now be described as an irony of fate, then presided over our Education Department and who was therefore the responsible spokesman on behalf of the Government on the subject. Sir Arundel Arundel expressed himself in the matter thus:—'I understand the Hon'ble Mr. Gokhale to advocate universal free primary education throughout India. That would be a large order.' And the utmost that he could bring himself to promise was that the aspiration for free primary education would be 'kept in view as the distant peak to be one day attained while the work of the present must be slow progress along the plain.' What was, however, 'a large order' in March became a very reasonable order in November, so reasonable indeed that the circular letter addressed to Local Governments on the subject showed unequivocally that the Government of India had already made up its mind to adopt the measure. The incident serves only to emphasise the necessity of entrusting the Educational portfolio to such members as feel some enthusiasm for the subject. My Lord, now that the Government has advanced as far as free primary education, I earnestly trust that no long interval will be allowed to elapse before the next step is taken, *vis.*, that of making a beginning in the direction of compulsory education. If His Highness the Gaekwar of Baroda has found it practicable to make primary education compulsory in his State, I cannot understand why the British Government should not be able to overcome the difficulties that lie in its path. The best plan, as I urged last year, would be to confer powers, in the first instance, on Municipal Corporations in cities, with a population of, say, a hundred thousand and over, to introduce compulsion for boys within their areas, the Government of India finding the funds required. The area of compulsion may then gradually be extended, till at last in twenty years or so, primary education should be compulsory in the country for both boys and girls. My Lord, we are already so far behind other civilized nations in this matter that no further time should be lost in making such a beginning. As an eminent German Professor points out, no real economic or social development of a people is possible without the education of the masses. Such education is "the foundation and necessary antecedent of increased economic activity in all branches of national production in agriculture, small industries, manufactures and commerce;" it leads to a more equal distribution of the proceeds of labour; and it ensures a higher level of intelligence and a larger capacity for achieving social advance among the people. It is impossible to over-estimate the importance of this question in the present state of India.

"My Lord, I have so far dealt with various questions arising out of the Financial Statement which the Hon'ble Member has laid before the Council. The question, however, that, in my humble opinion, transcends all others in importance at this moment is how to associate the people of this country with the administration of their own affairs, so that their growing estrangement may be prevented, and, while their self-respect is satisfied on one side, the bond between them and the Empire may be strengthened on the other. The Englishman who imagines that India can be governed much longer on

[*Mr. Gokhale ; Mr. Miller.*]

the same lines as in the past, and the Indian who thinks that he must seek a destiny for his country outside this Empire, of which now, for better, for worse, we are a part—both alike show an inadequate appreciation of the realities of the present situation. The main difficulty in regard to this association arises from the fact that the government of this country is really in the hands of the Civil Service which is practically a caste, with all the exclusiveness and love of monopoly that characterises castes. My Lord, I am speaking in the presence of so many distinguished members of that Service, and I respectfully trust I shall not be considered guilty of rudeness in making these observations. These men, who give on the whole a high average of work, and who moreover feel conscious that they are doing their best, are naturally satisfied with their position, and they expect us to be satisfied with ours. And as they happen to be practically the sole advisers of both the Viceroy and the Secretary of State, no reform which they do not approve has, as a rule, any chance of being adopted. Of course there are exceptions, but I am speaking now of the Service as a class. In a general way they seem to recognize that some advance is now necessary, but when you come to a discussion of different measures of reform, a majority, though not necessarily composed each time of the same individuals, is to be found arrayed against every reform that may be proposed. Thus if it is urged that judicial and executive functions should now be separated, you will be told that that will not do as that will weaken the executive power. If you say that the Viceroy and the Secretary of State should have among their official advisers one or two Indian gentlemen, the suggestion is resisted on the ground that the confidential character of the deliberations in the two Councils will no longer be assured. If you propose that the Legislative Councils should be expanded and improved and they should be entrusted with some degree of power to exercise a check over the financial and general administration of the country, the objection is raised that such a reform will strike at the root of the very constitution of the Government, which, as the Secretary of State said last year, must continue for as long as one can see autocratic and personal. If the reform suggested is that Municipal and Local Boards should now be made purely non-official bodies, freed from all immediate official control, the answer will be that Local Self-Government touches intimately the interests of the mass of the people, and you cannot allow its efficiency to be lowered. And thus we move round and round the fortress of Official Conservatism and bureaucratic reluctance to part with power, without being able to effect a breach at any point. My Lord, this kind of thing has now gone on for many years, with the result that the attitude of the public mind towards the Government—'opinion,' as Burke calls it, which is of greater importance than laws or executive power in maintaining order—has undergone a steady and, of late years even a rapid change. Since last year, the impression has prevailed that the Government has at last decided to move forward and that important concessions are contemplated. I earnestly trust that this impression is well-founded. I trust also that the proposed reforms, when announced, will be found to be substantial and conceived in a generous spirit. My Lord, it is of importance that there should be no unnecessary delay in this matter. The public mind is in a state of great tension, and unless the concessions are promptly announced and steps taken to give immediate effect to them, they will, I fear, lose half their efficacy and all their grace. The situation is an anxious—almost a critical one, and unless the highest statesmanship inspires the counsels of the Government, difficulties threaten to arise of which no man can foresee the end."

The Hon'ble Mr. MILLER said :—" My Lord, at the meetings of this Council in recent years very interesting statements have been made by my distinguished predecessor, Sir Denzil Ibbetson, regarding the policy of the Government of India in its efforts to improve the conditions of Agriculture, to develop Irrigation, to promote Forestry, and to deal with the constant variety of problems falling under the head of Land-revenue. I do not propose on this occasion

[*Mr. Miller.*]

to follow that example. Having only recently joined Your Excellency's Government I have not the intimate acquaintance with all those matters, or with the details of the striking developments that have taken place during the past five years, to enable me to speak with the same confidence as my predecessor; nor have I that personal knowledge which alone can give interest to a statement made for the information of this Council and the public. On these matters of departmental administration I propose, therefore, to confine myself to a few remarks of a general character.

"One subject which I thought it would not be necessary for me to notice today is that of famine. Relief operations have unfortunately been found necessary in some parts of the country and are now in operation, but I did not regard the position as so serious as to require mention in this Council. I cannot, however, allow some remarks which were made by the Hon'ble Dr. Rashbehary Ghose to pass altogether unchallenged. I heard those remarks with regret. The Hon'ble Member claimed to set down naught in malice, but, if I understand his remarks aright, he lent the countenance of his name and the weight of his eloquence to those who will set down much in malice. It is frequently asserted, and still more frequently insinuated, that famines are now of more constant occurrence and are more serious in character under British rule than they were formerly, owing to the gradual impoverishment of the people. Statements to this effect, often repeated and suffered to pass without contradiction, have now come to be accepted as axiomatic and are taken as part of the regular stock-in-trade of journalism. And yet these statements are absolutely incorrect and misleading. I do not for a moment mean to say that the Hon'ble Member committed himself definitely to such assertions, but I say that his remarks will tend to encourage their repetition. I regret the spirit in which these remarks were made, because I have no doubt that the aim of the Hon'ble Member is the same as that of Government, namely, to prevent famine as far as is humanly possible, and where famine cannot be avoided to do everything to alleviate the misery it must cause. I have no doubt that we all give the Hon'ble Member full credit for the honesty of purpose he claims. But if he desires to obtain a reputation for absolute fairness I trust that when he next reviews the subject of the alleviation of famine in the future he will not fail to make himself acquainted with, and to give due credit for, the great strides that have been made in the past, owing to which famines, terrible as they still may be, are not comparable in the distress and misery they cause with those of former times.

"In our Agricultural policy we are now approaching the end of a period of transition. The Department was built up during a long series of years chiefly by the patient and far-seeing efforts of Sir Edward Buck, whose great interest in India makes him still a yearly visitor to its shores. He laid the foundations during years of financial stress, and he recognised that in a branch of work from which no quick and visible returns could be derived, it was the part of true wisdom not unnecessarily to attract the attention of the financial authorities by any excessive demands for pecuniary assistance. He devoted himself rather to economies in the troublesome and often protracted system of land settlement, and in the domain of agriculture to inquiry and organisation, so that when a more propitious time arrived his successors should be prepared to reap the advantage of it. The appreciation by the Government and by the public of the possibilities before the Department gradually increased, the demand for a more active policy gathered force, and at the same time the improvement in the finances of the country enabled the Government to make an entirely new departure. In all the Provinces funds have in recent years been provided on a liberal scale for the expansion of the agricultural organisation for the recruiting of trained experts, for the provision of model or experimental farms, and for the improvement or establishment of schools or colleges. At the same time the Imperial Government has made special provision at Pusa for two definite purposes:—for the highest forms of scientific research and for the higher training of Indian students. We have thus, as I said, been in a period of transition—transition from the ill-equipped state of some years ago, when the staff of the Department was as small as the duties thrown upon it were multifarious—to the

[*Mr. Miller.*]

time when we shall have a strong and, we hope, a capable staff, competent both to grapple with the research work which must be the basis of all progress, and to bring the results before the peasantry, whether with a view to actual improvements or introduction of new staples and new methods, or with a view to the avoidance of the diseases and blights which have caused and do cause almost incalculable damage every year. We have obtained now the greater part of our expert staff, not indeed all we hoped for, but nearly all that can be provided at present, and the immediate future will be a period of training, of organisation, and of consolidation both in the Provinces and in the branches of work directly under the Imperial Government. At Pusa the work of research is now in full operation, the main buildings are nearly complete, and I hope in a few days to inspect their progress. When it will be possible to open the college I am not certain, but I hope at no very distant date, as the work of training is now perhaps the most important of all we have to undertake. The expansion of our provincial staffs is more likely to be delayed by want of men than by want of funds, and I hope to see a large increase in the number and the quality of the students who resort to our agricultural schools and colleges. It is with them indeed that the future must rest; and I hope that the numbers who are willing to devote themselves to what is, after all, the greatest of the interests of India will increase, and that the best brains of the country may be found in the service of its agriculture.

"The Financial Statement deals at some length with Irrigation works. The remarkable results achieved in the Punjab must give satisfaction to all who are interested in the material prosperity of the people of the country and in the growth of its revenues. It will interest the Council, as an example of the manner in which the enthusiasm of our engineers is ever ready to take advantage of the progress of modern discovery, to know that enquiries have been started in the Punjab to ascertain the possibilities of carrying on lift irrigation by electric power. The Province which now undoubtedly offers the most promising field for further profitable extensions of irrigation is Sind. There, owing to the absence of weirs, few of the canals at present carry any cold weather supplies, but with suitable weirs across the Indus vast and promising extensions of irrigation, unequalled I am told in any other part of India, would be feasible. It is possible that three weirs would be required which would break up a long stretch of the Indus into portions of convenient lengths for canals to irrigate the Indus Valley from the confluence of the Chenab river to the sea. In other Provinces equally profitable results cannot be secured, but the Council are aware that in consequence of the Report of the Irrigation Commission we are considering not only the most profitable schemes but also those which would not in former times have been deemed sufficiently remunerative, and that ever-increasing attention is being given to the protection of insecure tracts from famine. Of the many proposals under investigation there are three large reservoir projects in Madras—the Tungabhadra, the Kistna and the Cauvery schemes, the combined magnitude of which is almost staggering to anyone but an Irrigation Engineer. I am not certain that I ought to except even the Engineer, and the Hon'ble Mr. Sim, who has pleaded the cause of Madras, will, I feel sure, admit that projects so vast must be very carefully considered in all their aspects before public funds can be devoted to their construction. In Bombay the Godavari project, estimated to cost nearly a crore, has been sanctioned, and an interesting feature of another protective scheme under consideration in that Presidency is a proposal to use the water not only for irrigation but for the supply of power, the nature of the site lending itself to a scheme for this purpose. In the Central Provinces the largest scheme under consideration is one for irrigation from the Mahanadi.

"I should like to add a few remarks on the Budget proposals from the provincial point of view—more particularly with reference to their effect on the Province I have myself lately administered. In this view I desire to express a very hearty approval of the scheme for making assignments to the various Provinces to build up a Famine Reserve, and I observe that these proposals have been cordially received by more than one Local Government. When the

[*Mr. Miller.*]

provincial contract for the Central Provinces was under consideration, we admitted that we were treated with all the liberality we could expect. There was only one point on which we felt some hesitation, and that was our liability in the event of famine. The Government of India were good enough to make some modification, which relieved us of our more immediate anxieties, but I am very glad to see that a permanent scheme has now been devised, the terms of which are sufficiently liberal, if only we have a few good years to start with, to remove the danger of that dislocation of provincial finance which in previous years has had such a disastrous effect in impeding development. The first year of the new Provincial contract with the Central Provinces has just closed: the contract has worked out better than was expected; the provincial allowances are more than sufficient to meet the present scale of provincial expenditure, and will permit the administration to recover the ground it has lost during a long succession of lean years. That the contract has turned out so well is partly due to a cause that may be held, as the Hon'ble the Tikka Sahib has pointed out in connection with another Province, to have its unsatisfactory aspects—a great development in receipts from excise. The growth of this revenue is very largely due to a change of system introduced in large areas by which the supply of liquor has been brought under better control and its price raised: and so far it is satisfactory. It is also due to good times and to a very extraordinary increase in the wages of our labouring classes, amongst whom the habit of drinking is more widespread than in other parts of the country with which I am familiar. It is possible that these good times have led them to indulge more freely than before, and, if so, this is unsatisfactory; but the possibilities of evil are being recognised, I am glad to say, by the people themselves, and in more than one district temperance societies have been formed. One of these in a remote upland district had, when I last heard of it, obtained considerable success, and its adherents had passed through the temptations of certain festive seasons without lapsing. The local authorities have given their countenance to the movement, and the Government regards it favourably and with interest. Beyond this official action cannot go, but the Hon'ble Member will doubtless be glad to hear that these movements in favour of temperance are springing up amongst the people themselves, with whom rest the social influences that alone can maintain the vitality and ensure the success of efforts at reform.

“My Lord, the Central Provinces are well and ably represented on this Council, but this is the only occasion on which I shall ever have any claim to speak specially on their behalf, and I venture therefore to say that they fully deserve the great improvement in their financial condition that has recently been allowed them. They were described long ago by a well-known Anglo-Indian poet, though in a forgotten poem, as the Cinderella of the Indian Provinces. This description still holds good, for till now they have had no funds with which to make a respectable appearance in public. But they have a keen and, in many parts, a very intelligent population, they have many tracts of unusual fertility, immense mineral resources, and forests which are rapidly improving and which will in the future be a valuable asset. They only require development, and at present their urgent need is an extension of railway communications. Their present railways cannot move even the grain crops in a good year, and even the richest tracts are entirely unprovided with feeders. I share the disappointment caused by the announcement that progress in the construction of new railways will be retarded. It is possible that in the past the provincial aim has been too much to provide railways that would be useful in time of famine. In the circumstances of the time this was only natural. The Province now requires railways in the paying tracts, railways that will assist not only in the transport of its food-grains, but of its cotton and manganese and coal and forest-produce. There is a great commercial future before the Central Provinces, but progress is everywhere hindered by want of adequate transport. I believe that local capital would, though perhaps only to a limited extent, be forthcoming for the more promising lines, and I hope that it may eventually be found possible to devise some scheme that will encourage the local or private investor in this country to come forward to supplement the funds that are provided in the ordinary course of the programme of railway construction.”

[*Mr. Finlay.*]

The Hon'ble MR. FINLAY said :—" My Lord, it is satisfactory to a member who has just assumed charge of the Commerce and Industry Department to find the position of the country so sound in regard to the interests with which he is specially concerned. The figures of the Financial Statement bear throughout clear though indirect testimony to the continued progress of the trade and industries of India. The trade returns afford direct evidence to the same effect : the imports of merchandise in the first 11 months of 1906-1907 exceed those of the same months in 1905-1906, which was itself a record year, by between 5 and 6 crores of rupees : and the exports of Indian merchandise show an excess of between 12 and 13 crores. I may perhaps add that on my return to India, after an absence of more than four years, the fact which has made the keenest impression on my mind is the very great progress which has been made by the country during the interval. In Calcutta, in Bombay, in Madras, in Cawnpore I have seen and heard striking evidence of advance in every direction, and of commercial activity and progress of the most satisfactory kind.

" The members of this Council are aware that the Post Office in India is one of the best managed and most progressive of the departments of the public service, constantly assiduous in meeting and anticipating the needs and wishes of the public. The administration of the Post Office in this country compares favourably with that of any country in the world. I am glad that in this year's Budget Statement it has been possible to announce some important concessions to the letter-writing public.

" The first of these relates to letters to foreign countries. The Rome Universal Postal Conference of last summer altered the unit of letter weight from 15 to 20 grammes, and allowed the British Post Office to declare its equivalent to 20 grammes to be one ounce. India will follow the lead of Great Britain, and from October next the unit of weight for letters sent out of India will be doubled, being raised from half an ounce to one ounce. The rate of postage to countries within the British Empire will be one anna an ounce. To countries not in the British Empire the rate will be $2\frac{1}{2}$ annas for the first ounce, with $1\frac{1}{2}$ anna additional for each additional ounce.

" In almost all the countries of the world the lowest rate for which a letter is carried within the country is the equivalent of one anna. In India, almost alone, there is the specially low rate of half-an-anna. Till two years ago the weight allowed to be sent for this special rate was half-a-tola. From April 1905 this was raised to three-quarters of a tola. In the debate in this Council on March 29, 1905, the Hon'ble Sir J. Hewett stated that the Government of India hoped that the weight might eventually be raised to one tola. We are now in a position to fulfil this promise, and from October next half-an-anna will cover the postage of an inland letter not exceeding one tola in weight. This concession the Government of India intend to be final : whatever alterations may be made in the other units of weight for letters, they do not contemplate any further alteration in the weight of letters charged with the half-anna rate : nor can they hold out any hope of a reduction of the rate below half-an-anna as suggested by the Hon'ble Mr. Chitnavis.

" The half-anna rate is a special rate for light letters peculiar to India. The real unit of letter postage in India, as in other countries, is one anna. Till 1898 the weight covered by this rate was one tola ; in October 1898 this was raised to $1\frac{1}{2}$ tolas, which is the equivalent of about $\frac{2}{3}$ of an ounce. When the unit for foreign letters is raised to 1 oz. it would be impossible to retain unchanged the unit for inland letters. For it would be out of the question to charge one anna for a letter sent from Calcutta to London *via* Bombay and to charge two annas for a letter of the same weight sent to Bombay. From October next the letter unit of weight for inland letters will be increased to three tolas. This is the equivalent of rather less than $1\frac{1}{2}$ oz., and the Government of India do not consider that this increase can be considered as final : they think that the difference between the weight of an inland and of a foreign letter which can be carried for one anna should be considerably greater than 25 per

[*Mr. Finlay.*]

cent. In England a letter weighing 4 oz., the equivalent of about 10 tolas, is carried for a penny; and the Government of India hope, if the Post Office revenues continue to increase, to be able to announce next year a further increase in the unit of weight of inland letters which may be sent for one anna.

"The last valuation of the Postal Insurance Fund showed a considerable surplus, and, with the approval of the Actuary who made the valuation, the Government of India have decided to increase by 10 per cent. the sums insured by the existing premia: thus the monthly payments which have hitherto effected an insurance for Rs. 100 will in future secure Rs. 110. This concession will apply to all policies in existence on April 1, 1907, as well as to new policies from that date.

"I am also able to announce a reduction in a not unimportant telegraph rate. The tariff on telegrams between India and Aden is now Rs 1-5 a word. It will shortly be reduced to one rupee a word. The representations made by the Government of India have secured the consent of the Cable Companies concerned to this reduction, and I hope that the negotiations will before long also result in a corresponding reduction in the rate for telegrams to and from East and South Africa, and the Red Sea Littoral.

"The Hon'ble the Nawab Sahib refers to the question of making railway receipts negotiable instruments. I think he exaggerates the possible effects of this suggested change in the law, and I have never before heard that there was a clash of interests in regard to it between the large and the small trade centres. In any case I could not advise the Government to legislate on such a subject without feeling confident of the fairly unanimous support of commercial opinion.

"The same Hon'ble Member mentions the question of the purchase of stores required from England. The report of the Committee appointed to inquire into the system under which Indian and English stores are purchased for the use of the various departments has been received, and the recommendations made have been carefully considered. The Government will shortly place before the Secretary of State their views on the subject. Until their proposals reach the Secretary of State, I regret to say that we are not at liberty to publish the Committee's Report.

"The Hon'ble the Nawab Sahib and the Hon'ble Mr. Apcar refer to the Ganges Bridge Committee. The report of that Committee has not yet reached the Government, but I understand that it has been signed. When it is received, no time will be lost in taking up its consideration or in forwarding to the Secretary of State the recommendations of the Government of India on the subject. In the meantime the report will be published, and attention will be paid to any public criticisms or remarks which it may elicit.

"The Hon'ble the Nawab Sahib and the Hon'ble the Tikka Sahib of Nabha urge upon the Government to the claims of third class railway passengers for greater comforts and conveniences. The need for this is fully recognised, and I would refer Hon'ble Members to the remarks on the subject in the memorandum by the Railway Board appended to last year's Financial Statement. Although the Board do not recur to the matter this year, I can give an assurance that they have not relaxed their efforts to improve the comfort and convenience of third class passengers.

"The Hon'ble Mr. Apcar has commented on the reduction in the capital expenditure on railways. It is the case that the expenditure in 1907-1908 will be less than in 1906-1907, and also less than the amount entered for the year in the triennial programme which was provisionally sanctioned a year ago. The system of triennial programmes was sanctioned by the Secretary of State in the following words: 'Although I am not able to pledge myself unreservedly to the provision of money for three years in advance, I am willing to adopt the plan of a programme to be prepared each year of the expenditure for the coming three years, and to give provisional sanction beforehand to the expenditure necessary for carrying out the programme, subject, however, to financial exigencies

[*Mr. Finlay.*]

which may compel me to restrict the grant in any year. Although the Secretary of State cannot divest himself of the power of revising the programme in the special circumstances above referred to, it may be understood that the intention is that ordinarily the allocation made in advance for any given year shall not be disturbed.' The programme prepared a year ago for the three years 1905-1907 to 1908-1909 was the first triennial programme prepared and provisionally sanctioned under these orders. And it is particularly unfortunate that it should have been necessary to exercise the reserved power of reduction in special circumstances in the very first year for which a provisional sanction had been given beforehand. I regret the reduction as much as my Hon'ble Colleagues. But we must bow to the financial necessities which have led to the decision. The capital expenditure on railways must clearly be limited by the amount which can be borrowed in the year: there is no possibility of escaping from that limitation, though there may be difference of opinion as to the correctness of the estimate of the amount which it will be possible to borrow in the coming year. Provision has been made for a loan of three crores in India. I believe that banking and commercial opinion in India will endorse the opinion of the Government of India that it would not be prudent to issue a larger loan in India in the coming year. But the amount that can be raised in India is only a small fraction of the sum required for capital expenditure on railways, and the restriction of that expenditure really depends on the amount of sterling borrowing in London. This must be settled by the Secretary of State, who has at his command the fullest information and the best financial advice relating to the London money market. His decision as to the amount which can prudently be borrowed in London next year necessitates the reduction of the capital expenditure on railways from 15 to 13½ crores. While we regret the decision we must accept it; and enough is known in India of the present circumstances of the London money market to explain it.

"The Government of India are fully conscious of the disadvantages which this reduction in the rate of railway capital expenditure entails, and of the disappointment with which it is regarded by the mercantile community and all who are interested in the development of the country; and they recognise that the reduction is particularly inopportune at the present time when trade is exceptionally active, and when the Indian railways are proving increasingly remunerative. It has been necessary to omit from next year's estimates any provision for starting the construction of new lines, to retard slightly the progress of lines under construction, and to reduce to a small extent the expenditure on special works of open lines. The expenditure on rolling stock and on ordinary works of open lines has not been reduced, and the capital expenditure on open lines absorbs nearly three-fourths of the total provision of 13½ crores.

"If we are to reap the full advantage of our large past expenditure on railways and to avoid causing grave inconvenience to trade, we must be prepared to face an increase in the annual capital expenditure on open lines; and, in view of the urgent need for new lines in many parts of the country, we cannot long continue to restrict the expenditure on new construction. Must we then admit that the task of financing Indian railways has attained such a magnitude as to be beyond the power of the Government of India to undertake successfully? Or may we hope to devise some means by which we shall be enabled to fulfil our responsibilities, and avoid in future years a retardation of progress such as that which the state of the money market in London has forced upon us for next year? The Government of India do not despair of finding a remedy and will address themselves to the task.

"One means of relieving the Government of a portion of its difficulties and of increasing the progress of railway construction I may mention. It is private enterprise. In most other countries railways have been built without the direct intervention of the Government; and it has always seemed to me unfortunate that the Government of India has been required to take so large a share in the work of providing India with railways. The policy of giving guarantees was, no doubt, necessary at the beginning. But I myself believe that if during the last

[*Mr. Finlay.*]

thirty years or so the Government had sternly refused to give guarantees or any special assistance to private enterprise, and promoters had known that it was useless to ask for special assistance, real private enterprise would have come forward, and we should by this time have had more railways in India than we have built under the system of almost complete dependence on Government assistance. By private enterprise I do not mean the enterprise which would, while accepting the chance of profit, throw on the Government the risk of loss: I mean enterprise which accepts both the risk of loss and the chance of profit. If private promoters make proposals of this nature, they will find that they are welcomed both by the Railway Board and by the Government of India, and they will not have any unreasonable conditions imposed on them. But I confess that I am not sanguine that private enterprise will come forward so freely as to admit of the adoption of the very radical change in railway policy recommended by the Hon'ble Mr. Chitnavis.

"There is one remedy for the defects of the existing system often suggested in vague terms which I will mention only to reject. It is the separation of railway finance from the general finance of the Government. My Lord, the difficulties in the way of raising money for railway construction are real difficulties, and not difficulties which can be avoided by any book-keeping device. It will not make it any easier to raise the total amount of the loans that the Government require if the loans are divided into two classes, one of loans required for railways and the other of loans required for other purposes; and it would be impossible to give the first class precedence over the second, for when loans for other purposes are required, they are of an even more urgent nature than railway loans. In ordinary years we borrow practically only for capital expenditure on railways and irrigation, and the suggested separation of railway from general finance would have no effect whatever on the only real difficulty of our present system—the difficulty of raising the money required for railway construction.

"The restriction on the amount of our loans, which leads to the limitation of our railway programme, is exercised by those responsible for the decision on consideration of the price at which the loans are likely to be floated, that is, of the effect on our credit in the money market of loans of any required amount. At present our sterling loans are issued at 3 per cent., and at a discount. We cannot largely increase the amount of the loans without increasing the discount. But if we were prepared to pay a higher rate of interest, or to offer subsidiary advantages,—such as a share in the profits of our railways in addition to the fixed interest,—we should probably be able to raise in the London money market larger sums than are now considered prudent. There are of course objections and difficulties in the way of the adoption of either of these suggestions; but they are worthy of consideration.

"The Hon'ble Mr. Gokhale has today made a suggestion which, if adopted, would place at our disposal a considerable annual amount without in any way affecting the credit on the London money market of the Secretary of State. It is, in effect, that further investments on account of the Gold Standard Reserve should be made in our own railways instead of in sterling securities bought in the open market. The annual profits on coinage are, the Council is aware, invested in sterling securities in order to form a fund to be used, when occasion arises, for the purpose of preventing the rate of exchange falling below 1s. 4d. the rupee. Till the sterling investments have reached an amount which shall be unquestionably large enough to secure the object of the fund, no one would propose to divert the profits on coinage to any other purpose. The sterling investments now amount to over 12½ millions; and in addition the Government of India hold in the Currency Reserve and the Treasuries between 10 and 11 millions of gold, which would be as readily available as the investments, or more so, for use for the purpose for which the Gold Standard Reserve exists. In view of these figures the question arises whether the time will not shortly come when it will be unnecessary to continue to add to the sterling investments, and to incur the annual loss of the difference between the rate of interest secured from the investments, and the rate at which our annual loans are issued. That is a question which must be decided without

[*Mr. Finlay.*]

reference to the need of further expenditure on railways, and with reference solely to the sufficiency of the Gold Standard Reserve Fund for the purpose for which it was formed. But if it should be decided in the affirmative, the Government will be relieved of some of its difficulties in raising adequate funds for the construction of railways.

"I have mentioned some possible means of preventing an undue restriction of our capital expenditure on railways in the future: and there may be others. I do not wish to commit myself to advocate the adoption of any of them. But I can say this, that the Government of India will give the matter their early and careful consideration.

"Since I assumed charge of my present office the most important and most urgent question that I have had to deal with has been the deficiency of rolling stock on Indian railways. The Hon'ble Mr. Apcar has today given forcible expression to the general feeling of the public on this subject, and I have no fault to find with the accuracy of his description of the situation. I have received verbally and in writing complaints on the subject from Calcutta, Bombay, and Madras. These representations and the information supplied by the Railway Board leave no room for doubt that there is a serious deficiency in rolling stock, not confined to any particular railway but on practically all railways. The Government of India fully recognise the gravity of the situation which the Hon'ble Mr. Apcar has portrayed. I will not take up the time of the Council by discussing the past causes of this deficiency, except to hazard the suggestion that it is very largely due to the fact that the prosperity of India and the increase in the traffic offering have been very much greater than was foreseen or could reasonably have been assumed in forecasting our future requirements. Neglecting the past, we may confine our attention to the present and the future. As to the present, unfortunately no full remedy is possible: rolling stock takes time to build, and all that can be done is to make full use of the existing stock. I have the assurance of the Railway Board that they and all the Railways concerned have in the last few months been doing and are now doing their utmost to mitigate the present inconvenience by removing any defects in the methods of working the traffic, and to see that the fullest possible use is being extracted from every wagon at their disposal.

"As to the future, the figures given in the Financial Statement show that the Government are taking steps to make good the deficiency in rolling stock. The provision under this head amounts to 568 lakhs. The corresponding amounts in recent years were:—

| | Lakhs. |
|---------------------|--------|
| 1903-1904 | 291 |
| 1904-1905 | 292 |
| 1905-1906 | 279 |
| 1906-1907 | 382 |

"The deficiency in rolling stock was recognised a year ago, and the grant was largely increased in the current year. It has been still further increased for next year. The Hon'ble Mr. Apcar has called attention to the statement of the Railway Board that the provision has met in full the demands of all railways for grants for rolling stock. Special efforts will be required on the part of the India Office to spend the whole of the grant, and no doubt they will be made: the Government of India have impressed on the Secretary of State the urgency of the demands.

"In order to reduce in future years the difficulty of obtaining within the year the rolling stock for which funds are provided, the Railway Board are taking a special step this year a step which will meet with the approval of my friend Mr. Apcar, as it goes a considerable way in the direction which he has just recommended. The Secretary of State has provisionally sanctioned, subject to revision on financial grounds, a programme of railway capital expenditure of 15 crores in 1908-1909 and of 15 crores in 1909-1910. These figures include certain provision for rolling stock—474 lakhs in 1908-1909 and 368

[*Mr. Finlay ; Sir Harvey Adamson.*]

in 1909-1910. The Railway Board have now addressed all the Railway Administrations, informing them of the amount provided in the triennial programme for rolling stock in 1908-1909 and 1909-1910, and have urged on them the necessity of preparing and obtaining sanction to estimates for the rolling stock required in those years, and of sending home indents as soon as possible. This will enable the India Office to make timely arrangements for placing the orders for supply in the two later years covered by the triennial programme. The same instructions will apply to purchases in India. For I may explain—and this has an important bearing on the Hon'ble Mr. Apcar's remarks regarding the encouragement of Engineering firms in India—that in September 1905 the Railway Board issued instructions to the State Railways to call for tenders in India for the supply of 25 per cent. of any sanction for goods stock. I think the Hon'ble Member will admit that this is as great an assurance of steady employment as it would be proper for the Government to give. In addition to orders for goods stock, large and important orders are given to firms in India for structural iron work and ferry plant by the administrations of both State and Companies' lines.

"The above remarks state what is being done to meet what may be termed the current demands of the railways, and to bring the stock of each railway up to its requirements. The Government of India, however, think that the situation demands a further measure of a special character, and they are proposing to the Secretary of State the formation of a central reserve of rolling stock to be at the disposal of the Railway Board for issue to any railway which may from time to time require its own stock to be temporarily supplemented.

"So much for what the Government is doing. Now, I have a suggestion to make to the various coal and other companies who have felt the stress of the shortage of wagons. Could they not take some share in the steps to prevent the recurrence of the grave inconvenience of the past few months? In England and Scotland it is the almost invariable practice of such companies to supply their own wagons: they do not depend entirely on the railways to meet their demands. Cannot Indian companies do likewise? There may be difficulties; but I can assure the various companies that if any of them are ready to supply rolling stock for their own use their proposals will be welcomed by the Railway Board and the Government of India, and that reasonable conditions for the use of private wagons on railways will be agreed to."

The Hon'ble SIR HARVEY ADAMSON said:—"My Lord, the Hon'ble Sir Steyning Edgerley has expressed his disappointment that the Government of India have not been able to move faster towards the Settlement figure for Police expenditure. The figure for the whole of India was 150 lakhs to be worked up to at the rate of 25 lakhs a year. In the first year the Government of India gave 50 lakhs instead of 25, and the yearly rate of 25 lakhs has been maintained and even exceeded since. Up to date the Bombay Government have received 9½ lakhs for recurring expenditure, a much greater sum than they have been able to spend on the purposes for which the grant was made. In consequence of this inability they diverted part of it to the building of the Central Police Training School, an object for which it was not originally intended. The Bombay Government have not been delayed in their reorganization schemes owing to references to the Secretary of State. The superior establishment was sanctioned with retrospective effect, and though the Subordinate Police scheme, owing to a further reference has not yet been despatched to the Secretary of State, the Government of Bombay have been allowed to bring part of the scheme into operation. I may add that it is, of course, the case that the balances of previous years are available for future expenditure. It is quite true that it is desirable that the changes advocated by the Police Commission should be brought to completion at as early a date as possible, but I believe that the Hon'ble the Finance Member is moving as fast in this matter as his resources will reasonably permit him to do.

"The subject of decentralized administration referred to by the Hon'ble Sir Steyning Edgerley is already under the consideration of the Government of

[*Sir Harvey Adamson.*]

India. It is a big subject, and all that I can say at present is that the Hon'ble Member's valuable contribution will receive careful examination.

"With reference to the Hon'ble the Maharaja of Darbhanga's remarks on the subject of cleansing and beautifying Calcutta I am glad to announce that as the result of a conference held at Belvedere, at which I was present, there is every prospect of the scheme for the improvement of Calcutta soon coming to a successful issue.

"The Maharaja has referred to the question of the separation of Judicial and Executive functions. It is a few years now since Local Governments reported on the advantages and disadvantages of the proposal. I am afraid that it will be necessary to address Local Governments again on the question, not for the purpose of ascertaining what can be said for and against it, for that has already been fully discussed, but for the purpose of ascertaining what progress has been achieved during past years in separating the functions owing to the general effect that increase of work always exercises in the division of labour, and what still remains to be done in this direction. There can be no doubt that in many parts of India increase of work, both Executive and Judicial, has tended to a separation of the functions. In the meantime I may say, and I am only stating my own individual opinion formed on a perusal of the reports, that both the Maharaja and the gentlemen who were the authors of the memorial of a few years ago that opened the question are taking rather too serious a view of the present position, and that their arguments refer to a time when the District Magistrate was also the Police Superintendent of the district rather than to the present time when the District Magistrate seldom tries a criminal case and rarely takes part in the investigation of a crime. The District Magistrate who combines in his own person the duties of thief catcher, prosecutor and judge does not exist in India, and has not existed for the past half-century. Still I am not prepared to say that the present footing is in all respects a satisfactory one. I hope that the question will be brought to a solution before the return of the Government to Calcutta.

"The Hon'ble the Nawab of Dacca has referred to the present condition of political feeling in India and to the license of a section of the Press. I say without fear of contradiction that there is no country in the world in which the Press enjoys greater liberty than in India. It has from time immemorial been the policy of Government to refrain from putting the law in motion against the Press except in the extremest of cases. It is unfortunately only too true that in recent years, in the tension of political feeling, a section of the Press has stooped to scarcely veiled sedition. It is a matter that has seriously attracted the attention of Government. I venture to commend its careful consideration to the Native leaders of political thought in India, in whose desire for an enlarged representation of Natives in the administration of the country I can cordially sympathise, and whose loyalty to the British Crown I have never doubted. In particular I would draw their attention to the disastrous influence that a section of the Press exercises upon higher education. It is no light matter that the rising generation of students, to whom, when they are grown up, a large share in the administration of the country will be entrusted, should be taught by their daily reading during their most impressionable years to resent discipline, to condemn authority, and to hate the Government to which the destinies of India have been committed.

"I should have been glad to reply to the remarks made by other Hon'ble Members on matters that concern the Home Department. But in a Department which embraces thousands of subjects it is obviously necessary that a Member of the Executive Government should have at least a day's notice of the subjects that are to be criticised before he can be in a position to answer the criticisms with the authority that attaches to his position in the Government of India. I hope, therefore, that Hon'ble Members will excuse me from replying to criticisms of which I have had no notice.

"But I cannot pass in silence the concluding portion of the Hon'ble Mr. Gokhale's speech, in which he represents the Indian Civil Service as a caste whose only aim is to retain a monopoly of power for themselves. The

[*Sir Harvey Adamson.*]

Hon'ble Member forgoes that the Indian Civil Service is the custodian of the interests of the three hundred millions who inhabit India, and not merely of the small party of perhaps a few millions of whom he is the spokesman. The Hon'ble Member in his tours through India has formulated his demand, namely, self-government for India on the lines of a self-governing colony. We all may be allowed to look forward to the day, far distant, when education will have permeated through India, when the hundreds of races that inhabit it will have attained some measure of homogeneousness, and when such form of administration may be feasible ; but to set up that type of government at the present day as a plank of practical politics is as illogical and absurd as it would be for a teacher to instruct a pupil in the differential calculus immediately after he had mastered the principles of simple addition. If the Indian Civil Service allowed themselves in the present conditions of India to countenance such fads as this, they would indeed be worthy of even greater denunciation than they have received from the Hon'ble Member.

" I will now refer to one or two subjects which may be of some interest to the public. The first of these is the revision of the Imperial Gazetteer.

" In August 1900, when the preliminary operations were being undertaken in connection with the Census of 1901, the Government of India decided to take advantage of the special facilities which these offered for the effective and cheap revision of the Imperial Gazetteer of India through the agency of the provincial superintendents of the Census. These officers had been selected with an eye to their literary aptitude and would, it was thought, on the completion of the Census, be well equipped with material for compiling articles dealing with provinces, states, districts, large cities, etc. The proposal to carry out the scheme of revision on these lines was accepted by the Secretary of State. Under the general plan of revision Mr. J. S. Cotton was selected by the Secretary of State as the English Editor and Sir Herbert Risley was appointed as the Indian Editor, but, owing to the latter's selection in September 1902 as Home Secretary, Mr. W. S. Meyer was appointed Editor for India; and on the latter's appointment to be Finance Secretary, Mr. R. Burn, then provincial superintendent in the United Provinces, was entrusted, in February 1905, with the work. The result of the entire operations will be as follows :—

There will be issued in the first place the new Imperial Gazetteer embracing (a) four volumes on India as a whole, dealing respectively with descriptive, historical, economic and administrative matter: (b) twenty volumes containing, in a general alphabetical arrangement for all India, articles on provinces, states, mountains, rivers, districts, towns, etc., and (c) a concluding index volume for the whole work. The four India Volumes, while forming a component part of the Imperial Gazetteer, will also be issued separately as the Indian Empire series, and each volume will have its own index. In addition there will be the provincial gazetteer, which will be a collection for each British province and Native State of the articles relating thereto which are scattered through the volumes of the Imperial Gazetteer. These articles will be brought together for each province, and the whole series will consist of twenty-five volumes, each volume containing a full table of contents and a separate index. Finally there will be a district gazetteer series, comprising two separate volumes for each district, *viz.*, a main volume containing descriptive matter, and a subsidiary volume giving the more important district statistics. It is also proposed to issue a special atlas in connection with the Imperial Gazetteer. The atlas will consist of 64 plates or separate sheets: and a folding map of India will also be inserted in a pocket in each of the volumes of the Indian Empire series. The work of printing the Imperial and provincial gazetteers has been entrusted to the Clarendon Press, Oxford, but while the former will be published in England the latter will be published in India. The work in connection with the atlas has been entrusted to Mr. J. G.

[*Sir Harvey Adamson.*]

Bartholomew. Volumes I, III and IV of the Indian Empire series will be published very shortly.

"I will next briefly relate the progress that has been made in the reorganisation of the police.

"The reorganisation of the *superior* police establishment for all provinces received sanction during the year 1905 and effect is now being given to the reforms. Sanction has also been received to the entertainment of *deputy superintendents*. The complete reorganisation of the *subordinate* grades of the *district* police has been sanctioned in Bengal, the Punjab, Eastern Bengal and Assam, the Central Provinces, and Coorg. The scheme for the revision of the Burma subordinate police has recently been submitted to the Secretary of State: that for the United Provinces is about to be submitted. Final proposals on certain branches of the subject are still awaited from Madras and Bombay. Meantime sanction has been accorded to the carrying out of immediately necessary reforms on lines suggested by the Government of India. Proposals for the reorganisation of the city police in Calcutta, Madras, and Rangoon have been sanctioned by the Secretary of State. The revision of the similar force in Bombay has been deferred at the request of the Local Government. Proposals for the revision of the railway police in Bengal, the Punjab, Eastern Bengal and Assam, and the Central Provinces were included in the schemes for the revision of the subordinate police of those provinces and have been sanctioned. The Burma general proposals (like the United Provinces general proposals) also include the railway police. The Bombay proposals and the Madras proposals are now under consideration. Proposals are still awaited from the North-West Frontier Province. A sum of Rs. 50 lakhs of rupees was allotted during 1905-06. A grant of 25 lakhs of rupees was made during the year 1906-07, and for 1907-08 a further grant has been made of 30½ lakhs of rupees for the furthering of such reforms as have already been sanctioned.

"It may interest my Hon'ble Colleagues and the public to hear what progress has been made in the scheme for the endowment of a Research Institute for India, which owes its origin to the munificent liberality of the late Mr. Jamsetjee Nasserwanjee Tata. The last information communicated to the public was contained in the Bombay Government Resolution No. 431, dated the 8th March 1905. As related in the papers then published, the Government of India accepted Mr. Lowndes' valuation of the endowment properties, agreed to the proposals regarding the guarantee fund, and consented to make an annual grant to the Institute of a sum equal to one-half of the local assets, subject to a maximum of Rs. 1,50,000, and to make an initial grant of Rs. 2,50,000 towards the construction of the necessary buildings and the provision of scientific apparatus. They also agreed that the administration both of the endowment property and of the Institute itself should be carried out by a scheme under the Charitable Endowments Act providing for the vesting of the endowment property in the Treasurer of Charitable Endowments, and the formation of a Council in which would be vested the general administration of the Trust, the management of the property, and the executive administration of the Institute. Such being the accepted arrangements, the Messrs. Tata were asked to submit an application under section 4 of the Charitable Endowments Act embracing the whole scheme. This they did through their solicitors, Messrs. Ardesir Hormasji Dinshaw & Co., on the 6th June 1906. The scheme was necessarily one of exceptional intricacy and it required careful and detailed consideration.

"Some months before this scheme was submitted to them the Government of India had, at the request of the Messrs. Tata, moved the Secretary of State to enlist the assistance of the Royal Society in nominating a Director for the Institute in the hope that this would materially facilitate the settlement of the remaining details of the project, and would afford a definite guarantee of progress. Dr. Morris W. Travers, F.R.S., Professor of Chemistry at the University College, Bristol, was selected for the appointment, and arrived in India about the middle of November last. Since then he has been engaged in revising the scheme for the Institute in consultation with the Government of India and the representatives of the Messrs. Tata, and his assistance has been of the utmost

[*Sir Harvey Adamson ; Major General Scott.*]

value in working out the numerous points which called for decision. There are now good grounds for hoping that at no distant date the Indian Institute of Science, planned by the foresight and philanthropy of the late Mr. Tata and promoted by the generosity of the Mysore State, will pass beyond the stage of preliminary discussion, which has lasted so long, that a suitable governing body will be organized, and that the actual construction and equipment of the buildings at Bangalore will be commenced. The funds available for this purpose consist of Rs. 5,00,000 from the Mysore State and Rs. 2,50,000 from the Government of India, in all Rs. 7,50,000 for objects estimated to cost Rs. 6,57,000. For the working expenses of the Institute there will be available Rs. 1,25,000 derived from the endowment property, grants-in-aid of Rs. 50,000 from the Mysore State, and Rs. 87,500 from the Government of India, making up a working income of Rs. 2,62,500 as compared with Rs. 1,75,000 mentioned by Sir William Ramsay in his report of 1900 as the minimum sum required for an adequate commencement. With an assured income of this amount it is believed that the governing body will be in a position to procure the most competent teachers, to retain their services for long periods, and to found research scholarships for the encouragement of students. They will in fact be able to carry on their operations on a scale commensurate with the high aims which the founder of the endowment had in view. While sympathising cordially with these aims the Government of India have no desire to associate themselves directly with the actual administration of the Institute or to claim a determining voice in the settlement of the lines of research to be followed or the methods of instruction to be employed. They realise that the results of the experiment that is now about to be tried will depend mainly upon the character and energy of those who come forward to take advantage of the facilities for advanced study which it will offer. They are anxious not to interfere with the free growth of whatever forms of intellectual activity and economic enterprise the Institute may encourage or create, and they will therefore confine themselves strictly to exercising no more than that degree of influence and control which is justified, and indeed rendered obligatory, by the grant-in-aid which they are giving from public funds."

The Hon'ble MAJOR-GENERAL SCOTT said :—" My Lord, the majority of the important measures with which the Department of Military Supply is concerned have already been referred to in the Military Finance Secretary's memorandum, which will be found embodied in the Hon'ble Finance Member's statement. I do not propose therefore to take up the Council's valuable time by repeating information which is already at their disposal, but merely to invite attention to one or two matters which may be of general interest.

" In regard to the delay in manufacture which has occurred in some of the ordnance factories, I should like to mention that this is mainly due to the scarcity of trained labour, the demand for which has become very great all over India owing to the increasing number of mills, factories, and other works which are being installed. The country has doubtless every reason to be gratified at the general prosperity which this demand for skilled labour indicates, but at the same time the scarcity causes considerable inconvenience to superintendents and managers, and it is recognised that every endeavour must be made to attract labour by providing suitable accommodation and healthy surroundings for the native workman.

" The explosions of cordite which occurred at Hyderabad (Sind) and Ferozepore have demonstrated the importance of adopting a more rigid system of periodical expert inspection of this and other war stores, and Government will shortly consider proposals which are being submitted by the Director General of Ordnance for the constitution of an expert Inspection Branch. He is also about to submit a scheme for the reorganization of the Ordnance Department generally, by which it is anticipated that a more complete decentralisation of factory and arsenal administration will be secured.

" In furtherance of the policy of Government to encourage private enterprise, it is intended in the future to obtain from private local manufacturers many articles of army clothing and ordnance equipment which have hitherto been

[*Major General Scott ; the Commander-in-Chief.*]

made in Government factories, and with this object in view it has been decided to abandon the scheme for the permanent establishment of a third Army Clothing Factory at Fategarh.

"The Military Finance Secretary has dealt in his memorandum with the expenditure incurred in the Military Works Services, and I would merely observe that out of the fixed grant of 100 lakhs, approximately, only a small part is expended on new works of a comparatively minor character, the remainder being required to meet ordinary demands for establishment, maintenance of existing buildings, and the other items referred to in paragraph 13 of the memorandum.

"We have every reason to be satisfied with the progress which is being made with horse-breeding operations in the various districts to which stallions under the control of the Army Remount Department have been allotted. The selected young stock resulting therefrom will eventually prove a valuable source of supply for army remounts.

"The operations in connection with the establishment of stud farms at Ahmednagar and Mona with the object of preserving the pure Eastern breeds of horses, and of providing pure bred animals which will be fit for use as Imperial stallions, have so far been very successful. This and the establishment of young stock depôts and runs are the direct outcome of the recommendations of the Horse-Breeding Commission.

"During the past year marine survey work was carried out in the Persian Gulf and on the Burma coast, and in the archipelago to the eastward of the Middle Andaman Islands. One of the vessels was subsequently detailed for special work in the neighbourhood of the pearl banks near Mergui and Tavoy."

His Excellency THE COMMANDER-IN-CHIEF said :—"My Lord, as Your Excellency said at the last Budget debate :—

'The price paid for an army is the premium paid for the insurance of the country. The huge armies of modern nations are not due either to any tendency to over-insure, or to the promptings of mere military ambition. They exist in the first place for the maintenance of peace, because nations must know that on their armed strength depends their immunity from attack. No nation can hope to be great and prosperous without being strong amongst its fellows. Its wealth, the welfare of its people, its commerce, its investments, its interior development, depend on its security from hostile pressure—a security guaranteed only by the efficiency of its military forces.'

"Those words, my Lord, rightly define the principles of our military policy in India. Our arrangements are made to maintain the security of this country and its teeming millions of inhabitants, whom we have undertaken to protect, and for whom we are determined to ensure tranquillity in their homes. Our policy is, therefore, a purely defensive one, for it is most unlikely that we shall ever attack any other Power, or, indeed undertake any military operations, unless the necessity is forced upon us through aggression, or acts which compel us to defend what we hold.

"But whilst it is our duty to maintain adequate forces for the defence of this country, it is equally our duty to see that we obtain the best value for our money. As I pointed out last year, we are seeking to make the best use of the means at our disposal, by overhauling the machinery and reorganising our existing materials ; and I can fully understand the interest that has been taken by the public (as Mr. Gokhale has shown today) in the Redistribution Scheme that is one of the projects on which we are now engaged.

"I have seen it stated that we intend to place a large portion of the Indian forces on the North-West Frontier, whilst others seem to be under the impression that the troops are to be collected together in certain great cantonments. Neither of these statements are in any way accurate. The principles on which we have been working are totally different. The distribution of the Army in India, as it stood before the present changes were introduced, has hardly seen any practical improvement since the days of the Mutiny. The Military areas into which the country has hitherto been

[*The Commander-in-Chief.*]

sub-divided have been mere geographical divisions of varied extent, with a different number of troops in each. They were not such that peace formations were in any degree adapted to the requirements of war. The troops for the various Brigades and Divisions of the field army had to be drawn from widely separated localities, and from different Commands. They could not be trained together in the tactical formations in which they would be employed in the field, and the numerous administrative details, on which every army must depend for its success and very existence, were extremely complex and unsatisfactory.

"These are some of the reasons, my Lord, which rendered it necessary for us to examine the disposition of our forces, and try to remedy some of the most glaring defects.

"We have been attempting to form Divisions self-contained in all respects—not only ready and able to take the field themselves, but also to leave behind, when mobilised, sufficient troops to provide adequately for order and tranquillity in the areas from which they are drawn on mobilisation. It has also been necessary to establish these Divisions on the main lines of railway, in such a manner that they can be transported rapidly when required. For this purpose it is manifestly unnecessary and inadvisable to locate the army on the North-West Frontier. The Divisions will be established 'en echelon' one behind the other on our various railway lines, so that we carry out the principle of conveniently dispersing our troops in peace whilst providing for their rapid concentration in war. It must not be forgotten that distance is a factor of comparatively minor importance in the railway concentration of troops for war. Every one knows that for the successful conduct of military operations many other things are needed besides the actual troops. Stores, food and ammunition have to be supplied; transport collected; remounts arranged for; and numerous other details, such as hospitals, field parks, etc., have to be provided. All these have to be delivered at the various bases of operations—that is, they require 'train-power'; and, however excellent our train service may be, it requires most careful consideration and organisation to enable all requirements to be delivered in a moderate time. It is, therefore, essential that we should so distribute our forces and material in time of peace as to enable a thoroughly equipped army to pass rapidly into a state of war, when required, without unnecessary dislocation and confusion.

"I have already referred to the provision of the necessary internal garrisons that have to be left behind for political purposes when our Army takes the field. Besides these there are two other important considerations which have to be provided for in any scheme of redistribution. These are health and training. We want to move the troops from unhealthy stations, or where they are scattered in isolated detachments, and are no longer required for political or military purposes, and place them in more healthy localities where they can be of greater value in the general scheme of defence. In order to make the best use of our existing material it is not only necessary that we should do all in our power to mitigate climatic effects as far as possible, but it is of equal importance that we should distribute our available forces so as to secure their efficient training in fighting formations in time of peace.

"The ideal would be to have the Brigades organised in peace time in the formations in which they would take the field in time of war—each commanded and trained under its own Brigadier. But this ideal is not entirely obtainable. It is, however, practicable to arrive at an organization and distribution which will meet the essential requirements of the case, enabling the troops to be highly trained on a divisional basis in tactical formations in peace time, and pass rapidly into their war organisation when war occurs.

"These are the main principles of the scheme. It is not one which has been accepted without the most prolonged consideration of all the numerous and complex conditions involved; nor can it be carried to completion for some time, as each step has to be carefully considered in the fullest detail. In every instance sites have to be examined and surveyed; medical conditions have to be reported upon; the water-supply, cost of labour and building materials, facil-

[*The Commander-in-Chief.*]

ities for training, questions of forage and rations, and numerous other considerations must necessarily be examined. It is obvious, therefore, that the matter is one which will take some time to complete. But if carried systematically to a conclusion, we shall be able to deploy approximately double our former strength in half the time—which appears to be worth a moderate expenditure simply in the form of an insurance. Of course it must be understood that the redistribution of the troops costs only a small proportion of the total grant that has been authorised for the redistribution of the army and its reorganisation on a divisional basis.

“ Closely connected with the training and organisation of the troops themselves, is the equally important subject of staff organisation and training, for however efficient the regimental officers and men may be, however brave and devoted—and we can confidently pay that tribute to the magnificent material of which the Army in India is composed—they can only be heavily handicapped if the staff work fails or is found wanting. We have been trying, therefore, not only to improve our staff organisation by an improved distribution of duties; but, by the establishment of the Indian Staff College, we hope gradually to obtain a large body of highly trained staff officers who will be of the greatest value both for peace preparation and in the ordeal of war.

“ Several little difficulties had to be faced at first; but they have all been satisfactorily disposed of, and the new buildings at Quetta will be ready in time for the College to be transferred there next term, where they will have the best possible facilities for learning their important duties, both theoretically and in a thoroughly practical manner. With the permission of the Secretary of State and the courteous assistance of our gallant allies, the Japanese, we are arranging to send a party of these young Staff Officers to Manchuria, where they will be able to study on the ground the course of those recent great military operations and learn the many remarkable lessons which that campaign disclosed. Their tour will, I feel sure, have the best results, and be well worth the small expenditure incurred on their passages.

“ At the Budget debate last year I said that I felt sure my Hon'ble Colleagues do not consider the sepoy overpaid—indeed, having regard to the increased cost of living, I should be somewhat surprised if they did not think the converse to be more correct. Whilst systematically proceeding with our schemes for the general improvement of the Army and its preparedness for war, we have therefore been also considering how we can ameliorate the conditions of the troops themselves within the means at our disposal. The kit money of Native troops is being raised from Rs. 30 to Rs. 60, which will give each man a free kit, instead of his having to pay a large part of the cost himself; a boot allowance will also be given to all unmounted combatants; free passages will be granted to a certain number of native soldiers proceeding to their homes on leave; and revised pension rules for the Native Army have been recommended to the Secretary of State. All these measures will be of great assistance to the native ranks, and will, it is hoped, have a beneficial effect.

“ The British officers, also, have not been forgotten. A revised scale of travelling allowances for all officers has been introduced, which will prevent their being subjected to pecuniary loss, as has frequently been the case hitherto when transferred or ordered on out-station duties. The question of the pay of the British officers of the Indian Army is now under consideration, and I hope that before long it may be found possible to do something to improve the position of the junior ranks.

“ My Lord, I am sure we all fully realise that there is no finality in military arrangements. It is an unfortunate necessity that our measures of defence must be periodically revised in order to keep pace with the progress of other nations and the improvements in their armaments if we intend to maintain our high position in the world. An army is an extremely complicated machine, which becomes more and more complex as new inventions are produced and requires constant overhauling, not only to ensure that each part is thoroughly sound, efficient and suited for its intended purpose, but that all that is not proved to be really

[*The Commander-in-Chief; The Lieutenant-Governor; Mr. Baker.*]

necessary shall be rejected and got rid of. By carefully observing the latter precaution, the cost of essential improvements may be largely counterbalanced by savings effected in other directions; and, if these principles are constantly adhered to, I feel sure that any increased expenditure anticipated from our schemes of re-organisation will be greatly reduced by a sound system of economical administration in the Army."

His Honour THE LIEUTENANT-GOVERNOR said:—"My Lord, I congratulate Your Excellency's Government and my Hon'ble friend Mr. Baker on the favourable and exceedingly lucid Financial Statement which he has been able to submit, and on the cordial and appreciative reception with which it has met. I think it is only necessary for me to say generally that I find myself in full accord with the remarks which fell from my Hon'ble friend at the last meeting of this Council, in regard to all the important features of the budget. I may be permitted to state, in regard to one important subject which is receiving the earnest attention of the Government of India, that I recognise with great pleasure the spirit, at once sober and sympathetic, in which questions affecting Opium revenue and cultivation are being approached.

"Passing to matters affecting the Province of Bengal, I desire especially to express the feeling of satisfaction and gratitude with which the arrangement for meeting expenditure on famine relief has been received. The arrangement seems to me to have been very carefully considered in view of all the circumstances of the case. The immediate result, so far as the Province of Bengal is concerned, is that we shall be relieved of our famine expenditure next year. We can only regret that this considerate measure had not been conceived a year earlier; but of this we cannot complain.

"I desire also to say that the fixed assignment to Bengal seems to me satisfactory, and to acknowledge the fair share of the grants for Police reforms which has fallen to the Province.

"In common with the rest of India, we hail the decision to reduce the salt-duties and the postal rates with great satisfaction. We are also gratified with the practical assurance given in the Financial Statement, that the question of free primary education is receiving careful and sympathetic consideration, and that, although no provision has been made for it in the Budget, Government is prepared to carry into effect at once, even in the course of the next financial year, any suitable scheme that may be adopted."

The Hon'ble MR. BAKER said:—"My Lord, with one exception, I mean the provision of funds for railways, the present Budget has on the whole been favourably received both in this Council and by the public. With reference to the latter, as represented by the Press, I have been struck by the comparative indifference that has been displayed in some quarters towards the reduction of the salt-tax. Some of our friends in the Press seem almost to regard this measure as of less interest and importance than the lowering of postal charges. I do not at all suppose that they really mean to imply anything of the kind; but, in any case, the comparatively languid approval extended to this reduction is in marked contrast to the vigorous appreciation with which the first reduction was received in 1903. It would be possible to draw the inference that the salt-tax at its present, or even at its recent, rate is so low as not to be felt as an appreciable burden, and that its reduction is no longer a matter of pressing consequence to any one. There may be something in this, and the present incidence of the tax is unquestionably very low; but I suspect that the true explanation is quite different. I believe the attitude of the Press means nothing more than that reduction of the salt-tax, now thrice repeated, no longer possesses the virtue of novelty, and has ceased to impress the imagination of the journalist. This view derives some colour from the comments made by most of the Hon'ble Members in Council to-day. They have left us in no doubt as to the way in which they regard the measure. Their view seems to me by far the juster and sounder of the two; and I venture to think that if we had adopted a course which I have seen hinted at in one

{*Mr. Baker.*}

newspaper, and instead of reducing the duty had spent the money on new railway construction, the observations of most Hon'ble Members would have been very different from those which we have heard to-day.

"The Hon'ble Dr. Rashbehary Ghose and the Maharaja of Darbhanga and I think also Mr. Gokhale go so far as to ask for the entire repeal of the salt-duty altogether. These gentlemen are entitled, if they please, to claim the high authority of the present Secretary of State as an adherent of their view. I would, however, remind the Hon'ble Members that on the occasion to which I allude Mr. Morley offered the salutary advice that we should do well to accept the half-loaf which is better than no bread.

"The Hon'ble and learned Doctor has put forward the highly interesting suggestion that in place of the salt-tax we should impose a succession-duty on the estates of deceased Hindus and Muhammadans. This is the second time that a similar proposal has been made in this Council, for it was advocated some ten years ago by the late Sir Griffith Evans. Independently of this it has been considered by Government on at least three separate occasions, once at the instance of Sir Henry Maine, once on the initiative of Sir Edward Law, and again more recently on a limited scale in connection with the Calcutta Improvement Scheme. On all these occasions the verdict was that though possible on paper it was unworkable in practice. The Hon'ble Member will doubtless note that this justifies his reference to Noodle's celebrated oration. The difficulties anticipated arose mainly, though not entirely, out of the Hindu joint family system. Personally I have never felt very confident on the matter, and it is significant that the project should now have again been raised by a distinguished member of the Bar who is himself a Hindu. I will merely say that if the Hon'ble Member is desirous of assisting us to elucidate the matter, we shall be very pleased to discuss it with him in Simla; though whether the proceeds of the proposed duty would be applied for the purpose he has suggested is quite another question, and one on which I can give no assurance whatever.

"The Hon'ble Member has devoted a great part of his powerful speech to the advocacy of a measure on which he justly claims, as a lawyer, the right to speak, *viz.*, the separation of judicial and executive functions. Now, on the merits of this proposal, it would be quite out of place for me to say anything on this occasion. I have my own opinions—they are on record elsewhere—and they will be brought forward at the proper time. But when the Hon'ble Member advocates it on the score of economy, and on the ground that it will directly save money to the State, then I must assure him that to the best of my knowledge and belief he is merely deceiving himself. The Maharaja of Darbhanga seems to me to take a sounder and more cautious view. I have seen Mr. Dutt's scheme, and I have also seen more than one variant of it; and so far as I am able to judge, not one of them could possibly be carried out without an increase of expenditure. I do not say that the cost would be greater than we could afford, or that the representatives of the tax-payers would not be willing to accept it. Neither do I suggest that if the measure is right in itself we should be deterred from adopting it by reason of its cost. But I do affirm that in itself this measure is not a measure of economy, and that it spells greater expenditure and not less.

"The Hon'ble Tikka Sahib of Nabha has urged the formation of a strong reserve for the Native Army. The Hon'ble Member will, I think, be interested to learn that the strengthening of the present reserve (for a small reserve already exists) is a matter to which His Excellency the Commander-in-Chief has devoted much attention, and it has for some years past been included in the list of measures to which the grant for special military expenditure is applied. It is hoped eventually to raise the strength of the reserve to 50,000 men, and though we are still a long way short of this—we have between 29,000 and 30,000 men—still a good beginning has been made.

"The Hon'ble Mr. Reynolds, while welcoming the new scheme for adjusting Provincial Expenditure on famine relief, is of opinion that the maximum

[*Mr. Baker.*]

limit of 30 lakhs proposed for the United Provinces is insufficient. The Hon'ble Mr. Sim expresses the same view in regard to the assignment of 25 lakhs for Madras. I have explained in the Financial Statement the way in which these various maxima were fixed. I admit, however, that the precise figures are empirical, and if we find in practice that they are unsuitable, we shall not hesitate to revise them.

"Both Mr. Reynolds and the Hon'ble Munshi Madho Lal have renewed the appeal made by the Hon'ble Rai Sri Ram Bahadur and Mr. Porter last year for additional assistance to the United Provinces. I readily admit that the wants of this Province are many, and also that the terms of its present settlement are less favourable than those of settlements made more recently with other Provinces. Still, I hardly think the Local Government is quite so badly off as the Hon'ble Members paint it. It should be remembered that we have just reimbursed Provincial finances the considerable sum of 28·35 lakhs which they had spent on famine relief. We have also made over to them Rs. 9,80,000, which was the balance of the Patwari fund, and is available for general provincial expenditure. Including these windfalls, the Province starts the new year with a cash balance to its credit of over 62 lakhs, and it only proposes to draw upon this by a little less than 5 lakhs in the course of the year. The proposed outlay on public works is greater than that of any Province except Burma, Bengal, and Bombay, and its educational budget, though it may be as small in proportion to population as Mr. Reynolds asserts, is nevertheless greater than that of any Province except Bengal, Bombay, and Madras. In these circumstances, I hardly think it can fairly be regarded as being in serious financial straits.

"However, I have a crumb of comfort for the Hon'ble Members. Last year I threw out a hint that we might possibly undertake the revision of the settlement before long. During the past year I have had some discussion with Sir John Hewett on the subject, and it was agreed between us that this should be taken up during the ensuing year. I shall then take care to see that the new settlement incorporates all the latest improvements, and is framed on the most liberal scale which the state of our finances will permit. It is also our intention to revise the settlement with Madras, if the Local Government desires it. It is true that Madras is extremely well-off at present, having an opening cash balance of 103 lakhs of rupees - larger than that of any province except Burma. But the settlement is one of the older ones, and is less favourable than those made more recently, and we desire to place all Provinces as far as possible on equal terms.

"The Hon'ble Munshi Madho Lal has evidently formed a magnificent conception of the obligations of the British bridegroom towards his Indian bride. His princely dream of a grant of 50 millions a year from the British treasury, even for a few years only, opens up an alluring prospect to us who are responsible for Indian finances. But I fear the suggestion is likely to meet with a chilling response from the House of Commons and the Chancellor of the Exchequer.

"I am sorry that the Hon'ble Mr. Hall thinks that the Settlement recently made with Burma is not sufficiently liberal. We recently received a representation from the Local Government to the same effect, and the terms were again fully considered, with the result of confirming us in our view that the settlement is not only fair but generous. I am not prepared to admit that the cost of all public works in Burma is or ought to be double that of similar works in India; but even if that were conceded, I would observe that no other Province in India has received a larger standard assignment for this purpose than 45 lakhs—and only one has received so much. The standard of 80 lakhs allotted to Burma in our judgment is quite adequate. But if the Local Government wishes to spend more, it has ample funds for the purpose, and it has in fact provided for a grant of more than 100 lakhs during the ensuing year.

"I am quite unable to follow the Hon'ble Member's argument that the export-duty on rice entitles Burma to compensation. If this duty does tend to keep down the land-revenue, which is open to argument, this effect is already allowed for in full in the estimate of land-revenue assumed as the

[*Mr. Baker.*]

standard. The Hon'ble Member does not allude to the fact that Burma oil is admitted into India free of duty, and that our Customs receipts are suffering in consequence. I do not propose to make any claim on Burma for compensation on that account.

"In the interesting and suggestive speech of Sir S. Edgerley a number of questions have been raised, some of which will no doubt engage our attention during the summer. I am glad that he, in common with every Member who has referred to the subject today, approves of the new arrangement for the adjustment of famine relief charges. I do not, however, quite understand his regret that we have not moved faster in regard to police reform. As Sir Harvey Adamson has explained, it was contemplated from the outset that we should work up to the full charge of 150 lakhs in 6 years, at the rate of 25 lakhs a year; and as a fact, we have gone rather faster than this. The reason why the additional grants to Bombay and Madras for 1907-1908 are somewhat small is that those Governments have so far failed to spend the grants already allotted to them. I have every reason to believe that, within the next two years, grants will be made which will enable each Local Government to work up to its final settlement figure; and perhaps this assurance will encourage the Bombay Government to use part of its exceedingly large cash balances in pushing on with the schemes it has in hand.

"As regards the debts of the Thana circles in Kathiawar and Guzerat, the position is one of considerable difficulty. It seems unfortunately to be clear that some of these petty estates are absolutely unable to meet the cost of protecting their own people from famine. Where that is the case, there seems no option but to accept the liability as a charge against Indian revenues. But such a result is neither just nor logical, and before it can be admitted we must make very sure, in justice to the general tax-payer, that it is really impossible to recover the whole or part of the charge from the proprietors.

"I am in cordial agreement with the Hon'ble Member in his desire for greater devolution of financial authority to Local Governments, and I am convinced that some such measure is essential if we are to effect a material reduction in the ever-growing mass of official business. I may take this opportunity to mention that we have recently addressed the Secretary of State, in the hope of obtaining an extension of our own financial powers, and if our proposals are sanctioned, it is our intention to pass on a corresponding increase of power to Local Governments. I do not however feel particularly drawn towards one specific proposal put forward by the Hon'ble Member. I can well believe that the condonation of financial irregularities is a matter of greater importance in some provinces than in others. If the Hon'ble Member considers that the mass of business in the Bombay Secretariat would be greatly reduced if they were no longer required to send up cases of infringement of financial rules, I shall certainly bow to his superior knowledge. But I have not observed that any other province has experienced the same necessity; and I am disposed to think that most legitimate requirements are covered by the powers embodied in Article 278A of the Civil Account Code which came into force a few years ago, and to which the Hon'ble Member has made no allusion.

"I have listened with great interest to the Hon'ble Member's suggestions for a broad and elastic measure of devolution—financial, administrative, and statutory—for its periodical examination by a Committee of this Council, and for the eventual formation of local Committees to be associated with Commissioners and heads of districts. These important and far-reaching proposals would require to be considered by the Government of India as a whole. Speaking for myself alone, I will merely say that I heartily concur in the principles underlying them, and if a workable scheme based thereon can be evolved, I do not doubt that it will tend to the unqualified advantage of the administration.

"The Hon'ble Nawab of Dacca and also Mr. Chitnavis have urged the claim of India to receive compensation from the British treasury for the possible loss of our opium-revenue, and has reminded us of the remarks made by the

[*Mr. Baker.*]

Secretary of State on this subject in the House of Commons. On the other hand the Hon'ble Mr. Gokhale has vigorously maintained an entirely contrary view. The Hon'ble Members may rest assured that this aspect of the question has not escaped our attention; but it is not one on which it would be appropriate for me to make any statement. Dr. Rashbehary Ghose has reminded us that threatened men live long, and he at least evidently has little expectation that the revenue will be lost at all.

"I have heard the Hon'ble Nawab's demand for an all-round increase in the numbers and pay of the public services with astonishment and something like dismay. I have now been connected with the Finance Department of the Government of India for five years continuously, and during the whole of that period I do not believe that a single day has passed on which I have not been called upon officially to assent to an increase of pay of some appointment or group of appointments, to the reorganization of some Department, or to an augmentation of their numbers. All experience proves that wherever revision is needed, either of strength or emoluments, the Local Governments and the Heads of Departments are only too ready in bringing it forward. Nor are the members of the various services at all backward in urging their own claims. I cannot in the least recognize the necessity for imparting an additional stimulus to this process. On the contrary, I believe that all that is necessary is continuously being done. In this view I welcome the remarks of the Hon'ble Saiyid Muhammad, though I am not very sanguine that the urgent needs of India will permit of any actual reduction.

"The Hon'ble Maharaja of Darbhanga has made some remarks regarding the food-grain supply of the country and the regulation of exports of grain. There is no doubt that prices have ruled very high during part of the past year and some inconvenience has been caused to certain classes of the population. I am not in a position to assign the cause of the rise, though some reasons have lately been suggested in reply to an interpellation in the Bengal Council, but at all events it is certainly not due to any increase in exports. The total exports of rice during 1906-07 are estimated at 37½ million cwt. compared with 43 millions last year and 49½ millions in the year before and I have explained in the Financial Statement how considerably this has affected the receipts from the export-duty.

"I have seen it stated in the papers that a committee has been formed under the presidency of the Hon'ble Maharaja to consider the situation and, if possible, to devise measures to meet it. It will be of interest to see what comes of this movement, but personally I should hesitate to express a sanguine view. The price of rice, like that of other staples, is dependent on economic laws, and attempts to interfere with the operation of these are not likely to achieve much success. I think it probable that my Hon'ble friend will find, as a result of his enquiries, that the inconvenience which undoubtedly exists is confined to a comparatively limited number of people. For instance, it can scarcely extend to the agricultural classes, who form 80 per cent. of the whole population, and who must be gainers in the long run by the rise in value of what they produce. The principal sufferers are, I expect, the smaller salaried classes, the poorer *bhadra-lok* on fixed incomes. These are certainly deserving of sympathy and assistance, and if the Hon'ble Maharaja's Committee is able to devise any means of mitigating their difficulties, its labours will be deserving of encouragement. Until we see what the Maharaja's Committee elicits, I do not think that there is any occasion for a Government Committee of enquiry.

"The cost of the Army has, as usual, formed the subject of adverse comment. One Hon'ble Member has reminded us that, while a man in a small way of business may insure, yet a man with a great business often does not insure. The inference suggested seems to be that a small country might properly maintain a strong Army, but that a great country with world-wide interests should only keep up a small one or none at all. I would merely observe that no civilized country of modern times has ever acted on such

[*Mr. Baker.*]

a principle. The Army of India is not excessive for its area or population. It numbers less than 230,000 men, all told, which is barely one fighting-man per 1,000 of the population. Even the petty Kingdom of Belgium, whose population is under 7 millions, has an army whose peace strength is 50,000, equivalent to one per 140 of the population. It may be alleged that the cost of our Army is heavy in proportion to its numbers. I admit the fact: I regret it, and I would gladly see the cost reduced. But I will venture to assure the Council that, to the best of my knowledge and judgment, at no time with which I have personal acquaintance has India received better value for every penny she spends on her Army than she is receiving at the present time.

"I am not sure that I follow the Hon'ble Mr. Chitnavis's remarks regarding the loss which he apprehends results from our sterling loans. It is quite true that during the current year the sterling loan is likely to be raised at an exceptionally unfavourable rate. But even if it should be floated at so low a rate as 90, the true interest works out to only $3\frac{1}{2}$ per cent., whereas it will be seen from the Financial Statement that our Railways are now returning nearly $5\frac{1}{2}$ per cent., while our Irrigation Canals yield a still more favourable return.

"Neither do I understand the complaint that the Railway surplus is only 1 per cent. on the capital charge. It almost seems as if the Hon'ble Member had forgotten that this surplus of 2 millions sterling means the excess after deducting all charges for interest and for annuities for the purchase of Railways that have been brought under this system. This has frequently been pointed out on former occasions. Our Railways do not now impose any burden whatever on Indian revenues; but on the contrary afford considerable relief to the taxpayer. Why it should be suggested on financial grounds that we should hand them over to private enterprise I am unable to understand.

"There is much in Mr. Gokhale's speech which does not fall within my province to deal with. With many of his observations I am in hearty agreement, but I do not propose to refer to these matters at present, and shall confine my remarks to those points in which I have the misfortune to differ from him.

"The Hon'ble Member takes exception to my statement that the salt-tax is the only contribution towards the public expenditure which many of the people pay. I hardly think that the Hon'ble Member correctly quoted my remarks; I did not say that the tax was the only contribution which the poorer classes pay: that is quite a different matter. I must adhere to my view. I am happy to believe that there are many millions of people in India who do not contribute a penny towards the excise-revenue; and though Indians are often said to be litigious, yet every district officer knows how many there are who never enter a Law Court during their whole lives, and who are wholly innocent of any share in the revenue from stamps. Grazing dues and fees for firewood are payment for services rendered. It would be as unreasonable to regard them as a contribution to the State Exchequer as money spent on buying postage stamps or railway tickets. The case of land-revenue is different and more debatable, but the Hon'ble Member is doubtless aware that many authorities, including Sir Henry Fowler, hold that land-revenue in India is not taxation but rent, and it is in that view that my statement was made. When the Hon'ble Member mentions provincial rates, he must surely have forgotten that since the abolition of village service and famine cesses during the last two years, the only provincial rates that remain are those which appertain to local, and not to general revenues. Cotton Excise-duties I must admit that I forgot when making my statement: but as these amount only to 29 lakhs spread over a population of nearly 300 millions, the incidence works out to approximately one rupee among 100 of the population. I concede that point to the Hon'ble Member. As regards Customs, I well remember Sir Edward Law's statement; but he was then endeavouring to enumerate those of our imports which were imported for the benefit of the poorer classes, and it was in this view that he included such articles as railway material, machinery, and mill work. I am prepared to maintain that there are numbers of the people who do not contribute towards the Customs-duties, even indirectly. At the

[*Mr. Baker.*]

same time I am glad to believe that this state of things is slowly passing away with the growing spread of prosperity among the masses.

"Mr. Gokhale is quite correct in saying that the present method of showing the charges for interest on Railway debt involves a minus entry on the expenditure side of the account. To have transferred this minus entry to the revenue side would not, I think, have been an improvement, and that is one reason why we have decided not to do so. But I am not satisfied that the existing method of exhibiting interest charges is altogether satisfactory, and the matter is receiving attention.

"As regards the exclusion of local figures from our accounts, I may explain that the work involved is exceedingly laborious. It necessitates the detailed examination of the receipts and expenditure of many hundreds of local funds scattered all over India, in order to determine which items should properly be incorporated in general revenues, and which should be excluded altogether. This examination is being made, but it will take some time longer, and I am unable to say when it is likely to be completed. Moreover, as I intimated last year, it is impossible to predicate what view is likely to be taken of the measure if it is eventually submitted for the decision of the Secretary of State.

"I am not at all sure, however, that this measure, if it should ultimately be adopted, will give the Hon'ble Member what he apparently requires. Our accounts do show the expenditure incurred under each head of charge, but they are not constructed to show the sources from which the expenditure is met, and, broadly speaking, they could not do so without being entirely recast, if at all. For instance, a large part of the so-called local expenditure is met from funds placed at the disposal of local bodies by Government, and does not represent expenditure from the proceeds of local taxation. If any one wishes to get more minute details, I think he will have to refer to the departmental reports.

"The Hon'ble Member has renewed the criticism which he made last year on the disposal of our surpluses. He objects to their being spent on railway construction or applied to the reduction of non-productive debt; and he urges that they should be devoted to large schemes of water-supply or drainage to improve the health of the people.

"I will not stop to observe that a great part of the surpluses of recent years has arisen from unexpectedly large receipts from opium and great development of our railway earnings and has involved no burden upon any one. It is quite true that during the last nine years we have been favoured with a succession of surpluses, some of which have been of large amount: and that during this period the process of transferring debt from the non-productive to the productive account has proceeded apace, perhaps more rapidly than is really required. But if we take a longer survey, the position is entirely altered. I have looked up the figures for the last 30 years, beginning with 1877-78. During this period, there have been 19 years of surplus, 10 years of deficit, and one year of practical equilibrium. If we deduct the aggregate deficits from the sum of the surpluses, we shall find that the net surplus for the whole period amounts to just over 31 crores, *i.e.*, it has averaged a trifle more than one crore per annum during the whole 30 years. I do not think it can be reasonably affirmed that that is an excessive sum to apply out of surplus revenue towards the reduction of our non-productive debt. If any one should argue that we are more concerned with the present than with the somewhat distant past, I would remind him that in 1896-97 the non-productive debt was increased by £162,000, that in the following year it was further increased by £2,195,000, and that in 1900-01 it was again increased by £2,713,000. This has all happened within the past 10 years, and it would be a rash thing to predict that it will never happen again. However, I do not wish to press this argument unduly. Having regard to the very moderate figure at which our non-productive debt now stands, I am disposed to think that an average annual reduction by one crore or perhaps a crore and a half is sufficient to pay it off within a reasonable time, and that so far as sinking fund operations are concerned we need not attempt to go faster.

[*Mr. Baker.*]

"That however is not all. We have to consider the matter from the standpoint of railway construction. The Hon'ble Member has referred to a suggestion which I made last year, and which my Hon'ble Colleague Mr. Finlay has mentioned today, to the effect that possibly future accretions to the Gold Standard Reserve might be used to provide adequate funds for financing the Railway programme. I certainly think myself that this is a promising resource. But there are two points to be considered in regard to it. In the first place, it will not become available until the invested portion of the Fund is considerably larger than it is now. At present the investments are a little less than 13 millions, and until the figure reaches 20 millions or such larger sum as may be found necessary, I do not think we should be justified in locking up future additions in a non liquid form. It will probably be several years before this limit is reached. The other consideration is of a different nature. The earnings of our Railways and Canals are received in rupees: and if we invest any part of the Gold Standard Reserve in them, we must expect to be told that we are placing the Fund on a silver basis instead of a gold one. I am myself disposed to think that after the Fund has reached a certain figure this might quite safely be accepted; but there can be no assurance that such a course would commend itself to the public or to the Secretary of State. Unless and until these two objects can be attained, *i.e.*, until we can provide adequate funds for productive public works, and can also reduce our non-productive debt by about a crore of rupees a year, I cannot agree that the proposals of the Hon'ble Member are a matter of practical politics. If we can arrange for them both, and still have a surplus, then I agree that we shall have to consider how to dispose of it. It must be spent and must not be hoarded; it may be that some of the objects to which he has referred may be selected. But even then I venture to doubt whether any really large scheme of sanitary reform can properly be financed from a series of fortuitous and fluctuating windfalls. Revenue surpluses are necessarily wanting in the essential feature of regularity and continuity: and if we relied on them to finance such measures as the Hon'ble Member advocates, we should speedily find him or his successors expressing the most lively dissatisfaction at the wasteful stoppage of work or curtailment of funds. If these measures are as urgent as the Hon'ble Member holds them to be—and I certainly do not dispute his contention—then the best prospect of getting them promptly accepted and continuously carried into effect is to get them placed on the regular Government programme and financed from current revenues in the ordinary way.

"The Hon'ble Member will excuse me if I decline his invitation to make an announcement of the intentions of Government as to the purposes and limits of the Gold Standard Reserve on the present occasion. I admit that the time is approaching when it will be necessary to consider whether any, and if so what, limit should be put on the amount of the invested portion, and this question we shall take up without delay. Until that has been done it would be premature, and possibly embarrassing, to make any public declaration of policy.

"I do not propose to notice further the remarks of Hon'ble Mr. Chitnavis regarding the Gold Standard Reserve. I think that, if he will take the trouble to study what was said in the Financial Statement both this year and on former occasions, he will find an answer to most of his questions and a full explanation both of the genesis of the fund and of the objects for which it was originally established.

"With regard to the provision of funds for Railway construction, I desire to associate myself with what has fallen from the Hon'ble Mr. Finlay and I will not go over again the ground he has traversed. In particular I entirely agree in his criticism of the suggestion, of which we often hear, that Railway finance should be separated from our general finance. I should like to add a few remarks on my own account on this subject. I suppose the idea is that if the requirements of Railways are treated as part of the loan requirements of the country as a whole, the Railway Administrations are hampered in some way in obtaining the full amounts they require. People perhaps argue to themselves

[*Mr. Baker.*]

somewhat as follows : a Railway Administration applies for half a million for rolling-stock. The Railway Board, however, replies that the total allotment for the Railway programme is only so much, and that the share which falls to the lot of the particular Administration for rolling stock is only £300,000. The Railway therefore gets £200,000 less than it wanted ; and the inference is that if Railway borrowings were treated as a thing apart from our loans for other purposes, it would have got the full amount.

"I doubt whether there is any foundation for this inference, and my belief is that if the suggestion is followed up to the end, it will be found to resolve itself into the proposition that we ought to increase our borrowings for Railway construction, even though we may have to pay a higher rate for the money. That may be a perfectly legitimate conclusion, and even a necessary course of action. But it is an entirely different thing from the suggestion to separate Railway finance. The latter measure by itself would not, I believe, in any way tend to increase the sums available for Railway construction, and might even have the contrary effect.

"The essential thing to remember is that we cannot in any year raise on reasonable terms any larger amount than the market is able to supply. That is the final and ultimate limit on our borrowing, and it applies with exactly the same force whether we raise a single consolidated loan for all purposes, or whether we issue a separate loan for railways only and another one for other purposes. If we attempt to get more than this in the aggregate, the result will be either that we shall fail to get the full amount, or that we shall have to pay more for it.

"It is not possible to give priority to Railway loans. Apart from railways, the only objects for which we borrow are irrigation, war and famine. Irrigation may be left out of account for the present purpose, for the amount we ordinarily spend on it is only 125 or 150 lakhs a year, and this is covered, and usually more than covered, by the supplementary funds provided from non-loan sources as explained in paragraph 71 of the Financial Statement. There remain only war and famine. Manifestly, if we had a war or a famine on hand, and were unable to finance it from current revenue, we should be forced to borrow for it : and the need would be imperative and urgent, and must be given priority over the demands for railways. If, therefore, the market is only prepared to supply, let us say, 10 millions in a particular year on reasonable terms, and 8 millions are required for famine relief or for war, the latter demand must first be met in full, and there remains only 2 millions available for railways. The result is exactly the same whether we raise the Railway loan separately or amalgamate it with the other loans for famine or war.

"If it is supposed that better results would be obtained by enabling Railway Administrations to borrow for themselves, I would point out that we already do so to a large extent, and that actual experience shows that they constantly fail to obtain the funds they want. Thus in the current year three Railways proposed to raise an aggregate sum of 2½ millions for capital outlay. The market conditions, as is well known, were very unfavourable, and in the event the railways were unable to raise anything at all, and were forced to fall back on the Secretary of State for the funds they required. Similar results occur almost every year. In 1905-06 four railways desired to raise rather over 2½ millions, but they were only able to get less than 2 millions. In 1904-05 they wanted £2,900,000, but obtained only £2,417,000. In 1903-04, seven railways proposed to raise £3,178,000, but not one of them was able to get anything at all. I certainly make no reflection whatever on the action of the Railway Administrations concerned. On the contrary, I fully believe that they were well-advised in the course they adopted. The point I wish to press home is that by merely imposing the duty of raising capital for Railway development on private agencies, we do not seem at all likely to facilitate the provision of the funds required.

"It is manifest that what I have said by no means exhausts the subject. It would be an entire mistake to suppose that Government intends to assume

[Mr. Baker.]

a merely *non possumus* attitude in this matter. New railways must be built, and money must be found for them. As the mileage increases and traffic develops, more money must be provided for the equipment and expansion of open lines, and their requirements must continue to grow until they swallow up the whole and more than the whole sum which is available according to present standards. It follows of necessity that those standards must be raised. The practical question is to discover the best way of doing so. We are sometimes told that if we utilize properly the security of our splendid Railway property, we shall have no difficulty in obtaining as much money as we want. Those who offer this advice evidently contemplate that in issuing loans for Railway purposes, we should offer to investors not merely a fixed rate of interest but some share in the net earnings in addition. In other words, that in order to raise more money we should be prepared to pay more for it. This comes back to the proposition with which I started. Like my Hon'ble Colleague, I am not authorized to make any pronouncement on this subject. It is a serious question, for even though our railways as a whole are earning more than 5 per cent on the sum at charge, and we could certainly get what we want at a considerably lower figure, yet it by no means follows that this particular method is the most economical that can be devised. The idea of having recourse to future increments of the Gold Standard Reserve appears *prima facie* much more promising, but even here, as I have already indicated, the matter is not all plain sailing. In any case it is certain that India alone will not be able to provide the large sums required, and the question resolves itself into the most advantageous way of approaching the London money market, with which the advisers of the Secretary of State are naturally in much closer touch than we can be in this country. I will, therefore, merely say that, for our part, the matter is engaging our earnest attention, and that I am hopeful that a solution may be found without having recourse to any heroic measures.

"I am disposed to agree in the principle of Mr. Apcar's suggestion that Railway Administrations should be enabled to forecast their requirements beyond the limits of one budget, and to receive sanction to place orders for more than one year. As a matter of fact, existing arrangements do enable them to do this in practice to a far greater extent than the Hon'ble Member is apparently aware of; but I believe that more can be done.

"When a private company embarks on a large scheme in which the expenditure is to be spread over two or three years, they do not as a rule raise all the capital at once. They arrange to call it up from time to time as required. Something analogous to this ought to be possible in the case of our Railways, and possibly Mr. Finlay and myself may be able to devise a workable scheme before long.

"I fear that Mr. Apcar and I must agree to differ in regard to the limit of exemption from the income-tax. I wonder whether my Hon'ble friend is aware that in Germany, where they are said to manage things with high scientific accuracy, the income-tax is imposed on incomes as small as £48, or R720 a year? Yet the standard of living in Germany is certainly a good deal higher than it is in this country.

"The last matter to which I propose to refer relates to the action that has been taken in regard to the recommendations of the Excise Committee which, as Council are aware, was appointed 18 months ago to enquire into the practical working of the Excise Department and to submit proposals for its improvement in its various branches. The Committee was composed of gentlemen possessing peculiar qualifications for the task; they did their work in a most efficient manner: and I desire to express the cordial acknowledgments of Government to Sir James Thomson and his colleagues for the valuable service they have rendered to the Administration.

"The Committee's Report was presented in August last, and has recently been published. For some months we have been considering it, and we have already issued orders, or are about to do so, on most of the principal points with which it deals. It may be of general interest if I lay before the

[*Mr. Baker.*]

Council a brief summary of the conclusions at which we have arrived, and of the action which is being taken upon them. I shall only refer to matters of importance, and shall make no allusion to the many minor points which have come before us.

"The chief matters on which a course of action has already been decided include the treatment of country spirit, its consumption, and the methods by which its production and taxation should be controlled; foreign liquors, *tari*, and the disposal of licenses for retail vend.

"It should always be borne in mind that the main object underlying the reforms which the Committee were called on to consider is the regulation and restriction of consumption, and that while it is necessary to make due provision for the requirements of persons whose habit it is to use alcohol in moderation, it is the settled policy of Government to minimise temptation to those who do not drink and to discourage excess in those who do. Fiscal considerations in connection with the liquor traffic are important, not as an end in themselves, but because, as was stated in the Resolution appointing the Committee, the most effective method of forwarding the policy of Government in regard to consumption is to make the tax upon liquor as high as it is possible to raise it without stimulating illicit production to a degree which would increase instead of diminishing the total consumption, and without driving people to substitute deleterious drugs for alcohol or a more for a less harmful form of liquor.

"In regard to country liquor, which is on the whole the most important excisable article in common use, the more important reforms in course of adoption or already introduced include the following:—

- (1) The gradual curtailment of the areas under the outstill system, which is, as I explained in Council two years ago, admittedly a bad one, until they are confined to the block of feverish and inaccessible country lying between Chota Nagpur and the Godavari and to certain small tracts of the United Provinces, Madras, Bombay, and Baluchistan, which, for special reasons, cannot be brought under more advanced arrangements.
- (2) Stricter control of the manufacture and sale of liquor in areas where the outstill system may be retained, by preventing the smuggling of outstill liquor into distillery areas; prohibiting the sale of liquor to children and drunken persons; preventing drunkenness in the neighbourhood of shops; stopping the hawking of liquor and its sale in weekly markets, etc.; and exercising greater supervision over licensed shops.
- (3) Gradual abolition of the Central and Sadr Distillery and the District Monopoly systems, and their eventual replacement by a system of supply (except in the Punjab) by a Contract Distillery system on the lines of that at present in force in Madras. The essence of this system, which has been found by the Committee to be the best working system and that most suited to the conditions of India that has yet been devised, is that the monopoly of supply in a district or other selected area is given out on contract, the contractor issuing his liquor at the rate of excise-duty in force and supplying vendors at a fixed rate, determined by tender, over and above this duty, while the right of vend is generally disposed of by auction for each shop sanctioned. This system possesses admitted advantages over the systems for which it is proposed to substitute it.
- (4) Improvement of the quality of the country spirit sold in distillery tracts by greater concentration and more adequate supervision of distilleries; by the adoption of certain detailed improvements in the methods of manufacture recommended by Major Bedford; by securing, where necessary, the guidance of skilled distillery officers; and by requiring periodical analysis of samples of liquor produced at the distilleries. In furtherance of these

[*Mr. Baker.*]

objects it is proposed to appoint three excise distillery experts, such as the Madras Government already possess, for the supervision of distillery work (a) in Bengal and Eastern Bengal and Assam, (b) the United Provinces, the Punjab, and the Frontier Province, and (c) Bombay and the Central Provinces, and to establish distillery schools for the training of the local distillery officers and distillers. The maintenance as an experimental measure of a Central Excise Laboratory at Kasauli till the end of March 1908 has also been sanctioned.

- (5) Enhancement of the existing local rates of duty so far as this may be found to be feasible without giving rise to grave danger of illicit practices. An advance in this direction should be possible in most provinces. It is admittedly desirable that the still-head duty should be the main factor in taxation, and that the revenue to be obtained for the disposal of vend licenses should be subsidiary only.
 - (6) Adoption of adequate measures, including the maintenance of an efficient preventive staff, to prevent the production of illicit liquor.
- "In respect of foreign liquors, the following reforms are proposed:—

- (1) It is the policy of Government that these should be taxed in such a way as to avoid any undue stimulation of their sale in preference to country spirit. In this connection there has been some diversity of practice as to what classes of liquors should be treated as 'foreign' and what as 'country' liquor. The Government of India, following, with unimportant modifications, the recommendations of the Committee, think that the proper line of division for excise purposes is as follows:—All spirits of Indian manufacture, which are coloured or sophisticated so as to resemble imported liquors, or which describe themselves by the names of such liquors and are obviously intended to give the consumers the impression of being identical with them in character, should be treated as such and taxed at the tariff rate. Plain spirit spiced so as to meet special Indian tastes without any attempt at the imitation of imported liquor should be treated as ordinary country spirit and be taxed at the local rates leviable on such spirits. In connection with this decision it is proposed in future to restrict the manufacture of toddy spirit to one distillery in each of the Presidencies of Madras and Bombay and to tax it adequately as compared with plain spirit manufactured from *mahua*, molasses, etc., and further, as soon as possible, to treat it as foreign spirit and to tax it accordingly. Similarly, *tari* and the so-called country beers should be classed for Excise purposes as 'country liquors,' while all others, for instance, wines made in Kashmir and genuine beers made in India, should be treated as 'foreign liquors' and be taxed as such.
- (2) The manufacture and quality of 'foreign liquors' as above defined and the assessment of duty thereon should be regulated by (a) the control of the flavouring and colouring of locally produced liquors; (b) a periodical examination of samples of imported liquors with a view to the prohibition of the sale of those that are impure or otherwise undesirable; (c) the control of the arrangements for compounding and bottling of imported liquors; (d) a prohibition of their sale below prescribed minimum strengths; and (e) the exercise of more efficient supervision over breweries on lines already in force in Madras.
- (3) One of the matters into which the Committee was asked to enquire was the truth of an allegation commonly made that some particular varieties of imported liquor are specially deleterious as compared with country liquor. The result of Major Bedford's enquiries has

[*Mr. Baker.*]

shown that so far as cheap imported spirit is concerned there is no reason to prohibit its importation on the ground that it is unwholesome, since from a hygienic standpoint it compares quite favourably with the more highly priced imported liquors. Nor again, so long as it bears a due indication of the country of its origin, can it be criticised on the ground that it is a patent-still product falsely described as whisky, brandy, etc., since even the higher priced spirits are now very largely the products of patent-stills. The real objection to this class of spirit is that owing to its extreme cheapness it competes to an undesirable extent with country spirit, and that it is becoming increasingly popular among the natives of India as being in essence the drink of the European classes. The increase made last year in the duty on imported spirit must necessarily have a proportionately greater effect in the case of a cheap article and should already have told against spirit of this nature; and the further restrictions referred to above will work still more strongly in the same direction since the cheapness of the spirit is mainly due to the ease with which it is put on the market and the low strength at which it is sold.

- (4) As regards 'foreign' spirit produced in India it has been decided to introduce a system of inland transport in bond, so as to place the local trade on an equal footing with imported spirits
- (5) The existing arrangements for the vend of foreign liquor will be improved, where necessary, (a) by the grant of wholesale licenses and retail licenses for consumption off the shop premises on fixed fees sufficiently high to keep the business in respectable hands, but not so high as to hamper legitimate trade, (b) by the restriction of the number of licenses for consumption on the premises and of beer tavern licenses within the narrowest possible limits; (c) by better regulation of other classes of licenses; and (d) by the prohibition of the sale of 'foreign' and 'country' liquors on the same premises.

"As regards *tari*, the principal reform in contemplation is a tentative move in the direction of introducing the tree-tax system. It has generally been supposed that toddy is the least noxious of all the forms of alcohol in common use in India, and that it would be a great evil to discourage its use if this result should be purchased at the cost of driving the people to more deleterious intoxicants. The Committee have, however, pointed out that toddy is considerably stronger than has sometimes been imagined; that statements as to its relative harmlessness apply only to cases in which it is drunk fairly fresh and in moderate quantities; and that if it is consumed stale or to excess it acts to the detriment of the consumer. The Committee have further found that the consumption of toddy in parts of Bengal, the United Provinces, the Central Provinces, Berar and Coorg is considerable, and requires more adequate check by improved excise methods and enhanced taxation than it has yet received. As already explained, measures are in course of introduction to restrict the consumption of country spirit by an enhancement of taxation throughout large parts of the country, and there will therefore be a considerable risk of increased consumption of toddy in the areas referred to, unless steps are taken to check this also by increase of taxation and by restrictions on its use. The Committee have expressed the opinion that the necessary check would best be imposed under a tree-tax system, and the Local Governments concerned are being consulted as to the desirability of adopting such a system, subject to the necessary safeguards. In the Central Provinces and Berar its experimental introduction in one district has already been decided upon, and the Committee suggest a similar experiment in the case of Bengal. The final decision as to the adoption of the system or otherwise will be left entirely to the discretion of the Local Governments. In the case of the tree-tax systems in force in Madras and Bombay, the Committee have expressed the opinion that certain improvements are

[*Mr. Baker; the President.*]

necessary in points of detail, and these will be brought to the notice of the Governments of those Provinces.

"As regards the method of disposing of licenses for retail vend, the Government are not altogether in agreement with the Committee. In the case of country liquor, the general method of disposing of the right of retail vend is that of sale by auction. The Committee have expressed their preference for a non-competitive system, and discussions as to the relative merits of these systems have recently appeared in the Press. The Government of India consider that the best system is a properly regulated auction system, under which the period for which shops are auctioned would be extended up to three years at the discretion of the Local Governments, and that, though the existing system doubtless requires some modifications of detail in its working, it would be a retrograde step to seek to replace it generally by one of fixed fees. This is not the occasion for an elaborate justification of the reasons for this opinion, but I may quote from a letter addressed to the Government of the Punjab four years ago as giving a succinct view of the position which the Government of India have taken up in this matter :—'The leading principle of the auction system is that as large a portion as possible of the total revenue on country spirits should be derived from the fixed duty, but in addition to the fixed duty a subsidiary and variable revenue is drawn from the fees for licenses for retail vend which are sold by auction. The disposal of vend licenses by auction serves as a simple but sure guide to the local demand and indicates whether the still-head duty is adequate or otherwise. In the opinion of the Government of India it is inadvisable to obtain more than a subsidiary amount of revenue from this source, and disproportionately large receipts from vend rents would indicate that the still-head duty was too small and might be raised, and not that the system should be changed. The objection to fixed vend fees is that experience has shown that it is practically impossible to fix such fees with due regard to the interests of the revenue, and that they generally tend to a level at which they yield large profits to the licensees, with the result that there are several applications for a single shop, constant and troublesome appeals from disappointed candidates, and the risk of collusion with the office establishment. With a system of competition fees which should, as already stated, be a mere subsidiary receipt as compared with still-head duty, these difficulties are avoided, though for the successful working of such a system it is necessary that the preventive arrangements should be such as to debar shopkeepers from making a profit by the use of illicit liquor.'

"These include, I think, all matters of importance on which we have up to the present arrived at definite conclusions. Other matters still remain for consideration, including the number and location of liquor shops, restrictions on the retail sale of liquor, excise establishments, and legislation. These are now receiving attention, and I am hopeful that orders will issue regarding them within a few weeks of our reaching Simla."

His Excellency THE PRESIDENT said :—"I rejoice that the continued prosperity of India enables me to renew my congratulations of last year to my friend the Hon'ble Mr. Baker on the pursuance of a well-considered financial policy, the details of which he has placed before us with so much clearness and which has again enabled him to announce a substantial remission of taxation in the coming year.

"But in the midst of these good times—these times of comparative plenty before which the spectre of famine is falling back—we must not shut our eyes to the misery that is still amongst us—the perennial harvest of the plague. I confess to some surprise at hearing so little mention of its ravages in today's speeches. Recent reports are most depressing. The marked decline in the mortality which occurred in 1906 has not been maintained in the present year. Taking the months of January and February, the figures for the last five years show a progressive increase during those months up to the year 1905 when 252,567 deaths were recorded. In 1906 the mortality for these two months fell to 47,505. It has now suddenly

[The President.]

risen to 157,640, more than three times the number of deaths recorded last year. The disease is at its worst in the Punjab and the United Provinces, whence no fewer than 102,529 deaths have been reported during January and February. A similar rise of mortality has occurred in the Bombay Presidency. Excluding Bombay city, where there has been no increase, there have been 19,841 deaths during the last two months against 6,071 in January and February 1906. In Burma, which escaped plague entirely until two years ago, the deaths in January and February reached a total of 3,574 compared with 1,370 in the same months of 1906.

"In the United Provinces the city of Lucknow is suffering severely from the disease. During the week ending the 16th March, 521 deaths occurred, while in the previous weeks 513 and 266 deaths were recorded. The Government of India have done their best to combat it. In a Resolution published on the 17th January 1906 they stated the results of the practical experience which had been acquired in the previous five years of actual plague administration. They indicated the preventive measures the utility of which appeared to have been established, and they pointed out that their application must depend upon the circumstances of the locality, the character of the people, the stage which the disease has reached and the agency available for dealing with it. In view of the great variety of conditions in different provinces they declined to lay down a uniform scheme of plague administration, and they left it to the Local Governments to determine which of the various measures admissible are practicable or expedient at particular times and places, and finally they observed that in the last resort all preventive action depends for its success upon the hearty co-operation of the people themselves. It is needless to go now into the efforts Government have made and are making to trace the origin of the disease. Much admirable work has been done, and we must hope that scientific investigations may at last help us to check it. I only tell you the sad story of today.

"Yet there is much to be thankful for. The Monsoon showered the breath of life almost impartially throughout India and the land has brought forth in plenty. Mr. Baker tells us that the area under the cotton crop is more than a million of acres in excess of that of last year, whilst the estimated yield exceeds that of any previous year by over a million bales; that the cultivation of jute has grown in area by 200,000 acres and in outturn by 600,000 bales as compared with any former return, whilst it is estimated that the jute crop of last year realized 40 crores of rupees. Our Land revenue tells a tale of increasing wealth—of wealth to great proprietors, but still more, I hope, of abundance of the necessities of life to the small tiller of the soil. He is the man we must strive to help. He is to a great extent the backbone of the population of India. On his welfare depends much of the happiness and the contentment of the people. And we have been able to do something for him. The reduction of the salt-tax to Re. 1 a maund throughout the whole of India means very palpable relief. Certainly the tax cannot be termed a heavy one, and it is really the only obligatory tax which falls on the great mass of the population. As I understand my Hon'ble Colleague, the incidence of the duty will now work out to less than $2\frac{3}{4}$ annas per head of the population, and yet in a poor household the amount is very appreciable. It means a loss of £1,266,700 in our revenue for 1907-1908, but in addition to the boon we are conferring on the people our experience of former reductions fully justifies us in assuming that the consumption of salt will more than respond to the reduction in duty.

"But we have undertaken this reduction in the salt-duty in the face of another loss to our revenue—a very serious loss. My Hon'ble Colleague tells us that 'proposals have been submitted by the Chinese Government for the gradual reduction of the imports of Indian opium into China *pari passu* with the gradual contraction of the production of opium in that country, the object in view being the eventual extinction of the opium habit among the Chinese', and in recognition of China's proposals we have already notified a reduction in the number of chests of Bengal opium for sale in 1907-1908 to 49,200 as compared with 52,800 last year. We are also reducing the area of opium cultivation. The intention of the Chinese Government, apparently, is that

[*The President.*]

the reduction of imports of Indian opium into China should be spread over ten years, at the end of which period they should cease. At first sight, I grant that China's proposals are very alarming as to their possible effects on Indian revenues. But I am afraid I am unable to follow the Hon'ble the Nawab of Dacca in his sweeping assumption that India is about to be sacrificed for the pleasure of a few faddists. Neither do I think we are entitled to doubt the good faith of the Chinese Government as to the objects of their proposals. Papers which I have had recently before me indicate every intention on the part of China to reduce with a strong hand the consumption of opium, and the growth of the poppy in her own territory. I am no opium faddist. I quite admit the hardship a proscription of opium would entail on those who use it in moderation as many in this country do, and I am well aware of the difficulties surrounding any attempt to reduce its production. But there is no doubt throughout the civilized world a feeling of disgust at the demoralizing effect of the opium habit in excess. It is a feeling in which we cannot but share. We could not with any self-respect refuse to assist China on the grounds of loss of revenue to India.

"I notice that the Hon'ble Tikka Sahib recognises the harm that intoxicating drugs are already doing amongst the manly race from which he springs and welcomes the orders to reduce cultivation of opium as beneficial to his people.

"I admit that the task China has set herself may be greater than she can accomplish, and that we have a perfect right to require that in agreeing to the reduction of imports from India we should be satisfied of the results of China's efforts to reduce her own internal opium production. But notwithstanding the prospect of a heavy loss in revenue, I hope we may accept what I believe to be my Hon'ble Colleague's view, that provided the transition state through which we must pass is spread over a sufficient number of years, we need apprehend no financial disaster, and may reasonably believe that the expansion of our sources of revenue will continue to guarantee our future prosperity. For the coming year at any rate we are, I think, entitled to look with satisfaction on much that it has been possible to provide for a reduction in postal rates, a largely increased expenditure on education, and assistance to Provincial expenditure on Famine Relief, are all measures which should prove of far-reaching public benefit.

"In respect to Railways, the Hon'ble Mr. Finlay has explained the reasons which have made it necessary 'to omit from next year's estimate any provision for starting the construction of new lines, to retard slightly the progress of lines under construction and to reduce to a small extent the expenditure on special works of open lines.' It has been necessary to provide for a very large expenditure upon rolling-stock, and I am glad to see that the Hon'ble Mr. Apcar, speaking on behalf of the trading interests of Calcutta, welcomes the provisions which have been made to meet a deficiency which have naturally elicited much bitter criticism from the commercial world. However, we may do well to remember that a shortage in rolling-stock has often before now been the evidence of a sudden prosperity which it has been momentarily impossible to meet. I am inclined to ask with my Hon'ble Colleague, if, judging from the custom of great trading companies elsewhere, it would not be possible for Indian Companies to relieve the pressure which exists by supplying their own wagons to a certain extent? I am afraid I cannot find it so easy to follow him in his view that Government guarantees are detrimental to private enterprise. I have seen not a little of rapid railway development by private enterprise, but I have never suspected that such development was likely to be delayed by a Government guarantee. My experience has rather been that Government guarantees have very largely encouraged private enterprise. Indeed, with my short acquaintance with India I am rather inclined to suspect that private enterprise may have suffered from want of Government support.

"In respect to Military expenditure I congratulate His Excellency the Commander-in-Chief on the very clear statement he has given to us. His explanation of the manner in which the Army in India is being redistributed will, I trust, assist to disabuse the public mind of many misconceptions. I doubt whether the value of Lord Kitchener's attempt to create a self-contained

[*The President.*]

Divisional organization has ever been sufficiently appreciated, whilst all that he has done and is still doing to improve the position of the sepoy cannot be too widely known. He has also told us that conditions affecting the pay of British officers of the Indian Army is under consideration.

"I am convinced that though the initial outlay of Lord Kitchener's scheme is necessarily heavy, its completion will tend not only to increased efficiency in many directions but will save much of the waste of past years and ensure what I know the Commander-in-Chief has warmly at heart—a sound system of economical administration in the Army.

"The Hon'ble Sir Steyning Edgerley, in his very interesting speech, dealt with many topics requiring much more detailed consideration than it would be possible to devote to them today, but I can assure him of my full agreement with the views he has expressed of the sympathetic treatment we owe to the Bombay Chiefs, whilst in all he said as to the evils of centralized administration he will find himself in entire accord with many an overworked public servant in this country. Perhaps I speak feelingly as one who is called upon to overrule a Local Government on such a weighty matter as the extravagant purchase of a horse valued at Rs. 70, or to check the heavy expenditure entailed by the unpardonable demand of some distant Collector for the erection of a bath-room, and simultaneously to guard the interests of India in connection with the administration of a world-wide Empire. I do not think we can go on as we are. We can, I hope, do something to shake off the unnecessary chains that bind us. Perhaps we are on the eve of new possibilities.

"The Hon'ble Mr. Gokhale tempts me to foreshadow the future. I am afraid at present I can only do so faintly. I recognise with him that politically India is in a transition state, that new and just aspirations are springing up amongst its people, which the ruling power must be prepared not only to meet but to assist. A change is rapidly passing over the land, and we cannot afford to dally. And to my mind nothing would be more unfortunate for India than that the Government of India should fail to recognise the signs of the times. I have deemed it all important that the initiative of possible reforms should emanate from us. I have felt that nothing would be more mischievous to British administration in India in the future than a belief that its Government had acted on no conviction of their own, but simply in submission to agitation in this country and in accordance with instructions conveyed to them from home. If there has been misconception as to this, I hope I may be allowed this opportunity of correcting it. The story as far as I can tell it at present is simply this: that last autumn I appointed a Committee of my Council to consider the possibility of a development of administrative machinery in accordance with the new conditions we were called upon to face. The Committee's report was considered by my Council, and a despatch expressing the views of my Colleagues and myself has been forwarded to the Secretary of State. What I would impress upon you is that this move in advance has emanated entirely from the Government of India, and that we are justly entitled to deny any accusation of 'an inadequate appreciation of the realities of the present situation.'

"We have now to await the reply of the Secretary of State, and there is no intention that any legislation should be undertaken before the public in India and at home have had ample opportunity for an expression of opinion on the proposals we have placed before him. I can assure all those who are interested in this great question that the despatch we have recently addressed to Mr. Morley is fraught with great possibilities, and I earnestly trust that the suggestions it contains may go far towards satisfying the pressing requirements of the Indian Empire."

The Council adjourned *sine die*.

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

CALCUTTA ;

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 13, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India Home Department, of August 1901 :—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

Rates of subscription.

|--|------------|
| Subscription for <i>Gazette</i> and Supplement | Rs. 15 0 0 |
| Postage | 5 8 0 |
| Subscription for Parts I, II, and III, or any of them | 6 0 0 |
| Postage | 2 8 0 |
| Subscription for Parts IV, V, and VI, or any of them | 4 0 0 |
| Postage | 2 8 0 |
| Subscription for Supplement only | 5 0 0 |
| Postage | 3 0 0 |
| Subscription for Supplement and Part VI | 6 0 0 |
| Postage | 3 0 0 |
| For a single copy of the <i>Gazette</i> and Supplement | 0 8 0 |
| For a single copy of Parts I, II, and III, or IV, V, and VI, or Supplement | 0 4 0 |
| A special price will be fixed for specially heavy issues of the <i>Gazette</i> or any particular Part. | |
| Postage on single copies varies according to weight. | |
| Rules and Notifications issued under Legislative Acts, and having the force of law, may be obtained separately at, per page, 2 pice. | |

By order of Government, all subscriptions must be paid in advance.

Applications for the supply of the *Gazette* on the public service should be addressed to the Home Department.

Complaints regarding non-receipt of any number of the *Gazette* should be forwarded within a week after the date on which it is due.

J. J. MEIKLE,

Publisher, *Gazette of India*.

GOVERNMENT OF INDIA.
DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 11th April 1907.

NOTIFICATIONS.

No. 1375 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 8th April 1907 :—

- No. 172 of 1907.—Yusaf, clerk in the office of the General Officer Commanding 7th (Meerut) Division, Meerut Cantonment, Meerut. *Summer relief.*
- No. 173 of 1907.—K. G. Subba Row, Forest ranger, Madras Forest Department, Tirukolur, South Arcot District, Madras Presidency. *A pair of cook's tongs.*
- No. 174 of 1907.—Leo Von Gerstenbergk-Zech, landed proprietor and court functionary, of Bergsulza, near Stadtsulza, in the empire of Germany. *Improvements in or relating to means for storing hydraulic power.*
- No. 175 of 1907.—D. S. Guanakan, assistant sanitary inspector, Bangalore City Municipality, residing at Cleveland town, Bangalore. *Improvement on Izal disinfectant called "osu."*
- No. 176 of 1907.—Norman Pain Pearse, gentleman, of Burleigh House, Belsize lane, Hampstead, Middlesex, England. *Improvements in cotton gins and like machines for treating fibres.*
- No. 177 of 1907.—Alfred Edgar Longworth, engineer, of 125 Howrah road, Howrah, Bengal. *Improvements in and relating to locomotive type steam boilers or generators.*
- No. 178 of 1907.—John Vincent Christian, indigo planter, of Bangoan P.O., Monghyr, British India. *Improvements in bayonet holders and the like.*
- No. 179 of 1907.—McCarty Wireless Telephone Company, a corporation organized under the laws of the state of California, of 102 Bacon Block in the city of Oakland, county of Alameda, state of California, United States of America. *Wireless transmission of sonorous vibrations.*
- No. 180 of 1907.—Malcolm Bentzon, engineer, of 188 Strand, London, England, and Alfred Henry Emerson, Junior, optician, of 26 Eyre street Hill, Clerkenwell, London, England. *Improvements in bi-focal lenses and their manufacture, and in apparatus to be employed in the said manufacture.*
- No. 181 of 1907.—The Printing Machinery Company, Limited, printing machinery manufacturers, of 188 Fleet street, London, England. *Improvements in apparatus for finishing and cooling unfinished articles, especially unfinished curved stereotypes.*
- No. 182 of 1907.—The Printing Machinery Company, Limited, printing machinery manufacturers, of 188 Fleet street, London, England. *Improvements in apparatus for finishing, cooling and drying unfinished articles, especially unfinished curved stereotypes and also in the said articles.*
- No. 183 of 1907.—Giuseppe Angelini, director of the telegraphs of Rome, Rome, Italy. *Improvements in or relating to microphones.*
- No. 184 of 1907.—William Melland, gentleman, of Beaulieu, Hale, Altrincham, in the county of Chester, England, and William Herbert Nield, engineer, of 23 Hawthorn road, Heaton Mersey, in the county of Lancaster, England. *Improvements in splicing the ends of ropes and in means therefor.*
- No. 185 of 1907.—John Hamilton Brindle, manufacturers' agent, of 49 Deansgate, Manchester, county of Lancaster, England. *Improvements relating to long collars for the spindles of textile machinery.*

- No. 186 of 1907.—George Wade Wilkins, gentleman, of Penshurst, in the state of Victoria, commonwealth of Australia. *An improved solution for use with cotton goods, woollens, silk, paper, wood, hemp and other analogous substances for rendering the same capable of resisting fire.*
- No. 187 of 1907.—Albert Thomas Hughes, engineer, of 10 Fitzedown Terrace, Rectory lane, Tooting, London, England. *Improved means for locking nuts to bolts.*
- No. 188 of 1907.—Thomas Butler, a citizen of the United States of America, manufacturer, residing at Fort Worth, Texas, and the Butler Pumping Company, a corporation of the state of Texas, in the United States of America, carrying on business at 816 Main street, Fort Worth, Texas, United States of America. *Improvement in pumps.*
- No. 189 of 1907.—Karl August Brauning, technician, of 11 Anna Paulownastraat, Zaandam, in the kingdom of the Netherlands. *Improvements in automatic fire-arms.*
- No. 190 of 1907.—G. H. Cook, managing partner of Messrs. H. F. Cook and Sons, Lime Works in Katni, Tehsil Murwara, District Jubbulpore. *Making roofing tiles.*
- No. 191 of 1907.—Gottfried Ludwig Max Dorwald, engineer, of 28 Mexfield road, East Putney, London, England. *Improvements in carburettors for internal combustion engines.*

No. 1376 P.—THE undermentioned design has been registered, under the provisions of the Inventions and Designs Act, 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma. This and other designs are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office, 2, Bankshall Street, Calcutta, on payment of a fee of one rupee, and a certified copy of anyone of them will be supplied on payment of the fixed expenses of copying.—

No. 10-D of 1907.—Jugal Kishore, doing business in Mohalla Johree Bazar, Delhi, in the name of Jugal Kishore Mutsaddi Lall. *A disc for necklaces bearing specified words on each side.*

No. 1377 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary, appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of anyone of them will be supplied on payment of the fixed expenses of copying :—

- No. 305 of 1906.—Isaac Westley Stokes, signal and interlocking engineer, Parel Hill, Bombay. *Improvements in rail clips.* (Specification filed 6 March 1907.)
- No. 413 of 1906.—Stewarts and Lloyds, Limited, engineers, of Nile street, Birmingham, England. *Improvements in hose and pipe couplings.* (Specification filed 27 March 1907.)
- No. 414 of 1906.—Stewarts and Lloyds, Limited, engineers, of Nile street, Birmingham, England. *Improvements in straightway valves.* (Specification filed 27 March 1907.)
- No. 425 of 1906.—Sebastian Ziani de Ferranti, engineer, of 31 Lyndhurst road, Hampstead, London, N. W., England. *Improvements in and relating to spinning, doubling and like textile processes.* (Specification filed 27 March 1907.)
- No. 426 of 1906.—Charles Blades Coverdale Storey, mining engineer, of Lancaster, in the county of Lancaster, England, and John Andrew Wauchope, of Coosheen Cottage, Schull, in the county of Cork, Ireland. *Improvements in ore crushing machines.* (Specification filed 27 March 1907.)
- No. 430 of 1906.—Patrick Bernard Delany, electrical engineer, of South Orange, county of Essex, state of New Jersey, United States of America. *Improvements in telegraphy.* (Specification filed 27 March 1907.)

- No. 432 of 1906.—United Cotton Gin Company, a corporation organized under and pursuant to the laws of Arizona, and having a place of business at 76 William street, New York city, United States of America. *Cotton gins.* (Specification filed 27 March 1907.)
- No. 540 of 1906.—Richard Wingfield Stuart, mining engineer, of "Conrad" Hunters Hill near Sydney, in the state of New South Wales and commonwealth of Australia. *Improvements in steam cookers.* (Specification filed 16 March 1907.)
- No. 441 of 1906.—William James Albert London, engineer, of Silverdale, Sylvan Avenue, Brooklands, Manchester, England. *Improved means for balancing single flow fluid-pressure turbines.* (Specification filed 27 March 1907.)
- No. 443 of 1906.—Joseph Robert Hardy, engineer, of 4 Hochstadtplatz, Vienna, Austria. *Improvements in automatic vacuum brake apparatus.* (Specification filed 27 March 1907.)
- No. 452 of 1906.—Carl Leistner, engineer, of 188 Northumberland Park, Tottenham, London, England. *Improvements in and relating to liquid fuel burners applicable to various industrial uses.* (Specification filed 26 March 1907.)
- No. 491 of 1906.—Charles Joseph Tagliabue, manufacturer, of 53 Fulton street, in the borough of Manhattan, city, county and state of New York, United States of America. *Improvements in safety razors.* (Specification filed 23 March 1907.)
- No. 493 of 1906.—The Pradeau Wheel Syndicate, Limited, engineers, of Finsbury House, Blomfield street, in the county of London, England. *Improvements in wheels for motor cars or other vehicles.* (Specification filed 25 March 1907.)
- No. 543 of 1906.—Gustave Ernest Cammiade, merchant and contractor, residing at Tondiarpet, in Madras, British India. *The manufacture of carbonic acid gas.* (Specification filed 23 March 1907.)
- No. 108 of 1907.—Frederick William Gifford, judge, and Ward Carden Gifford, engineer, both of 940 New York Life Building, Kansas city Missouri, United States of America. *Improvements in apparatus for producing the illusion of travelling in a railroad car or the like.* (Specification filed 28 March 1907.)
- No. 109 of 1907.—William Berkeley Wallace, Major, Suffolk Regiment, Royal Small Arms Factory, Enfield Lock, in the county of Middlesex, England. *Charge holder for magazine rifles.* (Specification filed 28 March 1907.)

No. 1378 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

- No. 104 of 1895.—Louis Michel Bullier. *Process for the manufacture of carbides or acetylides of the earth-metals and alkali-earth metals, and of the oxides of these metals.* (From 26 April 1907 to 26 April 1908.)
- No. 128 of 1901.—Bernard Coventry. *Improvements in the manufacture of indigo.* (From 14 April 1907 to 14 April 1908.)
- No. 453 of 1901.—Isaac Shone and Edwin Ault. *Improvements in the mode of and means for ventilating and flushing house drains and other drains and sewers.* (From 17 June 1907 to 17 June 1908.)
- No. 19 of 1903.—Frederick George Creed and William Arthur Coulson. *Improvements in or relating to telegraphic apparatus.* (From 21 May 1907 to 21 May 1908.)

No. 1379 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased:—

- No. 182 of 1902.—Percy Hulburd. *Improvements in or connected with apparatus for distributing sand or the like.* (Specification filed 2 January 1903.)

No. 317 of 1902.—Joseph Lever. *Improvements in cooling towers.* (Specification filed 2 January 1903.)

No. 358 of 1902.—The Linotype Company, Limited. *Improvements in and connected with machines for printing in gold, silver or other powders.* (Specification filed 2 January 1903.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

NOTICES

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888.

TREASURE TROVE.

NOTICE.

It is hereby notified, under section 5 of the Indian Treasure Trove Act, VI of 1878, that, about 17th January 1907, treasure consisting of the undermentioned articles and valued at Rs35 was found by Subba Naidu while ploughing in S. No. 82 C. of Sathapundi, Wandiwash Taluk, North Arcot District.

| Description of treasure. | Estimated value. |
|--|------------------|
| (1) A stone idol of Varadavaja perumal (Height 2' 3") | } Rs35 |
| (2) Two stone idols of goddesses to match (Height 2' 1") | |

2. All persons claiming the said treasure or part thereof are hereby required to appear personally or by Agent before the Collector of North Arcot at Chittoor on 10th August 1907 in view to the matter being enquired into or determined according to Law.

(Illegible)
for Collector.

NORTH ARCOT COLLECTOR'S OFFICE,
Chittoor, 26th March 1907.

CIVIL ENGINEERING COLLEGE, SIBPUR.**Engineer Department.**

SESSION, 1907-1908.

Candidates for admission to the Engineer Department should apply to the Principal in the prescribed form stating their University Registration Number on or before the 15th May 1907. Each application must be accompanied by registration fee of R1, which will in no case be returned.

The session begins on Monday, the 3rd June 1907.

Candidates must furnish proof that they have passed one of the following tests:—

- (1) The B.Sc. or B.A. Examination in the B course in Physics and Chemistry of the Calcutta University. The candidate's age must be under 23 years.
- (2) The F. A. Examination of the Calcutta and Madras Universities.
- (3) The Intermediate Examination of Allahabad and Punjab Universities.
- (4) The Intermediate Examination for the degree of B.A. of Bombay University.
- (5) The High School Examination for Europeans and Eurasians.

The candidate's age in (2), (3), (4) and (5) must be under 21 years.

In selecting candidates who have passed the F. A. (all other things being equal), preference will be given to those who have passed in Sanitary Science in addition to the ordinary subjects of the F. A. Examination.

The maximum number to be admitted is limited to 40. The position in the University examination and the age of the candidate will be taken into consideration when selection is made, and such selection will be made by the Principal.

The tuition fee for students to the Engineer class is R10 a month for each month of the year, vacation included.

One junior scholarship of R20 a month, one of R15 a month, and six of R10 a month, tenable for two years, will be given to students who have been admitted to the College and who do not hold University Scholarships.

The selection will be made in the following order:—

- (a) B.Sc.'s;
- (b) B.A.'s who have taken up the B course; and
- (c) F. A. candidates (except those who passed in the third division).

There will be in addition one scholarship of R20 a month and one of R10 a month for Europeans and Eurasians who have been admitted to the College, tenable for two years.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Form of application for admission and any further particulars will be supplied upon application to the Principal.

B. HEATON,
Principal, Civil Engineering College

SIBPUR;
The 5th April 1907.

CIVIL ENGINEERING COLLEGE, SIBPUR.**Apprentice Department.**

SESSION, 1907-1908.

Candidates for admission to the Apprentice Department should apply to the Principal in the prescribed form on or before the 6th May 1907. Each application must be accompanied by a registration fee of R1, which will in no case be returned.

The session begins on Monday, the 3rd June 1907.

Candidates must furnish proof that they have passed one of the following tests:—

- (1) Standard VII or Middle School Examination of the Code of European Schools
- (2) University Entrance Examination.

The candidate's age must be at least 15, and not more than 17 years.

There are 25 vacancies for Indians and 10 for Europeans and Eurasians. The selection of candidates for admission will be made by the Principal.

There will be one vacancy on the free list for Christian apprentices in June next and five on the reduced fee list. For natives there will be ten vacancies on the reduced fee list, available during the month of June. Election to those lists will be made by the Board of Visitors. Forms to be filed up for the consideration of the Board can be had on application to the Principal.

The tuition fee to students of the Apprentice Department is Rs 3 monthly for each month of the year, vacation included, except for students on the free and reduced fee lists.

Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Before an applicant is admitted to the College his parent or guardian must sign an agreement in the prescribed form.

All applications from Christian candidates for admission to the free or reduced fee lists must reach the Principal not later than the 6th May, so as to enable the elections to be made by the Board of Visitors before the opening of the session.

The vacancies on the native list will be filled up after the opening of the session from those apprentices who have joined the College after admission. Forms of application for admission and further particulars will be supplied on application to the Principal.

B. HEATON,

Principal, Civil Engineering College.

SIBPUR;

The 5th April 1907.

POST OFFICE.

SURVEY OF INDIA.

NOTIFICATION.

Calcutta, the 12th April 1907.

No. 1-B.—Mr. F. B. Kitchen, Sub-Assistant Superintendent, 3rd grade, is granted privilege one leave for one month under Article 260 of the Civil Service Regulations, with effect from the 1st May 1907 or such subsequent date as his services can be spared.

G. B. HODGSON, Lieut.-Colonel,
Deputy Surveyor General.

THE HON'BLE THE AGENT TO THE GOVERNOR GENERAL AND CHIEF COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.

NOTIFICATIONS.

Peshawar, the 3rd April 1907.

No. 29.—Captain G. Dodd, Commandant, Northern Waziristan Militia, is granted privilege leave of absence for 90 days, under the provisions of paragraph 222, Army Regulations, India, Volume II, with effect from the forenoon of the 20th March 1907.

No. 30.—In consequence of the grant of 90 days' privilege leave to Captain G. Dodd, Commandant, the following acting promotions are ordered in the Northern Waziristan Militia, with effect from the forenoon of the 20th March 1907 :—

Captain C. J. White, 2nd-in-Command, to officiate as Commandant ;

Lieutenant C. F. M. Worsley, Wing Commander, to officiate as 2nd-in-Command ;

Lieutenant A. W. H. M. Moens, Adjutant and Quartermaster, to officiate as Wing Commander in addition to his own duties.

By order, etc.,

W. C. BARRATT, Lieut.-Colonel,
Staff Officer to the Chief Commissioner, North-West
Frontier Province.

The 5th April 1907.

No. 31.—The following bye-laws which have been framed by the Cantonment Authorities of Changla Gali, Kalabagh, Bara Gali, Khyra Gali, Ghora Dakka (including Khanspur) and (f) and section 145 (i) of the Punjab Municipal Act, have been confirmed by the Honourable the Chief Commissioner, North-West Frontier Province, and are hereby published for general information.

They will come into force with effect from the 1st April 1907.

• Bye-laws.

1. Every person who lets out on hire horses or ponies for riding purposes within the limits of Changla Gali, Kalabagh, Bara Gali, Khyra Gali, Ghora Dakka (including Khanspur) Cantonments shall take out a license.

2. The license shall be issued by the Cantonment Authority concerned after the horses and ponies and gear have been examined by him.

3. The license shall be granted subject to the following condition :—

That the animals and gear are, in the opinion of the Cantonment Authority concerned, in good serviceable and working condition.

4. The license shall continue in force during the season, namely, from 1st April to 30th November in each year, but may be revoked within the period named by order of the

Cantonment Authority concerned if the animals or their gear are found unfit for work and unserviceable, or if the licensee charge excessive rates in contravention of these rules, or if the license is used by a wrong person.

5. The Cantonment Authority concerned may separate the horses or ponies for which licenses are taken out into two classes; the fees for a 1st class horse or pony's license shall be Rs 5 and for a 2nd class horse or pony's license shall be Rs 4.

The payment of these fees shall exempt the license-holder from any other Cantonment tax on such horse or pony.

6. The Cantonment Authority concerned may from time to time appoint places for stands for licensed ponies and horses; and no pony or horse shall wait for hire except at such stand.

7. All licenses shall be produced for inspection when required by any Magistrate or Police Officer or by any officer or official duly authorised by the Cantonment Authority concerned.

8. The license shall not be transferable without permission of the Cantonment Authority concerned.

9. The rates to be paid for the use of hired ponies or horses shall be as under:—

REMARKS :—In the event of a 2nd class pony being licensed $\frac{1}{2}$ of the fare for a 1st class pony will be charged.

10. Any person convicted of a breach of any of the foregoing bye-laws shall be punishable with a fine not exceeding Rs 50 and when the breach is a continuing breach, with a further fine which may extend to five rupees for every day after the first during which the breach continues.

The 6th April 1907.

No. 32.—Mr. P. J. Anderson, Superintendent, Office of the Revenue Commissioner, North-West Frontier Province, is appointed to officiate as an Extra Assistant Commissioner and as Personal Assistant to the Revenue Commissioner, *vice* M. Mahbub Alam transferred to Foreign Service, with effect from the afternoon of the 30th March 1907.

No. 33.—On return from the leave granted to him under Notification No. 9, dated the 29th January 1907, Major C. H. Bowle-Evans, I.M.S., Civil Surgeon, Hazara, resumed charge of his duties on the forenoon of the 28th of March 1907, relieving Captain J. K. S. Fleming, I.M.S.

No. 34.—Captain J. K. S. Fleming, I.M.S., made over charge of the duties of the Superintendent, Abbottabad Jail, to Major C. H. Bowle-Evans, I.M.S., on the forenoon of the 28th March 1907.

By order, etc.,

J. L. MAFFEY,

Assistant Secretary to the Chief Commissioner,
North-West Frontier Province.

REVENUE AND FINANCIAL SECRETARY TO THE CHIEF COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.

NOTIFICATION.

Dated Peshawar, the 5th April 1907.

No. 1905.—The following amendments made in accordance with the Government of India, Finance Department, Resolution No. 1792-Exc., dated the 25th March 1907, in the rules for the custody, supply and sale of stamps and stamped papers, contained in the Notification of the Chief Commissioner, North-West Frontier Province, No. 3496, dated the 28th August 1906, are published for the information and guidance of all officers concerned. The amendments shall take effect from 1st of April 1907 :—

(1) In rule 25 for the first fourteen words the following shall be substituted :—

“ Ordinary postage stamps (including half-anna and one-anna unified stamps) shall be sold for cash from local depôts to officers in charge of post offices, receiving offices, tehsils, thanas and police stations at which letters are received for despatch, to persons licensed to sell general stamps under the rules framed under the Stamp Act, 1899 (II of 1899) and to the public.”

(2) For rule 26, the following shall be substituted :—

“ The officer in charge of every post office, receiving office, tehsil, thana, and police station, at which letters are received for despatch, is required to keep a supply of ordinary postage stamps (including half-anna and one-anna unified stamps) for sale to the public sufficient for the probable demands of one week. Every person licensed under the rules framed under the Stamp Act, 1899 (II of 1899) to sell general stamps is required to keep a similar supply of half-anna and one-anna unified stamps.

(3) Rule 27 shall be cancelled.

(4) In rule 28 the words “ or authorised ” shall be omitted, and for the words and figures “ rules 26 and 27 ” the word and figure “ rule 26 ” shall be substituted.

E. INGLIS, Lieut.-Col.,
Offg. Revenue and Financial Secretary to the Chief
Commissioner. N.-W. Frontier Province.

NORTH-WEST FRONTIER PROVINCE—MEDICAL DEPARTMENT.

**GOVERNMENT OF EASTERN BENGAL AND ASSAM—
REVENUE DEPARTMENT.**

NOTIFICATION.

Shillong, the 9th April 1907.

No. 4723-C.—The following is published for general information, with reference to section 42 of the Land Acquisition Act, 1 of 1894 :—

H. LEMESURIER,

Offg. Chief Secretary to the Government of Eastern Bengal and Assam.

AGREEMENT.

Agreement made this ninth day of February, one thousand and nine hundred and seven, between the Burma Oil Company, Limited, a Joint Stock Company, with limited liability, incorporated under the English Companies Acts, and having its registered office at Glasgow in Scotland (hereinafter called the Company) of the one part and the Secretary of State of the other part. Whereas the Company has applied to the Local Government for the acquisition of the land described in the schedule annexed hereto and delineated in the accompanying map for the construction of a tank, cooli houses and bazar required for the bulk oil installation in villages Nalsa and Gosaidanga in the district of Chittagong. And whereas the Local Government being satisfied by an enquiry held under its order that the said acquisition is needed for the construction of a tank, cooli houses and bazar, and that such construction of a tank, cooli houses and bazar is likely to prove useful to the public, has consented to the said acquisition pursuant to the provisions of the Land Acquisition Act, 1894, on the condition of the Company entering into such agreement as is hereinafter contained. Now it is hereby agreed as follows :—

1. The Company shall and will on demand repay to Government all and every compensation damages, costs, charges and expenses to be paid or incurred in respect or on account of the acquisition as aforesaid of the said land described in the schedule annexed hereto.

2. Forthwith upon satisfaction by the Company of all demands under the preceding clause, the land forming the subject of the acquisition shall be transferred to and vested by the Secretary of State in the Company.

3. The said land shall be held by the said Company for the purpose of constructing a tank, cooli houses and bazar. It and when the Company shall be notified by the Secretary of State at the instance of the Commissioners of the Port of Chittagong of the desire of the said Commissioners to purchase the said land for the like purpose, the Company shall thereupon sell and transfer the same to the said Secretary of State at a price equivalent to the amount to be paid by the Company to Government under clause (1) hereof upon the acquisition of the said land, provided that upon completion of such sale and transfer the Secretary of State shall grant to the Company a lease of such part or parts of the said land as the Company shall desire to utilise for the construction of a tank, cooli houses and bazar or other purposes of the Company's business. Such lease to be for a term of ninety-nine years at an annual rental equivalent to four and a half per cent. of the amount of purchase money to be paid by the said Secretary of State as aforesaid.

4. The work for which the acquisition is required shall be completed within one year from the date of giving of possession. The land now acquired shall be used for no other purpose than that for which it is now acquired (*viz.*, for the construction of a tank, cooli houses and bazar) without the previous sanction of Government. Should the work not be completed within one year or should the land now acquired cease to be required for the aforesaid purpose, it shall be competent to Government to take it over at the total cost now paid for the acquisition.

THE SCHEDULE ABOVE REFERRED TO.

In the district of Chittagong, Thana Town, village Nalsa Taraf Jafar Ullah, Towzi No. 1359, cadastral survey plots Nos. 27, 107, 108, 125 and 126; area 3.63 kanis.

In the same village Taraf Boidyanath, Towzi No. 557, cadastral survey plots Nos. 102, 105, 106, 109, etc., part of 98 and 99; area 3.69 kanis.*

PROMISSORY NOTE.

LOST, STOLEN, OR DESTROYED.

The Government Promissory Note No 042041 of the three per cent of 30th June 1896-97 for Rs500 originally standing in the name of the Comptroller General and last endorsed to Lachmandas, Contractor, the proprietor, by whom it was never endorsed to any other person, having been lost, stolen, or destroyed at Bannu, notice is hereby given that payment of the above Note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for the issue of Duplicate in favour of the proprietor. The public are cautioned against purchasing or otherwise dealing with the above mentioned security.

Name of the Advertiser—LACHMANDAS, Contractor,
Residence—Bannu.

Lost.

I beg to announce for the information of the public, that the Promissory Notes amounting to Rs23,000 which were purchased through the care of Bank of Bengal, Lahore, have been lost by me in beginning of February 1905.

It is most probable that my sons, named Devidass, Diwan Chand, Deena Nath and Hemraj, my hostile sons, with the object of giving me loss have misappropriated these Promissory Notes and they have taken a forcible possession of all my property earned solely by me.

I am not aware of the numbers of such Promissory Notes, hence I beg to advertize for the information of the public that any one purchasing any of the above Notes shall be lawfully treated under an offence punishable by the code rules.

These Promissory Notes are on the names of Nurput Rai, Devidass and Diwan Chand Doulat Ram, hence this advertisement.

I am the sole owner of both firms, the Notes were purchased solely of my own earning.

NURPUT RAI,
Merchant and Contractor.

LAHORE;
The 18th March 1907.

Lost.

The Government Promissory Notes Nos. 135625, 3½ per cent. of 1865, for Rs500, 135626, 3½ per cent. of 1865, for Rs1,000, and 014666, 3½ per cent. of 1900-1901, for Rs500, originally standing in the name of Abinash Chandra Ghose, the proprietor, by whom they were never endorsed to any other person, having been lost, notice is hereby given that payment of the above Notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for issue of duplicates in favour of Amar Kristo Ray. The public are cautioned against purchasing or otherwise dealing with the above securities.

SUPPLEMENT TO
The Gazette of India.

No. 15.}

CALCUTTA, SATURDAY, APRIL 13, 1907

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately, on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately, on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

Dated the 11th April 1907

REPORT OF THE GANGES BRIDGE COMMITTEE.

The following Report is published for general information. Copies of the Report are on sale at the office of the Superintendent of Government Printing, India.

B. ROBERTSON,
Secretary to the Government of India.

REPORT

OF THE

GANGES BRIDGE COMMITTEE.

The Ganges Bridge Committee was convened under the instructions conveyed in the Resolution by the Government of India, Department of Commerce and Industry, No. 10252—10264 (Railways), dated the 28th December 1906, and was constituted as follows:—

| | |
|--|-------------------|
| MR. G. MOYIE, Director of Railway Construction | <i>President.</i> |
| MR. F. G. DUMAYNL, Vice-Chairman, Port Commissioners, Calcutta | } <i>Members.</i> |
| HON'BLE MR. W. A. INGLIS, Secretary to the Government of Bengal, Public Works Department | |
| MR. RADHA RAMAN KAR, Bengal National Chamber of Commerce | |
| MR. NORMAN McLEOD, Messrs. McLeod & Co., Bengal Chamber of Commerce | |
| MAJOR A. D. G. SHILLEY, R.E., Agent, Bombay, Baroda and Central India Railway. | |
| MR. J. H. LOVELL, Deputy Consulting Engineer for Railways, Calcutta | <i>Secretary.</i> |

The Committee was directed to assemble directly after the Christmas holidays, and its duties were defined as under—to consider and report on the following:—

- (1) The erection of a bridge at Sara to link up the metre and broad gauge sections of the Eastern Bengal State Railway.
- (2) The provision of a bridge at Godagiri to more distinctly serve the interests of the Bengal and North-Western Railway.
- (3) A scheme suggested by the Railway Board for the construction of a bridge at Rampur Boalia, connected by short links with the Ranaghat-Katihar and Eastern Bengal State Railways and with Calcutta by a new metre gauge line *via* Meherpur and Ranaghat.
- (4) The project which the Committee recommends as offering the best settlement of the complex question of the location of a bridge over the Lower Ganges.

In pursuance of these instructions, a detailed inspection in company with the responsible officials concerned was made of the lines and termini in the neighbourhood of Calcutta on the left bank of the Hooghly including the Kidderpore Docks and the import jetties. The three proposed bridge sites were also generally examined and a Sub-Committee visited Madras and there examined the terminus where at the harbour both broad and metre gauge lines are successfully worked, and received evidence regarding the handling of traffic in this yard from the Traffic Manager of the Madras Port Trust.

A large number of witnesses, representing the various interests, have been examined. Written statements have also been received from several public bodies which, together with the evidence recorded, will be found in the Appendices to this report.

Statements or witnesses were also invited from the following Local Governments, Associations and Firms who did not respond:—

United Provinces Government.

Bengal Dooars Railway Company.

Messrs. Bird & Co.

Messrs. Landale & Clark.

Messrs. Landale & Morgan.

Preliminary to the consideration of the questions before the Committee it is desirable to point out that the precise meaning of the following opening words of the resolution is not clear:—"The question of the most suitable site for the erection of a bridge across the river Ganges near Calcutta, with the object of affording the metre gauge system north of that river direct access to the country to the south has been under consideration for some time." This might be taken to imply that the object in view was confined to the extension of the metre gauge to Calcutta, were it not that the other schemes to be considered involved the linking up of lines of different gauges north and south of the river. To avoid any chance of misconception the President ascertained by personal interview with the Secretary, Department of Commerce and Industry, that the extract was not intended to bear such a restricted interpretation.

2. From the exhaustive report submitted by Mr. F. J. E. Spring, C I E.,
Chief Engineer, Indian Public Works
Department, in October 1903, and the

Urgency for a bridge.

evidence, now recorded, supported by perusal of Government documents to which we have had access, there is overwhelming proof not only that a bridge across the Ganges is very urgently required, but that it has been so for many years past. Particular attention is invited to the fact that only so recently as last year, the prices of food and grain in some localities served by the metre gauge line of the Eastern Bengal State Railway were raised to famine rates through the temporary failure of the railway ferry between Damukdia and Sara, and, had the block been further accentuated, the keenest distress might have resulted.

This state of affairs was quite beyond the power of the Railway Officials to foresee or provide against, and is one which is liable to recur at any time in an even more pronounced form, either from changes in the river or from other causes. It has also to be borne in mind that the conditions under which trade is conducted and financed at the present day are very different from those existing in former years, and require far more efficient means of transport and communication than were provided and accepted as sufficient in the past. In fact the railway ferry at Sara which serves the very important traffic between Calcutta and Northern Bengal, Eastern Bengal and part of Assam, even at the best and apart from its extensive liability to interruption, is an entirely inadequate means of communication for present day requirements. The inefficiency of the ferry communication and its frequent dislocation are, we believe, a source of very considerable loss to the commercial community and at the same time check in a very marked degree the material progress of the country.

We venture to express the opinion that, from the public point of view, the urgency of the provision of a bridge in place of the ferry has not been altogether realised by the Advisers of Government, and the reported requests of the commercial community for a bridge, which are contained in the correspondence, have scarcely received the attention they merited. Public opinion is unanimous that the necessity for a bridge over the Lower Ganges is one of extreme and absolute urgency and that a project for its provision should find an immediate place in the Government Railway Programme.

It is clear the mercantile community cannot understand the neglect of the many representations made by them, being aware of the fact that the want of a bridge is detrimental to the best interests of the State and to the best interests of the trade which they represent. It is quite evident from statements and figures submitted to us that the loss to the State is considerable and that the present inadequate ferries with their contingent difficulties and expenses, are but very inefficient substitutes for a bridge.

Economically the construction of a bridge is abundantly justified. In fact, the capitalized saving in working the combined traffic over the bridge as compared with that of the ferries will go some way in meeting that outlay. Again, the cost of working by ferries must increase in direct proportion to the traffic handled and might probably amount to 15 to 18 lakhs per annum within ten years, while the additional cost of working the larger traffic over a bridge would be comparatively quite small.

It may be presumed that traffic will continue to develop in the future as it has in the past, and it may reasonably be predicted that once a bridge is built the impetus given to trade by improved transport will result in a relatively larger increase in the future.

We consider, therefore, that from every point of view the construction of a bridge is urgently called for, and confidently advise that no further time should be lost in its commencement.

3. From the records already referred to there is no indication that prior to the year 1896 the question of the Lower Ganges Bridge was considered on any other grounds than as a means of improving communications at Sara. Subsequently, however, other interests became involved as it was recognized that the Bengal and North-Western and the Tirhut State Railway systems required an alternative route to Calcutta. As a consequence Godagiri came prominently into notice as a site, and it is a remarkable fact that it came to be accepted as the proper one to serve these other interests before any investigations had been made to prove whether this really was the case. This premature acceptance of Godagiri was, to say the least of it, unfortunate, for it has considerably complicated the question we have been investigating and has given rise to outlay which might otherwise have been avoided.

There is nothing to show that prior to 1906 the extension of the metre gauge south of the Ganges was ever seriously contemplated. On the contrary, at the time the Ranaghat-Moorshedabad line to Godagiri was commenced, towards the end of 1902, it was definitely decided to build that line on the broad gauge, as it was then recognized that the entry of the metre gauge into Calcutta would be attended with extreme difficulty and expense. Mr. Spring, judging by his report, certainly never considered the extension of the metre gauge across the Ganges as in any way connected with the scheme for the Lower Ganges Bridge, but assumed that the broad gauge would cross the river and extend to a transshipment yard near Naitore. It is further to be noted that early in 1906, when the Bengal and North-Western Railway made definite proposals to build a bridge at Godagiri at their own expense, they also contemplated the extension of the broad gauge across the river with an exchanging station on the north bank. At the end of 1906 the Railway Board propounded an entirely new scheme, which not only provides a bridge, but includes the extension of the metre gauge to Calcutta, and, as we understand from their notes, into certain Calcutta termini. This last scheme, therefore, contains novel features which place it on an entirely different footing from any previous proposals, and raises very intricate and important questions gravely affecting the interests of Calcutta trade.

It is not clear from the memorandum issued by the Railway Board whether they propose to carry the metre gauge into Howrah and the termini on the west side of the Hooghly, but it is understood that this is not contemplated and that by Calcutta termini only termini on the east side of the river are referred to. From this it necessarily follows that no matter what terminal facilities are provided, transshipment cannot be entirely avoided. The considerable traffic crossing the Hooghly by the Jubilee Bridge near Naihati must necessarily be transhipped at or near this junction, as it includes the traffic for various mills and private premises on the west side of the river which are connected with the East Indian Railway and with the Bengal-Nagpur Railway by sidings. In fact a transshipment yard at or near Naihati is essential for the exchange of traffic with the East Indian Railway and to serve the termini commencing at Bandel Junction and extending to below Shalimar on the Bengal-Nagpur Railway.

4. The entry of the metre gauge into Calcutta must of course either be—

- | | |
|---|--|
| Introduction of the metre gauge to Calcutta termini. | (1) complete, <i>i.e.</i> , into all termini now served by the standard gauge; or |
| | (2) partial, <i>i.e.</i> , into such termini only as conditions permit. |

In respect to the first alternative we, as the result of personal inspection of sites, and from evidence tendered during the enquiry, have no hesitation in deciding that the general adoption of the two gauges, laid either as separate or mixed tracks, is practically impossible.

As the Railway Board have expressed the opinion that "with regard to the terminal arrangements there is no reason to suppose that there will be any practical difficulty which is not susceptible of removal in providing them," and further have instanced Madras and Karachi as ports, the former served and the latter desirous of being served by both gauges, it is necessary to somewhat fully explain the reasons on which our decision is based.

As regards the termini on the east side of the Hooghly, these commenced at Naihati, where two large mills are served by private sidings, and extend to Budge Budge. There are, or shortly will be, 29 mills or private premises with siding connection to the Eastern Bengal State Railway, all of which are practically termini receiving traffic from metre gauge sources.

The following Eastern Bengal State Railway termini have also to be considered:—

| | |
|-------------------|---|
| Chitpore Ghat | } connected with the main line at Canal Junction. The Port Trust Railway has two connections with the Eastern Bengal State Railway at Chitpore Ghat. |
| Do. delivery yard | |
| Cossipore do. do. | |
| Ultadanga do. do. | |

Sealdah passenger terminus.

Do. goods do.

Baliaghata passenger terminus.

Do. goods do.

Dock Junction (where the Eastern Bengal State Railway connects with the yards of the Kidderpore Docks).

Budge Budge.

And in addition to the above the undermentioned termini of the Port Trust Railway must also be dealt with:—

The delivery and despatching stations between Chitpore Ghat and the Jetties.

The Jetties.

The grain sheds at Kidderpore Docks.

The hide do. do.

The tea do. do.

The various berths for loading and unloading ships' cargo at Kidderpore Docks.

Traffic from metre gauge sources is dealt with at present at all the above terminal points, and all of them ought to be served by metre gauge lines and rolling stock, if trade is to receive the facilities it now receives from the broad gauge.

5. The jute mills served by the Eastern Bengal State Railway really extend for 10 miles from Naihati to Budge Budge.

Mill premises.

The Railway Board apparently overlooked the existence of these termini when drawing up their memorandum, but they must have considered them subsequently, because in their note of February 5th [see Appendix A³] they make a proposal to construct a loop line along the river face, *i.e.*, from Naihati to Chitpore, in order to serve them independently of the main traffic lines. It is not clear from the Board's note whether this is to be a single mixed gauge line, or to consist of broad gauge and metre gauge tracks

alongside each other, or whether double mixed gauge tracks are intended. Unfortunately the proposal was placed before us after we had examined all the witnesses interested in it, and we were therefore unable to ascertain from them how far it is practicable or whether they thought the mills concerned would be likely to approve or accept it. However, anyone acquainted with the circumstances of the localities through which this loop would pass, as some of us happen to be, would certainly feel some doubt concerning its feasibility and know that the cost would be very considerable. The mill-owners would most certainly oppose the proposal, because they are perfectly satisfied with the existing arrangements and because they know that it would be difficult, if not impossible, to accommodate both gauges inside their premises, or to work both gauges if they could be introduced. Moreover, the loop would not serve mills or private premises as follows:—two large mills at Naihati, one at Canal Junction and seven mills and premises between Canal Junction and Budge Budge, so that if it was constructed traffic for many mills would still have to be transhipped. The Railway Board have considerably emphasised the fact that under their scheme transhipment would be avoided. If therefore for a large portion of the trade this is not so, the advantages are apparently over-estimated.

It must be remembered that large sums have been spent both by Government and by mill-owners on the existing sidings between Naihati and Canal Junction and also on passing sidings and signalling arrangements for protecting and working trains to and from mill premises. Not only would this outlay, a large portion of which has been met by the mills, be to a very great extent lost but heavy further expenditure would be involved by the introduction of a second gauge. Apart from all considerations of cost, complication in working must result from the introduction of a second gauge into premises which are, as a rule, ill-adapted for duplication of tracks, and on this ground it is probable that mill-owners would never agree to any such radical change of present arrangements.

For the foregoing reasons, and also as the proportion of metre gauge to broad gauge traffic is less than one-fourth, we consider the idea of admitting metre gauge to mill premises should be abandoned.

6. The authorities of the Eastern Bengal State Railway have recorded the opinion, with which we concur, that the introduction of the metre gauge into Chitpore Ghat, Ballaghatta, and Scaldah. Chitpore Ghat is absolutely impossible.

As regards Scaldah and Baliaghatta, formerly the termini respectively of the Eastern Bengal and Calcutta and South-Eastern Railways, these will in some future year be merged into one general terminus for passengers and goods. The authorities of the Eastern Bengal State Railway have shown that the metre gauge could not be introduced into the present broad gauge yards, all the spare space in which is certain to be required for foreseen broad gauge extensions. They however anticipate no difficulty, apart from the cost, in providing a separate terminus, passenger and goods, for the metre gauge alongside the broad gauge yard, and we consider their proposals in this respect feasible and should the metre gauge be extended to Calcutta, likely to meet public requirements.

7. The Eastern Bengal State Railway authorities further consider that the introduction of the metre gauge into the Chitpore, Ultadanga, and Cossipore yards is inadvisable and when it is considered that these yards are already congested with broad gauge traffic during the busiest period of the jute season, it must be admitted that there is force in these objections. It may be true that the admission of the metre gauge stock would, to some extent, relieve the yards of part of the work which now has to be done with broad gauge wagons, but it is very doubtful if this relief would be in any way effective, because a greater number of wagons of a smaller gauge would have to be handled in place of those of the larger gauge displaced. In fact, the total number of wagons of both gauges would be greater for the same traffic. Again, it is not possible to understand how the

Chitpore, Cossipore, and Ultadanga delivery yards.

same quantity of traffic that is now handled* in broad gauge wagons could be delivered in the same time if it were divided between broad and metre gauge wagons. Indeed the capacity of a yard for a fixed traffic would be unfavourably affected in two ways; first in the increase in the number of wagons to be handled, and secondly, in the time taken to handle them. We believe that grave risk of disastrous congestion at Chitpore will be incurred if the mixed gauge is introduced there, and even if it were introduced it would be necessary to construct separate receiving, marshalling and departure yards for its use. The result of such an experiment however would be so uncertain that it would probably be best to provide an entirely separate metre gauge terminus, as near to the present broad gauge terminus as circumstances may show to be possible, and to run no risk of dislocating the very important and valuable business in jute, which is perhaps the backbone of Calcutta trade and for which Chitpore and its various extensions have always been the natural termini.

8. No difficulty is anticipated in extending the metre gauge to Dock Junction where it will come in contact with the Port Trust Yards, from which the

Dock Junction and Budge Budge

Kidderpore Docks and the various depôts connected with them are served. It can be further extended to Budge Budge, either as a separate track or by a third rail in the existing broad gauge track, and can be introduced into the Budge Budge terminus without difficulty.

9. It has been represented to us that though mixed gauge tracks might be laid in these termini such an arrangement will be quite impossible to work and after very careful examination of the various

Stations between Chitpore Ghat to Jetties and including the Jetties.

sidings and yards and from a full consideration of the circumstances, we are bound to concur and to state emphatically that any attempt to introduce the metre gauge will assuredly lead to endless confusion and dislocation, and to a most serious increase in the congestion which is already periodically experienced. As an example of what has influenced us in these views we may explain that at Hatkholah, Ruthtolla, Armenian Ghat and other points on the Port Trust Railway between Chitpore and the Jetties there are three parallel tracks, the two outside tracks being used for loading and unloading and the centre track for running and shunting purposes. These tracks are frequently, and in fact generally, taxed far beyond their capacity, and if it were attempted to work them on the mixed gauge, the result would be absolute chaos. No relief is possible by the provision of more tracks because the space occupied by these is bounded by the river on one side and by the business part of the city on the other. River reclamation is quite out of the question, and the acquisition of private property would not only be financially impracticable but would also necessitate the removal of the private depôts which this section of railway is specially designed to serve.

10. The Railway Board have not proposed to introduce the metre gauge here, but we have nevertheless examined the conditions and are quite satisfied that it is as impossible to work two gauges at the dock

Ships, berths and hide sheds at Kidderpore.

berths as at the berths at the Jetties. The same difficulties exist in respect of the hide godowns but not to the same extent. It might be possible to lay the third rail and even to handle the wagons of the two gauges on a mixed track, but this could only be done at the certain risk of accidents and of considerable delays in carrying out shunting operations. The Port Trust authorities strongly object to the traffic of the hide sheds being handled on any other than the broad gauge.

11. The introduction of the metre gauge into the Tea Warehouses is an engineering possibility but only if laid as a mixed track. Owing, however, to the traffic

Tea sheds at Kidderpore.

being worked over scissors crossings, the complications of moving stock would be so enormously increased as to render prompt unloading of wagons arriving with tea and the loading of same for shipment impracticable. No space is available for separate tracks, and even if there were, the cost would be out of all proportion to the advantages gained, considering that only about 25,000 tons

of tea are received by rail which are dealt with at these warehouses. The arrangements here may be described as two rows of warehouses of two and four storeys, between which are three broad gauge tracks with platforms between the tracks and the walls of the warehouses. One row of warehouses is on the river side so as to command river craft. Tea brought by rail is delivered on the platforms and into the warehouse, whilst it is also loaded into broad gauge wagons on the same platforms for delivery to the shipping sheds. The structural alterations necessary to provide space for metre gauge working would require that the warehouses should be dismantled and rebuilt, an operation which, even if practicable, would be far too costly to be justified in the interests of trade.

12. The Railway Board, in their note of the 5th February 1906, state as follows :—

Kantapukur grain sheds.

“ With certain structural alterations the Railway Board are of opinion that direct access can be given to these localities, *i.e.*, and Kantapukur grain warehouses at the Docks to a sufficient number of sheds to deal with the traffic brought by the metre gauge and such alterations would in no way preclude both gauges having access to such sheds.”

We may say at once that it is quite impossible to set apart certain sheds for one gauge and the remainder for the other. The conditions under which warehousing is done prevent this. Consignments have to be distributed to the various sheds as rapidly as possible, and quite irrespective of whether they originate from broad gauge or metre gauge sources. To meet the requirements of trade the metre gauge must, if admitted at all, have access to all the sheds, and can, we believe, only obtain such access by laying a third rail on the existing broad gauge tracks. When business happens to be so brisk at these sheds that they become glutted, it is the practice to utilize sheds in other depôts and in any part of the Kidderpore premises where space may be available, and it must be understood that metre gauge wagons could not participate in these facilities for dealing with over-flow, so that on occasions it would become necessary to tranship their contents at Naihati. The metre gauge would require its own separate receiving, marshalling and departure sidings near Dock Junction, and a third rail would have to be laid in the tracks leading to the grain sheds as well as in all the tracks along one face of the sheds, the broad gauge tracks on the other face being reserved for loading grain for shipment into broad gauge wagons for conveyance to the ship's side. It is difficult to foresee what effect such arrangements would have on the working of the depôt, but, in the opinion of the officials concerned with this working, considerable extension in sheds and lines would be required in consequence of the complications which might arise in handling wagons of two gauges during times of exceptional pressure. It may be added, however, that space for such extension is available, though at great expence.

13. Although the Railway Board have not suggested the introduction of the metre gauge into the Budge Budge Oil Depôt, we are of opinion that it could be effected.

Budge Budge Oil Depôt

14. From the foregoing remarks it will be seen that the introduction of the metre gauge, if given separate accommodation, is possible at Baliaghatta and Sealdah

Possible metre gauge termini.

goods and passenger yards and at Chitpore delivery yard, and as a combined arrangement to the Budge Budge Oil Depôt and Kantapukur grain sheds. As regards Sealdah and Baliaghatta, the Eastern Bengal State Railway have estimated that a separate passenger and goods terminus of the metre gauge in the immediate vicinity of these stations would cost 52 lakhs. No estimate has been prepared for a separate terminus at Chitpore, but from the nature of the surrounding property, we are satisfied that the cost would certainly not be less than at Sealdah and Baliaghatta. As regards the cost of terminal accommodation at Kantapukur and Budge Budge, it may be remarked that the cost of extending the line from Canal Junction to Dock Junction has first to be considered. This extension could not commence near Sealdah but would have to take off near Canal Junction. The Eastern Bengal State Railway have

estimated the cost of a double track extension* at 32 lakhs. It is considered, however, that a single track should be sufficient to deal with the traffic when the estimate would be reduced to approximately 24 lakhs. A shunting yard would be required near Dock Junction for receiving, sorting and despatching trains to and from the Kantapukur and Budge Budge depôts. The cost of this is very difficult to estimate because the price of land here is doubtful: it is, however, not likely to be less than 1½ lakhs. The cost of taking a third rail to and into the Kantapukur depôt should not exceed two and a half lakhs. The Eastern Bengal State Railway have estimated that a third rail could be laid to Budge Budge and into the depôt there for one lakh. The total cost therefore of introducing the metre gauge to the Kantapukur and Budge Budge depôts would be about 29 lakhs. Adding this to say 10½ lakhs, the cost of terminal accommodation at Sealdah, Baliaghatta, and Chitpore, we obtain a probable total cost of partial terminal accommodation of about 133 lakhs.

In view of these figures and of the fact that a considerable portion of the traffic still remains to be transhipped, combined with the difficulty in working the mixed track in Kantapukur, and the comparative smallness of the grain and oil traffic, we cannot regard this partial admission as altogether satisfactory, and we are convinced that the commercial and trading communities of Calcutta would not consider it as meeting their requirements in the manner they have hitherto enjoyed. They would also feel that the extra cost of working and interest charges would eventually fall on the trade. Apart from these considerations, we would draw attention to the fact that the Wheat and Seed Trade Association, who are principally interested in the subject of the metre gauge entry into the Calcutta termini and who were expected to strongly support the proposal, have deprecated its admission in the clearest language [see Appendix S]. It may also be noticed that though one witness laid some stress on the advantage of avoiding transhipment in the case of oil, subsequent enquiries have elicited the fact that no extra allowance for leakage is made for wagon to wagon transhipment and that therefore the matter is hardly as serious as has been represented.

Before we conclude our remarks on the admission of the metre gauge to Calcutta termini, we will refer to paragraph 17 of the Railway Board's memorandum dated 19th December 1906 [see Appendix A'], which might be taken to imply that, because both gauges run into the Port of Madras and because the authorities at Karachi are pressing for the entry of the metre gauge into their Port, there should be no particular difficulty, which is not susceptible of removal, in providing terminal arrangements for the metre gauge at Calcutta. We deputed, with a view to the examination of these arguments, two members of the Committee to visit Madras to inspect the arrangements of the two gauges at the harbour there, and to examine the Traffic Manager of that Port [see Appendix J]. The important feature in regard to Madras, as pointed out to us by our Sub-Committee, is that the two gauges both ran into the town of Madras, one from the west, and one from the south, before the harbour and its various works were constructed, so that in designing these works which are served by mixed tracks they were laid out for the express purpose of meeting the requirements of both gauges. In Calcutta the far more difficult problem exists of accommodating the two gauges, which would both enter the city from the same direction, in termini and yards which have been designed for the accommodation of one gauge only. Possibly if the process which has been followed at Madras had been adopted at Calcutta in the earliest days of Railways, the two gauges might have been provided with termini suitable for the traffic, and convenient to trade, but to do so now is a problem for the solution of which there are, as far as we know, no precedents and no examples. The circumstances under which exports are disposed of at Madras differ widely from those obtaining at Calcutta as will be seen from Appendix J, and it is important to understand that—

- (1) no vessels come alongside the jetties or into docks at Madras, and all cargo is shipped or unshipped by lighters;
- (2) scarcely any export cargo is taken direct to the harbour by the two Railways;

- (3) nearly all import cargo, except coal, heavy materials required to be handled by cranes, and oil, is removed by carts and is not despatched by rail;
- (4) the Port authorities only receive a small number of loaded wagons at the export sheds. Empty wagons for coal, heavy materials, and oil, which require no shunting or sorting, are all taken over from and handed back to each Railway at definite points.

It is scarcely necessary for us to remark that the rail-borne trade handled at Madras is inconsiderable and not comparable with that handled at Calcutta.

We made enquiries from the Karachi authorities regarding the demand for the entry of the metre gauge into their Port, and their reply will be found in the Appendices [*see* Appendix T]. We conclude that they do not intend to admit the metre gauge to their promises, but that they anticipate that transhipment will be effected outside those.

We have not referred so far to the effect on working cost if the metre gauge is introduced into the Calcutta termini, either wholly or partially; in either case there will be a large increase in interest charges on the cost of new metre gauge lines and accommodation, whilst at the same time there will be a loss of net earnings on broad gauge lines in consequence of the diversion of traffic. In addition to the above, the actual cost of working the traffic in the Calcutta termini will be enhanced. The commercial community would certainly protest most strongly against any increase in the charges now levied on trade to meet the considerable extra annual outlay involved, and it would probably have to be borne by the Eastern Bengal State Railway and the Port Trust.

Taking all these factors into consideration, we do not consider the time is ripe for the admission of the metre gauge into Calcutta.

15. Having come to the conclusion that the admission of the metre gauge into the termini in Calcutta is undesirable, its extension south of the Ganges has now to be considered, as on this the scheme formulated by the Railway Board must stand or fall. The only result connected with the extension of the metre gauge south of the Ganges would be the transfer of the main transhipment station between the broad and metre gauges to the south from the north bank of the river. The sense of evidence taken points most distinctly to the desirability of the transhipment station being located as far as possible from Calcutta owing to cheapness of land and labour and to the extra broad gauge lead thereby obtained. We are further influenced by a consideration of the cost of the Railway Board's scheme put forward in paragraph 13 of their memorandum. It is there estimated to amount to 390 lakhs, whereas we have prepared an approximate estimate, amounting to over 500 lakhs, mainly compiled from figures obtained during the course of the enquiry (*see* Appendix K).

We fully recognize that a most incalculable benefit would be conferred on the vast tracts of country in Bengal, Behar, the United Provinces, and Eastern Bengal and Assam, which are served by the metre gauge, if that gauge could be extended to Calcutta so as to meet the requirements of trade completely and without the least restriction. We further recognize and admit that every possible and reasonable facility ought to be given to metre gauge Railway Administrations to attain this; and if it can be attained, even though at considerable sacrifice, this sacrifice ought to be made, but we are unable to recommend that the efficiency and usefulness, present and future, of the Calcutta broad gauge termini should be sacrificed to this end. India is, only now, beginning to fully recognize, and to respond to, the advantages and facilities conferred by railway communications, and the effect of this somewhat tardy development must be a severe strain on the resources of open lines. These resources are likely to demand considerable improvement if the requirements of trade are to be met in even a reasonable manner, and very large outlay will therefore be necessary in future on open lines. This being the case it is scarcely likely that the Government of India, who have to finance nearly every railway in the country, will in the near future be able to increase or even maintain its grants for new lines and extensions. We venture to doubt therefore if the expenditure of perhaps over 500 lakhs, entailed by the adoption of the scheme

of the Railway Board, would be acceptable to the Government of India when the requirements of trade can be effectively provided for by an alternative scheme, in which the broad gauge would be extended across the Ganges to a transhipment station north of the river, at a cost of some 212 lakhs. Under these circumstances there appears to be no justification for extending the metre gauge south of the Ganges.

16. If it is accepted that for financial and general reasons the extension of the metre gauge to Calcutta is not at present practicable, the question of bridging the Lower Ganges may be considered from precisely the same general stand-points as were adopted by Mr. Spring, *viz.*, that the bridge will accommodate the broad gauge, and that the traffic will be transhipped on or near the north or left bank of the Ganges. We shall now compare the values of the three sites for the bridge, quite apart from all questions of gauge to the south of the Ganges.

Before studying these matters in detail, however, it is necessary to revise, or rather to bring up to date the figures for distance, and the cost of connecting lines worked out by Mr. Spring in 1903, as given in his report. Since this was written the line from Ranaghat to Lalgola, opposite Godagiri, has been constructed, and the Katihar-Godagiri line has been located and partly constructed. We therefore have the advantage of using actual distances on these lines, while Mr. Spring had to assume lines and scale distances on maps. We also have the actual figures of the cost of these lines which were not available at that time. The table below compares Mr. Spring's distances with those recently compiled by us.

| Route and bridge site. | DISTANCE. | | | |
|-----------------------------------|----------------------|---------------------|---------------------|----------------------|
| | Mr. Spring, 1903. | Committee, 1907. | Mr. Spring more. | Mr. Spring, less. |
| <i>Katihar to Calcutta.</i> | Miles. | Miles. | Miles. | Miles. |
| (1) <i>Via</i> Godagiri | 251 | 246½ | 4½ | ... |
| (2) „ Isabpur | 252 | 250½ | 1½ | ... |
| (3) „ Raita | 263 | 260½ | 2½ | ... |
| <i>Parbatipur to Calcutta.</i> | | | | |
| (4) <i>Via</i> Raita | 228 | 228½ | ... | ½ |
| (5) „ Isabpur | 243 | 237 | 6 | ... |
| (6) „ Godagiri | 265 | 269½ | ... | 1½ |

The differences under (1), (2), (3), (5) and (6) require some explanation:—

(1) Mr. Spring assumed an alignment between Katihar and Godagiri and between Lalgola and Ranaghat. We have adopted the actual alignment and the measured distances.

(2) and (3). As in (1) the actual Katihar-Godagiri alignment has been used.

(5) The most favourable site for the Isabpur Bridge at the present time has been adopted. This site is nearer to the Eastern Bengal State Railway than Mr. Spring's site, consequently the connections with Chuadanga on the south and with Nattore on the north of the river are shorter.

(6) Mr. Spring's distances are measured from Santahar to Godagiri, whereas we have measured from Nattore; we have preferred to take Nattore because it has also been taken for the Isabpur Bridge, and both Isabpur and Godagiri ought to be compared on the same connection basis north of the

Ganges. Moreover, Nattore would probably be adopted as the off-take of the connection for the proposed new Railway to Serajganj.

The following table shows the rates taken per mile :—

| Description. | Mr. Spring, 1903. | Committee, 1907. |
|---|-------------------|------------------|
| | Rs. | Rs. |
| (1) New double line, broad gauge | 2,00,000 | 1,48,370 |
| (2) Doubling existing line, broad gauge | 60,000 | 62,315 |
| (3) New single metre gauge line | 70,000 | 81,216 |

As regards (1) the cost of the Ranaghat-Lalgola single broad gauge line, exclusive of rolling stock and ferries, has been taken and multiplied by 1·66 to obtain the rate of Rs. 1,48,370. To obtain (2) the same cost has been multiplied by 0·70. For (3) we have taken the cost of the Katihar-Godagiri line, also excluding rolling stock and ferries. As connecting lines, north and south of the Ganges, will be built under almost the same conditions as the Katihar-Godagiri and Ranaghat-Lalgola lines, respectively, it has been considered correct to adopt the figures of cost from these lines.

The cost of connecting lines on the lengths and mileage of roads accepted by us above is detailed below, but in each case 5·70 miles, being the length of the bridge and its graded approaches, have been excluded from the broad gauge connecting lines :—

Godagiri Scheme

| | | Rs. | Rs. |
|---|----------|------------|-----|
| Doubling existing broad gauge line 85½ miles at | 62,315 | 53,13,867 | |
| New double broad gauge „ 5·70 „ „ | 1,48,370 | 8,15,709 | |
| „ single metre gauge „ 50·45 „ „ | 81,216 | 42,15,697 | |
| TOTAL | | 104,08,273 | |

Isabpur Scheme.

| | | |
|---|----------|------------|
| New double broad gauge line, 44·60 miles at | 1,48,370 | 66,17,302 |
| „ single metre gauge „ 47·10 „ „ | 81,216 | 39,65,574 |
| TOTAL | | 105,82,876 |

Raita Scheme.

| | | |
|--|----------|-----------|
| Doubling existing broad gauge line, 11½ miles at | 62,315 | 7,24,412 |
| New double broad gauge „ 8·35 „ „ | 1,48,370 | 12,38,890 |
| „ single metre gauge „ 47 „ „ | 81,216 | 39,65,152 |
| TOTAL | | 59,21,454 |

We may now compare the three routes—and first we would remark that we have adopted Mr. Spring's figures for the cost of the bridge and its training works as follows :—

| | Lakhs. |
|--------------------|---------|
| Godagiri | Rs. 110 |
| Isabpur | 120 |
| Raita | 180 |

Mr. Spring, although he estimated for a double line on the approaches to the bridge, included only a single line on the bridge itself. We are not aware why

he did this, and believe that it would be bad economy to build a bridge for a single line. We will however discuss this point later (see paragraph 30).

The approaches to the bridge and transshipping yard would cost practically the same at each of the three sites; the length of the graded approaches, including the bridge itself, may be taken as 5.70 miles and the cost as 12½ lakhs.

The cost of a transshipment station, including passenger stations and receiving, marshalling and departure and transshipping yards, is taken as 10½ lakhs.

We may now proceed to discuss with reference to cost the comparative merits of each in detail.

(1) *Godagiri*.—The total cost of the bridge would be—

| | Lakhs. Rs. |
|--|---------------|
| Bridge | 110 |
| Approaches and transshipment station | 23 |
| Connecting lines | 104 |
| TOTAL . | 237 |

The Eastern Bengal State Railway traffic will be overled by 40¾ miles, Parbatipur to Calcutta *via* Godagiri being 269¼ miles, Parbatipur to Calcutta *via* Raita 228½ miles—difference 40¾ miles. By constructing longer and therefore, more costly connecting lines the overlead of 40¾ miles may be largely reduced. The connections required in the case of Godagiri are direct lines from Parbatipur and Santabar. The extra cost of constructing these lines would be Rs. 79, 5,361, and the distance by which traffic is overled would be reduced to 12 miles. In the long run it might be economical to construct the longer connections in the first instance.

(2) *Isabpur*.—The total cost would be—

| | Lakhs. Rs. |
|--|---------------|
| Bridge | 120 |
| Approaches and transshipment station | 23 |
| Connecting lines | 106 |
| TOTAL . | 249 |

The length of overlead can be reduced in the case of the Eastern Bengal State Railway by constructing a connecting line from Raninagar at an extra cost of Rs. 12,21,132, and the distance from Parbatipur to Calcutta will be reduced to 228½ miles, or the same as *via* Raita, so that there will be no overlead of traffic. In the case of the Bengal and North-Western Railway traffic no improvement in connecting lines is feasible. For an extra expenditure, therefore, of Rs. 12,21,132 the overlead on the Eastern Bengal State Railway can be obviated. In this case also it might be economical to construct the longer, or more costly, connecting line in the first instance.

(3) *Raita*.—The total cost will be—

| | Lakhs. Rs. |
|--|---------------|
| Bridge | 130 |
| Approach lines and transshipment station | 23 |
| Connecting lines | 59 |
| TOTAL . | 212 |

No shortening or improving connecting line is feasible; the length of the overlead of traffic cannot, therefore, be reduced in case of Raita.

The cost of bridges at the three different sites with their various connections discussed under each site is abstracted in the tabular form below :—

| Scheme. | Cost of bridge with approaches and transshipment station | Cost of short connections. | Additional cost of improved connections to shorten routes. | TOTAL OUTLAY. | Overlead of Traffic. |
|---------------|--|----------------------------|--|---------------|--|
| | Rs. | Rs. | Rs. | Rs. | Miles |
| (1) Raita . | 153,00,000 | 59,21,454 | ... | 2,12,21,454 | B. & N.-W. R. 13½ |
| (2) Isabpur . | 143,00,000 | 1,05,82,576 | 12,21,132 | 2,61,01,008 | B. & N.-W. R. . Nil. E. B. S. R. . Nil. |
| (3) Isabpur . | 143,00,000 | 1,05,82,576 | ... | 2,15,82,576 | B. & N.-W. R. 3½ E. B. S. R. . 8½ |
| (4) Godagiri | 133,00,000 | 1,01,08,273 | 79,85,361 | 3,16,93,631 | E. B. S. R. . 12 |
| (5) Godagiri | 133,00,000 | 1,01,08,273 | .. | 2,37,08,273 | Do. . 40½ |

From this it will be seen that under total outlay Raita has a great advantage over the other sites, the difference varying from 25 to 105 lakhs and also that the length of overlead is very little greater than in the case of Isabpur (3).

There is also another point in favour of Raita compared with Godagiri. If Godagiri is selected the existing double track from Ranaghat-Poradah, 57 miles, would be wasted and its usefulness thrown away, whereas it would be necessary to double 89 miles of single line—Ranaghat to Bhagwangola—a work never likely to be required to accommodate local traffic.

17. Mr. Spring in his report has stated [see paragraph 2, chapter 16] :—

Engineering value of alternative bridge is concerned there is nothing to sites. choose between the several alternative bridge sites. So far as the training of the river also is concerned there is but little to choose."

Although the Railway Board in their memorandum apparently differ from the above *dicta*, we, as a Committee, after recently inspecting all three sites, see no reason whatever to reject or question them, though we may perhaps suggest that expert opinion, and possibly Mr. Spring himself, might advise that the Godagiri site, under present conditions, is not so well adapted for the training of the river as the other two sites. We may decide therefore that in effect for construction purposes one site is as good as another.

18. It will be convenient at this point to show how Isabpur, assuming that the question was not complicated and to Special considerations affecting Isabpur and Godagiri. a great extent governed by existing lines, would undoubtedly be the proper site to select for a bridge, inasmuch as both railways could then obtain the shortest possible route to Calcutta. As already pointed out above, an unfortunate mistake appears to have been made in assuming Godagiri as the proper site to serve the Bengal and North-Western Railway before any measures had been taken to verify this assumption. Mr. Spring proved in his report that Isabpur, or the crossing near there which he selected in 1903, provided a route from Katihar to Calcutta which was practically the same in length as that between the same places *via* Godagiri. At that time scarcely any work could have been done on the Ranaghat-Moorshedabad line and none beyond Moorshedabad, whilst the Katihar-Godagiri line had not even been located. If instead of proceeding with these lines, the lines connecting Katihar and Chuadanga to the Isabpur site had been constructed that site would now have possessed far greater advantages than Raita does at present, inasmuch as the outlay would have been about 62 lakhs less and there would have been no overlead of traffic. The estimated expenditure on the line to Godagiri is as follows, excluding rolling stock and ferries :—

| | |
|---------------------|-------------|
| Ranaghat to Lalgola | Rs. |
| Katihar to Godagiri | 86,79,660 |
| | 89,86,770 |
| TOTAL | 1,76,16,430 |

To complete the comparison between Godagiri and Isabpur, the cost of doubling a single broad gauge line—Bhagwangola to Ranaghat—must be added, say Rs. 63,91,744, bringing up the total cost to Rs. 2,10,03,174. The probable cost of a corresponding line to Isabpur is as follows:—

| | Rs. |
|--|--------------------|
| To Isabpur [<i>see page 861</i>] | 1,05,82,876 |
| From junction of line from Isabpur with Katihar-Godagiri line to Katihar | 72,12,576 |
| TOTAL | 1,78,25,152 |

The lines to connect Isabpur would, therefore, have cost Rs. 61,82,722 less than those built to Godagiri, and the outlay necessary to construct a bridge and the transshipping station would have been:—

| | Lakhs. |
|--|------------|
| Bridge | 120 |
| Approaches and transshipment station | 23 |
| TOTAL | 143 |
| Bridge at Raita | 212 |
| Saving | 69 |

If Godagiri had been abandoned, as perhaps it ought to have been when Mr. Spring submitted his report, nearly 62 lakhs might have been saved in connecting lines and a bridge could have been built at a saving of 69 lakhs. Altogether over 130 lakhs, or enough to build a bridge, might have been saved and the problem now before us, as a Committee, would have been perfectly simple.

19. In comparing the relative traffic advantages of the alternative bridge

Relative traffic advantages of the three bridge sites.

sites, it is necessary to form some estimate of the ton-mileage which will probably be diverted from the shortest route in each case. It is obvious that a large proportion of the Bengal and North-Western Railway traffic to and from Calcutta will be the subject of competition or arrangement, so that an appreciable percentage of this traffic must continue to cross the Ganges above Godagiri and will not use a bridge located on the lower reaches of the river. On the other hand, provided the Katihar-Ganges link continues to be operated by State Agency, the whole of the entirely local traffic between the Eastern Bengal State Railway stations and Calcutta will cross the river by a conveniently situated Lower Ganges bridge. From the returns submitted by the Bengal and North-Western Railway and printed as Appendices D² and D³, of the traffic crossing by the ferries at Tari, Digba, Mokameh, Monghyr, and Manihari, it will be seen that for all practical purposes the traffic carried *via* Mokameh need alone be considered. This traffic fluctuated largely during the seven years 1900-1906, for which statistics have been furnished, but as during the last two years abnormal conditions consequent on partial failures of the wheat and seed crops prevailed, the figures relating to the year 1904 are selected for examination. Analysis of the returns for this year shows that the total goods traffic, amounting to 736,786 tons, which crossed at Mokameh was divisible as under:—

| | Outwards. | Inwards | TOTAL. |
|-----------------------------------|----------------|----------------|----------------|
| | Tons. | Tons. | Tons. |
| Coal | ... | 156,670 | 156,670 |
| Railway material | 17 | 30,883 | 36,900 |
| Short traffic | 29,488 | ... | 29,488 |
| Calcutta public traffic | 368,829 | 138,049 | 506,878 |
| Other earnings | 6,812 | 538 | 6,850 |
| | 404,616 | 332,140 | 736,786 |

The colliery, non-Calcutta and other traffic aggregating 193,008 tons could be retained by the East Indian Railway in competition, and is not likely to be

routed *via* Lower Ganges bridge, while railway materials would unquestionably travel over the Bengal and North-Western Railway route and use such a bridge. The balance of traffic, consisting of about 500,000 tons of public merchandize imported into and exported from Calcutta, would be subject to competition or arrangement. The administration of the Bengal and North-Western Railway considers it could secure the whole of this traffic, while the Agent of the East Indian Railway maintains that with fair treatment, *i.e.*, provided equal through rates prevail by both routes, the traffic would continue to travel *via* Mokameh. With this apparently conflicting evidence an examination in some detail of the nature and weight of the various commodities crossed at Mokameh is necessary in order to form some idea of the division of the traffic between the rival routes during competition. The outwards traffic of the Bengal and North-Western Railway, including that carried short of Calcutta, consisted mainly of the following:—Grain and seeds 335,000 tons, saltpetre 11,000 tons, tobacco 10,000 tons, sugar 7,000 tons, and miscellaneous merchandize 34,000 tons. Practically the whole of the first four commodities and a preponderating weight of the last could be routed to serve the interests of the Bengal and North-Western Railway, so that the division of this outward traffic between the two crossings might fairly be assumed to be in the ratio of 10 *via* Mokameh and 3·7 *via* the Ganges bridge. In regard to traffic in the opposite direction, the largest items are piece-goods 16,000 tons, metals 10,000 tons, oil 17,000 tons, gunny 7,000 tons, salt 65,000 tons, and miscellaneous merchandize 20,000 tons. The competition for piece-goods, oil, gunny, and miscellaneous items would probably be severe, but the route favoured by the Bengal and North-Western Railway should secure about three-fourths of the tonnage despatched from Calcutta. The East Indian Railway, from the fact that the bulk of the salt and a portion of the metal traffic originates on the Howrah side of the Hooghly, has some advantage in competing for these commodities and might succeed in carrying two-thirds of the traffic. On these assumptions, the inward traffic of the Bengal and North-Western Railway despatched from Calcutta would be carried *via* Mokameh and the Lower Ganges bridge in the respective proportion of 65 and 70. Summarizing the foregoing results, and applying them to the figures for 1904, the Calcutta traffic under competition would have been routed in the approximate proportions of 76,000 tons *via* Mokameh, and 430,000 tons *via* the route favourable to the Bengal and North-Western Railway. Adding these weights to those of the non-competitive items referred to previously, it will be seen that, had competition existed in 1904, the Bengal and North-Western Railway could in all probability have, out of a total traffic of 736,000 tons crossing at Mokameh, diverted 467,000 tons to a bridge route over the Lower Ganges and could not have influenced 269,000 tons.

This estimate being based on the existence of competition gives figures which would be appreciably affected by any agreement for the division of traffic, and it is consequently necessary to enquire into the probability of such an arrangement being come to. Government would naturally be desirous that competition should be avoided, but it is doubtful whether it would endeavour to enforce any drastic preventive measures. In the first place, by having sanctioned the construction of railway from Katihar and Ranaghat to the Ganges at Godagiri, it has to all intents and purposes established a practical route *via* the latter crossing, so that any interference with the reasonable use of the new connection would not only stultify past action, but might lay Government open to an undesirable charge of subjecting the Bengal and North-Western Railway to unfair treatment. In the second place, the accordance of the fair treatment demanded by the East Indian Railway would involve restriction of the liberty of a railway to vary rates between its sanctioned maxima and minima and might form an awkward precedent. The East Indian Railway would certainly not submit tamely to the loss of some 450,000 tons of traffic having a lead of 284 miles. It is true that as matters now stand it could not hope to secure the traffic in competition, and that any reductions of rates might prejudicially affect the earnings from traffic unconnected with the Bengal and North-Western Railway, but it could compel the administration of this Railway to lower its rates for Calcutta and perhaps for other traffic to a very serious extent. It is more than probable under these circumstances that both sides would find it financially advisable to hold up rates and either divide their competitive traffic in fairly equal proportions, or in deference to the interests of

Government, to agree to an arrangement on the lines suggested in paragraph 29 of this report.

On the basis of these assumptions, and of an equal division of competitive traffic, the tonnage carried *via* Mokameh during 1904 could be re-distributed as under :—

| | <i>Via</i> Mokameh | <i>Via</i> Ganges Bridge |
|--|-----------------------|--------------------------------|
| | Tons. | Tons. |
| Calcutta competitive traffic | 253,139 | 253,139 |
| Coal | 150,670 | . |
| Railway materials | . | 36,900 |
| Traffic short of Calcutta | 29,455 | . |
| Other traffic | 6,850 | .. |
| TOTAL | 416,447 | 290,339 |

The second alternative, on the basis of the arrangement suggested at the end of paragraph 29, would result in the following division, it being assumed that the whole of the traffic in question must pass through Barauni Junction and that railway material would still be carried by the route most favourable to the Bengal and North-Western Railway :—

| | Tons |
|------------------------------|----------------|
| <i>Via</i> Mokameh | 699,886 |
| „ Ganges Bridge | 36,900 |
| TOTAL | 736,786 |

The Agent of the Bengal and North-Western Railway anticipates that the contemplated extension of his line by 42 per cent. will increase the traffic carried between it and Calcutta by 50 per cent. This forecast appears somewhat sanguine as regards the near future, and sufficient allowance for general development of goods traffic over the extended system will probably be afforded by adopting the tonnage given below as the weight of the Bengal and North-Western Railway traffic crossing a Lower Ganges bridge :—

| | Tons. |
|--|---------|
| (1) With competition | 600,000 |
| (2) Under agreement :— | |
| (a) Equal division competitive traffic | 400,000 |
| (b) Under terms detailed in paragraph 29 | 50,000 |

As regards passenger traffic the highest number crossing at Mokameh in any one year was 592,900, in 1905, of whom about one-half travelled to and from Calcutta. Unless, of course, the Bengal and North-Western Railway blocked its service between Barauni Junction and Mokameh Ghât to an extent which neither Government nor the public would tolerate, it is doubtful whether any large number of passengers would desert a route which, while decidedly shorter, also comprises a longer length of broad gauge line than its rival. Ten per cent. of the whole traffic would probably be an outside estimate of the possible diversion by Katihar allowing a 50 per cent. increase for the extension of the system, and considering 20 passengers as equivalent to the ton, the weight of Bengal and North-Western Railway passenger traffic carried across a Lower Ganges bridge would be under 5,000 tons. In determining the total Bengal and North-Western Railway traffic likely to use a Lower Ganges bridge, this figure may, therefore, be added to the estimate tonnage of goods before detailed.

In regard to the trans-Ganges traffic of the Eastern Bengal State Railway, the tonnage of Calcutta traffic now handed over to the East Indian Railway *via* Manihari Ghât may be taken as the volume of traffic for which a *via* Godagiri

route would be the shortest. The latest available (1905) statistics give the amount of this traffic as—

| | |
|----------------------|------------------|
| Goods | 88,783 tons. |
| Passengers | 10,959 (number). |

The traffic crossing the river at Sara is for the same period returned as—

| | |
|----------------------|-------------------|
| Goods | 466,840 tons. |
| Passengers | 359,590 (number). |

There is every reason to suppose that these figures will increase, though possibly the development of traffic may not be so extensive or rapid as in the case of the Bengal and North-Western Railway, which is not to the same extent restricted by the financial programme of Government. For the purposes of this report it may be assumed, without serious error, that such increase will be 30 per cent., against 50 per cent. allowed for the Bengal and North-Western Railway traffic.

This assumption completes the approximate estimate of tonnage necessary for the formation of an opinion on the relative suitability from a traffic aspect of the Godagiri, Isabpur and Raita sites for the Lower Ganges bridge. Each site involves a certain increase of lead over that of the shortest route, and obviously the one which reduces the diversion of traffic to a minimum is best suited to transport requirements. The following statement, based on the tonnages estimated here, is designed to exhibit the loss in ton-mileage consequent on the adoption of each site under the different conditions previously discussed—

| Conditions under which traffic is carried | GODAGIRI | | | ISABPUR | | | RAITA | | |
|---|--|-------------------|------------|--|-------------------|-----------|--|-------------------|------------|
| | Bengal and N W Railway and E B State Railway | E B State Railway | Total | Bengal and N W Railway and E B State Railway | E B State Railway | Total | Bengal and N W Railway and E B State Railway | E B State Railway | Total |

| (b) TERMS GIVEN IN PARAGRAPH 20 | | | | | | | | | |
| Tons } B & N W R 55,000 } carried } E B S R 116,000 } | 171,000 | 630,000 | | 171,000 | 630,000 | .. | 171,000 | 630,000 | ... |
| Miles of overlead | 0 | 41 | | 4 | 9 | ... | 14 | 0 | ... |
| Loss in ton-mileage | 0 | 25,830,000 | 25,830,000 | 684,000 | 5,670,000 | 6,354,000 | 2,394,000 | 0 | 2,394,000 |

From this table it will be seen that, as regards suitability from the traffic aspect, Godagiri is quite out of the question, while Raita possesses an advantage over Isabpur except under unrestricted competition.

20. So far as the public is directly concerned, the selection of the most suitable site for the bridge is governed by the conditions necessary to secure cheap

Bridge location as affected by public requirements.

freight charges, decrease of loss and

damage to consignments, quick transport, personal convenience, and rapid bridge construction. Low transport charges are mainly dependent on directness of route, and would perhaps be best assured by building the bridge at Isabpur, though the difference in the overleading between this site and that at Raita is so small as to be negligible. The location of the bridge at Godagiri would distinctly increase the length of the routes travelled by the bulk of trans-Ganges traffic, and result in an appreciable and permanent tax on trade. In the majority of cases loss and injury to consignments can be directly traced to transshipment, and accepting the impracticability of gauge conversion north of the Ganges the drawback can only be best removed by placing the bridge at Isabpur and extending the metre gauge over it to Calcutta. The through speed at which goods can be carried depends on transshipment, lead, and the proportions of broad and metre gauge in the route. Of these, transshipment is generally the greatest source of delay, and as before remarked its elimination is easiest at Isabpur. For shortness of route the Isabpur site also holds a slight advantage over that at Raita, while both are decidedly superior to the one at Godagiri unless heavy expenditure on connections is incurred. The mileage of a broad gauge line in the Godagiri and Raita routes is dependent on the location of the junction between the two gauges, but in the near future there would probably be but little difference in the two lengths. In regard to passenger traffic, the main requirements are that the arrival and departure times of trains at principal stations should be at suitable hours, and that change of carriage be avoided or, at any rate, made at convenient times.

21. Rapidity of construction is perhaps a minor factor in the choice of

Location as affected by rapidity of construction.

It would no doubt take longer to construct a bridge at Isabpur than at Godagiri or at Raita, because the site is not connected with main lines and little or no work could be done till the connecting lines were built. Godagiri is nearer the main source of stone supply than Raita, and this no doubt might give it some advantage in the time likely to be required for the construction of the bridge. But after all the longer lead for stone supply can be overcome by increased plant and, with proper arrangements, no more time should be required to construct a bridge at Raita than at Godagiri.

22. In paragraph 12 of the memorandum by the Railway Board, some

Location as affected by the opening up of new country.

stress is laid on the advantage likely to be secured by the adoption of the Board's Rampur Boalia scheme in opening out a new tract of country south of the Ganges, and in paragraph 15 of the same it is stated that this would confer solid advantages on the trade of the Port. From information supplied to us by the Government of Bengal, Public Works Department, we are enabled to state that up to 1903 that Government did not include in its schemes for new lines submitted from time to time to the Government of India any proposals for a line through the tract of country referred to by the Railway Board. In 1903, however, the District Board of Nuddea began to advocate the construction of a light feeder railway from Krishnagar *via* Meherpur to Jellinghee or say to the right bank of the Ganges opposite Rampur Boalia. The Government of Bengal consulted Mr. J. Munro, C.B., formerly of the Indian Civil Service, who possesses great local knowledge of this tract, in regard to the proposals for this light railway. Mr. Munro, who was opposed to the scheme, wrote as follows :—

“Nuddea is a poor district and the ryots of the tract through which the line passes are, as a whole, in many places the poorest in Nuddea. The tract is notorious in times of pressure, scarcity, or famine and the ryots generally have not much to spare for travelling.”

Mr. Munro considered that it would be a better policy to improve the waterways serving the tract, rather than to provide railway communication. The Eastern Bengal State Railway authorities have since prepared a detailed survey and project for the light railway from which it appears that the gross earnings are estimated at Rs. 1,37,882 per annum, equivalent to Rs. 48 per mile per week. The country is fairly well served at present by the rivers

Matabhanga and Churni on the east and by the Jellinghee on the west, streams which are navigable by small boats throughout the year and by steamers during the rains. A railway, other than a light feeder line through this tract, is not in our opinion demanded at present, and it will certainly not confer any solid advantages on Calcutta as a port.

23. We think that due weight should be attached to the fact that the bulk of the goods traffic which now uses the Sara ferry route is jute and that Raita is undoubtedly the most desirable and convenient route for this, a staple which is perhaps more important to the Calcutta trade than any other. The present traffic in jute *via* Sara is capable we believe of very considerable expansion. By the construction of the rejected line from some point north of Sara to Serajganj a large and fertile tract of country entirely devoid of railway communication will be opened up. Ample evidence has been tendered in the course of our enquiry to show that this line will be of considerable benefit to the jute trade and industry. If the bridge is built at Raita, it will be possible, and perhaps economically correct, to construct an extension to Serajganj on the broad gauge. In fact we have been told by the Manager of the Eastern Bengal State Railway that the project has been prepared for a broad gauge line. Direct unbroken communication on one gauge from Seraganj to Calcutta would undoubtedly be a very great boon to the jute trade. If, however, the bridge should be built at Isabpur the extra lead from Serajganj to Calcutta will be so great that the traffic prospects might not be such as would justify a broad gauge line. And if, again, a bridge were built at Godagiri the extra lead would be, we believe, prohibitive to such an extent that the branch to Serajganj would never be built. Clearly then since if the bridge is built at Raita far better facilities can be given to Serajganj, which is, next to Narainganj, the largest jute mart outside Calcutta, than at any other site, Raita possesses advantages, in a commercial sense which the other sites do not. Jute may be considered typical of the Eastern Bengal State Railway traffic, and wheat and seeds of the Bengal and North-Western Railway traffic. We desire to remark that the trade in the former, to the best of our belief, must always be very much more stable than in the latter. The vast mill industry of Calcutta must obtain its stocks of raw jute annually and Bengal has practically a monopoly of jute export., because jute is practically speaking not produced in any other country. On the other hand, the wheat export trade from Calcutta is of a most uncertain character, whilst the consumption locally is small. Linseed, too, is possibly not free from unfavourable influences since it is produced in various countries. Our conclusion is, therefore, that Raita is best suited for a bridge, judged from a commercial aspect only.

24. The Railway Board have expressed the opinion that the location of the Lower Ganges Bridge at either Sara or Godagiri will eventually be followed by the building of a second bridge at the other site, and that the only way of avoiding this duplication lies in the selection of the intermediate position at Rampur Boalia (Isabpur). The Agent of the Bengal and North-Western Railway has stated in his evidence that unless the bridge is built at Godagiri or Rampur Boalia his administration will construct one at the first mentioned place. The Manager, Eastern Bengal State Railway, considers that the over-leading of traffic by over 25 miles would justify the construction of another bridge, and on this ground maintains that a bridge at Godagiri would not enable one to be dispensed with at Sara, and that the adoption of the Sara site would obviate the necessity for bridging the river at either Rampur Boalia or Godagiri. In respect to Bengal and North-Western Railway traffic, bridges at Isabpur and Raita would, as previously shown, increase Calcutta leads by $3\frac{7}{8}$ and $13\frac{5}{8}$ miles, respectively, and that as regards Eastern Bengal State Railway traffic, bridges at Isabpur and Godagiri would increase distances by $8\frac{1}{2}$ and $40\frac{1}{2}$ miles, respectively. Under these circumstances it is quite clear that the location of the bridge at Godagiri must necessitate the provision of a second bridge at no distant date to serve the Sara traffic, while the adoption of either the Isabpur or Raita site will avoid all real necessity for a bridge at Godagiri. Unless based on erroneous mileage, or

on reasons connected with competition, the contentions of the Bengal and North-Western Railway are difficult to understand. In competition with the East Indian Railway no doubt every mile added to the longer route will militate against its success in securing traffic; but if so small an increase as about 14 miles can jeopardise its power of attraction, the encouragement of the route can hardly be to the interest of either Government or the public. We therefore think that the prediction implied in the memorandum of the Railway Board regarding the ultimate necessity of two bridges over the Lower Ganges may be disregarded, and that the possibility of an Upper Ganges Bridge being constructed between Bhagalpur and Mokameh is a far more probable contingency. The advantages likely to be conferred on trade by the Lower Ganges Bridge are almost certain to stimulate the demand for one over the Upper Ganges, and if this is built, the necessity for a second Lower Ganges Bridge will never be likely to arise.

25. It has been shown that the building of a second bridge over the Lower Ganges can be avoided if either Isabpur or Raita is selected as the site for a bridge, and that if Godagiri is selected further expenditure, either on improved communications or on a second bridge at Raita, would be necessary in the immediate future. If Raita is selected it may be possible to close the ferry at Godagiri, for there is scarcely likely to be any development of local traffic demanding it or which would make such a ferry remunerative or even pay its working expenses. If, however, Isabpur or Godagiri is selected the Sara ferry would certainly have to be retained to serve the local traffic between Chuadanga and Nattore in the one case and between Ranaghat and Nattore in the other. Even this reduced ferry would cost possibly $1\frac{1}{2}$ to 2 lakhs a year to work. This is another consideration of some importance in favour of the Raita site.

26. At this stage it will be convenient to briefly summarize the relative advantages and disadvantages of the three proposed bridge sites at Godagiri, Isabpur, and Raita as judged by conditions unconnected with the extension of the metre gauge south of the Ganges. It is to be noted in the first place that, so far as physical suitability is concerned, there is but little to choose between the three sites, and that any small advantage at present existing rests with Isabpur. In regard to cheapness of construction a bridge and its connections at Raita would cost from 25 to 36 lakhs of rupees less than similar works at Godagiri or Isabpur. The Raita site would also avoid a waste of the money already spent on duplicating tracks between Ranaghat and Poradah, and obviate the necessity for any further doubling of broad gauge lines south of the river. The adoption of any site but Raita will not admit of the abandonment of the present expensive and difficult ferry service at Sara, and unless sites at either Sara or Isabpur be selected there is a strong probability of a second bridge over the Lower Ganges being required. So far as public convenience is concerned, crossings at Raita or Isabpur offer about equal facilities, while one at Godagiri would be decidedly inferior unless heavy outlay on direct rail connections be incurred. As regards rapidity of construction the Godagiri site is perhaps the best, though it holds but slight advantage over that at Raita. Both these sites however are decidedly better than the one at Isabpur. So far as the opening up of new country is affected, this factor has been shown to be of comparatively small importance and can safely be neglected in weighing the relative advantages of the different sites. Unless large expenditure is incurred on the construction of chord lines, a bridge at Godagiri is far less suited to traffic requirements than bridges at Isabpur or Raita. As between these two sites it will probably be found that under actual working conditions the latter will involve less over-leading of traffic and also better suit the transport of the commodities in which Calcutta is specially interested.

27. It may be as well to compare the cost of transporting the traffic over the Ganges at Sara by ferry and by bridge. As regards the present ferry the Manager, Eastern Bengal State Railway, has submitted a statement to show the annual cost of working (see Appendix E^a).

It is perhaps difficult to estimate the cost of working a bridge with any approach to accuracy. But the following is offered as an approximate forecast. As already shown in paragraph 16, the cost of a bridge at Raita with its approaches and transshipment station will amount to 153 lakhs. It is considered correct to include the cost of a transshipment station and also that of handling in the working cost of a bridge, because the cost of the transshipment is included in the working cost of the ferry. It is assumed that the combined traffic, when a bridge is opened, will be on an average 38 trains a day from the Bengal and North-Western Railway and Eastern Bengal State Railway single metre gauge lines; and that 26 broad gauge trains will suffice to carry on this traffic. Also that the transshipment of one million tons in a year will cover all the requirements of 38 trains a day, passenger and goods. The rate of working a train mile on the broad gauge section of the Eastern Bengal State Railway has been taken from the administration report of Indian Railways for 1905, and the cost of administration and special and miscellaneous expenditure has been deducted in order to arrive at a fair actual rate. That is Rs. 2.09 per train mile.

Forecast of working traffic over a bridge at Raita.

| | Rs. |
|---|-----------------|
| (1) Interest on 153 lakhs at 3½ per cent. | 5,73,750 |
| (2) Maintenance at ¼ per cent. per annum | 38,250 |
| (3) Working trains 26, for 365 days for 5.70 miles, at 2.09 per train mile | 1,13,054 |
| (4) Cost of transshipping 1 million tons at 2 annas a ton | 1,25,000 |
| TOTAL | 8,50,054 |

If the traffic doubles itself the relative increase in cost will be small, since the additional interest charges under (1) would only increase to a very small extent on account of further outlay at the transshipping station, while (3) and (4) would be perhaps doubled. Possibly the total annual cost of working double the traffic over the bridge would be 11 lakhs, or not much in excess of what it now costs to work the present Eastern Bengal State Railway traffic alone by ferry, and this without reference to consequent economies at other ferries.

28. In the carrying of passengers and goods between Calcutta and the country north of the Ganges served by the Transshipment. metre gauge systems, the avoidance of transshipment is of such advantage that no ordinary difficulties should be allowed to prevent its accomplishment.

To passengers the matter is mainly a question of increased comfort in travel, but with regard to goods, though the mercantile community, as will be seen from the evidence tendered, do not anticipate that wagon to wagon transshipment will be the cause of much delay or loss or damage, yet there is the loss to the carrying agency in handling and in the locking up of stock.

The delay caused at the existing ferry at Sara is very variable, depending largely on the pressure of traffic, the state of the river, and other incidental circumstances, but with a bridge this delay will be capable of great reduction. We are informed by the Agent of the Bombay, Baroda and Central India Railway, who has supplied valuable information regarding the well-known Sabarmati transshipment station, that the detention to wagons is from 18 to 20 hours. This detention of course represents a loss to the railway, but it is a loss which cannot be easily measured in money. The delay to goods wagons practically amounts to this that a certain quantity of rolling stock has to be provided to do the same work which, without transshipment, could be done by a less quantity. Similarly coaching stock will also be detained, but the quantity and time involved are probably less than in the case of goods stock, though the cost may be nearly as great. Too many assumptions have to be made to admit of any exact estimate being prepared, but a rough calculation has been made [see Appendix L] which shows that the cost of detention of

rolling stock at the transshipment station* on the north bank of the Ganges would be about 2½ lakhs per annum.

An estimate of the total cost of transshipment between two gauges has been prepared from information supplied by the Bombay, Baroda and Central India and Eastern Bengal State Railways [see Appendix N].

Since the conversion of the metre gauge railways on the north of the Ganges is, as pointed out by the Railway Board, beyond the scope of practical finance, the adoption of some arrangement whereby the bodies of the metre gauge stock can be rapidly and cheaply transferred to and worked on broad gauge trucks, is worthy of consideration. This has been suggested in the evidence tendered by Mr. T. McMorran and the statement submitted by the Manager, Darjeeling-Himalayan Railway, and although the arrangement referred to involves serious difficulties when applied to Indian rolling stock, it is possible that the problem admits of practical solution. The idea, at any rate, deserves consideration and experiments might, perhaps, with advantage, be carried out on a small scale to test the feasibility of this method.

29. Taking Barauni as the starting point for the Bengal and North-Western Railway traffic, this being the station where traffic would be diverted from the *via* Mokameh route for a Lower Ganges Bridge route, the distances to Calcutta are —

| | Miles. |
|----------------------------|--------|
| <i>Via</i> Raita | 373½ |
| „ Godagiri | 359½ |
| More by Raita | 13½ |

That is 3·8 per cent., and such small extra mileage can surely not be considered unduly prejudicial to the interests of the Bengal and North-Western Railway.

The Directors of the Bengal and North-Western Railway attach great importance to the provision of a route independent of the East Indian Railway between their system and Calcutta. The ostensible reason given in 1903 for their insistence on the attainment of this object was that the East Indian Railway was unable to deal with the traffic at the time when its prompt transport was most important. Whatever may have been the state of affairs prior to 1903, the Agent of the Bengal and North-Western Railway is now unable to furnish us with a single recent instance of the blocking of ordinary traffic by the East Indian Railway, while the officials of the latter administration assert that, since 1902, there have been no complaints of any block at Mokameh ferry owing to the East Indian Railway failing to supply wagons for onwards carriage or of delay in transshipment, nor have there been any complaints as to fault in the provision of facilities for outwards traffic to the metre gauge railway. Difficulties certainly have occurred in connection with the transport of coal; but the Bengal and North-Western Railway were not solitary sufferers in this respect, and the trouble was attributable to shortage of broad gauge stock, and congestion at the coal-fields, rather than to any cause removable by the provision of a route independent of the East Indian Railway. At the same time the numerous occasions when the Mokameh ferry service was interrupted by stress of weather and vagaries of the river show that the Bengal and North-Western Railway ought to have a reliable route to Calcutta, though that can hardly be advanced as a substantial reason for such route to be independent of the East Indian Railway. The true cause would seem to be a natural and not altogether unreasonable attempt to secure as long a lead as possible over the home line for its Calcutta traffic. This object will be obviously best attained by the exchanging station with the foreign railway being at an end, and not near the centre of the system. If this explanation be correct the insistence of the Bengal and North-Western Railway on the Katihar instead of the Mokameh route, and the value placed on the shortening of the former connection, is not difficult to understand. A similar policy is adopted by practically every railway in India, especially in connection with its outwards traffic, and unless carried to extremes cannot be considered unreasonable. Unfortunately, in their endeavours to secure longer leads, the administration of the Bengal and North-Western Railway do not err on the

side of moderation ; and though we have every sympathy with efforts directed to a fair distribution of the Calcutta traffic between the two routes, we cannot view as reasonable the attempt made to secure the whole at a heavy loss to Government and a substantial sacrifice of public interests. This opinion would seem to be also shared by the Railway Board, as during the course of our investigations they authoritatively stated that the whole of the railway giving access to Calcutta from the Bengal and North-Western Railway *via* Katihar is to be owned and worked as a State Railway. As this decision will doubtless lead to considerable modifications of the concessions indicated by the Board and Agent of the Bengal and North-Western Railway, no useful object is served by discussing them, and our remarks will, therefore, be confined to a consideration of the conditions necessary to give that system reasonable access to Calcutta. The distances for charge between Barauni and Mokameh and between Barauni and Katihar are 27 and 112 miles, respectively, so that the *via* Katihar route gives the Bengal and North-Western Railway an extra lead of 85 miles. Assuming an annual traffic of 600,000 tons carried at an average rate of $\frac{1}{10}$ th pie per maund per mile, and a fair charge for haulage, the profit to be obtained by carriage under competitive conditions at $\frac{1}{10}$ th pie per maund per mile over this additional distance may be placed at $3\frac{1}{4}$ lakhs of rupees per annum, an amount which would be realized by the gross receipts of the same volume of traffic carried 19 miles at $\frac{1}{10}$ th pie per maund per mile. In other words, the Bengal and North-Western Railway would lose nothing by abstaining from competition in return for the gross receipts of 19 miles of the East Indian Railway portion of the Mokameh route. Under actual conditions, many cases would arise where the Bengal and North-Western Railway would not have to go down to $\frac{1}{10}$ th pie per maund per mile on the Katihar route, and also considering the loss they can cause the East Indian Railway, it is questionable whether they would be satisfied with bare compensation. Under these circumstances, an allowance of the receipts of 19 miles would be insufficient, but if the length be increased to 30 miles, the Bengal and North-Western Railway would receive liberal compensation for the routing of their traffic *via* Mokameh. The Manager, Eastern Bengal State Railway, estimated in 1906 that, neglecting the set-off of the Government share of the profits of the Bengal and North-Western Railway, the loss to the State by diversion of that Railway's traffic *via* Katihar would be Rs. 3-1-2 per ton, if an average rate of $\frac{1}{10}$ th pie per maund per mile were assumed. On the basis of 600,000 tons of traffic this loss would approximately amount to Rs. 18,50,000 per annum, so that even if the State absorbed the whole profits of Rs. 3,50,000 for which the Bengal and North-Western Railway are struggling, a loss of Rs. 15,00,000 would be incurred by the diversion of the traffic in question from the shortest route. It is, therefore, utterly opposed to the interests of Government that the Katihar route should be encouraged to compete with the shorter one *via* Mokameh. With this fact in view, and also in order to avoid interference with the existing rights of the latter route to reduce rates and fares to the sanctioned limits, we are of opinion that the total charges by the longer should exceed those of the shorter route by at least the "competitive difference." Subject to these restrictions the Bengal and North-Western Railway might be allowed running powers between Katihar and the transshipment station near Nattore, the right to quote such rates and fares over the Nattore-Calcutta section as would not affect the local rates and fares of the State line, and unprejudiced treatment at the transshipment station. As regards the quotations of rates and fares, the restriction of this power to traffic passing between Bengal and North-Western Railway stations and stations on the Eastern Bengal State Railway between Naihati and southern termini would appear to meet requirements. Independent control of the transshipping station is not absolutely necessary, but if it can be arranged without compromising State interests, might be introduced in deference to the known views of the Bengal and North-Western Railway. One method of effecting this concession consists in controlling the goods transshipment station by a joint committee, composed of representatives of the two railways concerned and of the Port Trust Railway, the discipline and appointment of the staff being vested in the last named authority. The foregoing proposals may be summarised as under—

- (1) Both routes to be available to the public.

- (2) On all traffic carried from Bengal and North-Western Railway stations *via* Mokameh to Calcutta, that railway to be credited with 30 miles of the East Indian Railway portion of the route in addition to its own lead.
- (3) Rates and fares *via* Mokameh and *via* Katihar to Calcutta termini to differ by the competitive difference.
- (4) Subject to the above restrictions, the Bengal and North-Western Railway to be allowed to quote through rates between stations on its system, and Naihati to Budge Budge, Diamond Harbour, and Mutla, stations on the Eastern Bengal State Railway.
- (5) The imposition of blocking charges of every description, designed to upset these proposals, to be generally prohibited.
- (6) The Bengal and North-Western Railway to be granted running powers between Katihar and the transshipment stations near Nattore.
- (7) The goods transshipment station to be worked under impartial management.

30. In paragraph 16 above allusion has been made to the number of

Importance of building the bridge
double track.

tracks for which a bridge should be built, and as we consider this is a matter which deserves very careful consideration we offer

the following remarks. Mr. Spring's estimates of the cost of a bridge whether at Baita, Isabpur or Godagiri, are for a single line bridge. It is difficult to understand why he did not estimate for a double line, because he recognised that the broad gauge line for which his bridge was designed must be double track from Calcutta to the Ganges and he provided for such double track in the cost of connecting lines. There can be little doubt that a very considerable traffic could be worked over a single line bridge, the approaches to which are double track. Still it is difficult to believe that more than one train could be worked over it in 15 minutes, considering the delays in starting heavy goods trains and in working them with absolute continuity and regularity. Assuming an average of 15 minutes per train, 96 trains per day could be passed over the bridge. On the assumption that the broad gauge line is extended over the bridge, it may be reasonably expected that a single track would accommodate the traffic for at least the next 15 years, and it may also be predicted that the time will come when a single broad gauge track will not accommodate all the traffic. From this point of view then, alone, a bridge ought to be built for double track: but there is another reason why this should be done. Circumstances may arise in the future under which extension of the metre gauge system to the south of the Ganges becomes desirable; if a bridge is built single track it is certain that it will not accommodate both gauges, whereas if it is double track the accommodation of both will be provided for and the cost of a second bridge will be avoided. The total cost of a single track bridge, exclusive of approaches, is estimated by Mr. Spring as varying from 110 to 130 lakhs, according to the site selected, and it is believed that the extra cost of a double track bridge will not amount to more than 13 to 15 lakhs, of which fully 80 per cent. would be in extra girder work. Considering, however, that a large proportion of the outlay of the bridge will not vary, whether the bridge is for single or double track, it seems extremely reasonable to insist that it should be built for the latter. Taking the extra outlay of 11 to 14 per cent. above Mr. Spring's estimate, the expenditure common to both a double and a single line bridge will vary from 70 to 90 lakhs for a bridge costing from 110 to 130 lakhs.

31. The Agent, East Indian Railway, raises in paragraph 9 of his statement of 28th January last (*see* Appendix F²) the question of the future safety of the Kosi Bridge.

Safety of the Kosi Bridge.

Obviously if the Kosi Bridge was at any time destroyed by the Ganges, the route for the traffic of the Bengal and North-Western Railway and Tirhut State Railway, which it is proposed to create *via* the Lower Ganges Bridge, would lose all its advantages. We therefore considered it desirable to ascertain what the actual position of the Kosi Bridge is. Letter No. 823 C., dated 9th February, 1907, from the Consulting Engineer for Railways, Lucknow (*see*

Appendix (G), shows that the Ganges which, since 1904, had been in such close proximity to the Kosi Bridge that damage to the training works caused the authorities of the Bengal and North-Western Railway great anxiety, has recently commenced to recede. If the Ganges continues to recede, no doubt the opportunity will be taken to extend the training works in such a manner as to entirely prevent any danger to the Kosi Bridge in future years.

32. The question referred to us is so intimately connected with the more difficult and complicated one of diversity of gauge, that we at once realised that it was our first business to investigate the

Conclusion.

proposal to extend the metre gauge to Calcutta. We, however, recognised that we were not concerned with the general policy of Government as regards the admission or exclusion of this gauge, to or from the great ports at present served exclusively by the broad gauge, and that it was merely our function to advise Government whether, in the particular case referred to us, it was desirable to extend the metre gauge to Calcutta as part of the general scheme for constructing a bridge over the Lower Ganges.

Our view throughout the enquiry has been this—that there would be every advantage in extending the metre gauge, so long as it could be shown that full and complete terminal facilities could be afforded to it. We, therefore, made very thorough and careful enquiries into all the circumstances of the numerous terminal points, and into the working and handling of traffic in them. We were conscious that we were placed in a very responsible position in advising Government regarding terminal facilities, and we frankly admit that we should have been glad to avail ourselves of the best and most reliable expert professional opinion on working two gauge termini had it been possible to obtain this. Such expert opinion as we were able to obtain from the officials of the railways concerned was unmistakably adverse to the admission of the metre gauge; but then these officials had no experience in dealing with two gauges in the same termini, and they perhaps regarded the introduction of a second gauge with some apprehension.

We, therefore, have had to reply on our own judgment and are unanimous in the conclusion that complete terminal accommodation cannot be provided. Partial accommodation, we believe, is practicable, but we cannot advise this, because we do not feel justified in supporting a scheme which, while being expensive, would still require a part, and probably by far the larger part, of the metre gauge traffic to be transhipped in order to deliver it at its natural termini. In our belief trade requires complete terminal accommodation without break of gauge; and, if it cannot have that, the only alternative is entire transhipment.

We are strongly of opinion that there can be no possible object in bringing the metre gauge south of the Ganges if entire or any substantial transhipment is required; for, to do this would entail very large outlay, whilst the existing broad gauge lines already provide very ample transport facilities which are susceptible moreover of great improvement at comparatively small outlay.

We have come to the definite conclusion, therefore, that we cannot recommend that the metre gauge be extended to Calcutta.

As regards the selection of a site for the bridge, and taking Godagiri first, we consider that this site cannot be compared in prospective advantages with the other two sites, and that it is to be regretted that it ever came prominently into notice. We hold that Isabpur (Rampur Boalia) and Raita (Sara) are from a general point of view the two sites from which a selection should be made. The former of these, if the connecting line to the Eastern Bengal State Railway metre gauge line was built so as to shorten the route for the traffic of that railway, would, without doubt, be the more desirable, since it would then provide routes entirely acceptable to all the interests concerned. But a far greater outlay (49 lakhs) would be involved and the completion of the work would be seriously delayed. Unquestionably, if no lines existed on either side of the river, Isabpur would provide an ideal site for trunk lines serving the

vast territory now occupied by metre gauge lines. But existing lines cannot be ignored, and economy must always be accepted as a ruling factor in the construction of a bridge. Raita, on the other hand, possesses some advantages which cannot be secured by selecting Isabpur, and a bridge can be provided at the former site at a minimum outlay ; its only drawback being that the route for Bengal and North-Western Railway traffic will be some 10 miles longer than by Isabpur, and that no improvement in connecting lines, so as to shorten this, is feasible.

As far as we see, provided the bridge is built for a double broad gauge track, the selection of Rampur Boalia (or Isabpur) is not essential to the introduction of the metre gauge, should the same at any other time be deemed advisable. A comparatively small deviation from the direct route would enable the metre gauge to serve from Raita the same country the Railway Board desire to open up, although we are not satisfied the tract of country specified, at present requires additional railway facilities. Looking to the present state of railway finance, and recognising that the funds for new railway works are limited, it is more than ever necessary to reduce expenditure on the bridge to a minimum, especially when the fact is accepted that no distribution of the outlay over many years is advisable on a work which essentially demands rapid construction.

We hold that Raita provides the cheapest and, therefore, the best route for the Eastern Bengal State Railway traffic ; and that since this traffic has no alternative route such as the Bengal and North-Western railway has *via* Mokameh, and is never likely to obtain one, it is entitled to the greater consideration. Raita (or Sara) as a site has been accepted as unquestionably feasible by (1) Sir F. L. O'Callaghan's Committee of 1890, (2) Mr. F. J. E. Spring, the expert specially deputed to investigate the Lower Ganges bridge question in 1903 ; and it is preferred by the Governments of Bengal and of Eastern Bengal and Assam, while the Government of the United Provinces has refrained from expressing a preference for any particular site.

Again, the Government of India have recorded the following in the Histories of Railway projects, 1904-05 :—"Of the three sites examined Godagiri, Isabpur and Sara, the balance of advantage being in favour of the Sara site the Government of India have recommended the construction of the bridge at that place."

We, therefore, as a result of our deliberations and supported by the views of the above authorities, recommend that the bridge be built at Raita.

The above conclusions may be stated briefly thus :—

- (1) the metre gauge ought not to be extended south of the Ganges ;
- (2) the bridge should be built at Raita.

We would again emphasise the fact that we consider the construction of a bridge over the Lower Ganges is a matter of extreme urgency, and in this we are unanimously supported by all the witnesses who have come before us, even though they have not been in agreement as to the most suitable situation.

We do not think it is outside our sphere to lay before the Government of India what has been brought prominently to our notice, *viz.*, the universal hope and expectation of the commercial community and of the general public, that the investigation and report of this Committee will result in immediate and practical action, as rightly or wrongly there is a strong impression that the Committee was appointed for the express purpose of assisting the Government of India to come to an early final decision. We cannot conceal from ourselves the fact, and we would respectfully desire to impress the same on the Government of India (and we should be wanting in our duty if we did not do so) that the mercantile community and the general public have been for many years urging the necessity for a bridge across the Lower Ganges, that they cannot understand why there should have been such great delay in meeting what is an admitted want, that the necessity has now become one of extreme urgency, and that the appointment of this Committee would point to the fact that the question is now ripe for a final decision.

We desire to thank the officials of the Eastern Bengal State Railway and of the Calcutta and Madras Port Trusts for the facilities afforded and help given in the inspections made during the course of the enquiry.

FREDERICK NOËL-PATON

Director-General of Commercial Intelligence

B. ROBERTSON

Off. Secretary to the Government of India

Calcutta. April 12, 1907

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 20, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

J. J. MEIKLE,

Publisher, *Gazette of India*.

GOVERNMENT OF INDIA. DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 18th April 1907.

NOTIFICATIONS.

No. 1447 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 15th April 1907:—

No. 192 of 1907.—Harold Gill, engineer, Apollo Chambers, Bombay, and Edgar Wakelin Thompson, engineer, Bombay. *A machine for filling cans, drums, or other receptacles by weight.*

No. 193 of 1907.—Alfred Vogelgesang, civil engineer, of Marktbreit, in the kingdom of Bavaria. *The manufacture of an improved insulating material.*

No. 194 of 1907.—Symonds, Harris and Company, Limited, manufacturers and general merchants, Trichinopoly Fort. *Improvement in steel portman-teaux.*

No. 195 of 1907.—J. E. A. D'Cruz, executive engineer, City Improvement Trust Board, Mysore city. *Flushing tank and cattle trough with bent tube automatic flushing syphon and automatic tipping trough combined.*

No. 196 of 1907.—F. D. Fowler, superintending engineer, 2nd grade, Public Works Department, employed as engineer-in-chief, O. & R. Railway, Lucknow. *Improving the form of metal sleepers.*

No. 197 of 1907.—John Henry Jewell, tea planter and engineer, c/o Messrs. Grindlay and Company, 11 Hastings street, Calcutta. *A tubular saving apparatus for automatically spreading fermented tea leaf in Paragon, Victoria and similar tea firing machinery.*

No. 198 of 1907.—Thakur Dutta Sharma, vaid, proprietor, Deshopkarak Aushdhalia, editor, "Deshopkarak," Lahore. *A medicinal compound called Amrit dhara.*

No. 199 of 1907.—Ernest James Andrews, secretary, of 2 Templar street, Camberwell, London, England. *Improvements in machines for separating the fibrous parts of leaves or stems from the pulpy or woody parts thereof.*

No. 200 of 1907.—Frederick John Cox, engineer, of 43 and 45 Fortess road, Kentish town, London, N.W. *Improvements relating to apparatus for the production of gas.*

No. 201 of 1907.—Thomas Harding Board, distiller, of Glenthorn Portishead, in the county of Somerset, England. *Improvements in the preparation of seed yeast.*

No. 202 of 1907.—George Johnston, engineer, of 16 Balmoral road, Fairfield, Liverpool, in the county of Lancaster, England. *Improvements in railway vehicle couplings.*

No. 203 of 1907.—Cox Brothers, Limited, jute manufacturers, of Camperdown Jute Works, Lochec, Dundee, Scotland, and David McIntosh, factory manager, of said Works. *Improved means for weaving sacks, bags and the like.*

No. 204 of 1907.—James William George Ross, engineer, trading as the Boilerline Manufacturing Company of Old Kent road, London, England. *Improvements in apparatus for supplying composition for the prevention of incrustation in steam boilers and the like.*

No. 205 of 1907.—Fredrik Wilhelm Hellberg, miner, of No. 5 Anderson Terrace, Spring street, Waverley, near the city of Sydney, county of Cumberland, state of New South Wales, commonwealth of Australia, and Charles William Turner, fishmonger, of 235 Oxford street, in the city of Sydney, aforesaid. *A combined hammock and tent.*

No. 206 of 1907.—Pearey Lall, agriculturist and physician, of Mauza Narela, Tehsil Delhi, District Delhi. *A new variety of or substitute for tea made from herbs, called "Imrat Sar Jiwan."*

No. 1448 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of anyone of them will be supplied on payment of the fixed expenses of copying :—

No. 321 of 1906 —James Henry Rossenrode, proprietor of Rossenrode and Company, civil and military saddlers and bootmakers, The Mall, Rawalpindi and Murree. *An improved simplex gaiter.* (Specification filed 2 April 1907.)

No. 106 of 1907.—John Alexander Colquhoun, engineer, of the East Indian Railway House, No. 105 Clive street, in the city of Calcutta, Bengal Presidency of British India. *Improvements in or relating to coal shoots.* (Specification filed 5 April 1907.)

No. 1449 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 33 of 1896.—William Augustus Bailey. *Improvements in and relating to portable and other latrines.* (From 30 April 1907 to 30 April 1908.)

No. 52 of 1899.—Henry Cruse. *Improvements in the method of and apparatus for generating steam.* (From 10 May 1907 to 10 May 1908.)

No. 38 of 1902.—David Moorhouse and David Thomson Dewar. *An automatic arrangement for regulating the tension of the tapes for driving the spindles of spinning and twisting frames.* (From 10 April 1907 to 10 April 1908.)

No. 257 of 1902.—Captain H. A. L. Hepper. *Improved electric key transmitting apparatus.* (From 7 April 1907 to 7 April 1908.)

No. 341 of 1902.—Robert Chamberlin Hislop. *Means whereby solder in the form of shots or small irregular shaped pieces can be used for soldering the joints on tins.* (From 27 April 1907 to 27 April 1908.)

No. 403 of 1902.—Robert Chamberlin Hislop. *An improved machine for soldering the joints of tins.* (From 27 April 1907 to 27 April 1908.)

No. 151 of 1903.—Alfred Moul. *Improvements in target apparatuses and the like where no projectile is employed.* (From 21 December 1907 to 21 December 1908.)

No. 1450 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased :—

No. 202 of 1902.—John Joseph Leahy, and Arthur Parmiter. *Improved method of and means for transferring travelling belts from one pulley to another.* (Specification filed 6 January 1903.)

No. 277 of 1902.—Albert Harlow Silver and Alfred Butterworth. *Improvements in or relating to sights for military and other rifles, guns and other fire-arms.* (Specification filed 9 January 1903.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs50 for each of the above inventions.

No. 87 of 1900.—Charles Woodbury Stevens. *Processes for the manufacture of artificial stones.* (Specification filed 9 January 1901.)

No. 172 of 1900.—Beaumont Richard Harrington. *An improved refuse incinerator with or without a smoke crematorium.* (Specification filed 7 January 1901.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

NOTICES

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888.

Administrative Medical Officer, North-West Frontier Province.

Pesháwar, the 12th April 1907.

ROYAL INDIAN MARINE.

FOR SALE.—Offers will be received up to 10th May 1907 by the Director, Royal Indian Marine, for the purchase of

THE ROYAL INDIAN MARINE SHIP "CANNING"

with all stores and fittings that are on board of her.

The vessel was built as a steel and iron screw steamer in 1882.

She is 285 feet long, has 36 feet 2 inches beam, and is 2,245·98 gross tonnage.

Purchaser must remove the ship from the Government Dockyard or moorings within 14 days of purchase at his own expenses and risk.

Dismantling will not be permitted in the Government Dockyard or at the moorings.

Twenty-five per cent of purchase money to be paid on acceptance of tender; balance before vessel is removed from Dockyard or moorings.

Application to view the vessel and further particulars may be obtained from the Director, Royal Indian Marine.

The Director does not bind himself to accept the highest or any offer.

G. H. HEWETT,

Director of the Royal Indian Marine.

ROYAL INDIAN MARINE DOCKYARD;
Bombay, 26th March 1907.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Engineer Department.

SESSION, 1907-1908.

Candidates for admission to the Engineer Department should apply to the Principal in the prescribed form stating their University Registration Number on or before the 15th May 1907. Each application must be accompanied by registration fee of Rs 1, which will in no case be returned.

The session begins on Monday, the 3rd June 1907.

Candidates must furnish proof that they have passed one of the following tests:—

- (1) The B.Sc. or B.A. Examination in the B course in Physics and Chemistry of the Calcutta University. The candidate's age must be under 23 years.
- (2) The F. A. Examination of the Calcutta and Madras Universities.
- (3) The Intermediate Examination of Allahabad and Punjab Universities.
- (4) The Intermediate Examination for the degree of B.A. of Bombay University.
- (5) The High School Examination for Europeans and Eurasians.

The candidate's age in (2), (3), (4) and (5) must be under 21 years.

In selecting candidates who have passed the F. A. (all other things being equal), preference will be given to those who have passed in Sanitary Science in addition to the ordinary subjects of the F. A. Examination.

The maximum number to be admitted is limited to 40. The position in the University examination and the age of the candidate will be taken into consideration when selection is made, and such selection will be made by the Principal.

The tuition fee for students to the Engineer class is Rs 10 a month for each month of the year, vacation included.

One junior scholarship of Rs 20 a month, one of Rs 15 a month, and six of Rs 10 a month, tenable for two years, will be given to students who have been admitted to the College and who do not hold University Scholarships.

The selection will be made in the following order:—

- (a) B.Sc.'s;
- (b) B.A.'s who have taken up the B course; and
- (c) F. A. candidates (except those who passed in the third division).

There will be in addition one scholarship of Rs 20 a month and one of Rs 10 a month for Europeans and Eurasians who have been admitted to the College, tenable for two years.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Form of application for admission and any further particulars will be supplied upon application to the Principal.

B. HEATON,

Principal, Civil Engineering College.

SIBPUR;
The 5th April 1907.

CIVIL ENGINEERING COLLEGE, SIBPUR.
Apprentice Department.

SESSION, 1907-1908.

Candidates for admission to the Apprentice Department should apply to the Principal in the prescribed form on or before the 6th May 1907. Each application must be accompanied by a registration fee of ₹1, which will in no case be returned.

The session begins on Monday, the 3rd June 1907.

Candidates must furnish proof that they have passed one of the following tests:—

- (1) Standard VII or Middle School Examination of the Code of European Schools.
- (2) University Entrance Examination.

The candidate's age must be at least 15, and not more than 17 years.

There are 25 vacancies for Indians and 10 for Europeans and Eurasians. The selection of candidates for admission will be made by the Principal.

There will be one vacancy on the free list for Christian apprentices in June next and five on the reduced fee list. For natives there will be ten vacancies on the reduced fee list, available during the month of June. Election to those lists will be made by the Board of Visitors. Forms to be filled up for the consideration of the Board can be had on application to the Principal.

The tuition fee to students of the Apprentice Department is ₹3 monthly for each month of the year, vacation included, except for students on the free and reduced fee lists.

Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Before an applicant is admitted to the College his parent or guardian must sign an agreement in the prescribed form.

All applications from Christian candidates for admission to the free or reduced fee lists must reach the Principal not later than the 6th May, so as to enable the elections to be made by the Board of Visitors before the opening of the session.

The vacancies on the native list will be filled up after the opening of the session from those apprentices who have joined the College after admission. Forms of application for admission and further particulars will be supplied on application to the Principal.

B. HEATON,

Principal, Civil Engineering College.

SIBPUR;

The 5th April 1907.

CALCUTTA UNIVERSITY.

NOTICE.

IN accordance with Rule (2) of the Revised Rules for the award of the Coates Memorial Prize, applications are hereby invited from candidates who intend to compete for the prize for 1907. The names of the candidates must reach the undersigned on or before the 30th June 1907.

SENATE HOUSE,
The 9th April 1907.

G. THIBAUT,
Registrar.

CALCUTTA UNIVERSITY.

• NOTICE.

THE Griffith Prize for 1907 will be awarded by the Syndicate in the course of 1908.

The subject for the prize will be an essay or record of original work in some department of Letters.

All persons who have taken the degree of Bachelor in the Faculty of Arts or the corresponding degree in any other Faculty in this University will be allowed to compete.

Each candidate will be required to send his essay or record of work to the Registrar under a distinguishing motto. The name of the candidate must be forwarded at the same time in a sealed cover with the motto outside. Such essays or records of original work must reach the Registrar on or before the 31st December 1907.

The value of the prize for 1907 will be Rs. 900.

SENATE HOUSE,
The 9th April 1907.

G. THIBAUT,
Registrar.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

[In all cases where reference is made to Chapters, Sections, Pages or Lines, thus Chapters I—IX, the reference is to be understood as inclusive.]

| Max Muller ... | ... | Science of Language, Vol. I, Lectures V, VI, VII, and IX, and Vol. II, Lectures III, IV, V, VI and VII. |
| Muir ... | ... | Sanskrit Texts, Vol. V. |

Students may take up the Inscriptions of Aśoka, instead of one of the following :—

- (a) Bhashaparichcheda (limited as above).
(b) Vedānta-Sūtra (limited as above).

GROUP B.

| | | |
|-------|-------------------------------------|---------------------------------------|
| I. { | Gautama and Visvanātha .. | Sūtra with Vṛitti. |
| I. } | Kanada and Sankara ... | Sūtra and Upaskāra. |
| II { | Kapila and Aniruddha ... | Sūtra and Vṛitti. |
| II } | Pantajali and Bhoja ... | Sūtra and Vṛitti. |
| III.— | Jaimini and Savara .. | Sūtra and Bhāshya—Adhyāyas 1, 2 and 3 |
| IV.— | Vyāsa and Sankara ... | Sūtra with Bhāshya—Adhyāya 1. |
| V.— | Vyāsa and Sankara -Adh- yāya II. | |
| VI.— | Essay and Comparative Grammar. | |

N.B. — Students may take up Indian Paleography and Epigraphy instead of any one of the subjects of the first five papers.

Permanent Subjects.

| | | |
|----------------|-----|--|
| Max Muller .. | ... | Science of Language, Vol. I—Lectures II and VI ; Vol. II—Lectures IV, V, VI and VII. |
| Colebrooke ... | ... | Philosophy of the Hindus as given in the first volume of the works. |
| Max Müller ... | ... | Six Systems of Philosophy. |
| Max Müller ... | ... | Six Systems of Hindu Philosophy. |

GROUP C. •

- I. { Gautama and Visvanátha .. Sūtra and Vritti.
 { Kanada and Sankara ... Sūtra and Upaskara.
 II.—Visvanátha ... Bhashaparirohaheda with Siddhanta Muktavali.
 III { Udayana and Haridasa ... Kusumanjali with Haridasa's tika.
 { Gangesa and Jayadeva Isvaranumana with Aloka.
 IV.—Gangesa and Mathuranatha Anumiti Siddhantalakshan of Pakshata and Pará-
 marsa.
 V.—Gangesa and Mathuranatha Avayava and Hetwabhasha.
 VI.—Essay and Comparative Grammar

N.B.—Students may take up Indian Paleography and Epigraphy instead of the subjects of any one of the first five papers.

Permanent Subjects.

Max Muller's Science of Language as limited in group B
 Mill's Logic, Book III of Induction, Chapters 1 to 5 and 8.

GROUP D.

- I.—Vyāsa and Sankara ... Sūtra and Bhāshya, Adhyāyas I and II—1, 2.
 II.—Vyāsa and Sankara ... Adhyāyas II—3, 4; III and IV.
 III.—Vyāsa and Sankara ... Gītā with Bhāshya.
 IV.—Appaya Dikshita Sidhhan-
 talesa Dharmarajudhvarindra.
 Vedantaparibhasha and Vedantasara, by Sarvananda.
 V.—Upanishads—Chhandogya and Vrihadaranyaka with Sankara Bhāshya.
 VI.—Essay and Comparative Grammar

N.B.—Students may take up Indian Paleography and Epigraphy, instead of the subject of any one of the first five papers.

Permanent Subject.

Max Muller's Science of Language (limited as above)

GROUP E.

- I.—Rigveda Astaka I, with Sayana's Introduction and Comment-
 ary and Aitareya Brahmana Kanda I.
 II.—Samaveda, Adhyāya I, with Sayana's Introduction and Commentary and Atharva
 Vedā Vratya Kanda with Sayana's Commentary.
 III.—Yajurveda Vajasaneya San-
 hita Adhyāyas 1 to 8 with Mahidhara's Commentary and
 Sathapatha Brahmana Kanda I, with Sayana's
 Commentary.
 IV.—Upanishads—Chhandogya and Vrihadaranyaka with Sankara's Commentary.
 V.—Nirukta—The Naighantuka Kanda only, Vaidikprakriya as in Siddhanta Kaumudi,
 and Satya-vrata Samasrami's Introduction to his edition of the Aitareya
 Brahman.
 VI.—Essay and Comparative Grammar.

N.B.—Students may take up Gupta and Kutilatip, instead of any one of the following.—

- (a) Chhandogya Upanishad with Commentaries

- (d) Bluntschli ... The Theory of the State, English Translation (Clarendon Press Series).
Wheaton ... International Law, Parts I and II.
Strachey ... India: its Administration and Progress (3rd edition).
- (e) Adam Smith ... Wealth of Nations.
Mill ... Political Economy.
Pierson ... Principles of Economics.

MENTAL AND MORAL SCIENCE.

The following books are recommended to be used in studying the subject of Mental and Moral Science as defined by the Syllabus prescribed:—

GENERAL.

- Ward ... "Psychology" (*Encyclopædia Britannica*).
Spencer ... Principles of Psychology.
Ladd ... Outlines of Physiological Psychology.
Mill ... System of Logic.
Venn ... Empirical Logic.
Sidgwick ... Methods of Ethics.
Martineau ... Types of Ethical Theory.
Sidgwick... The Ethics of T. H. Green, Herbert Spencer and Martineau.
- Caird ... Introduction to the Philosophy of Religion.
Martineau ... A Study of Religion, 2nd edition.
Ward ... Gifford Lectures (Naturalism and Agnosticism), 1896—1898.
- Green ... Prolegomena to Ethics.
Aristotle ... Politics (English translation by Jowett or Welldon).
- Ueberweg ... History of Philosophy.
Erdmann ... History of Philosophy, Vols. I and II.
Janet and Seailles ... A History of the Problems of Philosophy; translated by Ada Monahan.
- Mādhavācāryya ... Sarva-darsana Sangraha; translated by Cowell and Gough (the Nyāya, Chārvāka, Sāṅkhya, and Bauddha systems).
- Vyāsa and Sankara ... Vedānta Sūtras with Bhāṣhya, as in Part I of George Thibaut's Translation—Introduction only, pages i—xxx.
- Deussen ... The Philosophy of the Upanishads, as translated by Rev. A. S. Geden.
- Rhys Davids ... Buddhism: its History and Literature.

SPECIAL.

| | | |
|----------|-----|---|
| Kant ... | ... | Introduction. The Elements of Transcendentalism, Parts I and II, and Transcendental Analytic, Book I, together with the Supplements I to XIV and the Prefaces, as in Max Muller's Translation of Kant's Critique of Pure Reason, New, York, 1896, being pages xvii to lxxxii, 1 to 100, and 687 to 768. |
|----------|-----|---|

(The examination in Mental and Moral Science shall be on the subject as defined by the Syllabus, and shall not necessarily be confined to the books recommended to be used in studying the subject.)

CHEMISTRY.

No Text-books are proscribed in the subject.

BOTANY.

| | | |
|--------------|--------|--|
| Asa Gray ... | ... | Structural Botany. |
| Goebel ... | ... | Outlines of Classification and Special Morphology of Plants. |
| Sachs ... | ... | On the Physiology of Plants. |
| Sachs ... | ... | History of Botany. |
| Scott ... | ... | Studies in Fossil Botany. |
| { Roxburgh | ... | Flora Indica |
| { Prain ... | or ... | Bengal Plants. |
| Bower ... | ... | Practical Botany. |
| De Bary ... | ... | Comparative Anatomy of Phanerogams and Ferns. |

PHYSIOLOGY AND ZOOLOGY.

| | | |
|-----------------------|-----|--|
| Michael Foster ... | ... | Text-book of Physiology. |
| Schäfer ... | ... | Essentials of Histology. |
| Stirling ... | ... | Outlines of Practical Histology. |
| Halliburton ... | ... | Essentials of Chemical Physiology. |
| Halliburton ... | ... | Hand-book of Physiology. |
| Arnold Lang ... | ... | Text-book of Comparative Anatomy, Part I. |
| Wiedersheim ... | ... | Comparative Anatomy of the Vertebrata. |
| Parker and Parker ... | ... | Elementary Course of Practical Zoology. |
| Balfour ... | ... | Comparative Embryology. |
| Darwin ... | ... | Origin of Species. |
| Parker ... | ... | Lessons in Elementary Biology. |
| Haddon ... | ... | Introduction to the Study of Embryology. |
| Claus-Sedgwick ... | ... | Elementary Text-book of Zoology, Vol. I, General Part and Special Part—Protozoa to Insects; Vol. II, Special Part—Mollusca to Man. |

GEOLOGY AND MINERALOGY.

| | | |
|------------------------|--------|--|
| Geikie ... | ... | Text-book of Geology (latest edition). |
| Medlicott and Blanford | ... | Manual of the Geology of India (2nd edition), by R. D. Oldham, A.R.S.M. |
| Nicholson and Lydekar | ... | Palaontology. |
| { Rutley ... | ... | Mineralogy. |
| { Mier ... | or ... | Mineralogy. |
| Rutley ... | ... | Rock-forming Minerals. |
| H. Rosenbusch ... | ... | Microscopical Physiography of the Rock-making Minerals; translated by Joseph P. Iddings, Macmillan & Co. (latest edition). |
| Alfred Harker ... | ... | Petrology for Students, Cambridge, 1895 (Cambridge Natural Science Manuals). |
| Cole ... | ... | Aids to Practical Geology. |
| Geikie ... | ... | Atlas of Physical Geography. |

M. A. EXAMINATION, 1909.

ENGLISH.

THE following books have been prescribed for the M. A. Examination in English in 1909, in accordance with the New Regulations:—

GROUPS A AND B.

| | | | |
|--------------|---------------------------|-----|---|
| <i>Paper</i> | <i>I.</i> —No text-books. | | |
| <i>Paper</i> | <i>II.</i> —Shakespeare | ... | Cymbeline, Romeo and Juliet, Henry IV (Part II). |
| | Marlowe | ... | Faustus. |
| <i>Paper</i> | <i>III.</i> —Spencer | ... | Shepherd's Calendar—January to June. |
| | Pope | ... | Satires and Epistles. |
| | Shelley | ... | Prometheus Unbound. |
| | Browning | ... | Men and Women [being the 13 pieces included under this heading in the edition of Browning's Poetical Works published in 2 volumes in 1905, namely:—(1) Transcendentalism, (2) How it strikes a Contemporary, (3) Artemis Prologizes, (4) An Epistle, (5) Johannes Agricola, (6) Pictor Ignotus, (7) Fra Lippo Lippi, (8) Andrea Del Sarto, (9) The Bishop orders his Tomb at St. Praxad's Church, (10) Bishop Blougram's Apology, (11) Olean, (12) Rudel to the Lady of Tripoli, (13) One Word More]. |
| <i>Paper</i> | <i>IV.</i> —Milton | ... | Areopagitica. |
| | Butler | ... | Analogy of Religion, Part I. |
| | Carlyle | ... | Past and Present. |
| | Holmes | ... | Autocrat of the Breakfast Table. |
| | Thackeray | ... | Vanity Fair. |

GROUP A.

(a) Text-book.

| | | | |
|--------------|--------------------|-----|---|
| <i>Paper</i> | <i>V.</i> —Chaucer | ... | The Prologue, The Knightes Tale, The Nonne Prestes Tale and Minor Poems, edited by Skeat, pages 1—99. |
|--------------|--------------------|-----|---|

(b) Books recommended for study.

| | | | |
|---------|-----|-----|-------------------------------|
| Morris | ... | ... | Historical English Accidence. |
| Kellner | ... | ... | Historical English Syntax. |

(c) Text-book.

| | | | |
|--------------|-------------------------------|-----|---|
| | Skeat | ... | Selections from Piers Plowman (in order to illustrate Historical English Grammar). |
| <i>Paper</i> | <i>VI.*</i> —Period of Poetry | ... | 1660—1700; not including Dramas in verse, Translations and Adaptations; and a special study of poetical works of Butler, Milton and Dryden. |
| <i>Paper</i> | <i>VII.*</i> —Period of Prose | ... | 1600—1660: with a special study of the literary and political works of Bacon, Sir Thomas Browne and Hobbes. |
| <i>Paper</i> | <i>VIII.</i> —No Text-books. | | |

* A general knowledge of the history and literature of the period and a special knowledge of the works of the authors named will be required. The works of the authors named are to be studied and to be examined upon with regard to subject-matter only; no questions on the language of the text will be set.

Questions will be so framed as to test the candidates' study of the works themselves, and as not to be answerable merely out of books of criticism on them or from histories of literature.

GROUP B.*

Text-books.

| | | | | |
|--------------|-----------------------------|-----|-----|---|
| <i>Paper</i> | <i>V.—Sweet</i> | ... | ... | Anglo-Saxon Reader, Part I. |
| <i>Paper</i> | <i>VI.—Morris and Skeat</i> | ... | ... | Specimens of Early English, Parts I and II. |
| | Skeat | ... | ... | Specimens of English Literature. |

Books recommended for study.

| | | | | |
|--------------|--------------------|-----|-----|--|
| <i>Paper</i> | <i>VII.—Morris</i> | ... | .. | Historical English Accidence. |
| | Kellner | ... | ... | Historical English Syntax. |
| | Skeat | ... | ... | Principles of English Etymology, 1st and 2nd Series. |
| | Helfenstein | ... | ... | Comparative Grammar of the Teutonic Languages. |

Paper VIII.—No Text-books.

NOTE.—The books named against papers II, III, IV and V under group A (except Morris and Kellner) and V and VI under group B are to be treated as Text-books, and therefore as coming under Rules 5 and 6 of the Regulations for the M. A. Examination in English.

HEBREW.

| | | | | | |
|--------------------|-----|--------------|-----|-----|------------------|
| Isaiah | ... | Psalms | ... | ... | Song of Solomon. |
| Jeremiah | ... | Proverbs | ... | ... | Daniel. |
| Ezekiel | ... | Job | ... | ... | Ezra. |
| The Minor Prophets | ... | Ecclesiastes | ... | ... | Nehemiah. |

Permanent subjects.

History of the Jews.
History of the Hebrew Language and Literature.

GEOLOGY AND MINERALOGY.

No Text-books have been prescribed in the above subjects.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

[In all cases where reference is made to Chapters, Sections, Pages or Lines, thus Chapters I—IX, the reference is to be understood as inclusive.]

INTERMEDIATE EXAMINATION IN SCIENCE, 1909.

ENGLISH, VERNACULARS, FRENCH, GERMAN.

As in the Intermediate Examination in Arts.

GEOGRAPHY.

As in the Intermediate Examination in Arts.

CHEMISTRY.

As in the Intermediate Examination in Arts.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

[In all cases where reference is made to Chapters, Sections, Pages or Lines, thus Chapters I—IX, the reference is to be understood as inclusive.]

B. Sc. EXAMINATION, 1909.

CHEMISTRY.

As in the B. A. Examination.

**ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF
THE CALCUTTA UNIVERSITY.**

M. Sc. EXAMINATION, 1909.

CHEMISTRY

A.—Physical Chemistry—

| | | | |
|----------|-----|-----|------------------------------------|
| Nernst | ... | ... | Theoretische Chemie (3rd Edition). |
| Miller | ... | ... | Chemical Statics and Dynamics. |
| Findlay | ... | ... | The Phase Rule. |
| Lehfeldt | ... | ... | Electro Chemistry. |
| Whetham | ... | ... | Theory of Solution. |
| Travers | ... | ... | Study of Gases. |
| Soddy | ... | ... | Radio-activity. |
| Ostwald | ... | ... | The Principles of Chemistry. |

B.—Inorganic Chemistry—

| | | | |
|------------------------|-----|-----|--|
| Meyer | ... | ... | History of Chemistry. |
| Mendeleef | ... | ... | Principles of Chemistry. |
| Roscoe and Schorlemmer | ... | ... | Treatise on Chemistry. |
| Thorp | ... | ... | Industrial Chemistry. |
| Bloxam and Blount | ... | ... | Industrial Chemistry. |
| Ostwald | ... | ... | The Principles of Chemistry. |
| Frosenius | ... | ... | Qualitative Analysis and Quantitative Analysis |
| Sutton | ... | ... | Volumetric Analysis. |
| Hempel | ... | ... | Gas Analysis. |
| Treadwell and Hall | ... | ... | Analytical Chemistry, Vols. I and II. |

C.—Organic Chemistry—

| | | | |
|-----------|-----|-----|----------------------------------|
| Richter | ... | ... | Organische Chemie (9th Edition). |
| Gatterman | ... | ... | Practical Organic Chemistry. |

(Candidates for the M. Sc. Examination are required to consult original papers in the Chemical Society's Journals and other Scientific Periodicals, and also to consult the Annual Reports issued by the Chemical Society on the "Progress of Chemistry in connection with the special subject taken up by them.")

SENATE HOUSE,

The 25th March 1907.

G. THIBAUT,

Registrar.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

THE undermentioned candidates have passed the M.B. Examinations :—

PRELIMINARY SCIENTIFIC M.B. EXAMINATION.

FIRST DIVISION.

(In order of merit.)

| | | | | | |
|---|----------------------|-----|-----|-----|-----------------|
| 1 | Ghosh, Sureschandra | ... | ... | ... | Medical College |
| 2 | Basu, Girindrasekhar | ... | ... | ... | Ditto. |

SECOND DIVISION.

(In alphabetical order.)

| | | | | | |
|----|-----------------------------|-----|-----|-----|-----------------|
| | Bhattacharyya, Sibnath | ... | ... | ... | Medical College |
| | Chakrabarti, Dineschandra | .. | ... | ... | Ditto. |
| | Chattopadhyay, Niranjan | .. | ... | ... | Ditto. |
| | Das, Manindranath | ... | ... | ... | Ditto. |
| | Dasgupta, Jatindramohan | ... | .. | ... | Ditto. |
| | Datta, Charuchandra | ... | ... | ... | Ditto. |
| | Gangopadhyay, Brajendranath | ... | . | ... | Ditto. |
| | Ghosh, Saratchandra | ... | ... | ... | Ditto. |
| | „ Surendranath | ... | ... | .. | Ditto. |
| 10 | Lahiri, Subodhkumar | ... | ... | ... | Ditto. |
| | Misra, Ramchandra | ... | ... | .. | Ditto. |
| | Mukhopadhyay, Susilkumar | .. | ... | . | Ditto. |
| | Samanta, Umeschandra | ... | ... | ... | Ditto. |
| 11 | Sen, Jogeschandra | .. | .. | ... | Ditto. |

FIRST M.B. EXAMINATION.

FIRST DIVISION.

(In order of merit.)

| | | | | | |
|---|------------------------------|-----|-----|-----|-----------------|
| 1 | Kundu, Manilal | ... | ... | .. | Medical College |
| 2 | Lahiri, Subodhkumar | ... | ... | . | Ditto. |
| 3 | Sundaresan, V. R. | . | ... | ... | Ditto. |
| 4 | Raychaudhuri, Abinashchandra | ... | ... | ... | Ditto. |

SECOND DIVISION.

(In alphabetical order.)

| | | | | | |
|---|-------------------------|-----|-----|-----|------------------|
| | Bhattacharyya, Sibnath | .. | ... | ... | Medical College. |
| | Das, Satischandra | ... | ... | ... | Ditto. |
| | Dasgupta, Jatindramohan | ... | ... | ... | Ditto. |
| | Datta, Charuchandra | ... | ... | ... | Ditto. |
| | Ghosh, Surendranath | ... | ... | ... | Ditto. |
| | Murphy, Margaret | . | ... | ... | Ditto. |
| | Ray, Prabodhchandra | ... | ... | ... | Ditto. |
| | Sarkar, Girijabhushan | ... | ... | ... | Ditto. |
| 9 | Sen, Jogeschandra | ... | ... | ... | Ditto. |

SECOND M.B. EXAMINATION.

SECOND DIVISION.

(In alphabetical order.)

| | | | | | |
|---|----------------------|-----|-----|-----|-----------------|
| | Sanyal, Charuchandra | ... | ... | ... | Medical College |
| | Sen, Atindranath | ... | ... | ... | Ditto. |
| | „ Jyotilal | ... | ... | ... | Ditto. |
| 4 | „ Satyaranjan... | ... | ... | ... | Ditto. |

The undermentioned candidates, who failed at the Combined Preliminary Scientific and First M.B. Examination, have attained the standard of the First L.M.S. Examination :—

(In alphabetical order.)

| | | | | | |
|--|------------------------------|-----|-----|-----|------------------|
| | Bandyopadhyay, Himansusekhar | ... | ... | ... | Medical College. |
| | Gupta, Bankubihari | ... | ... | ... | Ditto. |
| | Mallik, Praphullachandra | ... | ... | ... | Ditto. |

The undermentioned candidates, who failed at the Preliminary Scientific M.B. Examination, have attained the standard of the Preliminary Scientific L.M.S. Examination: -

(In alphabetical order.)

| | | | | |
|----|-----------------------------|-----|-----|------------------|
| | Bandyopadhyay, Charuchandra | ... | ... | Medical College. |
| | " Himansu-ekhar | ... | ... | Ditto. |
| | " Nisikanta | ... | ... | Ditto. |
| | " Praphullachandra | ... | ... | Ditto. |
| | Banerjee, Dijen | ... | ... | Ditto. |
| | Basu, Jogendranath | ... | ... | Ditto. |
| | " Ramendrakrishna | ... | ... | Ditto. |
| | " Satischandra | ... | ... | Ditto. |
| | " Sudhirkumar | ... | ... | Ditto. |
| 10 | Batabyal, Kamalochan | ... | ... | Ditto. |
| | Bhar, Prabodhchandra | ... | ... | Ditto. |
| | Bhattacharyya, Kedarnath | ... | ... | Ditto. |
| | " Kachharaman | ... | ... | Ditto. |
| | " Surendranarayan | ... | ... | Ditto. |
| | " Susilkumar | ... | ... | Ditto. |

Whitby Smith, Director, Persian Gulf Section, Indo-European Telegraph Department, has been granted by the Director-in-Chief, combined leave for six months under Article 233, that is, privilege leave for one month and ten days under Article 260, combined with special leave on urgent private affairs for the remaining period under Article 316 of the Civil Service Regulations, with effect from the 1st March 1907.

K. BALARAMA IYER,
Examiner of Accounts in charge.

EASTERN BENGAL STATE RAILWAY.**NOTIFICATION.**

Calcutta, the 4th April 1907.

No. 4.—Mr. F. A. Hince, Assistant Traffic Superintendent, Eastern Bengal State Railway, passed the Lower Standard Examination in Hindustani, as prescribed in paragraph 53, Chapter VIII, Public Works Department Code, Volume IV, on the 27th March 1907.

C. H. COWIE, *Lieut.-Col.*,
Offg. Manager.

ARMY REMOUNT DEPARTMENT.**NOTIFICATION.****FURLOUGH AND LEAVE.**

Simla, the 16th April 1907.

Major G. C. Birdwood, Army Remount Department, has been granted by His Majesty's Secretary of State for India an extension of leave for six months on medical Certificate.

R. C. BROOME, Lt.-Colonel,
Offg. Director-General, Army Remount Department.

TREASURE TROVE.

NOTICE.

It is hereby notified under section 5 of the Indian Treasure Trove Act VI of 1878 that on the 29th day of December 1906, treasure consisting of the undermentioned article and valued at Rs. 49-8-0 was found by one Tayarammal of Permbakkam village, where she has engaged in gathering ground nut in a field belonging to one Galambalammal, namely S. No. 229 D of Kuppam, a village in the Villupuram taluk, of the South Arcot District, Madras Presidency.

2 All persons claiming the said treasure or part thereof are hereby required to appear personally or by agent before the Collector of South Arcot at his office at Cuddalore on Tuesday, the 1st day of October 1907 in view to the matter being enquired into or determined according to law.

[illegible]

L. J. P. JOLLY,
for Collector.

SOUTH ARLOT COLLECTOR'S OFFICE,
Dated 13th April 1907.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

PROMISSORY NOTE.

Lost.

I beg to announce for the information of the public that the Promissory Notes amounting to Rs23,000 which were purchased through the care of Bank of Bengal, Lahore, have been lost by me in beginning of February 1905.

It is most probable that my sons, named Devidass, Diwan Chand, Deena Nath and Hemraj, my hostile sons, with the object of giving me loss have misappropriated these Promissory Notes and they have taken a forcible possession of all my property earned solely by me.

I am not aware of the numbers of such Promissory Notes, hence I beg to advertise for the information of the public that any one purchasing any of the above Notes shall be lawfully treated under an offence punishable by the code rules.

These Promissory Notes are on the names of Nurput Rai, Devidass and Diwan Chand Doulat Ram, hence this advertisement.

I am the sole owner of both firms, the Notes were purchased solely of my own earning.

NURPUT RAI,
Merchant and Contractor.

LAHORE;
The 18th March 1907.

Lost.

The Government Promissory Notes Nos 135625, $3\frac{1}{2}$ per cent. of 1865, for Rs500, 135626, $3\frac{1}{2}$ per cent. of 1865, for Rs1,000, and 014666, $3\frac{1}{2}$ per cent. of 1900-1901, for Rs500, originally standing in the name of Abinash Chandra Ghose, the proprietor, by whom they were never endorsed to any other person, having been lost, notice is hereby given that payment of the above Notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for issue of duplicates in favour of Amar Kristo Ray. The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 27, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—74, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

Rates of subscription.

| | Per annum. |
|--|------------|
| | R s. p. |
| Subscription for <i>Gazette</i> and Supplement | 15 0 0 |

No. 584 of 1906.—John McDonald, tea planter, Arcuttipore Tea Estate, Cachar, in the province of Eastern Bengal and Assam. *Classifying and for winnowing out red, flat or broken leaf, dust, fluff, fibre and other light matter from tea or the winnowing of grain or other like product such as grass or other seeds to be known as "The deflector tea fanner."* (Specification filed 8 April 1907.)

No. 79 of 1907.—Frederick George Bakewell, stud groom, Government House, Malabar Point, Bombay. *Improvements in bits for horses.* (Specification filed 8 April 1907.)

No. 119 of 1907.—Robert Hutchison Anderson, Surveyor, of the May Consolidated Gold Mining Company, Limited, of Germiston, in the colony of the Transvaal, South Africa. *Improvements in rock drills.* (Specification filed 12 April 1907.)

No. 1570 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 385 of 1896.—Frank Lambert. *Type writer.* (From 26 April 1907 to 26 April 1908.)

- No. 364 of 1898.—Fred Lobnitz. *Improvements in apparatus for breaking up or cutting rocks, boulders, stones, or earth, under water or on dry land.* (From 14 April 1907 to 14 April 1908.)
- No. 393 of 1899.—Francis Hugh Fox. *Improvements in and relating to puttees or leg and other bandages and in their construction or method of manufacture.* (From 20 April 1907 to 20 April 1908.)
- No. 24 of 1900.—Victor Belanger. *Improvements in spinning and twisting machines.* (From 16 June 1907 to 16 June 1908.)
- No. 19 of 1901.—Bissun Dutt. *Improvements in portable sugar cane mills.* (From 28 May 1907 to 28 May 1908.)
- No. 30 of 1901.—Frank Clarence Newell. *Improvements in electric brakes.* (From 23 April 1907 to 23 April 1908.)
- No. 111 of 1901.—Solar Motor Company. *Improvements in solar generators.* (From 21 June 1907 to 21 June 1908.)
- No. 373 of 1902.—George Duvern. *An improved refrigerating machine vapour pump.* (From 1 May 1907 to 1 May 1908.)
- No. 496 of 1902.—Albert Alonzo Honey. *Improvements in electro-magnetic traction increasing apparatus.* (From 2 May 1907 to 2 May 1908.)
- No. 18 of 1903.—Joseph Berry. *Improvements in field hospital tents.* (From 29 April 1907 to 29 April 1908.)
- No. 57 of 1903.—The Westinghouse Brake Company, Limited. *Improvements in combined spring and frictional resistance devices.* (From 27 April 1907 to 27 April 1908.)
- No. 171 of 1903.—James F. Low and Company, Limited, and Charles Rodger Orr. *Improvements in and relating to the driving of the spindles of spinning frames.* (From 6 June 1907 to 6 June 1908.)

No. 1571 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased:—

- No. 130 of 1902.—William John Sharland. *An improved self-closing wagon door lock, with a self-acting bottom door fastener.* (Specification filed 13 January 1903.)
- No. 223 of 1902.—William Chapman. *Improvements in or relating to the track construction of electric railways operated on the conduit system.* (Specification filed 13 January 1903.)
- No. 224 of 1902.—William Chapman. *Improvements in or relating to the track construction of electric railways operated on the conduit system.* (Specification filed 13 January 1903.)
- No. 227 of 1902.—Thomas Ashworth and Joseph Shaw Gaunt. *An improved footstep for spindles used in machines for preparing, spinning, and doubling cotton and other fibrous substances and the like.* (Specification filed 13 January 1903.)
- No. 249 of 1902.—David Reid and John Dale. *A tea drying and glazing machine.* (Specification filed 19 January 1903.)
- No. 342 of 1902.—Charles Joshua Greengrass. *Improving the handwriting to be called the "Clerical Clip."* (Specification filed 16 January 1903.)
- No. 382 of 1902.—John Grieve and Henry Mathew Alleyn. *Improvements in apparatus for grading, sifting, polishing and increasing the keeping qualities of green or colong teas.* (Specification filed 19 January 1903.)
- No. 383 of 1902.—John Grieve and Henry Mathew Alleyn. *Improvements in apparatus for polishing, grading, sifting and increasing the keeping qualities of black or fermented teas.* (Specification filed 19 January 1903.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

No. 259 of 1901.—Arthur Harold Abbott. *A new or improved punkha pulling machine.* (Specification filed 18 January 1902.)

No. 398 of 1901.—The Hall Signal Company. *Improvements in signal apparatus.* (Specification filed 13 January 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (b) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

No. 257 of 1900.—Hab & Son. *Improvements in padlocks.* (Specification filed 17 January 1901.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888.

DIVISIONAL CONTRACT OFFICER, MEERUT.

The 19th April 1907.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Engineer Department.

SESSION, 1907-1908.

Candidates for admission to the Engineer Department should apply to the Principal in the prescribed form stating their University Registration Number on or before the 15th May 1907. Each application must be accompanied by registration fee of Rs. 1, which will in no case be returned.

The session begins on Monday, the 3rd June 1907.

Candidates must furnish proof that they have passed one of the following tests :—

- (1) The B.Sc. or B.A. Examination in the B course in Physics and Chemistry of the Calcutta University. The candidate's age must be under 23 years.
- (2) The F.A. Examination of the Calcutta and Madras Universities.
- (3) The Intermediate Examination of Allahabad and Punjab Universities.
- (4) The Intermediate Examination for the degree of B.A. of Bombay University.
- (5) The High School Examination for Europeans and Eurasians.

The candidate's age in (2), (3), (4) and (5) must be under 21 years.

In selecting candidates who have passed the F.A. (all other things being equal), preference will be given to those who have passed in Sanitary Science in addition to the ordinary subjects of the F.A. Examination.

The maximum number to be admitted is limited to 40. The position in the University examination and the age of the candidate will be taken into consideration when selection is made, and such selection will be made by the Principal.

The tuition fee for students to the Engineer class is Rs. 10 a month for each month of the year, vacation included.

One junior scholarship of Rs. 20 a month, one of Rs. 15 a month, and six of Rs. 10 a month, tenable for two years, will be given to students who have been admitted to the College and who do not hold University Scholarships.

The selection will be made in the following order :—

- (a) B.Sc.'s;
- (b) B.A.'s who have taken up the B course, and
- (c) F.A. candidates (except those who passed in the third division).

There will be in addition one scholarship of Rs. 20 a month and one of Rs. 10 a month for Europeans and Eurasians who have been admitted to the College, tenable for two years.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Form of application for admission and any further particulars will be supplied upon application to the Principal.

B. HEATON,

Principal, Civil Engineering College.

SIBPUR;

The 5th April 1907.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Apprentice Department.

SESSION, 1907-1908.

Candidates for admission to the Apprentice Department should apply to the Principal in the prescribed form on or before the 6th May 1907. Each application must be accompanied by a registration fee of Rs. 1, which will in no case be returned.

The session begins on Monday, the 3rd June 1907.

Candidates must furnish proof that they have passed one of the following tests:—

- (1) Standard VII or Middle School Examination of the Code of European Schools.
- (2) University Entrance Examination.

The candidate's age must be at least 15, and not more than 17 years.

There are 25 vacancies for Indians and 10 for Europeans and Eurasians. The selection of candidates for admission will be made by the Principal.

There will be one vacancy on the free list for Christian apprentices in June next and five on the reduced fee list. For natives there will be ten vacancies on the reduced fee list, available during the month of June. Election to those lists will be made by the Board of Visitors. Forms to be filled up for the consideration of the Board can be had on application to the Principal.

The tuition fee to students of the Apprentice Department is Rs 3 monthly for each month of the year, vacation included, except for students on the free and reduced fee lists.

Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eyesight.

Before an applicant is admitted to the College his parent or guardian must sign an agreement in the prescribed form.

All applications from Christian candidates for admission to the free or reduced fee lists must reach the Principal not later than the 6th May, so as to enable the elections to be made by the Board of Visitors before the opening of the session.

The vacancies on the native list will be filled up after the opening of the session from those apprentices who have joined the College after admission. Forms of application for admission and further particulars will be supplied on application to the Principal.

SIBPUR;
The 5th April 1907.

B. HEATON,
Principal, Civil Engineering College.

The 23rd April 1907.

No. 51.—Mr. D. Petrie, Quarter Master, Samana Rifles, is granted privilege leave of absence for three months combined with leave on urgent private affairs for three months in continuation, under the provisions of Articles 260, 233 and 316 of the Civil Service Regulations, with effect from the afternoon of the 15th April 1907.

No. 52.—Mr. C. W. Foster, Assistant Superintendent of Police, Punjab, whose services have been placed at the disposal of the Hon'ble the Chief Commissioner, is appointed to officiate as Quarter Master of the Samana Rifles, *vice* Mr. Petrie granted combined leave or until further orders, and assumed charge of his duties on the afternoon of the 15th April 1907.

By order, etc.,
W. C. BARRATT, Lieut.-Col.,
Staff Officer to the Chief Commissioner,
North-West Frontier Province.

NORTH-WEST FRONTIER PROVINCE—MEDICAL DEPARTMENT.

NOTIFICATION.

Peshawar, the 22nd April 1907.

No. 804-M. I.—2040.—The twenty days' privilege leave granted to third class Assistant Surgeon Moti Ram in this office Departmental Order No. 831-M. I.—3461, dated 21st September 1904, is hereby commuted to extraordinary leave without allowance.

A. M. CROFTS, Lt.-Col., I.M.S.,
Administrative Medical Officer,
N.-W. Frontier Province.

**NORTH-WEST FRONTIER PROVINCE—PUBLIC WORKS DEPARTMENT
Irrigation Branch.**

NOTIFICATION.

Lahore, the 22nd April 1907.

No. 404-R. I. F.—In exercise of the powers conferred by Section 75 of the Northern India Canal and Drainage Act, 1873 (VIII of 1873), and with the previous sanction of the Governor General in Council, the Chief Commissioner of the North-West Frontier Province is pleased to direct that in notification No. 9 R. I. F., dated the 9th January 1907, after the words "Kabul River Canal" the words "Paharpur Canal" shall be inserted.

J. J. MULLALY,
for Chief Commissioner, North-West Frontier Province.

LAHORE;

The 19th April 1907.

J. J. MULLALLY,
Secretary for Irrigation, N.W. Frontier Province

GOVERNMENT, UNITED PROVINCES.

MISCELLANEOUS.

POLITICAL DEPARTMENT.

The 21st March 1907.

No. 231—IV/305-1905.—In exercise of the powers conferred by sections 5 and 5A of the Scheduled Districts Act, 1874 (XIV of 1874), and with the previous sanction of the Governor General in Council, the Lieutenant-Governor is pleased to extend to those parts of the scheduled districts of Kumaun and Garhwal now known as the districts of Almora and Garhwal in the Kumaun division, in the restricted and modified form hereinafter set forth below, the provisions of sections 2 to 4, 6, 7 and 11 of the Bengal Eastern Frontier Regulation, 1873 (V of 1873):—

1. * * * * *

2. It shall be lawful for the Local Government, with the previous sanction of the Governor General in Council, to prescribe, and from time to time to alter, by notification in the Gazette, a line to be called "the inner line" in the districts of Almora and Garhwal (hereinafter referred to as "the districts") or in either of them.

The Local Government may, by notification in the Gazette, prohibit all British subjects, or any class of British subjects, or any persons residing in or passing through either of the districts from going beyond such line without a pass under the hand and seal of the chief executive officer of such district, or of such other officer as he may authorize to grant such pass, and the Local Government may from time to time cancel or vary such prohibition.

3. Any British subject or other person so prohibited, who, after "the inner line" has been prescribed and notified in accordance with section I, goes beyond such line without a pass shall be liable, on conviction before a magistrate, to a fine not exceeding Rs100 for the first offence, and to a fine not exceeding Rs500, or to simple or rigorous imprisonment for a term not exceeding three months, or to both, for each subsequent offence.

4. The Local Government may from time to time prescribe by notification in the Gazette a form of pass for both or either of the districts, and may in such form fix such restrictions or conditions as the Local Government may deem fit, and may require the payment of such dues and fees for such passes as to the Local Government may seem proper.

Any holder of such a pass shall, on breach of any such restriction or condition, be liable on conviction to a fine not exceeding Rs100 for a first offence and to a fine not exceeding Rs500 or to simple or rigorous imprisonment, which may extend to three months, or to both, for each subsequent offence.

5. * * * * *

6. The chief executive officer of either of the districts, in respect of which any notification as aforesaid is in force, may, subject to the approval of the Local Government, authorize, by a written instrument under his hand, any public servant to arrest and bring before him with the least practicable delay—

firstly,—any person prohibited from crossing "the inner line" prescribed for such district if such person shall be found beyond the line and when asked to produce his pass shall refuse or be unable so to do;

secondly,—any person to whom a pass may have been granted, and who has committed any infraction of its conditions.

7. It shall not be lawful for any British subject or other person, not being a native of either of the districts, to acquire any interest in land or the product of land beyond the said "inner line" without the sanction of the Local Government or such officer as the Local Government shall appoint in this behalf.

Any interest so acquired may be dealt with as the Local Government or its said officer shall direct.

The Local Government may also, by notification in the Gazette, extend the prohibition contained in this section to any class of persons, natives of the said districts, and may from time to time in like manner cancel or vary such extension.

8 to 10. Repealed by Regulation I of 1880.

11. Offences against this regulation may be tried by magistrates of the first or second class and shall be bailable.

(11) Jurisdiction as to offences.

J. M. HOLMS,
Chief Secretary.

ORDERS BY THE HONOURABLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

The ensuing Premchand Roychand Studentship Examination will be held on Monday, the 2nd December 1907, and following days, instead of on Monday, the 25th November 1907, and following days as previously announced.

G THIBAUT,
Registrar.

SE: ATE HOUSE ;
The 25th April 1907

ORDERS BY THE HONOURABLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

1. The following candidate who appeared at the last M A Examination in Pali as a non-collegiate student is declared to have passed the Examination in the Third Division :—

Sen, Girindrakumar Private student

2. The undermentioned candidates are declared to have passed the First L M S. Examination :—

(*In alphabetical order.*)

| | |
|--------------------------------------|------------------|
| Maitra, Girischandra | Medical College. |
| Mukhopadhyay, Jogeschandra | Ditto |

3. Under section 3, clause (h), every school that intends to undertake instruction in Geography for the Matriculation Examination is required to possess the apparatus mentioned in the following list :—

I.—The total cost need not exceed Rs 150—

1. A measuring tape.
2. A magnetic compass
3. Square paper and tracing paper
4. Clay, dry sand, paper pulp or plasticine for modelling.
5. A globe, not less than 14 inches in diameter, with writing surface, and with lines of latitude and longitude, and outlines only of the land-masses, marked upon it
6. A map of the school locality on a scale of 4" or 6" = 1 mile
7. A map of the district in which the school is situated on the scale 1" = 1 mile.
8. A map of the division in which the school is situated on the scale 1' = 4 miles
9. A map of the Province
10. A map of India.

(N. B.—All these maps should be coloured to indicate the height of the land above sea-level.)

11. A relief map of India.
12. Maps of India showing the most important distributions, *e g*, Temperature and Rainfall, Density of Population, Forest, Pasture, and Agricultural land, Minerals, Industries, Railways and Canals, Political Divisions.
13. Physical maps of the continents and of the British Isles

It is essential that the students should be provided with atlases, or with the necessary hand-maps. Maps for school work should not contain too much detail, or be crowded with names.

II.—The following additional equipment is recommended when it can be provided :—

1. A wet and dry bulb thermometer.
2. A barometer.
3. A rain gauge.
4. A large globe coloured to indicate land relief and ocean depths.
5. A relief globe.

6. Small hand globes for the use of pupils.
7. Hand maps for use in class.
8. A relief map of the Province.
9. A map of the World on Mollweide's equal area projection
10. A geological map of India.
11. A small collection of typical rocks, in particular those of the Province and of India.
12. A small museum of typical products.
13. The Statistical Atlas of India
14. A good standard atlas.
15. A meteorological atlas
16. Mill's International Geography
17. A geographical gazetteer.
18. Geographical wall pictures.

The total cost of this supplementary equipment need not exceed Rs. 400, and can be reduced if Schools will make their own collections of rocks and typical products.

III. (1) Valuable information regarding geographical equipment and all other matters connected with the teaching of geography is to be found in the *Geographical Teacher*, the organ of the Geographical Association, published three times a year, at one shilling a copy.

(2) Globes of all kinds are made by George Philip and Son, London, W. and A. K. Johnston, London, and Messrs. Ruddiman Johnston, London.

Small hand globes of German make can be obtained through the Calcutta School Book Society for about a rupee each.

(3) The "Comparative" series of large wall maps of the continents published by George Philip and Son is good and up to date; so also are the Orographical wall maps published by Edward Stanford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which includes maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District maps; also ordinary and relief maps of the Province.

Babu L. M. Basu, the drawing master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong card board, named on one side, and the same map without names on the reverse, published by Armand Colin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

(4) The hand maps, coloured to indicate relief, published by the Diagram Company, West Barnes Lane, New Malden, Surrey, at one penny each, are the best of their kind.

The uncoloured half-penny maps, showing river systems and a few towns, published by the same Company, are excellent for class use.

The Autograph hand maps, with hill shading in brown, published by Edward Stanford, London, at one penny each, are very good, and are larger than the Diagram Company's hand maps. The 15 inches map of the World on Mollweide's equal area projection is especially to be commended.

(5) Wall pictures of considerable artistic merit are published by Messrs. Edward Arnold of Leeds, Messrs. Hachette of Paris, and Messrs. Hölzel of Vienna. They cost, delivered in India, from two or three rupees each.

Map lantern slides, and view slides especially prepared for geography teaching, are sold by the Diagram Company for two or three shillings each.

(6) The best meteorological atlas published in Britain is Bartholomew's, and the most recent geographical gazetteer in English is that published by J. B. Lippincott, of Philadelphia and London.

G. THIBAUT,
Registrar.

SENATE HOUSE,

SUPPLEMENT TO

The Gazette of India.

No. 17.}

CALCUTTA, SATURDAY, APRIL 27, 1907

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Simla, the 1st May, 1907.

No. 993-M.—Notice is hereby given that HIS EXCELLENCY THE VICEROY AND GOVERNOR GENERAL will hold a Levée at Viceregal Lodge, Simla, at 9-45 P.M. on Friday, the 24th May 1907.

All Civil and Military Officers and the Native Officers of the Infantry Guard are invited to attend.

The following regulations are to be observed :

- I.—Gentlemen who propose to attend His Excellency's Levée are requested to bring with them two large cards with their names *clearly written* thereon—one to be left with the Aide-de-Camp in waiting in the corridor, and the other to be delivered to the Military Secretary, who will announce the name to His Excellency.
- II.—Gentlemen who have not already been presented at the Court of St. James, or at the Viceregal Court, should send in their names and addresses through the gentlemen who propose to present them to the Military Secretary's Office not later than Saturday, the 18th May 1907, in order that the names may be submitted to His Excellency, when, if they are approved, presentation cards will be forwarded.

III.—Gentlemen presenting others must themselves attend the Levée.

IV.—Full Dress will be worn by officers entitled to wear uniform. Civilians—Levée Dress: Gentlemen not entitled to wear uniform will appear in Evening Dress. For further particulars as regards dress, attention is drawn to this Office Notification No. 904-M., dated the 8th September 1899.

By Command,

G. FEILDING, Major,

Offg Military Secretary to the Viceroy.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 3rd May, 1907.

No. 6.—The following Statute is published for general information :

THE WORKMEN'S COMPENSATION ACT, 1906.

[6 EDW. 7, CH. 58.]

An Act to consolidate and amend the Law with respect to Compensation to Workmen for injuries suffered in the course of their Employment.

[21st December, 1906.]

BE it enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

1. (1) If in any employment personal injury by accident arising out of and in the course of the employment is caused to a workman, his employer shall, subject as hereinafter mentioned, be liable to pay compensation in accordance with the First Schedule to this Act.

Liability of employers to workmen for injuries.

(2) Provided that—

(a) the employer shall not be liable under this Act in respect of any injury which does not disable the workman for a period of at least one week from earning full wages at the work at which he was employed.

(b) when the injury was caused by the personal negligence or wilful act of the employer or of some person for whose act or default the employer is responsible, nothing in this Act shall affect any civil liability of the employer, but in that case the workman may, at his option, either claim compensation under this Act or take proceedings independently of this Act; but the employer shall not be liable to pay compensation for injury to a workman by accident arising out of and in the course of the employment both independently of and also under this Act, and shall not be liable to any proceedings independently of this Act, except in case of such personal negligence or wilful act as aforesaid:

(c) if it is proved that the injury to a workman is attributable to the serious and wilful misconduct of that workman, any compensation claimed in respect of that injury shall, unless the injury results in death or serious and permanent disablement, be disallowed.

(3) If any question arises in any proceedings under this Act as to the liability to pay compensation under this Act (including any question as to whether the person injured is a workman to whom this Act applies), or as to the amount or duration of compensation under this Act, the question, if not settled by agreement, shall, subject to the provisions of the First Schedule to this Act, be settled by arbitration, in accordance with the Second Schedule to this Act.

(4) If, within the time hereinafter in this Act limited for taking proceedings, an action is brought to recover damages independently of this Act for injury caused by any accident, and it is determined in such action that the injury is one for which the employer is not liable in such action, but that he would have been liable to pay compensation under the provisions of this Act, the action shall be dismissed; but the court in which the action is tried shall, if the plaintiff so choose, proceed to assess such compensation, but may deduct from such compensation all or part of the costs which, in its judgment, have been caused by the plaintiff bringing the action instead of proceeding under this Act. In any proceeding under this sub-section, when the court assesses the compensation it shall give a certificate of the compensation it has awarded and the directions it has given as to the deduction for costs, and such certificate shall have the force and effect of an award under this Act.

(5) Nothing in this Act shall affect any proceeding for a fine under the enactments relating to mines, factories, or workshops, or the application of any such fine.

2. (1) Proceedings for the recovery under this Act of compensation for an injury shall not be maintainable unless notice of the

Time for taking proceedings.

accident has been given as soon as practicable after the happening thereof and before the workman has voluntarily left the employment in which he was injured, and unless the claim for compensation with respect to such accident has been made within six months from the occurrence of the accident causing the injury, or, in case of death, within six months from the time of death:

Provided always that—

(a) the want of or any defect or inaccuracy in such notice shall not be a bar to the maintenance of such proceedings if it is found in the proceedings for settling the claim that the employer is not, or would not, if a notice or an amended notice were then given and the hearing postponed, be prejudiced in his defence by the want, defect, or inaccuracy, or that such want, defect or inaccuracy was occasioned by mistake, absence from the United Kingdom, or other reasonable cause; and

(b) the failure to make a claim within the period above specified shall not be a bar to the maintenance of such proceedings if it is found that the failure was occasioned by mistake, absence from the United Kingdom, or other reasonable cause.

(2) Notice in respect of an injury under this Act shall give the name and address of the person injured, and shall state in ordinary language the cause of the injury and the date at which the accident happened, and shall be served on the employer, or, if there is more than one employer, upon one of such employers.

(3) The notice may be served by delivering the same at, or sending it by post in a registered letter addressed to, the residence or place of business of the person on whom it is to be served.

(4) Where the employer is a body of persons corporate or unincorporate, the notice may also be served by delivering the same at, or by sending it by post in a registered letter addressed to, the employer at the office, or, if there be more than one office, any one of the offices of such body.

3. (1) If the Registrar of Friendly Societies, after taking steps to ascertain the views of the employer and workmen, certifies that

Contracting out.

any scheme of compensation, benefit, or insurance for the workmen of an employer in any employment, whether or not such scheme includes other employers and their workmen, provides scales of compensation not less favourable to the workmen and their dependants than the corresponding scales contained in this Act, and that, where the scheme provides for contributions by the workmen, the scheme confers benefits at least equivalent to those contributions, in addition to the benefits to which the workmen would have been entitled under this Act, and that a majority (to be ascertained by ballot) of the workmen to whom the scheme is applicable are in favour of such scheme, the employer may, whilst the certificate is in force, contract with any of his workmen that the provisions of the scheme shall be substituted for the provisions of this Act, and thereupon the employer shall be liable only in accordance with the scheme, but, save as aforesaid, this Act shall apply notwithstanding any contract to the contrary made after the commencement of this Act.

(2) The Registrar may give a certificate to expire at the end of a limited period of not less than five years, and may from time to time renew with or without modifications such a certificate to expire at the end of the period for which it is renewed.

(3) No scheme shall be so certified which contains an obligation upon the workmen to join the scheme as a condition of their hiring, or which does not contain provisions enabling a workman to withdraw from the scheme.

(4) If complaint is made to the Registrar of Friendly Societies by or on behalf of the workmen of any employer that the benefits conferred by any scheme no longer conform to the conditions stated in sub-section (1) of this section, or that the provisions of such scheme are being violated, or that the scheme is not being fairly administered, or that satisfactory reasons exist for revoking the certificate, the Registrar shall examine into the complaint, and, if satisfied that good cause exist for such complaint, shall, unless the cause of complaint is removed, revoke the certificate.

(5) When a certificate is revoked or expires, any moneys or securities held for the purpose of the scheme shall, after due provision has been made to discharge the liabilities already accrued, be distributed as may be arranged between the employer and workmen, or as may be determined by the Registrar of Friendly Societies in the event of a difference of opinion.

(6) Whenever a scheme has been certified as aforesaid, it shall be the duty of the employer to answer all such enquiries and to furnish all such accounts in regard to the scheme as may be made or required by the Registrar of Friendly Societies.

(7) The Chief Registrar of Friendly Societies shall include in his annual report the particulars of the proceedings of the Registrar under this Act.

(8) The Chief Registrar of Friendly Societies may make regulations for the purpose of carrying this section into effect.

4. (1) Where any person (in this section referred to as the principal), in the course of or for the purposes of his trade or business, contracts with any other person (in this section referred to as the contractor) for the execution by or under the contractor of the whole or any part of any work undertaken by the principal, the principal shall be liable to pay to any workman employed in the execution of the work any compensation under this Act which he would have been liable to pay if that workman had been immediately employed by him; and where compensation is claimed from or proceedings are taken against the principal, then, in the application of this Act, references to the principal shall be substituted for references to the employer, except that the amount of compensation shall be calculated with reference to the earnings of the workman under the employer by whom he is immediately employed:

Provided that, where the contract relates to threshing, ploughing, or other agricultural work, and the contractor provides and uses machinery driven by mechanical power for the purpose of such work, he and he alone shall be liable under this Act to pay compensation to any workman employed by him on such work.

(2) Where the principal is liable to pay compensation under this section, he shall be entitled to be indemnified by any person who would have been liable to pay compensation to the workman independently of this section, and all questions as to the right to and amount of any such indemnity shall in default of agreement be settled by arbitration under this Act.

(3) Nothing in this section shall be construed as preventing a workman recovering compensation under this Act from the contractor instead of the principal.

(4) This section shall not apply in any case where the accident occurred elsewhere than on, or in, or about premises on which the principal has undertaken to execute the work or which are otherwise under his control or management.

5. (1) Where any employer has entered into a contract with any insurers in respect of any liability under this Act to any workman, then, in the event of the employer becoming bankrupt, or making a composition or arrangement with his creditors, or if the employer is a company in the event of the company having commenced to be wound up, the rights of the employer against the insurers as respects that liability shall, notwithstanding anything in the enactments relating to bankruptcy and the winding up of companies, be transferred to and vest in the workman, and upon any such transfer the insurers shall have the same rights and remedies and be subject to the same liabilities as if they were the employer, so however that the insurers shall not be under any greater liability to the workman than they would have been under to the employer.

(2) If the liability of the insurers to the workman is less than the liability of the employer to the workman, the workman may prove for the balance in the bankruptcy or liquidation.

51 & 52 Vict.
c. 62.
52 & 53
Vict. c. 60.

(3) There shall be included among the debts which under section one of the Preferential Payments in Bankruptcy Act, 1888, and section four of the Preferential Payments in Bankruptcy (Ireland) Act, 1889, are in the distribution of the property of a bankrupt and in the distribution of the assets of a company being wound up to be paid in priority to all other debts, the amount, not exceeding in any individual case one hundred pounds, due in respect of any compensation the liability wherefor accrued before the date of the receiving order or the date of the commencement of the winding up, and those Acts and the Preferential Payments in Bankruptcy Amendment Act, 1897, shall have effect accordingly. Where the compensation is a weekly payment, the amount due in respect thereof shall, for the purposes of this provision, be taken to be the amount of the lump sum for which the weekly payment could, if redeemable, be redeemed if the employer made an application for that purpose under the First Schedule to this Act.

50 & 61 Vict.
c. 19.

(4) In the case of the winding up of a company within the meaning of the Stan-
naries Act, 1887, such an amount as aforesaid, if the compensation is payable to a miner or the dependants of a miner, shall have the like priority as is conferred on wages of miners by section nine of that Act, and that section shall have effect accordingly.

50 & 51 Vict.
c. 43.

(5) The provisions of this section with respect to preferences and priorities shall not apply where the bankrupt or the company being wound up has entered into such a contract with insurers as aforesaid.

(6) This section shall not apply where a company is wound up voluntarily merely for the purposes of reconstruction or of amalgamation with another company.

6. Where the injury for which compensation is payable under this Act was caused under circumstances creating a legal liability in some person other than the employer to pay damages in respect thereof—
Remedies both against employer and stranger.

(1) the workman may take proceedings both against that person to recover damages and against any person liable to pay compensation under this Act for such compensation, but shall not be entitled to recover both damages and compensation; and

(2) if the workman has recovered compensation under this Act, the person by whom the compensation was paid, and any person who has been called on to pay an indemnity under the section of this Act relating to sub-contracting, shall be entitled to be indemnified by the person so liable to pay damages as aforesaid, and all questions as to the right to and amount of any such indemnity shall, in default of agreement, be settled by action, or, by consent of the parties, by arbitration under this Act.

7. (1) This Act shall apply to masters, seamen, and apprentices to the sea service and apprentices in the sea-fishing service, provided that such persons are workmen within the meaning of this Act, and are members of the crew of any ship registered in the United Kingdom, or of any other British ship or vessel of which the owner, or (if there is more than one owner) the managing owner, or manager resides or has his principal place of business in the United Kingdom, subject to the following modifications.

(a) the notice of accident and the claim for compensation may, except where the person injured is the master, be served on the master of the ship as if he were the employer, but where the accident happened and the incapacity commenced on board the ship it shall not be necessary to give any notice of the accident:

(b) in the case of the death of the master, seaman, or apprentice, the claim for compensation shall be made within six months after news of the death has been received by the claimant:

(c) where an injured master, seaman, or apprentice is discharged or left behind in a British possession or in a foreign country, depositions respecting the circumstances and nature of the injury may be taken by any judge or magistrate in the British possession, and by any British consular officer in the foreign country, and if so taken shall be transmitted by the person by whom they are taken to the Board of Trade, and such depositions or certified copies thereof shall in any proceedings for enforcing the claim be admissible in evidence as provided by sections six hundred and ninety-one and six hundred and ninety-five of the Merchant Shipping Act, 1894, and those sections shall apply accordingly. 57 & 58 Vict. c. 60.

(d) in the case of the death of a master, seaman, or apprentice, leaving no dependants, no compensation shall be payable, if the owner of the ship is under the Merchant Shipping Act, 1894, liable to pay the expenses of burial;

(e) the weekly payment shall not be payable in respect of the period during which the owner of the ship is, under the Merchant Shipping Act, 1894, as amended by any subsequent enactment, or otherwise, liable to defray the expenses of maintenance of the injured master, seaman, or apprentice:

(f) any sum payable by way of compensation by the owner of a ship under this Act shall be paid in full notwithstanding anything in section five hundred and three of the Merchant Shipping Act, 1894 (which relates to the limitation of a shipowner's liability in certain cases, of loss of life, injury, or damage), but the limitation on the owner's liability imposed by that section shall apply to the amount recoverable by way of indemnity under the section of this Act relating to remedies both against employer and stranger as if the indemnity were damages for loss of life or personal injury:

(g) sub-sections (2) and (3) of section one hundred and seventy-four of the Merchant Shipping Act, 1894 (which relates to the recovery of wages of seamen lost with their ship), shall apply as respects proceedings for the recovery of compensation by dependants of masters, seamen, and apprentices lost with their ship as they apply with respect to proceedings for the recovery of wages due to seamen and apprentices; and proceedings for the recovery of compensation shall in such a case be maintainable if the claim is made within eighteen months of the date at which the ship is deemed to have been lost with all hands.

(2) This Act shall not apply to such members of the crew of a fishing vessel as are remunerated by shares in the profits or the gross earnings of the working of such vessel.

(3) This section shall extend to pilots to whom Part X of the Merchant Shipping Act, 1894, applies as if a pilot when employed on any such ship as aforesaid were a seaman and a member of the crew.

Application of Act to industrial diseases

8. (1) Where—

- (i) the certifying surgeon appointed under the Factory and Workshop Act, 1901, for the district in which a workman is employed certifies that the workman is suffering from a disease mentioned in the Third Schedule to this Act and is thereby disabled from earning full wages at the work at which he was employed, or
 - (ii) a workman is, in pursuance of any special rules or regulations made under the Factory and Workshop Act, 1901, suspended from his usual employment on account of having contracted any such disease; or
 - (iii) the death of a workman is caused by any such disease;
- and the disease is due to the nature of any employment in which the workman was employed at any time within the twelve months previous to the date of the disablement or suspension, whether under one or more employers, he or his dependants shall be entitled to compensation under this Act as if the disease or such suspension as aforesaid were a personal injury by accident arising out of and in the course of that employment, subject to the following modifications.

- (a) the disablement or suspension shall be treated as the happening of the accident;
- (b) if it is proved that the workman has at the time of entering the employment wilfully and falsely represented himself in writing as not having previously suffered from the disease, compensation shall not be payable;
- (c) the compensation shall be recoverable from the employer who last employed the workman during the said twelve months in the employment to the nature of which the disease was due:

Provided that—

- (i) the workman or his dependants if so required shall furnish that employer with such information as to the names and addresses of all the other employers who employed him in the employment during the said twelve months as he or they may possess, and, if such information is not furnished, or is not sufficient to enable that employer to take proceedings under the next following proviso, that employer upon proving that the disease was not contracted whilst the workman was in his employment shall not be liable to pay compensation, and
- (ii) if that employer alleges that the disease was in fact contracted whilst the workman was in the employment of some other employer, and not whilst in his employment, he may join such other employer as a party to the arbitration, and if the allegation is proved that other employer shall be the employer from whom the compensation is to be recoverable; and
- (iii) if the disease is of such a nature as to be contracted by a gradual process, any other employers who during the said twelve months employed the workman in the employment to the nature of which the disease was due shall be liable to make to the employer from whom compensation is recoverable such contributions as, in default of agreement, may be determined in the arbitration under this Act for settling the amount of the compensation;
- (d) the amount of the compensation shall be calculated with reference to the earnings of the workman under the employer from whom the compensation is recoverable;
- (e) the employer to whom notice of the death, disablement, or suspension is to be given shall be the employer who last employed the workman during the said twelve months in the employment to the nature of which the disease was due, and the notice may be given notwithstanding that the workman has voluntarily left his employment;
- (f) if an employer or a workman is aggrieved by the action of a certifying or other surgeon in giving or refusing to give a certificate of disablement or in suspending or refusing to suspend a workman for the purposes of this section, the matter shall in accordance with regulations made by the Secretary of State be referred to a medical referee, whose decision shall be final.

(2) If the workman at or immediately before the date of the disablement or suspension was employed in any process mentioned in the second column of the Third Schedule to this Act, and the disease contracted is the disease in the first column of that Schedule set opposite the description of the process, the disease, except where the certifying surgeon certifies that in his opinion the disease was not due to the nature of the employment, shall be deemed to have been due to the nature of that employment, unless the employer proves the contrary.

(3) The Secretary of State may make rules regulating the duties and fees of certifying and other surgeons (including dentists) under this section.

(4) For the purposes of this section the date of disablement shall be such date as the certifying surgeon certifies as the date on which the disablement commenced, or, if he is unable to certify such a date, the date on which the certificate is given: Provided that—

(a) where the medical referee allows an appeal against a refusal by a certifying surgeon to give a certificate of disablement, the date of disablement shall be such date as the medical referee may determine:

(b) where a workman dies without having obtained a certificate of disablement, or is at the time of death not in receipt of a weekly payment on account of disablement, it shall be the date of death.

(5) In such cases, and subject to such conditions as the Secretary of State may direct, a medical practitioner appointed by the Secretary of State for the purpose shall have the powers and duties of a certifying surgeon under this section, and this section shall be construed accordingly.

(6) The Secretary of State may make orders for extending the provisions of this section to other diseases and other processes, and to injuries due to the nature of any employment specified in the order not being injuries by accident, either without modification or subject to such modifications as may be contained in the order.

(7) Where, after inquiry held on the application of any employers or workmen engaged in any industry to which this section applies, it appears that a mutual trade insurance company or society for insuring against the risks under this section has been established for the industry, and that a majority of the employers engaged in that industry are insured against such risks in the company or society and that the company or society consents, the Secretary of State may, by Provisional Order, require all employers in that industry to insure in the company or society upon such terms and under such conditions and subject to such exceptions as may be set forth in the Order. Where such a company or society has been established, but is confined to employers in any particular locality or of any particular class, the Secretary of State may for the purposes of this provision treat the industry, as carried on by employers in that locality or of that class, as a separate industry.

(8) A Provisional Order made under this section shall be of no force whatever unless and until it is confirmed by Parliament, and if, while the Bill confirming any such Order is pending in either House of Parliament, a petition is presented against the Order, the Bill may be referred to a Select Committee, and the petitioner shall be allowed to appear and oppose as in the case of Private Bills, and any Act confirming any Provisional Order under this section may be repealed, altered, or amended by a Provisional Order made and confirmed in like manner.

(9) Any expenses incurred by the Secretary of State in respect of any such Order, Provisional Order, or confirming Bill shall be defrayed out of moneys provided by Parliament.

(10) Nothing in this section shall affect the rights of a workman to recover compensation in respect of a disease to which this section does not apply, if the disease is a personal injury by accident within the meaning of this Act.

9. (1) This Act shall not apply to persons in the naval or military service of the Crown, but otherwise shall apply to workmen employed by or under the Crown to whom this Act would apply if the employer were a private person:

Provided that in the case of a person employed in the private service of the Crown, the head of that department of the Royal Household in which he was employed at the time of the accident shall be deemed to be his employer.

(2) The Treasury may, by warrant laid before Parliament, modify for the purposes of this Act their warrant made under section one of the Superannuation Act, 1887, and notwithstanding anything in that Act, or any such warrant, may frame schemes with a view to their being certified by the Registrar of Friendly Societies under this Act.

10. (1) The Secretary of State may appoint such legally qualified medical practitioners to be medical referees for the purposes of this Act as he may, with the sanction of the Treasury determine, and the remuneration of, and other expenses incurred by, medical referees

under this Act shall, subject to regulations made by the Treasury, be paid out of moneys provided by Parliament.

Where a medical referee has been employed as a medical practitioner in connection with any case by or on behalf of an employer or workman or by any insurers interested, he shall not act as medical referee in that case.

(2) The remuneration of an arbitrator appointed by a judge of county courts under the Second Schedule to this Act shall be paid out of moneys provided by Parliament in accordance with regulations made by the Treasury.

II. (1) If it is alleged that the owners of any ship are liable as such owners to pay compensation under this Act, and at any time

Detention of ships.

that ship is found in any port or river of England or Ireland, or within three miles of the coast thereof, a judge of any court of record in England or Ireland may, upon its being shown to him by any person applying in accordance with the rules of the court that the owners are probably liable as such to pay such compensation, and that none of the owners reside in the United Kingdom, issue an order directed to any officer of customs or other officer named by the judge requiring him to detain the ship until such time as the owners, agent, master, or consignee thereof have paid such compensation, or have given security, to be approved by the judge, to abide the event of any proceedings that may be instituted to recover such compensation and to pay such compensation and costs as may be awarded thereon; and any officer of customs or other officer to whom the order is directed shall detain the ship accordingly.

(2) In any legal proceeding to recover such compensation, the person giving security shall be made defendant, and the production of the order of the judge, made in relation to the security, shall be conclusive evidence of the liability of the defendant to the proceeding.

57 & 58
Vict. c. 60.

(3) Section six hundred and ninety-two of the Merchant Shipping Act, 1894. shall apply to the detention of a ship under this Act as it applies to detention of a ship under that Act, and, if the owner of a ship is a corporation, it shall for the purposes of this section be deemed to reside in the United Kingdom if it has an office in the United Kingdom at which service of writs can be effected.

12. (1) Every employer in any industry to which the Secretary of State may direct that this section shall apply shall, on or before such day in every year as the Secretary of State

Returns as to compensation.

may direct, send to the Secretary of State a correct return specifying the number of injuries in respect of which compensation has been paid by him under this Act during the previous year, and the amount of such compensation, together with such other particulars as to the compensation as the Secretary of State may direct, and in default of complying with this section shall be liable on conviction under the Summary Jurisdiction Acts to a fine not exceeding five pounds.

(2) Any regulations made by the Secretary of State containing such directions as aforesaid shall be laid before both Houses of Parliament as soon as may be after they are made.

Definitions.

13. In this Act, unless the context otherwise requires,—

“employer” includes any body of persons corporate or unincorporate and the legal personal representative of a deceased employer, and, where the services of a workman are temporarily lent or let on hire to another person by the person with whom the workman has entered into a contract of service or apprenticeship, the latter shall, for the purposes of this Act, be deemed to continue to be the employer of the workman whilst he is working for that other person;

“workman” does not include any person employed otherwise than by way of manual labour whose remuneration exceeds two hundred and fifty pounds a year, or a person whose employment is of a casual nature and who is employed otherwise than for the purposes of the employer's trade or business, or a member of a police force, or an outworker, or a member of the employer's family dwelling in his house, but, save as aforesaid, means any person who has entered into or works under a contract of service or apprenticeship with an employer, whether by way of manual labour, clerical work, or otherwise, and whether the contract is expressed or implied, is oral or in writing;

any reference to a workman who has been injured shall, where the workman is dead, include a reference to his legal personal representative or to his dependants or other person to whom or for whose benefit compensation is payable;

“dependants” means such of the members of the workman's family as were wholly or in part dependent upon the earnings of the workman at the time of his

death, or would but for the incapacity due to the accident have been so dependent, and where the workman, being the parent or grand-parent of an illegitimate child, leaves such a child so dependent upon his earnings, or, being an illegitimate child, leaves a parent or grand-parent so dependent upon his earnings, shall include such an illegitimate child and parent or grand-parent respectively ;

"member of a family" means wife or husband, father, mother, grandfather, grandmother, step-father, stepmother, son, daughter, grandson, granddaughter, step-son, step-daughter, brother, sister, half-brother, half-sister ;

"ship," "vessel," "seaman" and "port" have the same meanings as in the Merchant Shipping Act, 1894 ;

"manager," in relation to a ship, means the ship's husband or other person to whom the management of the ship is entrusted by or on behalf of the owner ;

"police force" means a police force to which the Police Act, 1890, or the Police (Scotland) Act, 1890, applies, the City of London Police Force, the Royal Irish Constabulary, and the Dublin Metropolitan Police Force ;

53 & 54 Vict.
c. 45.
53 & 54 Vict.
c. 67.

"outworker" means a person to whom articles or materials are given out to be made up, cleaned, washed, altered, ornamented, finished, or repaired, or adapted for sale, in his own home or on other premises not under the control or management of the person who gave out the materials or articles ;

the exercise and performance of the powers and duties of a local or other public authority shall, for the purposes of this Act, be treated as the trade or business of the authority ;

"county court," "judge of the county court," "registrar of the county court," "plaintiff," and "rules of court," as respects Scotland, mean respectively sheriff court, sheriff, sheriff clerk, pursuer, and act of sederunt.

14. In Scotland, where a workman raises an action against his employer independently of this Act in respect of any injury caused by accident arising out of and in the course of

the employment, the action, if raised in the sheriff court and concluding for damages under the Employers' Liability Act, 1880, or alternatively at common law or under the Employers' Liability Act, 1880, shall, notwithstanding anything contained in that Act, not be removed under that Act or otherwise to the Court of Session, nor shall it be appealed to that court otherwise than by appeal on a question of law, and for the purposes of such appeal the provisions of the Second Schedule to this Act in regard to an appeal from the decision of the sheriff on any question of law determined by him as arbitrator under this Act shall apply.

43 & 44 Vict.
c. 42.

15. (1) Any contract (other than a contract substituting the provisions of a scheme certified under the Workmen's Compensation Act, 1897, for the provisions of that Act)

Provisions as to existing contracts and schemes.

existing at the commencement of this Act, whereby a workman relinquishes any right to compensation from the employer for personal injury arising out of and in the course of his employment, shall not, for the purposes of this Act, be deemed to continue after the time at which the workman's contract of service would determine if notice of the determination thereof were given at the commencement of this Act

60 & 61 Vict.
c. 37.

(2) Every scheme under the Workmen's Compensation Act, 1897, in force at the commencement of this Act, shall, if re-certified by the Registrar of Friendly Societies, have effect as if it were a scheme under this Act.

(3) The Registrar shall re-certify any such scheme if it is proved to his satisfaction that the scheme conforms, or has been so modified as to conform, with the provisions of this Act as to schemes.

(4) If any such scheme has not been so re-certified before the expiration of six months from the commencement of this Act, the certificate thereof shall be revoked.

16. (1) This Act shall come into operation on the first day of July nineteen hundred and seven but, except so far as it relates to

Commencement and repeal.

references to medical referees, and proceedings consequential thereon, shall not apply in any case where the accident happened before the commencement of this Act.

(2) The Workmen's Compensation Acts, 1897 and 1900, are hereby repealed, but shall continue to apply to cases where the accident happened before the commencement of this Act, except to the extent to which this Act applies to those cases.

60 & 61 Vict.
c. 37.
63 & 64 Vict.
c. 22.

Short title.

17. This Act may be cited as the Workmen's Compensation Act, 1906.

SCHEDULES.

FIRST SCHEDULE.

SCALE AND CONDITIONS OF COMPENSATION.

(1) The amount of compensation under this Act shall be—

(a) where death results from the injury—

- (i) if the workman leaves any dependants wholly dependent upon his earnings, a sum equal to his earnings in the employment of the same employer during the three years next preceding the injury, or the sum of one hundred and fifty pounds, whichever of those sums is the larger, but not exceeding in any case three hundred pounds, provided that the amount of any weekly payments made under this Act, and any lump sum paid in redemption thereof, shall be deducted from such sum, and, if the period of the workman's employment by the said employer has been less than the said three years, then the amount of his earnings during the said three years shall be deemed to be one hundred and fifty-six times his average weekly earnings during the period of his actual employment under the said employer;
- (ii) if the workman does not leave any such dependants, but leaves any dependants in part dependent upon his earnings, such sum, not exceeding in any case the amount payable under the foregoing provisions, as may be agreed upon, or, in default of agreement, may be determined, on arbitration under this Act, to be reasonable and proportionate to the injury to the said dependants; and
- (iii) if he leaves no dependants, the reasonable expenses of his medical attendance and burial, not exceeding ten pounds;

(b) where total or partial incapacity for work results from the injury, a weekly payment during the incapacity not exceeding fifty per cent. of his average weekly earnings during the previous twelve months, if he has been so long employed, but if not then for any less period during which he has been in the employment of the same employer, such weekly payment not to exceed one pound:

Provided that—

(a) if the incapacity lasts less than two weeks, no compensation shall be payable in respect of the first week; and

(b) as respects the weekly payments during total incapacity of a workman who is under twenty-one years of age at the date of the injury, and whose average weekly earnings are less than twenty shillings, one hundred per cent. shall be substituted for fifty per cent. of his average weekly earnings, but the weekly payment shall in no case exceed ten shillings.

(2) For the purposes of the provisions of this schedule relating to "earnings" and "average weekly earnings" of a workman, the following rules shall be observed:

(a) average weekly earnings shall be computed in such manner as is best calculated to give the rate per week at which the workman was being remunerated: Provided that where by reason of the shortness of the time during which the workman has been in the employment of his employer, or the casual nature of the employment, or the terms of the employment, it is impracticable at the date of the accident to compute the rate of remuneration, regard may be had to the average weekly amount which, during the twelve months previous to the accident, was being earned by a person in the same grade employed at the same work by the same employer, or, if there is no person so employed, by a person in the same grade employed in the same class of employment and in the same district;

(b) where the workman had entered into concurrent contracts of service with two or more employers under which he worked at one time for one such employer and at another time for another such employer, his average weekly earnings shall be computed as if his earnings under all such contracts were earnings in the employment of the employer for whom he was working at the time of the accident;

(c) employment by the same employer shall be taken to mean employment by the same employer in the grade in which the workman was employed at the time of the accident, uninterrupted by absence from work due to illness or any other unavoidable cause;

(d) where the employer has been accustomed to pay to the workman a sum to cover any special expenses entailed on him by the nature of his employment, the sum so paid shall not be reckoned as part of the earnings.

(3) In fixing the amount of the weekly payment, regard shall be had to any payment, allowance, or benefit which the workman may receive from the employer during the period of his incapacity, and in the case of partial incapacity the weekly payment shall in no case exceed the difference between the amount of the average weekly earnings of the workman before the accident and the average weekly amount which he is earning or is able to earn in some suitable employment or business after the accident, but shall bear such relation to the amount of that difference as under the circumstances of the case may appear proper.

(4) Where a workman has given notice of an accident, he shall, if so required by the employer, submit himself for examination by a duly qualified medical practitioner provided and paid by the employer, and, if he refuses to submit himself to such examination, or in any way obstructs the same, his right to compensation, and to take or prosecute any proceeding under this Act in relation to compensation, shall be suspended until such examination has taken place.

(5) The payment in the case of death shall, unless otherwise ordered as hereinafter provided, be paid into the county court, and any sum so paid into court shall, subject to rules of court and the provisions of this schedule, be invested, applied, or otherwise dealt with by the court in such manner as the court in its discretion thinks fit for the benefit of the persons entitled thereto under this Act, and the receipt of the registrar of the court shall be a sufficient discharge in respect of the amount paid in:

Provided that, if so agreed, the payment in case of death shall, if the workman leaves no dependants, be made to his legal personal representative, or, if he has no such representative, to the person to whom the expenses of medical attendance and burial are due.

(6) Rules of court may provide for the transfer of money paid into court under this Act from one court to another, whether or not the court from which it is to be transferred is in the same part of the United Kingdom as the court to which it is to be transferred.

(7) Where a weekly payment is payable under this Act to a person under any legal disability, a county court may, on application being made in accordance with rules of court, order that the weekly payment be paid during the disability into court, and the provisions of this schedule with respect to sums required by this schedule to be paid into court shall apply to sums paid into court in pursuance of any such order.

(8) Any question as to who is a dependant shall, in default of agreement, be settled, by arbitration under this Act, or, if not so settled before payment into court under this schedule, shall be settled by the county court, and the amount payable to each dependant shall be settled by arbitration under this Act, or, if not so settled before payment into court under this schedule, by the county court. Where there are both total and partial dependants, nothing in this schedule shall be construed as preventing the compensation being allotted partly to the total and partly to the partial dependants.

(9) Where, on application being made in accordance with rules of court, it appears to a county court that, on account of neglect of children on the part of a widow, or on account of the variation of the circumstances of the various dependants, or for any other sufficient cause, an order of the court or an award as to the apportionment amongst the several dependants of any sum paid as compensation, or as to the manner in which any sum payable to any such dependant is to be invested, applied, or otherwise dealt with, ought to be varied, the court may make such order for the variation of the former order or the award, as in the circumstances of the case the court may think just.

(10) Any sum which under this schedule is ordered to be invested may be invested in whole or in part in the Post Office Savings Bank by the registrar of the county court in his name as registrar.

(11) Any sum to be so invested may be invested in the purchase of an annuity from the National Debt Commissioners through the Post Office Savings Bank, or be accepted by the Postmaster-General as a deposit in the name of the registrar as such, and the provisions of any statute or regulations respecting the limits of deposits in savings banks, and the declaration to be made by a depositor, shall not apply to such sums.

(12) No part of any money invested in the name of the registrar of any county court in the Post Office Savings Bank under this Act shall be paid out, except upon authority addressed to the Postmaster-General by the Treasury or, subject to regulations of the Treasury, by the judge or registrar of the county court.

(13) Any person deriving any benefit from any moneys invested in a post office savings bank under the provisions of this Act may, nevertheless, open an account in a post office savings bank or in any other savings bank in his own name without being liable to any penalties imposed by any statute or regulations in respect of the opening of accounts in two savings banks, or of two accounts in the same savings bank.

(14) Any workman receiving weekly payments under this Act shall, if so required by the employer, from time to time submit himself for examination by a duly qualified medical practitioner provided and paid by the employer. If the workman refuses to submit himself to such examination, or in any way obstructs the same, his right to such weekly payments shall be suspended until such examination has taken place.

(15) A workman shall not be required to submit himself for examination by a medical practitioner under paragraph (4) or paragraph (14) of this schedule otherwise than in accordance with regulations made by the Secretary of State, or at more frequent intervals than may be prescribed by those regulations.

Where a workman has so submitted himself for examination by a medical practitioner, or has been examined by a medical practitioner selected by himself, and the employer or the workman, as the case may be, has within six days after such examination furnished the other with a copy of the report of that practitioner as to the workman's condition, then, in the event of no agreement being come to between the employer and the workman as to the workman's condition or fitness for employment, the registrar of a county court, on application being made to the court by both parties, may, on payment by the applicants of such fee not exceeding one pound as may be prescribed, refer the matter to a medical referee.

The medical referee to whom the matter is so referred shall, in accordance with regulations made by the Secretary of State, give a certificate as to the condition of the workman and his fitness for employment, specifying, where necessary, the kind of employment for which he is fit, and that certificate shall be conclusive evidence as to the matters so certified.

Where no agreement can be come to between the employer and the workman as to whether or to what extent the incapacity of the workman is due to the accident, the provisions of this paragraph shall, subject to any regulations made by the Secretary of State, apply as if the question were a question as to the condition of the workman.

If a workman, on being required so to do, refuses to submit himself for examination by a medical referee to whom the matter has been so referred as aforesaid, or in any way obstructs the same, his right to compensation and to take or prosecute any proceeding under this Act in relation to compensation, or, in the case of a workman in receipt of a weekly payment, his right to that weekly payment, shall be suspended until such examination has taken place.

Rules of court may be made for prescribing the manner in which documents are to be furnished or served and applications made under this paragraph and the forms to be used for those purposes and, subject to the consent of the Treasury, as to the fee to be paid under this paragraph.

(16) Any weekly payment may be reviewed at the request either of the employer or of the workman, and on such review may be ended, diminished, or increased, subject to the maximum above provided, and the amount of payment shall, in default of agreement, be settled by arbitration under this Act:

Provided that where the workman was at the date of the accident under twenty-one years of age and the review takes place more than twelve months after the accident, the amount of the weekly payment may be increased to any amount not exceeding fifty per cent. of the weekly sum which the workman would probably have been earning at the date of the review if he had remained uninjured, but not in any case exceeding one pound.

(17) Where any weekly payment has been continued for not less than six months, the liability therefor may, on application by or on behalf of the employer, be redeemed by the payment of a lump sum of such an amount as, where the incapacity is permanent, would, if invested in the purchase of an immediate life annuity from the National Debt Commissioners through the Post Office Savings Bank, purchase an annuity for the workman equal to seventy-five per cent. of the annual value of the weekly payment, and as in any other case may be settled by arbitration under this Act, and such lump sum may be ordered by the committee or arbitrator or judge of the county court to be invested or otherwise applied for the benefit of the person entitled thereto: Provided that nothing in this paragraph shall be construed as preventing agreements being made for the redemption of a weekly payment by a lump sum.

(18) If a workman receiving a weekly payment ceases to reside in the United Kingdom, he shall thereupon cease to be entitled to receive any weekly payment, unless the medical referee certifies that the incapacity resulting from the injury is likely to be of a permanent

nature. If the medical referee so certifies, the workman shall be entitled to receive quarterly the amount of the weekly payments accruing due during the preceding quarter so long as he proves, in such manner and at such intervals as may be prescribed by rules of court, his identity and the continuance of the incapacity in respect of which the weekly payment is payable.

(19) A weekly payment, or a sum paid by way of redemption thereof, shall not be capable of being assigned, charged, or attached, and shall not pass to any other person by operation of law, nor shall any claim be set off against the same.

(20) Where under this schedule a right to compensation is suspended, no compensation shall be payable in respect of the period of suspension.

(21) Where a scheme certified under this Act provides for payment of compensation by a friendly society, the provisions of the proviso to the first subsection of section eight, section sixteen, and section forty-one of the Friendly Societies Act, 1896, shall not apply to such society in respect of such scheme. 59 & 60 Vict. c. 25.

(22) In the application of this Act to Ireland the provisions of the County Officers and Courts (Ireland) Act, 1877, with respect to money deposited in the Post Office Savings Bank under that Act, shall apply to money invested in the Post Office Savings Bank under this Act. 41 & 42 Vict. c. 56.

SECOND SCHEDULE.

Sections 1, 14.

ARBITRATION, &C.

(1) For the purpose of settling any matter which under this Act is to be settled by arbitration, if any committee, representative of an employer and his workmen, exists with power to settle matters under this Act in the case of the employer and workmen, the matter shall, unless either party objects by notice in writing sent to the other party before the committee meet to consider the matter, be settled by the arbitration of such committee, or be referred by them in their discretion to arbitration as herein-after provided.

(2) If either party so objects, or there is no such committee, or the committee so refers the matter or fails to settle the matter within six months from the date of the claim, the matter shall be settled by a single arbitrator agreed on by the parties, or in the absence of agreement by the judge of the county court, according to the procedure prescribed by rules of court.

(3) In England the matter, instead of being settled by the judge of the county court, may, if the Lord Chancellor so authorises, be settled, according to the like procedure, by a single arbitrator appointed by that judge, and the arbitrator so appointed shall, for the purposes of this Act, have all the powers of that judge.

(4) The Arbitration Act, 1889, shall not apply to any arbitration under this Act; but a committee or an arbitrator may, if they or he think fit, submit any question of law for the decision of the judge of the county court, and the decision of the judge on any question of law, either on such submission, or in any case where he himself settles the matter under this Act, or where he gives any decision or makes any order under this Act, shall be final, unless within the time and in accordance with the conditions prescribed by rules of the Supreme Court either party appeals to the Court of Appeal; and the judge of the county court, or the arbitrator appointed by him, shall, for the purpose of proceedings under this Act, have the same powers of procuring the attendance of witnesses and the production of documents as if the proceedings were an action in the county court. 52 & 53 Vict. c. 49.

(5) A judge of county courts may, if he thinks fit, summon a medical referee to sit with him as an assessor.

(6) Rules of court may make provision for the appearance in any arbitration under this Act of any party by some other person.

(7) The costs of and incidental to the arbitration and proceedings connected therewith shall be in the discretion of the committee, arbitrator or judge of the county court, subject as respects such judge and an arbitrator appointed by him to rules of court. The costs, whether before a committee or an arbitrator or in the county court, shall not exceed the limit prescribed by rules of court, and shall be taxed in manner prescribed by those rules, and such taxation may be reviewed by the judge of the county court.

(8) In the case of the death, or refusal or inability to act, of an arbitrator, the judge of the county court may, on the application of any party, appoint a new arbitrator.

(9) Where the amount of compensation under this Act has been ascertained, or any weekly payment varied, or any other matter decided under this Act, either by a Committee or by an arbitrator or by agreement, a memorandum thereof shall be sent, in manner prescribed by rules of court, by the committee or arbitrator, or by any party interested, to the

registrar of the county court, who shall, subject to such rules, on being satisfied as to its genuineness, record such memorandum in a special register without fee, and thereupon the memorandum shall for all purposes be enforceable as a county court judgment.

Provided that—

- (a) no such memorandum shall be recorded before seven days after the despatch by the registrar of notice to the parties interested, and
 - (b) where a workman seeks to record a memorandum of agreement between his employer and himself for the payment of compensation under this Act and the employer, in accordance with rules of court, proves that the workman has in fact returned to work and is earning the same wages as he did before the accident, and objects to the recording of such memorandum, the memorandum shall only be recorded, if at all, on such terms as the judge of the county court, under the circumstances, may think just; and
 - (c) the judge of the county court may at any time rectify the register; and
 - (d) where it appears to the registrar of the county court, on any information which he considers sufficient, that an agreement as to the redemption of a weekly payment by a lump sum, or an agreement as to the amount of compensation payable to a person under any legal disability, or to dependants, ought not to be registered by reason of the inadequacy of the sum or amount, or by reason of the agreement having been obtained by fraud or undue influence, or other improper means, he may refuse to record the memorandum of the agreement sent to him for registration, and refer the matter to the judge, who shall, in accordance with rules of court, make such order (including an order as to any sum already paid under the agreement) as under the circumstances he may think just, and
 - (e) the judge may, within six months after a memorandum of an agreement as to the redemption of a weekly payment by a lump sum, or of an agreement as to the amount of compensation payable to a person under any legal disability, or to dependants, has been recorded in the register, order that the record be removed from the register on proof to his satisfaction that the agreement was obtained by fraud or undue influence or other improper means, and may make such order (including an order as to any sum already paid under the agreement) as under the circumstances he may think just.
- (o) An agreement as to the redemption of a weekly payment by a lump sum, if not registered in accordance with this Act, shall not, nor shall the payment of the sum payable under the agreement exempt the person by whom the weekly payment is payable from liability to continue to make that weekly payment, and an agreement as to the amount of compensation to be paid to a person under a legal disability or to dependants, if not so registered, shall not, nor shall the payment of the sum payable under the agreement, exempt the person by whom the compensation is payable from liability to pay compensation, unless, in either case, he proves that the failure to register was not due to any neglect or default on his part.
- (11) Where any matter under this Act is to be done in a county court, or by, to, or before the judge or registrar of a county court then, unless the contrary intention appears, the same shall, subject to rules of court, be done in, or by, to, or before the judge or registrar of the county court of the district in which all the parties concerned reside, or if they reside in different districts the district prescribed by rules of court, without prejudice to any transfer in manner provided by rules of court.
- (12) The duty of a judge of county courts under this Act, or in England of an arbitrator appointed by him, shall, subject to rules of court, be part of the duties of the county court, and the officers of the court shall act accordingly, and rules of court may be made both for any purpose for which this Act authorises rules of court to be made, and also generally for carrying into effect this Act so far as it affects the county court, or an arbitrator appointed by the judge of the county court, and proceedings in the county court or before any such arbitrator, and such rules may, in England, be made by the five judges of county courts appointed for the making of rules under section one hundred and sixty-four of the County Courts Act, 1888, and when allowed by the Lord Chancellor, as provided by that section, shall have full effect without any further consent.
- (13) No court fee, except such as may be prescribed under paragraph (13) of the First Schedule to this Act, shall be payable by any party in respect of any proceedings by or against a workman under this Act in the court prior to the award.
- (14) Any sum awarded as compensation shall, unless paid into court under this Act, be paid on the receipt of the person to whom it is payable under any agreement or award, and the solicitor or agent of a person claiming compensation under this Act shall not be entitled to recover from him any costs in respect of any proceedings in an arbitration under this Act, or to claim a lien in respect of such costs on, or deduct such costs from, the sum awarded or agreed as compensation, except such sum as may be awarded by the Committee, the arbitrator, or the judge of the county court, on an application made

either by the person claiming compensation, or by his solicitor or agent, to determine the amount of costs to be paid to the solicitor or agent, such sum to be awarded subject to taxation and to the scale of costs prescribed by rules of court.

(15) Any committee, arbitrator, or judge may, subject to regulations made by the Secretary of State and the Treasury, submit to a medical referee for report any matter which seems material to any question arising in the arbitration.

(16) The Secretary of State may, by order, either unconditionally or subject to such conditions or modifications as he may think fit, confer on any committee representative of an employer and his workmen, as respects any matter in which the committee act as arbitrators, or which is settled by agreement submitted to and approved by the committee, all or any of the powers conferred by this act exclusively on county courts or judges of county courts, and may by the order provide how and to whom the compensation money is to be paid in cases where, but for the order, the money would be required to be paid into court, and the order may exclude from the operation of provisoes (d) and (e) of paragraph (9) of this Schedule agreements submitted to and approved by the committee, and may contain such incidental, consequential, or supplemental provisions as may appear to the Secretary of State to be necessary or proper for the purposes of the order.

(17) In the application of this Schedule to Scotland—

(a) "county court judgment" as used in paragraph (9) of this Schedule means a recorded decree arbitral:

(b) any application to the sheriff as arbitrator shall be heard, tried, and determined summarily in the manner provided by section fifty-two of the Sheriff Courts (Scotland) Act, 1876, save only that parties may be represented by any person authorized in writing to appear for them and subject to the declaration that it shall be competent to either party within the time and in accordance with the conditions prescribed by act of sederunt to require the sheriff to state a case on any question of law determined by him, and his decision thereon in such case may be submitted to either division of the Court of Session, who may hear and determine the same and remit to the sheriff with instruction as to the judgment to be pronounced, and an appeal shall lie from either of such divisions to the House of Lords: ^{39 & 40 Vict. c. 70.}

(c) Paragraphs (3), (4) and (8) shall not apply.

(18) In the application of this schedule to Ireland the expression "judge of the county court" shall include the recorder of any city or town, and an appeal shall lie from the Court of Appeal to the House of Lords.

THIRD SCHEDULE.

Section 8.

| Description of Disease. | Description of Process. |
|---|---|
| Anthrax | Handling of wool, hair, bristles, hides, and skins. |
| Lead poisoning or its sequelæ | Any process involving the use of lead or its preparations or compounds. |
| Mercury poisoning or its sequelæ | Any process involving the use of mercury or its preparations or compounds. |
| Phosphorus poisoning or its sequelæ | Any process involving the use of phosphorus or its preparations or compounds. |
| Arsenic poisoning or its sequelæ | Any process involving the use of arsenic or its preparations or compounds. |
| Ankylostomiasis | Mining. |

Where regulations or special rules made under any Act of Parliament for the protection of persons employed in any industry against the risk of contracting lead poisoning require some or all of the persons employed in certain processes specified in the regulations or special rules to be periodically examined by a certifying or other surgeon, then in the application of this schedule to that industry, the expression "process" shall, unless the Secretary of State otherwise directs, include only the processes so specified.

T. W. RICHARDSON,

Offg. Secretary to the Government of India

HOME DEPARTMENT.

NOTIFICATIONS.

POST OFFICE.

GENERAL MATTERS.

Simla, the 1st May, 1907.

No. 3739—13.—In exercise of the powers conferred by the Indian Post Office Act, 1898 (VI of 1898), the Governor General in Council is pleased to direct that, with effect from the 1st July 1907, the following amendment shall be made in the rules published with the Notification of the Government of India in the Department of Finance and Commerce, No. 1429 A-S.R., dated the 30th March 1899, as subsequently amended :

For rule 6 (2) *substitute* the following :

6 (2). Subject to the following exceptions, nothing shall be affixed or attached to a postcard.

Exception 1.—To any postcard there may be affixed—

(a) on either side, an address-label bearing the name and address of the sender, and not exceeding in size 2 inches in length by $\frac{1}{4}$ of an inch in width ; provided that when the label is affixed to the address side of a postcard of private manufacture, the conditions laid down in the proviso to sub-rule 1 of this rule are fulfilled ;

- (b) on the address side, postage stamps in prepayment of postage and the registration fee (if any), and an address-label bearing the name and address of the addressee, and not exceeding in size 2 inches in length by $\frac{1}{2}$ of an inch in width ;
- (c) on the other side, (i) adhesive stamps used to denote the duty payable in respect of receipts ; and (ii) engravings, illustrations, drawings or photographs on very thin paper, and completely adherent to the card.

Exception 2.—To postcards of *private manufacture*, articles of the nature specified in Exception 1 (c) (ii) may be affixed on the address side, on the conditions laid down in the proviso to sub-rule (1) of this rule.

NOTE.—The sender of a *reply-postcard* may affix to the address side of the *reply-half* an address-label bearing his name and address and not exceeding in size 2 inches in length and $\frac{1}{2}$ of an inch in width.

LEAVE AND APPOINTMENTS. POST OFFICE.

The 3rd May, 1907.

No. 3831—93.—Mr. F. Hannington, I.C.S., Postmaster General, 2nd grade, is granted privilege leave for two months, with effect from the afternoon of the 23rd April 1907.

Mr. E. R. Jardine, officiating Postmaster General, 2nd grade, will continue to act in that grade, and will hold charge of the United Provinces Circle, during the absence on leave of Mr. Hannington, or until further orders.

EMIGRATION.

The 3rd May, 1907.

No. 3807—52 —The following draft of a notification which it is proposed to issue in exercise of the powers conferred by section 80 of the Indian Emigration Act, 1883 (XXI of 1883), is published as required by section 81 of the said Act, for the information of persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Governor General in Council on or after the 4th June 1907.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date fixed aforesaid will be considered by the Governor General in Council.

Draft Notification.

In exercise of the powers conferred by section 80 of the Indian Emigration Act, 1883 (XXI of 1883), the Governor General in Council is pleased to direct that the following amendments shall be made in Rules 11 and 12 of the Rules published with the Notification of the Government of India in the Department of Revenue and Agriculture, No. 94-E., dated the 18th March 1886, as subsequently amended, namely :

- (1) In Rule 11 for the words "an Assistant District Superintendent" and the words "an Assistant Superintendent", the words "a Deputy Superintendent" shall be substituted.
- (2) In Rule 12 after the word "Assistant" the words "or Deputy" shall be inserted.

RAILWAY BOARD.

NOTIFICATION.

Simla, the 1st May, 1907.

No. 102.—The following is published for general information :

No. 76 R. T., dated the 22nd April 1907.

RESOLUTION—By the Railway Board.

Revised General Rules of 1906 for working open lines of railway and the addendum thereto.

Read—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Department of Commerce and Industry, notification No. 801, dated the 24th March 1905.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. ^{89 A}/₅, dated the 8th September 1906.Railway Board's notification No. 205, dated the 5th October 1906, and Railway Board's circular No. R. T. ^{103 B}/₂, dated the 26th September 1906.Railway Board's notification No. 263, dated the 27th November 1906, and Railway Board's circular No. R. T. ^{29 P}/₅, dated the 16th November 1906.

Letter from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 1701, dated the 21st March 1907.

RESOLUTION.—The Agent of the Assam-Bengal Railway Company has recommended the adoption on the Assam-Bengal railway of the revised General Rules of 1906 for working open lines of railway in British India which were promulgated under Railway Board's circular No. R. T. ^{89 A}/₅, dated the 8th September 1906, and published under their notification No. 183, dated the 8th September 1906, and also of the addendum to rule 86, Chapter III, Part I, of the said General Rules promulgated under Railway Board's circular No. R. T. ^{103 B}/₂, dated the 26th September 1906, and published under their notification No. 205, dated the 5th October 1906.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, with effect from 1st July 1907, under section 47, sub-section (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the General Rules of 1906 for working open lines of railway, and of the addendum to rule 86, chap. III, Part I, cited in paragraph 1 above, on the Assam-Bengal railway system.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), also that the General Rules including the addendum cited in paragraph 1 which have already been published in the *Gazette of India*, be kept at railway stations as directed by sub-section (6) of the same section, and that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information.

R. C. F. VOLKERS,

Secretary, Railway Board.

SUPPLEMENT TO
The Gazette of India.

No. 18.]

SIMLA, SATURDAY, MAY 4, 1907.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and which may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 2nd May 1907, based on the Indian Daily Weather Reports of the period.

Unsettled weather prevailed over nearly the whole country during the first three days of the week, local rain occurred in Rajputana, Central India, the United and Central Provinces, northeast India and Burma and widespread rain in the Peninsula. On the 29th April conditions became more settled and skies cleared in the central parts of the country and over the greater part of the Peninsula. As rain decreased in these areas it became more general in northeast India, and a depression which appeared in Upper India gave general precipitation in the hills and plains of the extreme north and thunderstorms in the Simla and Mussooree hills from the 30th April to the 2nd May. The only areas in which no rain fell during the past week were Baluchistan, Sind, Gujarat and the Southern districts of the Punjab, very low temperatures were recorded in the Deccan, the Central Provinces and the adjacent districts of the United Provinces and of northeast India.

Burma.—Skies were lightly to thickly clouded and scattered falls of rain were reported on every day of the week except on the 29th April. Temperature was in slight excess in Upper Burma until the 1st, afterwards it was a little below normal.

Northeast India.—Rain, which was only scattered from the 26th to the 28th, increased on the 29th and became general on the 30th, but decreased again on the 1st and 2nd May. Skies were clear or lightly clouded in the western districts and highly to heavily clouded

elsewhere. Temperature was slightly above normal at the commencement of the week but owing to the extension eastward of the low temperature conditions prevailing in the Central and United Provinces temperature fell below normal, and very low values were recorded in Chota Nagpur and Orissa on the 28th and 29th April.

The United Provinces, Central India and the Central Provinces.—Local falls of rain were reported on the first four days of the week, during which period skies were lightly to heavily clouded, but on the remaining days skies were clearer, and there was practically no rain. Temperature was in moderate to very large defect up to the 29th April, when it began to rise and by the end of the week temperature conditions were approximately normal.

Northwest India.—Rain fell in Rajputana and at a few stations in the Punjab on the 27th and 28th April, and general precipitation occurred in the extreme north of the division on the 30th followed by a few falls of rain and hail on the next two days, chiefly in the western Himalayas. Temperature was somewhat below normal up to the 29th, during the next two days it was nearly normal but on the 1st May the disturbance in Upper India initiated a cold wave which by the 2nd had spread over the whole division, very low temperatures being reported from Baluchistan and the extreme north.

The Peninsula.—Rain fell in all parts of the division, more particularly in the Bombay Deccan, Hyderabad, Mysore and Malabar, most of the rainfall occurring during the first half of the week. Skies were thickly clouded during the period of rainfall and were nearly clear from the 29th April to the 2nd May except in the south and on the east coast where light to moderate cloud persisted throughout the week.

The rainfall of the past week was above the average over the greater part of the country; less rain than usual was however received on the Burma coast and in Eastern Bengal and Assam. The rainfall of the whole period from the 30th November to the 2nd May is in defect on the Burma coast, normal in Eastern Bengal and Assam, Baluchistan and the subdivisions of Bhamo, Narayanganj, Sibsagar, Ahmedabad and Calicut, and in more or less excess in the remainder of the Indian region.

The following summarises the chief rainfall amounts of the week, as reported at 8h. each day :—

April 26th. Sibsagar 1·65", Cherra Poonjee 1·98", Chanda 0·72", Sholapur 1·89", Salem 1·10" and Calicut 2·36".

„ 27th. Chittagong 1·58", Udaipur 0·61", Belgaum 1·75", Gulburga 3·12", Hyderabad 1·13" and Mangalore 1·42".

„ 28th. Yamethin 1·71", Toungoo 2·46", Dibrugarh 1·41", Waltair 1·94", Hyderabad 1·40", Bangalore 3·22", Ootacamund 1·97", Salem 2·29", Karwar 1·13", and Trivandrum 1·16".

„ 29th. Chittagong 1·17", Seoni 1·14", and Cochin 1·20".

„ 30th. Minbu 0·73", Gauhati 1·04", Silchar 1·50", Berhampore 1·30", Durbhanga 1·13", Murree 1·29", Srinagar 1·17", Sonemarg 1·56", Dera Ismail Khan 1·24", Masulipatam 1·30", Pamban 2·12", Mercara 1·57", and Calicut 1·36".

May 1st. Sonemarg 2·64" and Cochin 1·03".

„ 2nd. Port Blair 1·10", Mergui 1·30", Saugor Island 1·44", Shillong 1·52", Burdwan 1·46", and Sonemarg 1·08".

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 27th April 1907.

Burma.—Slight rain fell in seven districts of Lower Burma and in Pakokku, Mandalay, Sagaing, the Northern and Southern Shan States and the Chin Hills. Reaping of dry weather paddy is completed in Maubin and transplanting in Lower Chindwin. Sowing of hill side paddy has commenced in Katha; sowing of early wet weather paddy has commenced in the Northern Shan States; reaping of miscellaneous crops and plucking of tobacco have commenced in Minbu. Sowing of sesamum is completed in Kyaukse; ploughing for sesamum and cotton has commenced in the Yinmabin subdivision of Lower Chindwin and in Myingyan. Reaping of wheat is nearly completed in Kengtung in the Southern Shan States. The standing crops are in good condition but ripening showers for paddy are badly wanted in Mandalay. The price of paddy has risen considerably in Thayetmyo and Mandalay and slightly in Thaton and Minbu, it has fallen slightly in Akyab, elsewhere it is unchanged.

Eastern Bengal and Assam.—The weather is hot and cloudy. There was heavy rain in Chittagong, Noakhali, Cachar and Upper Assam and slight to moderate rain in other places except Dinajpur and Goalpara where no rain fell. More rain is wanted in Pabna, Faridpur and Malda. Plucking and manufacture of tea are in progress and prospects are fair in Sibsagar and good elsewhere. Harvesting of early transplanted rice continues and prospects are generally fair to good. Sowing of jute and rice is in progress. Pressing of sugarcane still continues in Darrang and Sibsagar. Prices of common rice:—Manipur 13; Silchar 9 to 9½; Chittagong and Kohima 9; Rangamati 8 to 9; Comilla 8½; Dinajpur 8½; Dacca 8½; Mymensingh, Rampur Boalia, Dhubri, Gauhati, Tezpur and Sibsagar 8; Faridpur 6 to 8; Bogra 7½; Dibrugarh 7½; Jalpaiguri, Patna and Sylhet 7½; Barisal 7½; Noakhali, Rangpur, Malda and Nowgong 7; Tura 6 to 7; and Shillong and Aijal 6 seers per rupee. Prices have risen in three and remained stationary in the remaining districts. Distribution of gratuitous relief in Sylhet is closed.

Bengal.—The rainfall was general though light in the Presidency, Orissa and Chota Nagpur Divisions. In Behar scattered showers fell. The sowing of jute and other autumn crops is in progress. Sugarcane is doing well. Rain is wanted in parts of the 24-Parganas, Nadia and Bhagalpur. In Darbhanga the number of persons on gratuitous relief is 12,302, on test works 2,282; and on relief works 26,274. The supply of fodder and water is sufficient everywhere. The price of common rice has risen in ten and fallen in seven districts; the variations have been slight.

United Provinces.—Slight rain fell in twenty-seven districts. Harvesting still continues in parts; elsewhere threshing and winnowing are in progress. Sugarcane and extra crops are being irrigated and weeded and sowing of cotton and indigo has commenced in places. Land is being prepared for autumn crops. Some damage by rain is reported from Almora, Moradabad and Cawnpore and by insects in Aligarh. The condition of cattle is good except in parts of six districts. Markets are well supplied but fodder is scarce in Sitapur and Azamgarh. Prices remain stationary.

Punjab.—Light to moderate rain has fallen except in Delhi, Ambala, Jullundur, Ferozepore and Amritsar. Prices of food grains are slightly rising in Ambala, Amritsar, Sialkot, Rawalpindi and Multan. Harvesting of spring crops and sowings of extra spring crops continue. Cotton and sugarcane are being sown; weeding of sugarcane has commenced in Jullundur. The condition and prospects of the standing crops are good to average except in parts of Amritsar where crops are poor. Extra spring crops have been considerably damaged by hoppers in parts of Mianwali; locusts have laid eggs in the northern portion of the Chakkar tehsil, locusts have also damaged extra spring crops in parts of Lyallpur; eggs and hoppers are being destroyed; damage to crops by hail is reported from Shahpur and spring crops in Ferozepore and Lahore have also been slightly injured by rain. Cattle are generally in good condition. Fodder is sufficient except in parts of Mianwali. There are no complaints regarding the water-supply.

North-West Frontier Province.—Rain fell 1·08 inches in Hazara and showers elsewhere. The standing crops are in excellent condition but the gram crop has withered in some parts of Bannu and wheat is also suffering from rust. The destruction of locusts and their eggs still goes on in Bannu, Dera Ismail Khan and Peshawar. Harvesting of gram continues and that of barley has commenced in Bannu. Cutting of spring crops has commenced in Dera Ismail Khan. The outturn of oil-seeds is below average in Dera Ismail Khan. Sowings of extra spring crops and of sugarcane are in progress. Land is also being prepared for autumn sowings. The water-supply and fodder are sufficient. Cattle

are in good condition. Prices except of *bajra* show a slight tendency to fall. Prices —wheat 16 to 19; gram 17½ to 25; maize 25 to 31½ and *bajra* 21 to 23 seers per rupee.

Jammu.—There was slight rain during the week. Prices are stationary. Prices —wheat 11 to 24 and maize 15 to 26 seers per rupee. The condition of the standing crops is good. Fodder is insufficient except in the Kishtwar and Ramban tehsils where it is scarce. Land is being prepared for autumn sowings. The recent rain has been injurious to the standings crops.

Kashmir.—The weather is generally bright and becoming warm. Prices are almost stationary.

Rajputana.—Scattered showers fell everywhere except in Partabgarh, Kotah and Tonk, the maximum fall was 63 cents at Reni in Bikaner. Harvesting operations are in progress. Cattle are in good condition except in some places in Mewar. Pasturage and fodder are sufficient. Prices have fallen slightly in Jaisalmer, Jhalawar and Jaipur, risen in Kotah and Kishengarh; and are steady elsewhere.

Central India.—Slight rain fell in parts of Gwalior, Bhopal, Malwa and Bhopawar. Harvesting of spring crops is in progress in Bhopal, Baghelkhand and Bundelkhand. Lands are being prepared for autumn crops in Malwa and Bhopawar. The standing crops and the probable outturn are fair to good. Crops have been damaged by hail-storm and rust in Baghelkhand. Agricultural stock and pasturage are fair to good except in parts of Malwa and Bhopawar. Prices have fallen slightly in Rutlam; are high in Baghelkhand, and normal elsewhere. Opium collection is nearly finished in Gwalior.

Central Provinces—The days are warm and mornings and nights cool. Rain was again fairly general all over the Provinces but the fall was light except in Seoni and at Wardha where an inch was received. Harvesting of spring crops is nearly completed everywhere and threshing and winnowing continue but are delayed by rain in most districts. Fourth picking of cold weather cotton in Warora tehsil (Chanda) is approaching completion. The *mohwa* crop has been seriously damaged in Betul. Ploughing for autumn crops and repairs to field embankments in the rice districts continue. The supply of fodder and water is sufficient in all districts but the price of fodder is higher in Nagpur and Yeotmal. Prospects remain generally good. *Juar* is cheaper in Narsinghpore, and dearer in Damoh and Wardha by 2 seers, elsewhere prices are generally steady or fluctuate very slightly but still continue equal to or above the scarcity rate in seven districts.

Native States.—Light local showers not exceeding 84 cents were received in eight States. Threshing and winnowing are finished but operations have been retarded by recent rain in Kawardha and Chhuikhadan. Picking of *mohwa* is completed. Preparation of land for autumn crops is in progress. Fodder and water are adequate everywhere. Prospects are generally good. The price of *kodon* (millet) rose by 2 seers in Chhuikhadan.

Bombay.—There was rain during the week in parts of Sukkur, Gujarat, Konkan, Deccan, Karnatak, Kathiawar, Palanpur and Mahi Kantha. The standing crops are in good condition except for slight damage by recent rain and hail to the wheat and rapeseed crops in parts of Palanpur. Harvesting of spring crops is nearing completion and threshing continues. Cotton-picking is progressing in parts of Gujarat, Karnatak, Palanpur, Rewa Kantha and Cutch. Preparation of lands for next season continues. Drinking water is sufficient except in parts of the Deccan and Bijapur. Water for irrigation purposes is insufficient in parts of Surat, the Deccan, Bijapur and Cutch. The fodder supply is sufficient. The quantity of food-grains purchaseable per rupee is in the Karnatak 20 to 43 per cent, in the Deccan 19 to 31 per cent, and elsewhere 3 to 25 per cent less than the normal. Labourers get sufficient field employment. During week ending 20th April 1907, 17 persons were on gratuitous relief in the Belgaum district.

Hyderabad.—There was heavy rain in the districts averaging one inch 50 cents. The late rice harvest continues. The standing crops have been damaged in parts by heavy rain. Lands are being prepared for monsoon sowings. Prices —wheat 7½, coarse rice 7½, and *juar* 15½ seers per rupee.

Mysore.—Slight rain fell throughout the State. Prices of food-grains are steady. The prospects of the season are good. Cattle are healthy and water and fodder are available.

Coorg.—Rainfall 2 inches 63 cents. Ploughing for rice has commenced. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—Rainfall good in South Canara, Malabar, Cuddapah, Vizagapatam Agency and Bellary; none in Chingleput and Madras; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of Godavari, Kistna, Bellary, Anantapur, Nellore, South Arcot, North Arcot, Salem and Madura. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally fair but some in parts of Godavari have suffered slightly on account of rain and some in parts of Madura require more rain.

Harvests continue with outturn poor to normal. Pasture is sufficient except in parts of the Circars, the Deccan, Chingleput, North Arcot, Salem, Madura and South Canara. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in thirteen districts; has fallen in five; and has very slightly risen in five. The prices of millets have fluctuated as follows—*Ragi* is stationary in fourteen districts; has fallen in two; and has slightly risen in five. *Cholum* is stationary in four districts; has fallen in two; and has slightly risen in eight. *Cumbu* is stationary in eight districts; has fallen in one; and has slightly risen in six.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table.

| Name of province. | PRECEDING WEEK. (REVISED FIGURES) | | | PRESENT WEEK. | | | Increase or decrease. |

HOME DEPARTMENT.

NOTIFICATION.

Simla, the 11th May, 1907.

Whereas an emergency has arisen which makes it necessary to regulate the holding of meetings in the Provinces of Eastern Bengal and Assam and of the Punjab; Now, therefore, in exercise of the power conferred by section 23 of the Indian Councils Act, 1861, the Governor General is pleased to make and promulgate the following Ordinance:—

ORDINANCE NO. 1 OF 1907.

Short title and extent.

1. (1) This Ordinance may be called the Regulation of Meetings Ordinance, 1907.

(2) It extends to the Provinces of Eastern Bengal and Assam and of the Punjab, but shall only come into operation in such areas (hereinafter called "proclaimed areas") as the Lieutenant-Governor of each Province respectively may from time to time notify in the local official Gazette.

(3) Any notification made under sub-section (2) may in like manner from time to time be amended, added to or cancelled by the Lieutenant-Governor.

2. (1) No public meeting shall be held in any proclaimed area for the discussion of public or political matters unless written notice of the intention to hold such

meeting and of the time and place of such meeting has been given to the District Superintendent of Police at least seven days previously.

(2) Any officer of Police, not below the rank of an officer in charge of a police-station, may, by order in writing, depute one or more Police-officers or other

persons to attend any such meeting for the purpose of causing a report to be taken of the proceedings,

3. The District Magistrate may at any time, by order in writing, of which public notice shall forthwith be given, prohibit any meeting in a proclaimed area if in his opinion such meeting is likely to promote sedition or disaffection or to cause a disturbance of the public tranquillity.

4. (1) Any person concerned in the promotion or conduct of a meeting of which due notice has not been given as required by section 2, sub-section (1), shall be punished with imprisonment of either description for a term which may extend to six months, or with fine, or with both.

(2) Any meeting which has been prohibited under section 3 shall be deemed to be an unlawful assembly within the meaning of Chapter VIII of the Indian Penal Code and of Chapter IX of the Code of Criminal Procedure, 1898.

MINTO,

Viceroy and Governor General.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Simla, the 1st May, 1907.

No 993-M.—Notice is hereby given that HIS EXCELLENCY THE VICEROY AND GOVERNOR GENERAL will hold a Levée at Viceregal Lodge, Simla, at 9-45 P.M. on Friday, the 24th May 1907.

All Civil and Military Officers and the Indian Officers of the Infantry Guard are invited to attend.

The following regulations are to be observed :

- 1.—Gentlemen who propose to attend His Excellency's Levée are requested to bring with them two large cards with their names *clearly written* thereon—one to be left with the Aide-de-Camp in waiting in the corridor, and the other to be delivered to the Military Secretary, who will announce the name to His Excellency.

II.—Gentlemen who have not already been presented at the Court of St. James, or at the Viceregal Court, should send in their names and addresses through the gentlemen who propose to present them to the Military Secretary's Office not later than Saturday, the 18th May 1907, in order that the names may be submitted to His Excellency, when, if they are approved, presentation cards will be forwarded.

III.—Gentlemen presenting others must themselves attend the Levée.

IV.—Full Dress will be worn by officers entitled to wear uniform. Civilians—Levée Dress. Gentlemen not entitled to wear uniform will appear in Evening Dress. For further particulars as regards dress, attention is drawn to this Office Notification No. 904-M., dated the 8th September 1899.

By Command,
G. FEILDING, Major,
Offg. Military Secretary to the Viceroy.

or Manager

190 .

NOTES AND INSTRUCTIONS.

(1) Failure to forward a correct return to the Chief Inspector of Mines ^{not} later than the 1st February in each year, will render the managing agent, owner, agent, or manager liable on conviction to a penalty which may extend to Rs. 500.

(2) It will greatly facilitate the preparation of the statistics if the return is despatched as soon as possible at the close of the year.

(3) The output should be given—

(a) in troy ounces in the case of gold ;

(b) in carats in the case of gem-stones ;

(c) in cwt.,—or in cwt. and lbs. where the circumstances require greater particularisation in order to give an accurate estimate of small outputs,—in the case of alum, amber, asbestos, chromite, corundum (not being gem corundum), graphite, jadestone, mica, steatite and tin ore ; and

(d) in tons, in the case of clays, coal, coke, iron-ore, limestone, magnesite, manganese-ore, other unspecified metalliferous ores, salt and slate.

(4) The total amount of mineral raised during the year must be given including in the case of coal mines, the colliery consumption and the coal made into coke.

(5) The value of the mineral given should be based on the actual or estimated wholesale price of the mineral at the pit's mouth. In the case of coal

sold into wagons at the colliery, the cost of loading should be deducted from the selling price.

(6) In the case of mica mines a "plot" is to be regarded as a "pit" for the purposes of statements Nos. II and III and the figures to be entered in columns 4 and 5 of statement No. III relate to the quantity and value of marketable mica consigned

(7) The average number of persons employed daily should be obtained by dividing the aggregate number of daily attendances (permanent and temporary) by the number of working days.

(8) Every person of or above the age of twelve years should be entered as an adult.

No. 3958-43.—The following draft of a notification which it is proposed to issue in exercise of the power conferred by section 20, sub-section (2), clause (h), of the Indian Mines Act, 1901 (VIII of 1901), is published as required by section 20, sub-sections (j) and (4), of the Act for the information of persons concerned, and notice is hereby given that the draft will be taken into consideration by the Governor General in Council on or after the 11th day of August 1907.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date fixed aforesaid, will be considered by the Governor General in Council.

Draft Notification.

In exercise of the power conferred by section 20 of the Indian Mines Act, 1901 (VIII of 1901), the Governor General in Council is pleased to make, in supersession of the rules published with Notifications Nos. 3352 45-32 and 3938-35, dated the 27th December, 1901, and 23rd May, 1906, respectively, the following rules for application to all mines in British India:

1.—When an accident occurs in or about a mine causing loss of life or serious* bodily injury, or when an accidental explosion occurs in a mine, the owner, agent or manager of the mine shall give notice of the accident to the Chief Inspector of Mines by despatching to the Magistrate of the district or to the Sub-divisional Magistrate, for transmission to the Chief Inspector of Mines, a notice in the form set forth below, within 24 hours of the occurrence of such accident:

No. .

NOTICE OF ACCIDENT.

Indian Mines Act, 1901.

From—

To—The Chief Inspector of Mines, through the ^{District} _{sub divisional} Magistrate of

Dated

190 .

SIR,

I have the honour to furnish the following particulars of a ^{fatal} _{serious} accident which has occurred at the Mine: an accidental explosion

Situation of the Mine.

1. (Village, Station, District, Province) .

* **NOTE**—An injury is said to be serious which involves or will in all probability involve the loss of, or permanent injury to any limb or to the sight or hearing, or fracture of any limb, or enforced absence from work for 30 days, or which is declared by any medical officer to be serious. (Circular No. 42-70-6, dated 4th September 1902 of the Government of India in the Department of Revenue and Agriculture.)

| | | | |
|--|----------|------|-------------|
| 2. Mineral worked | | | |

I have the honour to be,

SIR,

Your most obedient servant,

Owner,

Agent,

Manager.

2. For the purposes of entry No. 8 in the form of notice prescribed by rule 1, one or other of the following terms shall be used, namely :

- (1) Explosions of fire damp; (2) falls of roof; (3) falls of side; (4) in shafts (overwinding); (5) in shafts (ropes and chains breaking); (6) in shafts (whilst ascending or descending by machinery); (7) in shafts (falling into the shaft from the surface); (8) in shafts (falling from part of the way down); (9) in shafts (things falling from the surface); (10) in shafts (things falling from part of the way down); (11) in shafts (miscellaneous); (12) suffocation by gases; (13) by explosives; (14) irruptions of water or falling into water; (15) haulage; (16) by underground machinery; (17) sundries underground; (18) by surface machinery; (19) surface boilers or pipes bursting; (20) on surface railways or tramways belonging to the mine; (21) miscellaneous on surface.

3. When any person dies from the result of an injury already reported as serious under rule 1, the owner, agent or manager of the mine shall send notice, within 24 hours of his being informed of the death, to the Chief Inspector of Mines, through the Magistrate of the district or the Sub-divisional Magistrate.

4. When a mine, seam or vein has been abandoned for more than one month, or the working thereof discontinued for more than two months, the owner of the mine, seam or vein shall, within seven days after the expiry of such period, send notice to the Chief Inspector of Mines specifying the name and situation of the mine, the name of the owner and the date and cause of abandonment or discontinuance.

5. When a mine, seam or vein is re-opened after abandonment or discontinuance, the owner shall send notice to the Chief Inspector of Mines within one month after the date of re-opening.

6. When a change occurs in the name of a mine, or of an owner or agent of a mine, notice of the change shall be sent by the owner, agent or manager, to the Chief Inspector of Mines within one month after such change.

B. ROBERTSON,

Offg. Secretary to the Government of India.

RAILWAY BOARD.

NOTIFICATIONS.

Simla, the 7th May, 1907.

No. 103.—Mr. H. Armitstead, Chief Draughtsman, Carriage and Wagon Department, Oudh and Rohilkhand Railway, is appointed to officiate as an Assistant Carriage and Wagon Superintendent on that Railway, with effect from the 4th April 1907, *vice* Mr. F. Calderbank, on combined leave.

No. 104.—Mr. J. S. Lovejoy, Chief Carriage Inspector, Oudh and Rohilkhand Railway, is appointed to officiate as an Assistant Carriage and Wagon Superintendent on that Railway, with effect from the 2nd April 1907, and until further orders.

The 10th May, 1907.

No. 106.—Mr. F. C. T. Muller, Assistant Engineer, 3rd grade, North Western Railway, is permitted, at his own request, to resign the service of Government, with effect from the afternoon of the 17th April 1907.

No. 107.—Mr. D. H. Powell of the Superior Traffic Establishment is promoted from class I, grade 3 (Supernumerary), to class I, grade 1 (Supernumerary), of the Superior Revenue Establishment of State Railways, with effect from the 1st January 1906.

No. 108.—With reference to Railway Board Notification No. 62, dated the 20th March 1907, Babu Jai Narain, Assistant Traffic Superintendent, Oudh and Rohilkhand Railway, in class III, grade 3, of the Superior Revenue Establishment of State Railways, is appointed to officiate as a District Traffic Superintendent in class II of that Establishment, with effect from the 15th March 1907, and until further orders.

No. 109.—Mr. A. R. Jacobson, District Traffic Superintendent, Oudh and Rohilkhand Railway, is, on return from leave, appointed to officiate as Deputy Traffic Superintendent on that Railway with temporary rank in class I, grade 3, of the Superior Revenue Establishment of State Railways, until further orders.

No. 110.—*Addendum*—In Railway Board Notification No. 103, dated the 11th May 1906, regarding the posting of Mr. A. E. Adie to the Eastern Bengal State Railway in his substantive appointment of Deputy Traffic Superintendent, after the words "Deputy Traffic Superintendent" at the end of the Notification add the words "and temporarily promoted to class I, grade 2 of that establishment, with effect from the 25th May 1906."

No. 111.—*Corrigenda.*—In the following Notification by the Railway Board concerning Mr. A. E. Adie, Deputy Traffic Superintendent, Eastern Bengal State Railway, for "class I, grade 3," read "class I, grade 2, temporary rank" wherever the words appear:

No. 259, dated the 23rd November 1906.

" 2 " " 3rd January 1907.

" 6 " " 8th " "

" 33 " " 8th February "

The 9th May, 1907.

No. 105.—The following is published for general information :

No. 148 R. T., dated the 3rd May 1907.

RESOLUTION—By the Railway Board.

Revised General Rules of 1906 for working open lines of railway.

Read—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Department of Commerce and Industry, notification No. 801, dated the 24th March 1905.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. ^{80 A.} ₁, dated the 8th September 1906.

Railway Board's notification No. 263, dated the 27th November 1906, and Railway Board's circular No. R. T. ²⁶³_F, dated the 16th November 1906.

Letter from the Government of Bombay, Public Works Department, Railway Branch, No. 1228, dated the 4th April 1907.

RESOLUTION.—The Manager and Engineer-in-Chief of the Bhavnagar-Gondal-Junagad-Porbandar railway has recommended the adoption on the Bhavnagar-Gondal-Junagad-Porbandar railway, including the Jotalsar-Rajkot, Jamnagar and Dhrangadra railways, of the revised General Rules of 1906 for working open lines of railway in British India which were promulgated under Railway Board's circular No. R. T. ²⁶³_F, dated the 8th September 1906, and published under their notification No. 183, dated the 8th September 1906.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, with effect from 1st July 1907, under section 47, sub-section (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the General Rules of 1906 for working open lines of railway, cited in paragraph 1 above, on such portions of the Bhavnagar-Gondal-Junagad-Porbandar railway as are situate in British territory.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), also that the General Rules, cited in paragraph 1, which have already been published in the *Gazette of India*, be kept at railway stations as directed by sub-section (6) of the same section and that this resolution be communicated to the Government of Bombay, for information.

R. C. F. VOLKERS,

Secretary, Railway Board,

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 9th May 1907, based on the Indian Daily Weather Reports of the period.

A storm of considerable intensity formed in the Andaman Sea at the beginning of the week and gave heavy rain in Tenasserim, Tavoy reporting 6·70" on the 4th and Moulmein 21·52" on the 5th. The disturbance was however short lived and had disappeared completely by the morning of the 5th without causing rain of any importance in the interior of Burma. The past week was rainless over by far the greater portion of the country and with the exception of Tenasserim no heavy precipitation occurred anywhere. Sonemarg had a light fall of snow on the 6th and falls of rain were recorded during the week in Eastern Bengal and Assam, the interior of Burma, the Pegu coast, the Bay islands and the south of the Peninsula. The weather was unusually cool in northwest and central India especially in Baluchistan, the Frontier Province, the Punjab and Kashmir, and humidity was much below normal in Sind, Gujarat and the west of Central India.

Burma.—Rain was reported almost daily from the Bay islands and the south Burma coast and was very heavy in Tenasserim on the 4th and 5th; a few falls also occurred in the interior districts. Skies were moderately to thickly clouded in the southern half of the province; and, with the exception of the stations where heavy rain fell, temperature was almost normal.

Northeast India and Orissa.—Rainfall was nearly general in eastern Bengal and Assam on the 3rd and 4th, but weather was dry on the remaining days of the week except in Assam where rain continued to fall locally. Cloud decreased with the rainfall and from the 5th to the 9th was reported only from Assam. Temperature was approximately normal.

The United Provinces, Central India and the Central Provinces.—Skies were clear and temperature was below normal throughout the week.

Northwest India.—Weather was slightly disturbed in Kashmir, and on the 6th Sonemarg reported a light fall of snow, but over the greater part of the division clear dry weather prevailed, with temperature considerably lower than usual.

The Peninsula.—Thunderstorms were of daily occurrence in the south but the amounts of rain recorded were small. Skies were cloudy in the south and generally clear elsewhere, and temperature was approximately normal, except in parts of the east coast where it was slightly high on the 4th and 5th and slightly low on the last four days of the week.

A new rainfall period commences with this week. Rainfall is in defect everywhere except on the Burma coast and in the subdivision of Madras, in both of which areas it is in excess.

The following summarises the chief rainfall amounts of the week, as reported at 8 h. each day :—

- May 3rd. Cherra Poonjee 2·43", Shillong 1·08", Barisal 1·01" and Jalpaiguri 2·60".
- " 4th. Port Blair 1·15", Mergui 2·70", Tavoy 6·70", Dhubri 0·96" and Barisal 0·96".
- " 5th. Moulmein 21·52".
- " 6th. Port Blair 0·91", Moulmein 4·03" and Rangoon 1·32".
- " 7th. Moulmein 0·90".

GEORGE C. SIMPSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA ;
The 9th May 1907.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 4th May 1907.

Burma.—Rainfall :—Arakan Hill Tracts one inch 55 cents ; Bassein and Thaton about one inch ; Minbu 83 cents ; Rangoon, Amherst, Katha, Northern Shan States and Chin Hills about half-an-inch ; and lighter rain in ten districts and in the Southern Shan States. Reaping of dry weather paddy has commenced in the Shwebo township of Shwebo. Sowing of hill-side paddy has commenced in Myitkyina. Plucking of tobacco and reaping of miscellaneous crops are completed in Maubin. Ploughing for cotton has commenced in Sagaing. The standing crops are on the whole in good condition. The price of paddy has risen considerably in Henzada and slightly in Myaungmya, Thayetmyo and Mandalay ; it has fallen slightly in Rangoon ; elsewhere it is unchanged.

Eastern Bengal and Assam.—The weather is hot. Slight to moderate rain fell in all districts except the Lushai Hills. More rain is wanted for jute and paddy in Pabna and for tea in Cachar. Plucking and manufacture of tea are in progress, prospects are unfavourable in Kamrup but moderate to good in other places. Harvesting of early transplanted rice continues and prospects are fair. Sowing of jute and rice is in progress. Pressing of sugarcane still continues in Darrang and Sibsagar. Prices of common rice :—Manipur 12½ ; Silchar 9 to 9½ ; Chittagong and Kohima 9, Comilla 8½ ; Dacca 8½ ; Mymensingh, Rangamati, Tezpur and Sibsagar 8, Bogra 7½ ; Rampur Boalia and Dibrugarh 7½ ; Dinajpur, Jalpaiguri, Sylhet and Dhubri 7½ ; Faridpur 6½ to 7½ ; Patna 7½ ; Barisal, Malda, Gauhati and Nowgong 7 ; Noakhali 6½ and Shillong and Aijal 6 seers per rupee. Prices have risen in eleven, fallen in one ; and remained stationary in the remaining districts.

Bengal.—Light rain fell in scattered showers in most districts of the Province ; there was moderate rain in Burdwan, the 24 Parganas, Murshidabad, Darbhanga, Darjeeling, Cuttack and Palamau. Preparation of lands for autumn crops is still in progress. Sowing of paddy and jute continues. More rain is wanted in parts of Burdwan and in Hooghly and Nadia. Sugarcane is doing well. In Darbhanga the number of persons on test works is 2,246, on gratuitous relief 11,863 ; and on relief works 26,033. The fodder and water-supply is sufficient everywhere. The price of common rice has risen in seventeen and fallen in five districts.

United Provinces.—Light rain fell in seventeen districts. Threshing and winnowing continues. Extra crops and sugarcane are being irrigated and weeded and indigo and cotton sown. Preparation of fields for autumn crops is in progress. Fodder is still dear in Sitapur and Azamgarh. Supplies are adequate and prices stationary.

Punjab.—Light rain has fallen in Rawalpindi and in parts of Jullundur and Mianwali. There are slight fluctuations in the prices of food-grains ; the price of wheat is rising in Jullundur, Rawalpindi, Mianwali and Multan ; is high in Amritsar and is falling in Hissar. Harvesting of spring and sowings of cotton, sugarcane and extra spring crops continue in Rohtak. Indigo is also being sown and sugarcane weeded. The condition and prospect of the standing crops are good to average ; yield of gram and rapeseed is poor in Amritsar ; in Multan the outturn of spring crops is below average. Grass-hoppers have damaged the melon crop to some extent in tehsil Amritsar and extra spring crops in tehsils Mianwali and Isa Khel. The condition of cattle is good. Fodder is sufficient except in parts of Mianwali ; green fodder is scarce in Ferozepore. There are no complaints regarding the water-supply.

North-West Frontier Province.—Showers have fallen all over the Province except in Kohat. The condition of the standing crops is excellent but the gram crop has withered ; wheat is also suffering from rust in Bannu. Hail fell in certain villages of Mardan and Swabi tahsils in Peshawar district and caused some damage to the crops. The destruction of locusts and their eggs continues in all districts except Hazara. Harvesting of spring crops is in progress and the outturn is average. Sowings of extra spring crops and of sugarcane are going on. Land is also being prepared for autumn sowings. The water-supply is ample and there has been much irrigation from hill torrents in the Daman tract in Dera Ismail Khan. Fodder is sufficient. The condition of cattle is generally good. Prices are fluctuating. Prices :—wheat 16½ to 20½ ; gram 16½ to 25 ; maize 25 to 31½ ; and bajra 20½ to 21 seers per rupee.

Jammu.—There was slight rain at Rampur and Mirpur only. Prices are fluctuating. Prices—wheat 11 to 23 and maize 11 to 46 seers per rupee. The condition of the standing crops is good. Fodder is sufficient except in the Kishtwar and Ramban tehsils where it is scarce. Land is being prepared for autumn sowing.

Kashmir.—The weather is generally bright and becoming warmer. Prices are almost stationary.

Rajputana.—Showers fell in Bikaner, Jaisalmer, Jhalawar and Kishenghar; the maximum average fall was 15 cents in Bikaner. Harvesting operations are in progress. Cattle are in good condition except in some places in Mewar and Merwara. Pasturage and fodder are sufficient. Prices are rising in Marwar and Kotah and are steady elsewhere.

Central India.—Light showers of rain fell in parts of Gwalior and Bhopawar and there was hail in Dhar. Harvesting of spring crops continues in Gwalior, Bhopal, Baghelkhand and Bundelkhand. Land is being prepared for autumn crops in other Agencies. The standing crops and probable outturn are fair to good. Crops have been damaged by hail and rust in Baghelkhand and the wheat crop by rust in parts of Gwalior. Agricultural stock and pasturage are fair to good. Prices are high in Baghelkhand and in parts of Malwa; and are steady elsewhere. Opium collection is finished in Gwalior.

Central Provinces.—The days are hot and the mornings and nights still cool. Local showers not exceeding 75 cents were received in three districts. Threshing and winnowing are nearing completion. The outturns of wheat and linseed range as follows—wheat 50 to 120 and linseed 50 to 110, average for the Central Provinces and Berar—wheat 92 and linseed 86. Harvesting of second crop of rice in the Sironcha tehsil (Chanda) has commenced. Picking of *mohwa* is finished in Seoni and Bhandara. Preparation for autumn sowing and raising of field embankments in rice districts are in full swing. Fodder and water are adequate everywhere but fodder is dear in Nagpur and Yeotmal. The prices of staple food-grains are stationary in sixteen districts, the marked fluctuations are gram is cheaper by 2½ seers per rupee in Chhindwara and rice and *juar* dearer in Akola by 3 and 4 seers, respectively, prices still exceed or are equal to the scarcity rate in seven districts but rates are generally lower than at this time last year.

Native States.—Sarangarh, Bastar, Kankar, Kawardha and Chhuikhadan had rain ranging from 57 to 6 cents. The *mohwa* crop has been slightly damaged in Kawardha and Bastar by recent rain. Threshing, winnowing and preparation of land for next autumn crops are progressing. Fodder and water are sufficient. The price of wheat rose by 2 seers in Chhuikhadan and *kodon* (millet) fell by 3 seers in Kawardha.

Bombay.—There was rain during the week in parts of Ratnagiri, Kanara, the Deccan, the Karnatak, Kathiawar and Mithi Kantha. The standing crops are generally in good condition. Harvesting of spring crops is nearing completion and threshing continues. Cotton-picking is progressing in parts of Gujarat, Palanpur and Cutch. Preparation of lands for next season continues. The fodder supply is sufficient and agricultural stock are generally in good condition. Drinking water is sufficient except in parts of Kanara, the Deccan and Bijapur. Water for irrigation purposes is insufficient in parts of Surat, the Deccan and Bijapur. The quantity of food-grains purchaseable per rupee is in the Karnatak 20 to 39 per cent, in the Deccan 21 to 31 per cent, and elsewhere 3 to 25 per cent less than the normal. Labourers get sufficient field employment. During the week ending 29th ultimo, 26 persons were on gratuitous relief in the Belgaum district.

Hyderabad.—Rainfall:—The late rice harvest is in progress. The standing crops have been damaged by the recent rainfall. Lands are being prepared for monsoon sowings. Prices—wheat 7½, coarse rice 7½; and *juar* 15½ seers per rupee.

Mysore.—There was good rain in Bangalore, Kolar, Tumkur and Kadur and slight rain elsewhere. Prices of food-grains are steady. The prospects of the season are good. Cattle are healthy and water and fodder are available.

Coorg.—Ploughing for rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—No rain in Madras; light in Guntur, Bellary and Chingleput and fair to good elsewhere. Irrigation supplies are sufficient except in parts of Godavari, Kistna, Bellary, Anantapur, Nellore, South Arcot, North Arcot, Salem and Madura. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally fair but some in parts of Godavari and Madura require more rain. Harvest continues with outturn poor to normal. Pasture is sufficient except in parts of the Circars,

* the Deccan, Nellore, Chingleput, North Arcot, Salem, Madura and South Canara. Fodder is procurable and the condition of cattle is generally good. The price of rice is stationary in twelve districts; has fallen in five; and has slightly risen in six. The prices of millets have fluctuated as follows:—*Ragi* is stationary in eight districts; has fallen in ten; and has slightly risen in three. *Cholum* is stationary in four districts, has fallen in four; and has slightly risen in six. *Cumbu* is stationary in three districts; has fallen in six; and has slightly risen in six.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table :

Government of India Notifications, Appointments, Promotions, &c.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 17th May, 1907.

No. 9.—Mr. M. H. Harrison, of the Indian Civil Service, is placed on duty in the Legislative Department, with effect from the afternoon of the 16th May, 1907.

T. W. RICHARDSON,

Offg. Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATION.

Simla, the 17th May, 1907.

Whereas an emergency has arisen which makes it necessary to regulate the holding of meetings in the Provinces of Eastern Bengal and Assam and of the Punjab; Now,

therefore, in exercise of the power conferred by section 23 of the Indian Councils Act, 1861, the Governor General is pleased to make and promulgate the following Ordinance :—

ORDINANCE No. 1 OF 1907.

Short title and extent.

1. (1) This Ordinance may be called the Regulation of Meetings Ordinance, 1907.

(2) It extends to the Provinces of Eastern Bengal and Assam and of the Punjab, but shall only come into operation in such areas (hereinafter called "proclaimed areas") as the Lieutenant-Governor of each Province respectively may from time to time notify in the local official Gazette.

(3) Any notification made under sub-section (2) may in like manner from time to time be amended, added to or cancelled by the Lieutenant-Governor.

2. (1) No public meeting shall be held in any proclaimed area for the discussion of public or political matters unless written notice of the intention to hold such meeting and of the time and place of such meeting has been given to the District Superintendent of Police at least seven days previously.

Notice to be given of certain meetings.

(2) Any officer of Police, not below the rank of an officer in charge of a police-station, may, by order in writing, depute one or more Police-officers or other persons to attend any such meeting for the purpose of causing a report to be taken of the proceedings.

Power of Police to take report.

3. The District Magistrate may at any time, by order in writing, of which public notice shall forthwith be given, prohibit any meeting in a proclaimed area if in his opinion such meeting is likely to promote sedition or disaffection or to cause a disturbance of the public tranquillity.

Power to prohibit certain meetings.

4. (1) Any person concerned in the promotion or conduct of a meeting of which due notice has not been given as required by section 2, sub-section (1), shall be punished with imprisonment of either description for a term which may extend to six months, or with fine, or with both.

Penalties.

(2) Any meeting which has been prohibited under section 3 shall be deemed to be an unlawful assembly within the meaning of Chapter VIII of the Indian Penal Code and of Chapter IX of the Code of Criminal Procedure, 1898.

MINTO,

Viceroy and Governor General.

H. H. RISLEY,

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla, the 16th May, 1907.

No. 1138.—In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, the Governor General in Council is pleased to apply the Transfer of Property Act, 1882 (IV of 1882), so far as it is applicable to Berar, with effect from the 1st July 1907.

Provided that all references to "British India" and the "Local Government" shall be construed as referring to Berar and the Chief Commissioner of the Central Provinces, respectively.

JUDICIAL.

The 17th May, 1907.

No. 679.—Under the provisions of the Indian High Courts Act, 1861 (24 and 25 Vict., Cap. 104), section 7, the Governor General in Council has been pleased to appoint the Hon'ble Mr. Justice R. F. Rampini, one of the Judges of the High Court of Judicature at Fort William in Bengal, to perform the duties of the Chief Justice of the said court, during the absence on deputation of the Hon'ble Sir Francis William Maclean, Kt., K.C.I.E., or until further orders.

No. 683.—The services of the Hon'ble Sir Lawrence H. Jenkins, Kt., K.C.I.E., Chief Justice of the High Court of Judicature at Bombay, are placed at the disposal of the Legislative Department, with effect from the 10th June 1907.

No. 685.—The following Order of His Majesty the King-Emperor in Council is published for general information

(Extract from the London Gazette of Friday, 28th December, 1906.)

ORDER IN COUNCIL.

ESTATES OF DECEASED JAPANESE SUBJECTS ORDER IN COUNCIL, 1906.

Buckingham Palace, 21st December 1906.

At the Court at *Buckingham Palace*, the 21st day of *December*, 1906.

PRESENT.

The KING'S Most Excellent Majesty.

Lord President.

Earl Beauchamp.

Lord Tweedmouth.

Mr. Harcourt.

Lord Justice Buckley.

Sir Arthur Kekewich.

Sir Claude MacDonald.

Whereas by section four of the Domicile Act, 1861, it is enacted that whenever a Convention shall be made between His Majesty and any Foreign State,

whereby His Majesty's Consuls or Vice-Consuls in such Foreign State shall receive the same or the like powers and authorities as are hereinafter expressed, it shall be lawful for His Majesty by Order in Council to direct, and from and after the publication of such Order in the London Gazette it shall be and is hereby enacted, that whenever any subject of such Foreign State shall die within the dominions of His Majesty and there shall be no person present at the time of such death who shall be rightfully entitled to administer to the estate of such deceased person, it shall be lawful for the Consul, Vice-Consul, or Consular Agent of such Foreign State within that part of His Majesty's Dominions where such foreign subject shall die to take possession and have the custody of the personal property of the deceased, and to apply the same in payment of his or her debts and funeral expenses, and to retain the surplus for the benefit of the persons entitled thereto; but such Consul, Vice-Consul, or Consular Agent shall immediately apply for and shall be entitled to obtain from the proper Court letters of administration of the effects of such deceased person, limited in such a manner and for such time as to such Court shall seem fit.

And whereas a Convention between His Majesty the King and His Majesty the Emperor of Japan was made on the twenty-sixth April, one thousand nine hundred, and ratified on the twenty-fifth October, one thousand nine hundred, whereby it is provided

I. That whenever a subject of one of the High Contracting Parties shall die within the dominions of the other and there shall be no person present at the time of such death who shall be rightly entitled to administer the estate of such deceased person, the following rules shall be observed:

(1) When the deceased leaves, in the above named circumstances, heirs of his or her own nationality only, or who may be qualified to enjoy the civil status of their father or mother, as the case may be, the Consul General, Consul, Vice-Consul, or Consular Agent of the country to which the deceased belonged, on giving notice to the proper authorities, shall take possession and have custody of the property of the said deceased, shall pay the expenses of the funeral, and retain the surplus for the payment of his or her debts, and for the benefit of the heirs to whom it may rightly belong.

But the said Consul-General, Consul, Vice-Consul, or Consular Agent shall be bound immediately to apply to the proper Court for letters of administration of the effects left by the deceased, and these letters shall be delivered to him with such limitations and for such time as to such Court may seem right.

(2) If, however, the deceased leaves in the country of his or her decease and in the above named circumstances, any heir or universal legatee of other nationality than his or her own, or to whom the civil status of his or her father or his or her mother, as the case may be, cannot be granted, then each of the two Governments may determine whether the proper Court shall proceed according to law, or shall confide the collection and administration to the respective Consular Officers under the proper limitations. When there is no Consul-General, Consul, Vice-Consul, or Consular Agent in the locality where the decease has occurred (in the case contemplated by the first rule of this article) upon whom devolves the custody and administration of the estate, the proper authority shall proceed in these acts until the arrival of the respective Consular Officers.

II. That the stipulations of the Convention shall be applicable so far as the laws permit, to all the Colonies and foreign possessions of His Majesty, excepting to those hereinafter named, that is to say, except to India, the Dominion of Canada, Newfoundland, The Cape, Natal, New South Wales, Victoria, Queensland, Tasmania, South Australia, Western Australia, and New Zealand; provided always that the stipulations of the Convention shall be made applicable to any of the above named Colonies or foreign possessions, on whose behalf notice to that effect shall have been given to the Japanese Government by His Majesty's Representative at Tokyo, within two years from the date of the exchange of ratifications of the Convention.

III. That the Convention shall remain in force until the seventeenth July, one thousand nine hundred and eleven.

And whereas within the period prescribed by Article II the stipulations of the Convention have been made applicable to the Colonies of The Cape, New South Wales, Victoria, Queensland, Tasmania, South Australia and Western Australia, and to India :

Now, therefore, His Majesty, by and with the advice of His Privy Council, is pleased to order, and it is hereby ordered, that whenever any subject of His Majesty the Emperor of Japan shall die during the currency of the Convention within any of the dominions of His Majesty the King to which the stipulations of the Convention are applicable, and there shall be no person present at the time of such death who shall be rightfully entitled to administer to the estate of such deceased person, it shall be lawful for the Consul, Vice-Consul, or Consular Agent, of the Japanese Government within that part of His Majesty's Dominions where such Japanese subject shall die, to take possession and have the custody of the personal property of the deceased, and to apply the same in payment of his or her debts and funeral expenses, and to retain the surplus for the benefit of the persons entitled thereto ; but such Consul, Vice-Consul or Consular Agent shall immediately apply for and shall be entitled to obtain from the proper Court letters of administration of the effects of such deceased person, limited in such manner and for such time as to such Court shall seem fit.

A. W. FitzRoy.

No. 686.—In supersession of the Home Department notification no. 1123, dated the 24th July 1902, and in exercise of the power conferred by section 8 of the Administrator General and Official Trustees Act, 1902 (V of 1902), the Governor-General in Council is pleased to direct that whenever any subject of His Majesty the Emperor of Japan shall die in British India, and there shall be no person, other than the Administrator General, present at the time of such death who shall be rightfully entitled to administer to the estate of such deceased person, it shall be lawful for the Consul, Vice-Consul, or Consular Agent of the Japanese Government within that part of British India where such Japanese subject shall die, to take possession and have the custody of the personal property of the deceased, and to apply the same in payment of his or her debts and funeral expenses, and to retain the surplus for the benefit of the persons entitled thereto, but such Consul, Vice-Consul or Consular Agent shall immediately apply for and shall be entitled to obtain from the proper Court letters of administration of the effects of such deceased person, limited in such manner and for such time as to such Court shall seem fit.

The above directions will remain in force until the 17th July 1911.

ECCLESIASTICAL.

The 16th May, 1907.

No. 2998-P.

RESOLUTION—By the Government of India, Finance Department.

READ—

RESOLUTION—By the Government of India in the Finance Department, No. 2937-P., dated 30th May 1906.

It has been brought to the notice of the Government of India that the orders in the Resolution cited in the preamble relating to the conditions under which an officer on leave may accept employment outside Government service, have been read as conflicting with the rule in Article 757-A of the Civil Service Regulations. The Governor General in Council accordingly issues the following revised orders on the subject.

2. In the first place the Government of India desire to repeat that inasmuch as leave is intended as a period of recreation and rest and is granted to an officer for the purpose of recruiting his health, it follows that taking up employment during leave is not permissible, save in exceptional circumstances and with special sanction. It has accordingly been ruled that a Gazetted Officer who is in receipt of furlough or leave allowances may not, without the special orders of the Government of India, take service under another employer in this country, and no such officer whose services have been lent to any other employer in India can take leave or obtain leave allowances from Government or from the employer to whom his services have been lent, unless he actually quits his employment for the period of such leave. In the case, however, of a non-Gazetted Officer the special permission of his departmental superior may be accepted as sufficient authority.

3. The above orders referred to the acceptance of employment of a private or casual nature and do not apply to the acceptance by officers, while on leave, of employment of the kind for which the Foreign Service rules in Part VII of the Civil Service Regulations provide. An officer who, during leave, takes up an appointment which is such as should for public reasons and not merely in his own interests be filled by a servant of Government, must be transferred thereto in the regular way by the authority empowered to authorise his transfer under the rules regulating transfers to Foreign Service. From the date on which he takes up the appointment he ceases to be on leave and is no longer entitled to draw leave allowances from Government, and becomes an officer in active service drawing from his employer pay fixed in accordance with rule.

Ordered, also, that this Resolution be published in the *Gazette of India*.

J. S. MESTON,

Secretary to the Government of India.

FINANCE DEPARTMENT (MILITARY FINANCE).

NOTIFICATION.

LEAVE AND APPOINTMENTS.

Simla, the 17th May, 1907.

J. B. BRUNYATE,

Offg. Joint Secretary to the Government of India.

DEPARTMENT OF COMMERCE AND INDUSTRY.

NOTIFICATIONS.

POST OFFICE.

Simla, the 16th May, 1907.

No. 4040—148.—In exercise of the powers conferred by the Indian Post Office Act, 1898 (VI of 1898), the Governor General in Council is pleased to direct that, with effect from the 1st July 1907, the following amendments shall be made in the rules published in the Notification of the Government of India in the Department of Finance and Commerce, No. 1439C.—S.R., dated the 30th March 1899, as amended by the Notifications of the Government of India in the Department of Commerce and Industry, Nos. 595c and 990—32, dated the 15th March 1905 and 6th February 1906, respectively.

For rule 140 substitute the following :

140. The postage on a postal article shall not be deemed to be prepaid by means of a proper stamp—

- (a) if the stamp is a stamp which has not been provided for use as a postage stamp under section 16 of the Act ; or
- (b) if the stamp has been obliterated, defaced, torn, cut or otherwise rendered imperfect ; or
- (c) if the stamp has upon it any word, letter, figure or design printed or impressed upon it, otherwise than by the authority of the Government before posting ; or
- (d) if the stamp has been cut or otherwise separated from an embossed envelope, or from a post-card or wrapper ;

Provided that nothing in this rule shall prevent the perforation of postage stamps with initials, or other identifying marks, traced in minute holes.

NOTE.—The special registration envelopes provided by the Post Office, bearing embossed stamps denoting the registration fee, cannot be used for the transmission of unregistered postal articles.

TELEGRAPHS.

The 16th May, 1907.

No. 4155—106.—In exercise of the powers conferred by section 7 of the Indian Telegraph Act, 1885 (XII of 1885), the Governor General in Council is pleased to direct that the following amendments shall be made in the rules published with the Notification of the Government of India in the Public Works Department, No. 298-Telegraphs, dated the 22nd September 1904, namely :

1. In Rule 135 for the words " four months " the words " three months (except in the case of offices situated on the Frontier beyond Kashmir and on the extreme limits of Burma the message drafts of which are preserved for four months) " shall be substituted.
2. In Rule 140 for the word " four " the word " three " shall be substituted.

CUSTOMS.

The 16th May, 1907.

No. 4133—37.—In exercise of the powers conferred by Section 22 of the Sea Customs Act, 1878 (VIII of 1878), the Governor General in Council is pleased to direct that, for the corresponding items of entry No. 11 in the Notification of the Government of India in this Department, No. 10123-30, dated the 22nd December 1906, the following shall be substituted with effect from the 21st May 1907, namely :

| No. | Names of articles. | Per. | Tariff Valuation. | Duty. |
|-----|--|------|-------------------|----------------|
| 11 | * * * * * | | Rs. As. | |
| | Camphor, refined, cake | lb. | 3 12 | Five per cent. |
| | " partially refined, cake, in blocks of about 13 lb. | " | 2 12 | " " |
| | " crude, in powder | " | 3 4 | " " |

SUPPLEMENT TO
The Gazette of India.

No. 20.]

SIMLA, SATURDAY, MAY 18, 1907.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 h. on Thursday,
the 16th May 1907, based on the Indian Daily Weather Reports
of the period.**

A fall of the barometer in the extreme northwest of India on the 11th was followed by two days of disturbed weather in Kashmir, where light falls of rain and snow occurred. On the disappearance of this disturbance temperature rose in northwest India and became more nearly normal, and at the end of the week ordinary hot weather conditions prevailed over that area, Jacobabad reporting a maximum of 115° on the 16th. Weather was dry during the week over the greater part of the country and rainfall was confined chiefly to north-east India, Burma and the south of the Peninsula, regions where rain is most frequent at this time of year. On the 12th a change in the direction and the strength of the wind at the Bay Islands showed the probable existence of disturbed weather in the south of the Bay. The disturbance apparently moved slowly northwards during the next two days, but there were no certain indications of the formation of a storm till the morning of the 15th, when a definite area of low pressure was shown to the northwest of the Andamans; this depression apparently crossed the Arakan coast during the next twenty-four hours and on the 16th was breaking up in the neighbourhood of Toungoo. The disturbed conditions produced moderately heavy rain over the southern half of Burma, Bassein recording 8" and Toungoo 6" during the forty-eight hours ending at 8 h. on the 16th.

Burma.—Rain occurred in lower Burma throughout the week and was moderately heavy during the existence of the disturbed weather in the Bay, but practically no rain fell.

in the north of Burma except on the 13th. Temperature was slightly above normal in the northern half of the province till the 12th, on the 14th temperature fell everywhere and weather was cooler than usual during the remainder of the week over the whole province.

Northeast India and Orissa.—Weather was dry in Bihar, Chota Nagpur and Orissa; rainfall was fairly general in the remainder of the division on the 11th and 14th, and occurred daily in Assam. Skies were clear in the west of the division and cloudy in the east, and temperature was generally normal or in excess.

The United Provinces, Central India and the Central Provinces.—Jubbulpore and Raipur reported light falls of rain on the 11th. Skies were lightly clouded on the 10th and lightly to moderately clouded on the 16th, but were clear on the remaining days of the week. Day temperature was approximately normal and night temperature was somewhat lower than usual.

Northwest India—Local light precipitation occurred at intervals in the northwest Himalayas, and on the 16th a light fall of rain was reported from Sambhar. Skies were generally clear except during the disturbed weather in the extreme north. Unusually cool weather prevailed during the first-half of the week; but later temperature rose and by the 15th was normal throughout the division.

The Peninsula—Local rain occurred nearly every day in the south of the Peninsula, but weather was dry elsewhere except for a light fall of rain at Belgaum on the 14th. Skies were generally clear except in the south and the coast districts, and temperature was nearly normal.

The rainfall of the past week has been largely above the average on the Burma coast and for the whole rainfall period commencing on the 3rd May it has been normal or in excess in Burma and normal in the subdivisions of Calcutta, Burdwan, Jubbulpore, Calicut and Madura; in all other parts of the country it has been in defect.

The following summarises the chief rainfall amounts of the week, as reported at 8 h. each day —

- May 10th. Sibsagar 0·60" and Negapatam 0·50".
- „ 11th. Bassein 1·02", Sibsagar 1·00", Cherra Poonjee 2·32", Burdwan 1·03" and Mysore 0·87".
- „ 12th. Bassein 2·65" and Sonemarg 0·52".
- „ 13th. Minbu 1·16", Yamethin 2·70", Dibrugarh 1·47", Sibsagar 2·54" and Trichinopoly 0·77".
- „ 14th. Moulmein 1·28", Rangoon 3·40", Bassein 1·30", Diamond Island 2·10", Jessore 1·90" and Darjeeling 2·26".
- „ 15th. Tavoy 1·76", Moulmein 2·29", Bassein 4·00", Diamond Island 2·63", Toungoo 2·20", Thayetmyo 2·05" and Kodaikanal 0·90".
- „ 16th. Port Blair 1·47", Tavoy 3·18", Moulmein 1·51", Bassein 4·19", Diamond Island 1·03", Toungoo 4·04", Coimbatore 1·00" and Calicut 1·75".

GEORGE C. SIMPSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA ;
The 16th May 1907.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 11th May 1907.

Burma.—The rainfall of the week was very heavy in Amherst; heavy in Thaton and Tavoy, moderate in Myaungmya, Mergui, Maubin, Pyapon and Rangoon; and light in Pegu, Bassein, Prome, Founzo, Sagaing, the Chin Hills, Tharrawaddy, Henzada and the Northern Shan States. Reaping of dry weather paddy has commenced in Katha, the Ruby Mines district and in the Myittha township of Kyaukse. Burning of hillsides for cultivation is completed in Magwe. Cultivation of early wet weather paddy has commenced in the Ruby Mines district and in the Monywa subdivision of Lower Chindwin and is completed in Mandalay. Plucking of tobacco is completed in the Arakan Hill Tracts and Minbu. Harvesting of miscellaneous crops is completed in Mandalay. Sowing of sesamum has commenced in the Northern Shan States. The standing crops are generally in good condition but early wet weather paddy in Mandalay and early sesamum in Kyaukse are in need of rain. The price of paddy has risen considerably in Amherst and Tharrawaddy and slightly in Bassein; it has fallen considerably in Mandalay and slightly in Maubin.

Eastern Bengal and Assam—The weather is hot. Slight to moderate rain fell in all districts except Bakuganj, Chittagong, Noakhali, the Chittagong Hill Tracts and Dinajpur. More rain is wanted for jute and paddy in the Eastern Bengal districts and for tea in Cachar and Lakhimpur. Plucking and manufacture of tea are in progress and prospects are generally fair although red spider has appeared in some gardens in Cachar and Lakhimpur. Harvesting of early transplanted rice continues and prospects are fair. Sowing of jute and rice is in progress. Weeding of jute has commenced in some parts. Pressing of sugarcane still continues in Sibsagar. Gathering of potatoes in the Khasia Hills has commenced and prospects are very good. Prices of common rice:—Manipur 10½; Silchar 9 to 9½, Chittagong and Kohima 9, Comilla 8½; Dacca and Sibsagar 8½; Mymensingh and Tezpur 8, Faridpur 6 to 8; Bogra 7½; Rangamati, Rampur Boalia, Jalpaiguri, Sylhet, Dhubri and Dibrugarh 7½; Dinajpur 7½, Barisal, Rangpur, Patna, Gauhati and Nowgong 7, Fura 6 to 7; Noakhali 6½ and Shillong 6 seers per rupee. Prices have risen in six, fallen in four; and remain stationary in the remaining districts.

Bengal.—There was practically little or no rain throughout the Province during the week under review. In the 24-Parganas, Nadia, Jessore and Darjeeling the rainfall was nominal, moderately heavy rain fell only in Burdwan, Bankura, Hooghly and Cooch Behar. More rain is reported to be wanted in the districts of Burdwan, Hooghly, the 24-Parganas, Nadia, Champaran and Bhagalpur. The ploughing of lands for the next season's crops is still continuing in some districts. The sowing of paddy, jute and other autumn crops is still in progress. The prospects of the standing crops are fair. In Darbhanga the number of persons on test works is 1,715, on gratuitous relief 11,505; and on famine relief works 23,525. The fodder and water supply are generally sufficient. The price of common rice has risen in ten and fallen in six districts and has remained stationary in the remaining eighteen districts of the Province.

United Provinces.—No rain fell during the week. In some districts threshing and winnowing are nearing completion. Irrigation and weeding continue. Fields are being prepared for autumn crops and sowings have begun in places. Agricultural stock is generally in good condition. Markets are well stocked but fodder is dear in Sitapur, Bara Banki and Azamgarh. Prices are stationary with a tendency to rise in some districts.

Punjab—Light rain has fallen in parts of the Amritsar and Rawalpindi districts. There are slight fluctuations in the prices of food-grains; wheat is falling in Hissar, Rohtak and Rawalpindi and rising in Jullundur and Sialkot. Harvesting of spring crops and sowings of cotton, sugarcane and extra spring crops continue, except in parts of Shahpur where sowings have been retarded on account of plague. Sugarcane is being weeded in Jullundur. The outturn of spring crops is good to average except in some districts where it is below average or poor. The condition of the standing crops is generally good. Locusts have damaged the standing sugarcane crop in Ambala and hoppers (locusts) have destroyed the standing crops in two tehsils of Mianwali where they are moving about in enormous masses; locusts have nearly been destroyed in Lyallpur. The condition of cattle is good. Fodder is sufficient except in Mianwali; green fodder is scanty in Ferozepore. There are no complaints regarding the water-supply.

North-West Frontier Province.—There was no rain except slight showers in the Tank tehsil of the Dera Ismail Khan district. The standing crops are in excellent condition. The wheat crop has suffered from recent high winds in some villages of the Marwat tehsil in Bannu. The destruction of locusts still goes on in all districts except Hazara. Harvesting of spring crops is in progress; the outturn is reported good in Bannu. Extra spring crops and sugarcane are being sown. Land is also being prepared for autumn sowings. The water-supply and fodder are sufficient. The condition of cattle is generally good except in the Marwat tehsil in the Bannu district. Prices are fluctuating. Prices:—wheat 14½ to 21½; gram 16½ to 24; maize 24½ to 30; and *bajra* 20 to 23½ seers per rupee.

Jammu.—No rain. Prices are stationary. Prices:—wheat 11 to 23 and maize 11 to 36 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient except in the Ramban and Kishtwar tehsils where it is scarce.

Kashmir.—The weather is generally bright and is becoming warm, but is occasionally rainy. Prices are almost stationary.

Rajputana.—Harvesting operations continue. Preparation of land for autumn sowings has commenced in many places. Cattle are in good condition except in some places in Mewar. Pasturage and fodder are sufficient. Prices are falling in Marwar; rising in Banswara, Jaipur, Kishengarh, Bharatpur and Ajmer Merwara; and are steady elsewhere.

Central India.—Light showers fell in parts of Gwalior. Harvesting of spring crops continues in Bhopal and is completed in Indore and Bundelkhand; threshing and winnowing are in progress in Gwalior, Baghelkhand and Bhopawar. Land is being prepared for autumn crops in Indore, Malwa and Bhopawar. The standing crops and the probable outturn are fair to good. The crops have been damaged by hail and rust in Baghelkhand. Agricultural stock and pasturage are fair to good except in Indore and in parts of Malwa and Bhopawar. Prices have risen slightly in Malwa; are high in Baghelkhand; and are normal elsewhere.

Central Provinces.—The days are very warm but the mornings and nights continue cool. Light local showers not exceeding 35 cents fell in five districts. Threshing and winnowing of spring crops are still progressing in the Saugor, Narsinghpur, Bilaspur and Satpura districts. Preparation of land for next autumn sowings and raising and repairing of field embankments in rice districts are vigorously proceeding. Sugarcane is in good condition in Betul and Bilaspur. Fodder and water suffice, but the price of fodder is rising high in Nagpur, Akola and Yeotmal. Prices are generally steady or fluctuate very slightly with a tendency to rise, but are still equal to or exceed the scarcity level in seven districts.

Native States.—Chhuikhadan, Khairagarh, Kawardha, Rajnandgaon and Udaipur received light showers during the week. Threshing and winnowing and preparation of land for autumn sowings still continue. Sugarcane has been planted in Udaipur and is flourishing in Kawardha and Raigarh. Fodder and water are adequate everywhere. Prices remain stationary.

Bombay.—There was rain during the week in parts of Kanara, Belgaum, Dharwar and Kathiawar. The standing crops have been slightly damaged by rust and blight in parts of Karachi and by locusts in parts of Belgaum and are generally in good condition elsewhere. Threshing of spring crops continues in parts of Sindh, Khandesh, Nasik and Palanpur. Cotton-picking is progressing in parts of Gujarat, Palanpur and Cutch. Preparation of lands for autumn cultivation continues. The fodder supply is sufficient except in parts of Ahmednagar. Agricultural stock is generally in good condition. Drinking water is sufficient except in parts of Kanara, the Deccan and Bijapur. Water for irrigation purposes is insufficient in parts of Surat, the Deccan and the Karnatak. The quantity of food-grains purchasable per rupee is in the Karnatak 20 to 37 per cent, in the Deccan 21 to 31 per cent, and elsewhere 3 to 25 per cent less than the normal. Labourers get sufficient field employment.

Hyderabad.—Rainfall—One cent. The late rice harvest is in progress. Lands are being prepared for monsoon sowings. Prices:—wheat 7½; coarse rice 7½; and *juar* 15½ seers per rupee.

Mysore.—The rainfall was good in parts of Mysore and slight in other districts. Prices of food-grains are steady. The standing crops are in good condition. The prospects of the season are good. Cattle are healthy and water and fodder are available.

Coorg.—Rainfall—60 cents. Ploughing for rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Madras—The rainfall of the week, was light to fair in Malabar, Coimbatore, Madura, the Nilgiris, South Canara, Tinnevely and Tanjore; there was no rain elsewhere. Irrigation supplies are sufficient except in parts of the Circars, Bellary, Nellore, South Arcot, North Arcot, Salem and Madura. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally good. Harvests continue with outturn poor to normal. Pasture is sufficient except in parts of the Circars, the Deccan, Nellore, Chingleput, North Arcot, Salem, Madura and South Canara. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in fifteen districts; has fallen in five; and has slightly risen in three. The prices of millets have fluctuated as follows:—*Agri* is stationary in ten districts; has fallen in four; and has slightly risen in seven. *Cholum* is stationary in five districts; has fallen in four; and has slightly risen in five. *Cumbu* is stationary in seven districts; has fallen in three; and has slightly risen in five.

Nepal.—*Report for the quarter ending 15th April 1907*.—The rainfall for the period was 7·16 inches against 3·49 inches for the corresponding period last year.

January and February.—The second crop of potatoes and winter vegetables were sown.

March.—In the Terai the spring crop consisting of wheat, barley and gram was harvested and the outturn was fair. Sowing of Indian-corn was commenced in the hills.

April.—The wheat and barley crops are suffering from the excessive rain. The second crop of potatoes has commenced to be dug up and peas are being gathered in. Early rice is being sown and the fields are being prepared for the pepper and paddy crops.

The market is well stocked and the prices of food-grains continue normal, except wheat which is unusually cheap. The health of livestock throughout the country is reported to be good.

The weather is cool but unsettled; storms accompanied by thunder, lightning and rain being of frequent occurrence.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table:

| Name of province. | PRECEDING WEEK. (REVISED FIGURES.) | | | PRESENT WEEK. | | | Increase or decrease. |

H. H. RISLEY,
Secretary to the Government of India.

No. 3026-Exc.
GOVERNMENT OF INDIA.
FINANCE DEPARTMENT.

SEPARATE REVENUE.
EXCISE.

Simla, the 16th May 1907.

Resolution by the Government of India in the Finance Department Nos. 2994, 2995, 2996 and 2997-Exc, dated the 16th May 1907.

Ordered, that the foregoing Resolutions be published for general information in the Supplement to the *Gazette of India*.

J. S. MESTON,
Secretary to the Government of India.

No. 2994-Exc.

The 16th May 1907.

RESOLUTION.

In this Resolution the Government of India propose to consider the recommendations made by the Excise Committee in Chapters III to VI of their Report, along with the relevant portions of Major Redford's Report on the "Quality, Manufacture and Excise control of alcoholic liquors in India." The portions of the Excise Committee's Report which are here brought under review are the most important of all, for they deal with the question of the consumption of country spirit and the methods by which its production and taxation should be controlled.

2. The main object underlying the reforms in Excise policy and procedure which the Committee were called on to consider is of course the regulation and restriction of consumption. The Government of India, as observed in paragraph 2 of their Resolution No. 5001-Exc., dated the 7th September 1905, appointing the Committee, have no desire to interfere with the habits of those who use alcohol in moderation, and deem it necessary to make due provision for the needs of such persons; but their settled policy is to minimise temptation to for those who do not drink and to discourage excess among those who do. Fiscal considerations in connection with the liquor traffic are important, not as an end in themselves, but simply because, as stated in the Resolution in question, the most effective method of forwarding the policy of Government in regard to consumption is "to make the tax upon liquor as high as it is possible to raise it without stimulating illicit production to a degree which would increase instead of diminishing the total consumption, and without driving people to substitute deleterious drugs for alcohol or a more for a less harmful form of liquor."

3. To deal first with the last mentioned consideration, Major Bedford has shown (pages 140 and 141 of his Report) that such injury to health as arises from alcoholic indulgence is due purely to excessive consumption, and not to any specially toxic properties of any particular kind of liquor. Fermented liquors are more wholesome than spirit simply because they contain less alcohol, an advantage which manifestly may be neutralised by their consumption in larger quantities. As between the various classes of spirit, it is clear from the result of Major Bedford's enquiries that the commonly prevailing idea that cheap imported spirit is specially pernicious is unfounded. So too

(*vide* pages 18 and 205 to 208 of Major Bedford's Report) is the similar idea that outstill spirit, and spirit produced by the crude processes in force in central distilleries, are materially worse in quality than even the better classes of imported spirit, or than spirits made in India by European methods. Spirit produced by native processes is no doubt defective in some respects—mainly in regard to excess of acidity due to inferior methods of distillation; but these defects can be removed by concentration of the centres of production and by improvement in methods. The conclusion at which Major Bedford has arrived (pages 153 to 155 of his Report) is that it is unnecessary to lay down any tests of quality or standards in respect to spirit in general and country spirit in particular, and in this conclusion the Government of India agree.

4. This conclusion is, however, in no way inconsistent with the suggestion, made in paragraph 47 of the Excise Committee's Report, that in Contract Distillery areas the contract distiller should be bound to produce liquor of a certain quality or purity. The fact that it is found to be unnecessary for the State to interfere on hygienic grounds in the matter of quality, where liquor is subject to ordinary trade competition, does not debar it from such interference when it has, by its own action, given a particular producer the monopoly of production of country spirit in a specified area. In the latter case it is bound to see that the producer does not abuse his position, and it may and ought to require, as one of the conditions of the contract, that the liquor produced shall not be unwholesome. While, therefore, it would be unnecessary and undesirable to prescribe any general standard of quality or purity for contract distillery liquor, which will be produced in future in distilleries working under varied conditions in different parts of India, it should certainly be provided that the liquor issued from every such distillery shall be subject to periodical analysis, and that the distiller shall be bound to take steps to remedy defects in his product which the provincial Excise Commissioner may consider material.

5. As regards consumption, it was pointed out by the Hon'ble Mr. Baker in his speech on the Budget of 1905-06, that there are no means of obtaining any statistics for outstill areas, and this is one of the bad features of the system. The Excise Committee have, however, found (paragraph 73 of the Report) that the system is "responsible for a great tendency to increase of drinking." The objections to a system which affords no adequate check on consumption by the imposition of quantitative duty are indeed patent, and the only defence which can be made on behalf of outstills is that they must be maintained in tracts where it is impossible, under present conditions, to exercise the adequate control which the successful working of a distillery system demands, and that in these cases it is obviously better to impose a lump tax on liquor than to have none at all.

6. As regards the distillery areas which, as shown by the Hon'ble Mr. Baker in his Budget speech just referred to, have been largely increased of late years at the expense of the areas under outstills, and are now in process of still further increase in the Central Provinces and in Bengal, the statistics then quoted by him and those given in paragraph 72 of the Excise Committee's Report show the very abstemious character of the population as a whole. The majority of that population is, however, composed of habitual abstainers, and no doubt in certain areas some classes of the population drink to an extent which it is desirable to check by improved distillery and preventive arrangements and by enhanced taxation.

7. The areas found by the Committee (paragraphs 77 to 91 of the Report) to be those of relatively high consumption are set forth below:

- (a) In *Bengal* consumption is mainly confined to three distinct tracts—one comprising Calcutta and its neighbourhood; the second the Darjeeling district; and the third, and most important, the greater part of the Patna division, two districts of the Bhagalpur division and three districts of Chota Nagpur.
- (b) In *Eastern Bengal and Assam* consumption is highest in the Dacca district. The Dacca division as a whole is also responsible for a considerable consumption of cheap imported spirits.

- (c) In the *United Provinces* the area of greatest consumption adjoins Bihar and stretches up the Gogra and Jamna rivers as far north as Lucknow, the bulk of the consumption being, however, confined to large cities and cantonments. The consumption in the districts of Agra, Bareilly and Dehra Dun is also high.
- (d) In the *Punjab* high consumption is confined to a tract consisting mainly of the Sikh districts of Lahore, Amritsar, Ferozepore, Jullundur and Ludhiana, and the cities and cantonments of Simla, Ambala and Rawalpindi. Illicit distillation is rife in some of the central districts, the consumption of illicit liquor being estimated to be at least equal to that of licit.
- (e) In *Madras* there is a very large consumption of toddy, and consumption as a whole is more equally distributed than in other provinces.
- (f) The *Bombay Presidency proper* consumes more than one-third of all the distillery liquor drunk in India. The area of highest consumption comprises the city of Bombay and the adjoining districts of Thara and Kolaba, together with those of Surat, Broach and Khandesh. Next come the cities of Ahmedabad, Nasik, Ahmednagar, Poona, Sholapur, Satara, Belgaum, Dharwar and Hubli; next the south coast districts of Kanara and Ratnagiri; and then the districts of Panch Mahals and Kaira.
- (g) In *Sind* consumption is large in the towns of Karachi, Hyderabad, Kotri, Shikarpur, Sukkur and Rohri.
- (h) In the *Central Provinces* consumption is highest in the town and cantonment of Jubbulpore, and in the districts of Bhandara, Chanda, Ellichpur and Betul, the last three of which are largely inhabited by aboriginal tribes.
- (i) In *Coorg* the rate of consumption per head is higher than in any other province, and that of *Ajmer-Merwara* is only exceeded by Coorg, Bombay and the Central Provinces.
- (j) In the *cantonment areas in Native States* figures of consumption are available only for Bangalore and Nowgong and in both of these the consumption is high.

8. A relatively high consumption in particular areas is of course largely determined by causes which are beyond the control of Government, *e.g.*, considerations of race, caste and religion, climate and occupation. Moreover, as regards occupation, the industrial development of India, diverting agricultural labourers to large towns, where they are employed on relatively high wages on exhausting work, and are at the same time free from the checks afforded by local public opinion in their own villages, is bound to lead to larger consumption. So also, as in all countries, will agricultural and trade prosperity. In some cases too, as in the instance of Khandesh, noted in paragraph 84 of the Committee's Report, an apparent increase in consumption is due to more efficient control of illicit practices, and the greater the reform in this direction, the larger will be the diversion of consumption from illicit to licit liquor. Lastly, the backward outstill areas contain, generally speaking, a larger proportion of drinkers than the more advanced distillery tracts, and their absorption in the latter will tend *prima facie* to raise the average rate of recorded consumption.

9. On the other hand, consumption is in many cases higher than it need be owing to causes which it is in the power of Government to remove or lessen by more adequate preventive arrangements, better Excise systems—including greater care as regards the number and situation of shops, a matter which will be dealt with in connection with Chapter XI of the Report—and higher taxation. These considerations apply *in toto* to the areas to which it would have been possible to apply a distillery system but which have been hitherto left under outstills, and in part, as the Committee have shown, to the distillery areas also.

10. As regards the latter, the following figures will make this clear. For the year 1904-05, on which the Excise Committee base their statistics, the provincial figures as regards consumption are as follows, the provinces being arranged in inverse order of consumption, as compared with population, in distillery tracts. It must be borne in mind in considering this statement that the average provincial figures of duty and total taxation represent, as a rule, the net resultant of a number of different rates of duty applied to different districts :

| PROVINCE | Consumption of country spirit per head of population in distillery areas in 1904-05 in drams per annum. | Percentage of country spirit revenue derived from distillery systems. | Percentage of country spirit revenue derived from the outstill system. | Average rate of duty per proof gallon in distillery areas in 1904-05. | Total average taxation per proof gallon in distillery areas in 1904-05. | REMARKS |
|------------------------------------|---|---|--|---|---|--|
| | | | | Rs. s. p. | Rs. s. p. | |
| Eastern Bengal and Assam | 0.1 | 15 | 85 | 4 0 2 | 8 8 10 | |
| North-West Frontier Province. | 0.4 | 100 | Nominal | 4 0 0 | 7 4 3 | |
| Punjab | 0.7 | 100 | Nominal. | 4 0 0 | 6 1 4 | There is a large amount of illicit consumption in the Punjab. |
| Bengal | 1.4 | 51 | 49 | 3 8 1 | 5 8 7 | |
| Madras | 1.7 | 96 | 4 | 4 1 2 | 5 13 2 | Madras has a large consumption of fermented liquors. |
| United Provinces | 1.8 | 88 | 12 | 2 11 7 | 3 13 7 | |
| Sind | 2.7 | 100 | ... | 5 0 2 | 5 3 9 | |
| Ajmer-Merwara | 4.8 | 100 | ... | 2 10 5 | 2 10 5 | |
| Central Provinces proper | 5.4 (a) | 58 | 42 | 2 0 2 | 3 10 0 | The consumption of opium and hemp drugs is relatively high, and there is considerable consumption of fermented liquor in parts of the province. The number of country spirit shops is also higher in proportion to population than anywhere else in India. |
| Berar | | 64 | 36 | 3 1 8 | 5 8 3 | |
| Bombay proper | 7.4 | 100 | Nominal. | 3 3 1 | 3 12 1 | In the area under the District Monopoly system the average total taxation is Rs. 3-2-5. |
| Coorg | 7.7 | 100 | | 5 0 6 | 5 5 10 | |

(a) The average consumption per head seems to be much the same in Berar and the Central Provinces proper.

NOTE.—It may be explained in connection with the above figures that they relate to a year antecedent to the institution of considerable Excise reforms now in course of adoption in the Central Provinces and Bengal.

11. The above figures show that, taking the major provinces, in Bombay, where taxation is lowest, the relative consumption in distillery areas is highest, a situation which may be largely attributed to the operation of the District Monopoly system. This system, apart from the fact that it is accompanied by a low rate of taxation, leaves preventive work which should properly be undertaken by Government largely in the hands of the district contractors; and, as the Committee have indicated in paragraphs 34 and 85 of their Report, this delegated function is not satisfactorily discharged.

In the Central Provinces the number of shops was formerly excessive, but this is now being reduced. Moreover, the rate of duty under the lately superseded Modified Bonded Warehouse and the Sadar Distillery systems was low.

In Ajmer-Merwara the District Monopoly system is in force and the rate of taxation is low.

In Coorg and Berar, though the rate of taxation is fairly high, the rate of consumption is much above the average for India, which the Committee estimate in paragraph 86 of their Report as 2.1 drams per head of population per annum. The reason assigned for the high consumption in Coorg is that the population contains a large proportion of drinking classes who get good wages while the preventive arrangements are defective, illicit distillation being rife. The Committee do not give any special explanation as regards Berar.

Again, in a number of the districts which the Committee have noted as areas of relatively high consumption, the existing rate of still-head duty is lower than the general average for the province to which they belong.

12. There is in fact adequate evidence to show that in many instances the duty is unduly low, and occasionally that it has been reduced in recent years, such reduction having had the effect of increasing consumption, as in the case (referred to by the Committee in paragraph 94 of their Report) of the Bengal districts noted in the margin. Similarly, in paragraphs 78 and 80 of the Report it is pointed out that in Bengal high rates of district taxation are accompanied by low consumption, and *vice versa*, and that in the United Provinces the majority of the districts of high consumption are those which show the lowest incidence of taxation.

Gaya, Saran, Champaran, Mozuffarpore, Darbhanga, Monghyr, Bhagalpore and Midsapore.

The above remarks indicate that in present circumstances an advance of taxation is in many cases feasible and desirable.

13. The measures which the Committee propose for restriction and better control of consumption will now be considered. The first and most obvious necessity is to curtail the outstill areas as far as possible. A vigorous policy towards this end had been initiated in Bengal and the Central Provinces before the Committee assembled. In Bengal the programme submitted by the Local Government in 1904-05, and approved by the Government of India, involved the ultimate extinction of most of the outstill tracts in the present province, and a beginning has already been made in this direction by the abolition of the outstill areas in Midnapur and Cuttack, and the application of the distillery system to Darjeeling, the whole of which district was formerly under outstills. In the Central Provinces, as the Excise Committee state (paragraph 21 of the Report), the outstill system formerly in force over the greater part of the province has already been restricted to the central range of the Satpuras and the hilly and backward country in the south of the Chhatisgarh division, and will ultimately be narrowed down to the zamindaris of Raipur, Bilaspur and Chanda and a part of the Mandla district.

14. In the other provinces in which the outstill areas were large in 1904-05, *vis.*, Eastern Bengal and Assam, the United Provinces, Baluchistan and Madras, the position is now as follows (paragraph 21 of the Report):

- (1) In Eastern Bengal and Assam, a Contract Distillery system has been introduced in the Sibsagar district of Assam, and this will gradually be extended throughout the tea garden districts, while it is understood that the Local Government contemplates the eventual abolition of outstills throughout the whole of Eastern Bengal.
- (2) In the United Provinces portions of the outstill areas have already been brought under distilleries, and it is hoped in course of time to reduce the former till outstills are confined to the hilly portions of Garhwal and Almora, and isolated parts of the Pilibhit, Kheri, Gonda, Bahraich, Agra, Etawah, Jhansi and Mirzapur districts.
- (3) In Baluchistan (at present entirely under outstills), where the bulk of the population consists of Muhammadan abstainers and liquor consumption is confined to cantonments, trade centres, and the country along the railway lines, no steps have yet been taken. But the Committee recommend the application of a distillery system to the Quetta-Pishin and Sibi districts and to places on the railway, thus rendering the retention of outstills necessary only at a few outlying stations, such as Fort Sandeman and Loralai.
- (4) In Madras, where the bulk of the outstill areas consists of the wild agency tracts of the Northern Circars, the Committee

propose the gradual extension of the Contract Distillery system as communications are improved and general development progresses, and instance certain tracts in the eastern portion of the agencies and elsewhere in which it may be possible to make this advance at no distant date.

15. To turn to tracts in which outstill areas are already a matter of relatively little importance, it is proposed in the Punjab to adopt a policy of complete abolition. The cantonments in Central India are, under orders recently conveyed to the Agent to the Governor General, to be brought under the Contract Distillery system. The Committee further propose the application of a distillery system to the Deesa cantonment and to those which exist in the Hyderabad State.

16. In the opinion of the Government of India the programme outlined above is an excellent one. If fully carried out, it will, as stated in paragraph 21 of the Committee's Report, confine the operation of the Outstill system to a large block of feverish and inaccessible country lying between Chota Nagpur and the Godavari and to certain small areas of the United Provinces, Madras, Bombay and Baluchistan, which for special reasons cannot be brought under more advanced arrangements. It may, however, be possible to reduce this area in the Madras Presidency by the elimination of the Chavakkat Deputy Tahsildar's division and of British Cochin which could be brought under a distillery system, provided that the Cochin State is willing to adopt such a system in respect to its own territory. The Governor General in Council would suggest to the Government of Madras that the Cochin Durbar should be addressed on this subject.

17. As regards the areas which it may be found necessary to retain under the Outstill system, the Committee were asked in paragraph 8 of the Resolution of the Government of India No. 5001-Exc., dated the 7th September 1905, to consider how far the evils to which the system is subject could be minimised by the following measures :

- (1) By bringing the quantity of the outturn under stricter control.
- (2) By making the incidence of taxation bear a more definite proportion to the outturn.
- (3) By improving the quality and regulating the strength of the liquor.
- (4) By preventing the smuggling of outstill liquor into distillery areas.
- (5) By prohibiting the sale of liquor to children or to drunken persons.
- (6) By checking the occurrence of drunkenness in the neighbourhood of shops or stills.
- (7) By securing a reasonable degree of conformity with local public opinion as to the location of shops.

The Government of India accept the conclusion of the Committee that the adoption of the first three of the above suggestions is unnecessary, since if circumstances admit of the exercise by Government of a sufficient measure of control to enable it to carry out such a policy in respect of outstills, the proper method would be to introduce a distillery system. The other measures suggested are clearly desirable.

The attention of Local Governments is invited to the suggestion of the Committee that, in order to check the smuggling of outstill liquor into distillery areas, the establishment of a shop or still within a fixed limit of the outer border of an outstill area should be prohibited, and that the most effective means of obtaining the other objects specified is the appointment of a responsible staff. The main duty of such a staff would be the control of shops and it should serve to prepare the way for the introduction of the distillery system.

* 18. Questions relating to shops and establishments will be more fully discussed in reviewing Chapters XI--XIII of the Report. Meanwhile, it may be

noted that where outstill areas are to be retained either temporarily or permanently, the number of shops should be reduced when possible, as is proposed by the Committee in the case of the Madras Agency tracts and in the Central Provinces. In the latter province this policy has already been approved in paragraph 6 of this Department's letter No. 3947-Exc., dated the 11th July 1905. Steps should also be taken, as the Committee suggest, to put a stop to the hawking of liquor and its sale in weekly markets. Their further suggestion that liquor vendors in backward areas should be debarred from lending money or acquiring land is, in the opinion of the Government of India, impracticable and would certainly be evaded.

19. In paragraph 92 of their Report the Committee refer to the suggestion made by a local Excise Commissioner that distillery liquor should be issued to outstill areas free of duty. This course would, as the Committee evidently consider, be an ineffective *via media*. If it were possible to ensure that liquor so issued would become the staple of consumption, it should also be possible to introduce a regular distillery system.

20. The question of the system of Excise management to be adopted in distillery areas will now be considered.

In paragraphs 9 to 13 of their Resolution No. 1975-Exc., dated the 6th April 1905, and in paragraph 10 of their Resolution No. 5001-Exc., dated the 7th September 1905, the Government of India advocated the policy of concentrating the production of country spirit in a relatively small number of well-equipped distilleries working by European processes. The object which they had in view was two-fold, namely—

- (1) Production of more wholesome liquor.
- (2) Greater security to the revenue, as production in such distilleries could be more adequately controlled, and the spirit turned out therefrom could be more readily distinguished from the products of illicit distillation, or from smuggled imports from outstill areas.

The fact that the products of the crude central distilleries are, as explained in paragraph 3 of this Resolution, not at present distinctly worse than those of the regularly equipped distilleries does not affect these considerations. It is clear from the results of Major Bedford's investigations that such spirit is in the generality of cases capable of considerable improvement both as regards diminution of acidity and other defects, and in respect to economy of production. In connection with the latter point it should be explained that the object to be aimed at should be the reduction of the cost of manufacture to a point as low as is compatible with the turning out of liquor of a good quality, with a view to the imposition thereon of high taxation so as to enhance the price to the consumer. This could be effected either by a direct increase of the duty, or by obtaining a reduction of the *ex-duty* price at which contract distillers supply the retail vendors and then securing larger fees from the latter for the privilege of sale.

It has been emphatically stated by Major Bedford that improvements in the above directions can be brought about only by a greater concentration and more adequate supervision of distilleries and, where necessary, by securing the guidance of skilled distillery officers (pages 153, 164, 200, 207 and 208 of his Report). In these views the Government of India entirely agree. No material improvement can be looked for in distilleries which (as in the case of certain of those under the Bengal Central Distillery system) are mere collections of petty stills whose transactions are on a very small scale. It would also be impossible to replace the ignorant and ill-paid distillery officers at present employed over a large part of India by a more adequate and more expensive agency without effecting a corresponding decrease in their number.

21. In Chapter XV of his Report (pages 206 to 208) Major Bedford has raised the question of the relative merits of patent and pot stills and has

deprecated the substitution of large capitalist concerns working extensive patent-stills for pot-still distilleries. The Government of India had, however, no intention of prescribing or recommending the general introduction of patent-stills. In Madras, where the Excise Committee have found that the distillery arrangements have reached a stage of efficiency as yet not attained elsewhere, a number of the distilleries work with pot and goose-neck stills (*vide* pages 2 to 8 of the Appendix to Major Bedford's Report). The question of patent *versus* pot stills is really a matter of economy in production and if, as Major Bedford appears to think, pot-stills, can be improved so as to make their outturn as efficient as that of the patent-stills, they will hold their ground.

22. The Government of India observe with satisfaction that the Excise Committee are entirely in favour of a system of concentration of distillation. This involves as a necessary corollary the abolition of the present crude central distilleries where effective control of the distiller's operations is practically impossible, improvement in processes extremely difficult, and the cost of production relatively high, thus leading, as explained in paragraph 20 above to economic loss. That policy is already in course of development in Bengal and the Central Provinces and has also been accepted by the Government of Eastern Bengal and Assam.

In the United Provinces, where the central distilleries are of a more advanced pattern than in Bengal, the Committee propose (paragraph 29 of the Report) to reduce their number and, in those that remain, to confine the number of separate distillers to a select few, by insisting on the introduction and maintenance of proper plant, on a stricter system of control, and on the separation of the right of vend from the privilege of manufacture. They contemplate (paragraphs 49 and 50 of the Report) the development of the reduced and improved distilleries which will thus survive into sources of supply under the Contract Distillery system. This system, however, involves the selection of a single responsible contractor or contracting firm for a particular area; and it is presumably the intention of the Committee that where a number of separate distillers exist, these should form a syndicate to take up the contract as a whole, and then make their own arrangements as to the division of their contract district into spheres of influence. In such a case it should of course be understood that Government could recognise only the collective syndicate.

23. Central distilleries are likewise the source of supply in Sind; in the Town and Island of Bombay, and in the coast districts to the south of that city; and in a portion of the Frontier Province. In these tracts of the Bombay Presidency proper the source of country spirit is two-fold, *vis.*, *mahua* spirit, produced at the central distillery at Uran, and toddy spirit, produced in the central distillery at Dadar and at other local distilleries, which the Excise Committee characterise (paragraph 31 of Report) as little better than cow-sheds. The Government of India are of opinion that toddy spirit should hereafter be treated as foreign spirit, its production in the Bombay Presidency being limited to the Dadar distillery, and that the taxation thereon should be gradually enhanced up to the full tariff rate levied on imported spirit. Separate orders on this point will be issued in connection with Chapter VII of the Committee's Report.

The question of the future supply of country spirit in Bombay and in Sind is discussed in paragraphs 31 and 32 of this Resolution, and the case of the Bannu distillery (Frontier Province) in paragraph 34.

24. To turn now to the more advanced systems, the Government of India accept the Committee's finding that, in existing circumstances, the best and most suitable is the Contract Distillery system of Madras. The advantages of this system are:

- (1) It steadies prices and thus renders it easier to obtain the full rate of effective taxation both in respect of duty and in regard to the surtax raised on retail vend under the auction system. Its influence in the latter respect is particularly marked, for

enables the shop-keeper to know exactly what price he will have to pay for his liquor, and therefore the extent to which he can bid for a license.

(2) The judicious grant of local monopolies of production in respect to country liquor prevents the undue concentration of distilling interests in the hands of a single firm or combine, for it makes it possible to maintain and encourage other agencies by giving them a certain share of the contracts.

(3) The adoption of this method of mapping the country out into local monopolies of production facilitates preventive and warehousing arrangements.

25 On the other hand, the fact that in order to keep up a diversity of distilling interests it is necessary, in certain cases, to give local contracts otherwise than on free competition as determined by the lowest satisfactory tender, opens out the possibility of the system degenerating, if not very carefully worked, into a system of pure selection accompanied by intrigue and jobbery. The Committee suggest in paragraph 43 of their Report that, after tenders have been invited for the working of the Contract Distillery system in any province, the procedure should be "to strike a bargain on the tenders, not necessarily in terms of the original offers, in such a way as to secure the carrying on towards the next lease of as effective a body of contractors as possible." If this means that the terms of an offer by one tenderer are to be quoted to another, to whom it is desired to give the contract in preference, in order that he may reduce his terms to the same level or a little lower, the procedure would, in the opinion of the Government of India, be absolutely objectionable. The natural and inevitable result would be that tenderers would realise that they were being played off against one another, and 'would come to preliminary agreements which would make the subsequent tenders the work of a concerted 'ring.'

26. The essence of the Contract Distillery system, as properly worked, is that the contracts for the various districts should be given on the lowest terms as regards *ex-duty* price of liquor, that will be consistent with the main objects of the system, *viz.* :

(1) That the contractors should be men who have the means to carry out their contracts in a satisfactory manner.

(2) That there should be an avoidance of such allocation of the various district contracts as would place the greater part of the country spirit production of a province in the hands of a single distiller or combination of distillers.

The first condition would, in any case, involve from time to time the rejection of low tenders. The second goes a step further and requires, in some instances, the rejection of a low tender, otherwise satisfactory, in favour of a higher one, simply in order to keep up an adequate diversity of producing interests. Such a step should of course be adopted only when it is absolutely necessary on this ground, and then it is no doubt legitimate and proper to ascertain whether the distiller, whom it is desired to select outside the working of the competition system, cannot be made to abate his terms. But there should be no communication of one man's tenders to another: these should always be regarded as confidential.

Accordingly, in approving the general adoption of the Contract Distillery system, the Government of India consider it essential to issue a warning as to the possibility of its abuse, and to indicate the way in which contracts should be assigned.

27. A contract should be for a period long enough to give the distiller opportunity for employing his capital to advantage, and to tide over any loss which may accrue in an abnormal year, but not so long as to permit of the growth of vested interests. The Committee suggest a term of from three to five

years. The former is that which has hitherto been generally adopted in Madras, and should, in the opinion of the Government of India, be sufficient. It must of course be understood that, as the contract relates to the supply of liquor *ex-duty*, the contractor must accept any possible reduction in consumption in consequence of enhancement of duty during the period of his contract. It must be within the province of Government to make such enhancement at any time it thinks fit.

28. In paragraph 42 of the Report the Committee refer to the diversity of practice as regards the provision of contract distilleries. In Madras, in accordance with the practice under the old Free Supply system, the contractors provide their own buildings; elsewhere the provision of buildings by Government is also recognised. The Government of India leave the matter to the discretion of the Local Governments concerned; but they consider that, generally speaking, it is more satisfactory, as laying less initial demand on the distiller, that Government should provide the building. In that case the distiller should pay adequate rent, a rent charge being the only satisfactory method of balancing the advantage which he would otherwise have in the competition for contracts over a distiller who has had to acquire his own premises. The plant should in any case be provided by the distiller, but subject to the condition that if another contractor succeeds him *qua* local distiller in the contract area, the latter may be required to take it over at a valuation.

29. The Contract Distillery system is already the sole system in Madras and in the small province of Coorg, and will eventually be equally predominant in Bengal and the Central Provinces. A beginning of it has been made in Assam, and it is eventually contemplated to make it the distillery system of the whole province including Eastern Bengal. In the United Provinces, the Committee have, as stated in paragraph 22 above, recommended the adoption of the same system, and the Government of India will be glad to learn whether this suggestion has been accepted by the Local Government.

In Bombay the system has recently been introduced in the districts of Belgaum, Poona, Satara, Nasik, Ahmednagar and Khandesh, and its further extension to the rest of the province is, as explained below, only a question of time.

30. The typical Bombay system has hitherto been that of District Monopoly, the effect of which in its relation to consumption the Committee were specially directed to consider. As has already been indicated in paragraph 11 above, the Government of India entirely concur with the Committee in their condemnation of this system as a permanent Excise arrangement. The system undoubtedly promotes consumption for the following reasons:

- (1) Its essence is a low rate of taxation on liquor, the minimum guarantee being fixed with reference to the consumption of normal years, while abnormal circumstances are met, as was the case in the famine period of 1899 to 1902, by large remissions of the guarantee, as also by the course, which the Committee bring to notice, of allowing large issues to be made during one year which are really intended for consumption in the next. The monopolist thus pays in practice nothing for the right of vend; and the rate of duty is also inevitably lower than it would be otherwise, since the convenient index which auction vend prices afford is lacking as a guide to raise it, and, the contracts being given by pure selection, the same considerations which enable a man to obtain a contract and to secure its periodical renewal will probably also enable him to stave off or defer an enhancement of duty.
- (2) As the Committee have found, the contractors sub-let their contracts on terms favourable to themselves, thus securing, as middlemen, profits which should be diverted to the State.
- (3) As already indicated, the defective preventive arrangements which the system involves favour illicit practices.

31. It appears from their Proceedings in the Revenue (Miscellaneous) Department for October 1906 that the Government of Bombay now fully recognise the defects of this system, and that it is their intention to replace it by the Contract Distillery system as soon as circumstances permit; but that they have deferred an advance in this direction until the improvement of their preventive establishments shall place them in a position to give full effect to Excise reforms. The improved establishments applied for by the Local Government having now been sanctioned by the Secretary of State, the Contract Distillery system should be extended as soon as possible, it being borne in mind that it is not desirable to effect a change in too many districts at once. The central distillery tracts in Bombay proper, referred to in paragraph 23 above, should also be brought under the Contract Distillery system.

32. In the case of Sind, proposals for a joint Salt and Excise staff are under consideration, and here also similar reforms should be introduced as soon as an adequate establishment is available.

33. In Ajmer-Merwara, where the District Monopoly system has hitherto prevailed, the Government of India have already suggested to the Chief Commissioner that it should be replaced by the Contract system, and steps to this end are being taken.

34. In paragraph 36 of their Report the Committee express themselves in favour of the maintenance of the District Monopoly system as an intermediate measure "in places where the repression of crime is difficult during the period of transition from outstills to more advanced management". But the conditions with which they accompany this recommendation, *viz.*, full control by the Collector and by a satisfactory Excise staff, and the fixing of the guarantee by competition, indicate that where circumstances which admit of these precautions exist, it should be practicable to introduce a Contract Distillery system at once. Accordingly in the case of the areas in the North-West Frontier Province hitherto supplied from the Bannu central distillery, where the Committee suggest the introduction of a District Monopoly as a present alternative to the Contract Distillery system, it should be considered by the Chief Commissioner whether the immediate adoption of the latter is not possible. The Government of India are, however, prepared to leave the final decision to him.

35. The only remaining provincial areas which it is proposed to transfer from outstills and which would not come under the Contract Distillery system (outside a small tract in the Punjab) would thus be those in Baluchistan. Here the Committee, while indicating the eventual desirability of the Contract system, point out (paragraph 50 of their Report) that there may be difficulties in the matter of supply, and that the local authorities propose as an intermediate arrangement to farm out the right of manufacture and vend subject to the payment of still-head duty. In other words, the contract would apparently go to the man who tendered the largest amount to Government as a lump contract vend fee in addition to the ordinary duty incidence, instead of vend fees being realised from separate shop-keepers or farmers. The Government of India feel some doubt regarding this proposal, and they would be glad to have the opinion of the Chief Commissioner on the subject.

36. As regards outlying Cantonments in Native territory, the Government of India have recently decided (paragraph 26 of their letter to the Agent to the Governor-General in Central India, No. 6965 Exc., dated 12th December 1906), that those in Central India shall be supplied under the Contract Distillery system and the Committee recommend the adoption of a similar policy in the case of the cantonments in Rajputana and Hyderabad. In the case of the Central India cantonments the intention is that arrangements for their supply should be made in connection with the system as it is proposed to apply it in the adjoining Native States. The same conditions do not, however, exist in Hyderabad and Rajputana, and the only method in which a Contract Distillery system could at present be introduced in the cantonments there would probably be by the importation of liquor under bond from a distillery in

British India. It is requested that the Local Administrations concerned will consider and report on the feasibility of this.

37. There remains the competition system of the Punjab, which also applies, though there are no local distilleries there, to the greater part of the North-West Frontier Province. The large amount of illicit consumption in the Punjab which has been noticed in paragraph 7 above appears to have been due mainly to want of an organised preventive establishment, and though the Committee are impressed by the possible future evils of a distillery combination which would raise prices, the Government of India are not in favour of the abolition of the present system so long as the local authorities are of opinion that it works satisfactorily. The system is, however, open to the disadvantage, pointed out in paragraphs 39 and 59 of the Report, that distillers are prone to concentrate their operations in the large centres and to neglect outlying tracts, which are thus left open to illicit supplies. It is requested that the Local Government will consider this matter and will report for the information of the Government of India the measures which it proposes to remedy this defect. The reforms in the areas under the same system in the North-West Frontier Province would naturally follow those which it is decided to adopt in the Punjab.

38. Under the Contract Distillery system, the distillery may itself be outside the contract area, and there are, in any case, large tracts to be supplied. The development of the system therefore necessitates the adoption of adequate arrangements for distribution of liquor, and these are discussed in Chapter V of the Report. Speaking generally, the Government of India accept the Committee's recommendation that the distributing centres should be bonded warehouses maintained in Government buildings at tahsil head-quarters and other important centres, and under the supervision of an officer of Government, who need not, however, except in the case of the more important warehouses, be a full time officer. But where, as in Madras, distillers have hitherto maintained their own warehouses, it is unnecessary to interfere with this system unless and until the Local Government think fit to alter it.

As the Committee point out, the warehouse system can be supplemented, where necessary, by the grant of wholesale licenses; but these agencies should be employed only in the case of liquor that has already paid duty either directly at the distillery, or on issue from the warehouses, and the revised terminology proposed in this connection in paragraph 64 of the Report may suitably be adopted.

It is also desirable, as suggested by the Committee in paragraph 63 of the Report, that the Contract Distillery system should be so applied as to make the supply at all warehouses in a contract area uniform in price.

39. While, however, the establishment of Government warehouses is suitable in respect of Contract Distillery areas, in which the contracting distiller has a monopoly of supply in his own sphere and is bound to sell to the shop-keeper at fixed prices, it would not be suitable under the Free Supply system in force in the Punjab and the North-West Frontier Province, where, subject to certain limits of price, each distiller is at liberty to compete for supply to the shop-keepers. The Government of India have already issued instructions, in paragraph 7 of their letter No. 7115 Exc., dated the 20th December 1906, as regards wholesale vend arrangements under this system. As there stated, distillers may here be allowed to charge higher prices at outlying warehouses than at the distillery, since in the former case they have, at the option of the shop-keeper, to bear the cost of transit. But they should not be allowed to decline sales at the distillery, or to refuse supplies to any vendor wholesale or retail. These conditions must, as above remarked, be supplemented by more efficient arrangements for the adequate supply of liquor to outlying areas.

40. In regard to wastage, a stop should be put to the system prevalent in the United Provinces and the Punjab by which large wastage allowances are given in advance as a concession to wholesale vendors. As instanced in paragraph 59 of the Report, this system has led to districts in the Punjab sending liquor to one another in order that the allowance might be drawn, and

in the case of Lucknow to liquor being sent outside the district and then reintroduced. Wastage allowances should be granted, on issue of the liquor for local consumption from Government or distillers' warehouses, under the conditions indicated in paragraph 63 of the Report, actual wastages being allowed subject to a maximum scale, which should be fixed according to the distance travelled, and should not be excessive.

41. In order to ensure success in carrying out the policy of abolition of outstill areas and concentration of manufacture of country liquor, the adoption of adequate measures to prevent the production of illicit liquor will be essential. These measures will include the maintenance of an efficient preventive staff, a matter which will be discussed further in connection with Chapter XIII of the Committee's Report.

42. Moreover, the policy of distillery concentration will not attain the ends which justify it, unless the processes of manufacture in the distilleries are subject to complete and careful Government supervision, the distillery operations being controlled by an efficient and trustworthy staff. These matters are discussed in paragraphs 51 to 55 of the Committee's Report. As there pointed out, Madras is the only province in which the necessary conditions at present apply both as regards supervision and as regards establishments. The methods there in force should, as the Committee suggest, be worked up to elsewhere, though this cannot be fully done until a thoroughly competent and trained staff is available. The Rosa distillery at Shihjahanpur in the United Provinces, which appears to have been hitherto exempt from all supervision, should be brought under control without further delay.

43. As regards the distillery staff, the Government of India accept the proposals indicated in respect to the various provinces in paragraph 282 of the Report which, they understand, have the approval of the Committee. The distillery officer should, as the Committee observe, belong to the ordinary Excise establishment and should be posted to distillery duty after a suitable training.

44. The Government of India also agree with the recommendation made by the Committee, in paragraphs 283 and 284 of the Report, that the staff at distilleries should be paid directly by the State, though distillers can be fairly required to make a lump contribution in cases where the establishment charges amount (as suggested by the Committee) to more than 10 per cent of the duty on issues from the distillery. Distillery officers should be enabled to reside at a reasonable rent, not exceeding 10 per cent. of their salary, in the neighbourhood of the distillery, and to this end it may be necessary in some cases to require the distiller to provide quarters. Where the Government owns the distillery premises it will naturally provide quarters also. As regards the rule referred to by the Committee as being already in force in Madras and the Central Provinces, that overtime fees should be paid when the attendance of a distillery officer is required outside the regular hours, the Government of India would prefer not to permit operations requiring such attendance outside fixed hours.

45. The proposal made in paragraph 291 of the report for the entertainment of three Excise distillery experts, such as the Madras Government already possess, for the supervision of distillery work in (a) Bengal and Eastern Bengal and Assam, (b) the United Provinces, the Punjab and the Frontier Province, and (c) Bombay and the Central Provinces is, in the opinion of the Government of India, eminently desirable. The head-quarters of these officers would naturally be Calcutta, Lahore (the Punjab distilleries being more advanced than those in the United Provinces), and Bombay; and the Local Governments concerned, who are stated by the Committee to be unanimous in recommending the appointment of these officers, should now report whether they are willing to defray the cost. The pay of the Madras Excise expert is Rs. 800—1,300 and it would probably be necessary to grant similar remuneration to the officers now proposed. The distribution of cost might be in the proportion of 2 : 1 as between Bengal and Eastern Bengal and

Assam; equal as between the United Provinces and the Punjab (the North-West Frontier Province need not contribute for the present, as it will have no local distilleries except one at Bannu); and 2: 1 in regard to Bombay and the Central Provinces.

46. The Government of India also accept as desirable the proposal that distillery schools, similar to those which now exist in Madras for the training of distillery officers, should be opened in other provinces. The establishment of such schools would necessarily be deferred till the appointment of the proposed distillery experts by whom, as in Madras, they would be conducted. Meanwhile, it will be open for any Local Government that so wishes to make special arrangements with the Madras Government for the training of some of its officers in the Madras distillery classes. As regards the Committee's suggestion in paragraph 295 of the Report, the Government of India agree that such distillers as desire to take advantage of the distillery courses might be allowed to attend them on payment of fees.

47. The Committee, in paragraph 296 of the Report, have represented the necessity for an Excise laboratory for periodical tests and Excise work, and the Secretary of State has sanctioned the continuance of the existing laboratory at Kasauli for this purpose up to the end of March 1908. Local Governments have already been informed that the laboratory will be available for the work specified in paragraph 296 of the Report, including the standardisation but not the stocking of hydrometers and saccharometers, and that its continuance after the date above mentioned will depend on their practical experience of its utility.

48. The Government of India would invite the attention of Local Governments to the remarks of Major Bedford on pages 200 to 205 of his Report as to improvements required in the existing processes of manufacture of liquor. The most important of his suggestions may be summarised as follows:—

- (a) Cleanliness of the stores for holding the fermentative bases and especially of the fermentation sheds and vessels should be insisted on.
- (b) A sound and vigorous yeast should be provided by a central Government agency at the outset and later on by the distillers themselves.
- (c) Proper barrels or vats should be used as fermenting vessels in place of the earthenware pots now used for the purpose.
- (d) Provision should be made for a sufficient water-supply.
- (e) Proper mashing in every particular should be ensured.
- (f) In the case of pot-stills, there is little if anything to choose between single and double distillation or between fire and steam heat. But spirits made from washes which contain a quantity of solid vegetable matter, such as rice, raisins, dates, toddy and *mahua*, yield the highest amounts of furfural, while *gur* and molasses spirits give markedly less. The wash should be properly strained and the heating should be fairly regular and not too violent or prolonged.
- (g) The method of feeding the stills should be by gravitation or (less preferably) by pump, but not by hand as is at present the case in many distilleries.
- (h) A good still-head should be provided so as to ensure a proper degree of rectification.
- (i) Proper arrangements should be made for the condensation of the alcoholic vapours.
- (j) The diameter of the worm should be graduated so that it may progressively diminish in calibre, and its length regulated according to the capacity of the still.

- (k) When the condensing worm is made of copper, care should be taken to protect the liquor from serious contamination by the copper salts produced by the action of the acid spirit on the metal.
- (l) Proper safes should be provided between the worm end and the receiver so as to prevent the illicit abstraction of spirit and the loss of alcohol by evaporation.

The above suggestions appear to the Government of India to be generally suitable, with the exception of the proposal for the supply of yeast by Government to which, as was stated in paragraph 10 (c) of the Resolution in this Department No. 7057 Exc., dated the 18th December 1906, they are altogether opposed.

49. In respect of the rates of the still-head duty in distillery areas, the Committee's recommendations are as follows. Duty should be the main factor in taxation, and it should, in most provinces, be feasible to increase the existing local rates of duty without giving rise to grave danger of illicit practices. As a fair *minimum* rate the Committee suggest 15 annas per proof gallon, and as a *maximum* rate the tariff rate on imported spirit (Rs. 7 per proof gallon) diminished by a rupee or so per gallon in areas where the vend fees on country spirit considerably exceed those on imported liquor. Within these limits they recommend that the rates should be varied according to local circumstances, and in general by steps of 10 annas per proof gallon, though in special cases a differentiation of five annas might be adopted. The fixing of the duty in multiples of 10 annas per proof gallon would, it is pointed out, have the advantage of facilitating calculation. It is also suggested that there might be differential rates between urban areas and the adjoining country, as is already the case in the United Provinces and Bombay, subject to the following precautions for the prevention of smuggling, *viz.* :—

- (a) That the extent of the differentiation should not be so great as to induce smuggling, 10 annas per proof gallon being taken as the maximum which should ordinarily be adopted.
- (b) That there should be no shop in the rural area within 3 miles of the town limits.
- (c) That there should be a strict limitation of the quantity of liquor which may, as being in legitimate private possession, be transported from one duty area to another.
- (d) That arrangements should be made for the keeping of accounts by the rural shop-keepers, for the effectual verification of the fact that liquor despatched to them actually reaches them, and to prevent the possibility of such liquor being brought back into the towns.

The Government of India approve these general principles. They would, however, remark that distinction in the matter of duty between rural and urban areas should only be made where the latter are real towns and not mere agglomerations of villages : also that high vend fees in the rural areas will generally show that such differentiation need no longer be made.

50. Working on these principles, the Committee recommend the following specific increases of duty in the various provinces :—

- (1) *Bengal.*—In the large spirit-consuming tract to the west the abolition of outstills will remove the chief obstacle to the increase of duty and a rate of Rs. 2-8-0 per proof gallon may be imposed in the districts, with an addition of 10 annas in the towns, to be further raised gradually as control over illicit practices is secured. The rates may increase (as they do at present) as they go east, and the present maximum limit of Rs. 5 may safely be raised by 10 or 15 annas. In the Contract Distillery areas of Midnapore and the Orissa Division, it would be safe to advance the present

rates (which vary from Rs. 1-0-8 to Rs. 3 per proof gallon) to at least Rs. 3-2-0.

- (2) *Eastern Bengal and Assam*.—In the planting districts in which it is proposed to introduce still-head duties for the first time it would be safe to start with a rate of Rs. 2-8-0 per proof gallon.
- (3) *United Provinces*.—When agricultural conditions improve, there will be room for a considerable advance in the rates of duty. In the areas to be newly brought under the distillery system a start might be made with a rate of 15 annas per proof gallon. In the richer districts, and in particular in those within the area of high consumption referred to in paragraph 7 above, an advance to Rs. 3-2-0 or Rs. 3-12-0 will soon be possible, while in the towns an advance may be made to Rs. 4-1-0 or even more.
- (4) *Punjab*.—As soon as illicit distillation has been brought under control an increase of duty in the towns at any rate would be desirable as a check on the rapid growth of consumption.
- (5) *North-West Frontier Province*.—An addition of 11 annas to the present duty of Rs. 4 per proof gallon is recommended.
- (6) *Madras*.—There is room for a further advance of duty in the two northern districts, Ganjam and Vizagapatam, and in the two west coast districts, South Canara and Malabar. In the former, the rate might be raised to Rs. 4-6-0 per proof gallon levied in the other Telegu districts, and in the latter to Rs. 3-2-0 immediately and to Rs. 4-6-0 later on. In Bellary town a differential urban duty might be introduced if the garrison is maintained there at its present strength. The Committee indicate in paragraph 99 of the Report that in the case of the two west coast districts an increase to the general rate of duty now prevalent in Madras has not been made in deference to views formerly expressed by the Government of India as to the probable effect of certain increases in duty in checking illicit consumption. As to this it may be observed that circumstances have now changed. The Contract Distillery system has proved a marked success, and the licit consumption of the province has more than recovered the temporary check which it had sustained when the observations in question were made.

It may be observed in this connection that the general rate of duty in the Madras districts was formerly Rs. 4-6-0 per proof gallon; but that this has now been raised to Rs. 5 for the Southern districts, and that a similar enhancement in the Northern districts of the Presidency is now under the consideration of the Local Government.

- (7) *Bombay*.—There are at present no less than 33 different rates of duty in force, this great variety being neither necessary nor desirable. The policy of enhancing the rates which the Local Government has already accepted should be steadily pursued and measures taken to accelerate progress. When the preventive establishments have been strengthened and satisfactory Excise arrangements have been made with the Native States in Gujarat, enhancements in duty should be proceeded with as rapidly as circumstances may allow. The duty in the large towns should be raised to not less than Rs. 3-12-0 per proof gallon and in the rural areas to not less than Rs. 3-2-0, except in tracts where facilities for illicit practices necessitate differentiation. In Bombay city the duty may be raised to Rs. 5 per proof gallon immediately and later on to the level of that on imported liquor, this being accompanied by a concomitant enhancement of the taxation on other kinds of intoxicants also, if their consumption should show a tendency to increase. In Khandesh and Surat too (as also in

Ratnagiri and Kanara) the enhancements of duty contemplated by the Local Government should be carried out. In the Panch Mahals the duty need not be lower than 15 annas per proof gallon. The rates in the Deccan and the Karnatik are already fairly high.

- (8) *Sind*.—The duty on flavoured spirit may be raised to Rs. 6 per proof gallon for the present and to the tariff rate later on. That on plain spirit may be fixed at Rs. 5 per proof gallon for the present, and proportionately as the strength is higher or lower, and at Rs. 5-15-0 later on.
- (9) *Central Provinces and Berar*.—A policy of constant advance is already in execution in these provinces both in the direction of enhancement of the duty rates in districts in which the Central Distillery system has been introduced and by the extension of that system to areas hitherto under the Sadar Distillery and outstill systems. The Committee have advised against too rapid an increase in the rates, and the local authorities have also wisely determined not to introduce changes of system into too many districts at once.
- (10) *Coorg*.—The rate of consumption in this province being high and the incidence of vend fees very low, an immediate raising of the duty to Rs. 5-10-0 per proof gallon is recommended.
- (11) *Ajmer-Merwara*.—An enhancement of the existing rates to Rs. 3-12-0 per proof gallon for the urban area and to Rs. 3-2-0 for the rural area is proposed.
- (12) *Baluchistan*.—It is suggested that in the areas to be brought under the distillery system the duty might be fixed at Rs. 1-4-0 per proof gallon at the outset.
- (13) *Cantonments in Native States*.—The duty in Bangalore (Rs. 5-15-0 per proof gallon) might be raised with the co-operation of the Mysore Darbar in respect of a corresponding enhancement in the duty in Bangalore city. In the cantonments in Central India the duty might well be fixed at Rs. 2-8-0 per proof gallon.

51. In proposing ultimately to raise the rate of duty on country spirit in Bombay city to the level of that of imported liquor, the Committee have not taken into account the fact that the vend fees on country spirit shops, which are already sold by auction there, are considerably higher than the fixed fees on foreign spirit, and that the measure would really amount to a differential taxation against country spirit and would be in disaccord with their own general proposal that the rate of duty on country spirit should be about a rupee below the tariff rate of duty. As regards spiced spirit in Sind, the Government of India have decided, in connection with the recommendations made by the Committee in Chapter VII of their Report, that such spiced spirit should be treated as country spirit and not as foreign liquor, and the suggestion now under reference cannot therefore be approved.

52. Subject to these remarks, the Government of India commend the above proposals, which appear to have been made after due local investigation, to the favourable consideration of the Local Governments concerned. They are likely to result in a better regulated and higher duty taxation than is at present in force, and it is requested that Local Governments and Administrations will report the extent to which they are prepared to adopt them.

53. A few incidental matters remain to be dealt with. Major Bedford has pointed out (pages 164 and 165 of his Report) that under the scheme of modernised central distilleries with outlying bonded warehouses it will be necessary to adopt means to prevent loss of revenue on account of obscuration by casking. He will now be asked to undertake the preparation of the obscuration tables that he suggests, and also to enquire further into the question of the increase of alcoholic strength induced in stored spirit under certain conditions.

which is discussed on pages 173 to 175 of his Report. He has already been asked to prepare tables for the blending and reduction of spirits under Indian ranges of temperature, and copies of these when completed will be communicated to Local Governments.

As regards colour dyes for the distinction of distillery liquor, referred to in paragraph 299 of the Excise Committee's Report, the Government of India agree with the Committee that there is no necessity to take any general action for their introduction.

ORDERED, that a copy of the foregoing Resolution be communicated in continuation of Resolution No. 7057 Exc., dated the 18th December 1906, to all Local Governments and Administrations for information and guidance; to the Foreign Department with reference to paragraphs 15, 16, 36, 50 (13) and 52; and to Major C. H. Bedford, I.M.S., with reference to paragraph 53.

No. 2995-Exc.

The 16th May 1907.

THIS Resolution deals with the recommendations made by the Excise Committee in Chapter VII of their Report, which relates to foreign liquors, and also with the connected portions of Major Bedford's Report on the 'Quality, manufacture and Excise control of alcoholic liquors in India'.

2. The recommendations of the Excise Committee in regard to 'foreign liquors' may be discussed under the following main heads:—

- I.—Classification of "foreign liquors" for Excise purposes.
- II.—Regulation of manufacture and quality, and of duty assessments.
- III.—Regulation of imports by land and of transport.
- IV.—Vend arrangements.
- V.—Enhancement of the existing rates of duty.

3. *1.—Classification for Excise purposes.*—In paragraph 6 of the Resolution in this Department, No. 1987 Exc., dated the 9th April 1906, the Government of India expressed the opinion that the sound line of fiscal distinction between "country" and "foreign" spirits is that which puts into one class imported spirits and spirits of Indian manufacture describing themselves by the names of imported liquors, or obviously intended to give to the consumers the impression of being identical with them in character, in the other plain Indian spirits and spirit spiced to meet a special Indian taste without any attempt at the imitation of imported liquor.

4. The differentiation which the Committee now recommend (paragraphs 30-31 and 108-110 of their Report) is that eventually only plain spirit made from materials recognised as legitimate bases for the manufacture of country spirit should be treated as "country spirit" proper and subjected to local rates of duty, while all imported spirits, sophisticated and flavoured spirits, and spirits made from special bases, such as malt and toddy, should be treated as "foreign liquor" and subjected to tariff rates of duty. A similar distinction would apply to fermented liquors also. Of these *tars* and the so-called country beers should be treated as "country liquors," while all others, for instance, wines made in Kashmir and genuine beers made in India, should be treated as "foreign liquors".

If these proposals are adopted the Committee think that the toddy distilleries on the southern coast of Bombay should, in course of time, be abolished; that the manufacture of toddy spirit should be confined to one distillery in each of the Presidencies of Madras and Bombay, the former at Chavakkat and the latter at Dadar; that the production of flavoured spirit at Uran (Bombay) and

Kotri (Sind) should be restricted ; and that liquors from Kashmir, Baroda and the Jaipur States* and the malt whisky manufactured at Simla and Rawalpindi should be subjected to duty at tariff rates.

* *Vide* paragraph 115 of Report.

5. The Government of India entirely agree with the Committee that the manufacture of spirit from toddy should be restricted as they propose, and that the toddy spirit that is left should be adequately taxed as compared with plain spirit manufactured from *mahua*, molasses, etc. ; and should further, as soon as possible, be treated as foreign spirit and taxed accordingly. This has already been done in Madras, and it is requested that the Government of Bombay will report whether they are willing to adopt similar measures, and if so, from what date they will be prepared to increase the duty on toddy spirit in that Presidency to the tariff rate. The Government of India consider it to be most desirable to eliminate, as far as possible, the recognised production of toddy spirit, since this is very easily produced by primitive methods from fermented toddy, and so long as licit toddy spirit is allowed as the standard country spirit in any area, the licensed vendors will be under the temptation to enhance their stocks by illicit manufacture. Experience in Madras shows that there is no real hardship to the country spirit consumer in altering the basis of the spirit supplied to him. At one time the country spirit consumed in that Presidency was mainly made from toddy ; but with the adoption of scientific Excise methods toddy spirit was replaced by jaggery or molasses arrack. The new spirit soon took the place of the old, and it appears from the Local Government's Proceedings in the Revenue Department for the month of June 1906 that even in South Canara and Malabar, where arrack (country spirit) was till recently permitted to be distilled from toddy, molasses arrack is already preferred by the large majority of consumers.

6. The Committee also propose to treat as "foreign" ordinary plain spirit which is merely spiced to meet Indian tastes. In the opinion of the Government of India the case in regard to this class of spirit is different. It is manufactured from the same bases as ordinary country spirit, and it makes no attempt to imitate European liquors. The Committee urge in paragraph 109 of their Report that the consumption of these spirits is already diminishing and will, it is expected, shortly be confined to the richer classes ; that they are liable to the same objection on the score of obscurity as imported liquors ; and that as soon as the duty on them is raised to the tariff rate their sale on the same premises as country spirit will be even more liable to give rise to substitution of the one class for the other than in the case of imported spirits. The first argument does not appear in itself to afford a sufficient justification for the enhancement of the taxation on the spirits in question ; the second would be met by the levy of duty on the spirits before the obscurity of strength by the admixture of flavouring essences, as is recommended in paragraph 112 of the Committee's Report ; and the third would not apply at all, if the spirits are taxed at the same rate as country spirit. For these reasons the Government of India hold that spiced spirit should continue to be treated as "country spirit".

7. They are, however, in full agreement with the recommendation made by the Committee (paragraph 110 of the Report) that a lower rate of duty than the tariff rate should not be maintained for protective purposes on locally produced malt whisky in the Punjab, and they are issuing separate orders to the Local Government on this subject.

8. *II.—Regulation of manufacture and quality, and of duty assessments*—It will be convenient first to state briefly the results of Major Bedford's enquiries that are material in this connection. These may be summarised as follows :—

- (1) The alcoholic strength of cheap imported spirits is generally lower than that of the more highly priced imported liquor, and the amount of bye-products present in these spirits is also relatively small.

Report, pages 25, 26, and 155.

- (2) The effects of by-products in the small quantities in which they are found in the worst samples of liquor are unimportant

Report, pages 96-97, 140-141, and 144-147.

and practically negligible, and the preference of consumers for European rather than for native liquors is influenced more by the relative cost of the two articles and by fashion than by anything else. No particular liquors have any special noxious quality apart from the quantity consumed and their alcoholic strength.

- (3) In these circumstances the fixation of a quality standard in respect of the liquors in question is unnecessary, and is undesirable

Ibid, pages 154-155.

in view of the fact that it would give an impetus to the systematic doctoring of spirits and to attempts at evasion of the law.

- (4) To prevent loss of revenue by obscuration, sophisticated spirits of Indian manufacture should be proved for alcoholic

Ibid, pages 166 and 206.

strength before they are compounded. Supervision should also be exercised over the quality of the flavouring agents, as these are sufficiently costly to render the substitution of cheaper and often very deleterious materials for those used in good class essences a profitable business.

- (5) The method at present used in custom houses for determining obscuration in imported spirits is imperfect and requires modification.

Ibid, pages 166-168, and letter No. 358, dated the 30th July 1906.

9. The recommendations of the Excise Committee under this head are:—

- (1) That control should be secured over the flavouring and colouring of locally produced 'foreign' liquors by requiring that

Paragraphs 112 and 116 of the Report.

the materials used for these purposes should be added to spirit only in such proportions as authorised analysis may determine, the duty being assessed before the spirit is so obscured that its strength cannot be ascertained accurately with the aid of a hydrometer. The question of applying similar restrictions in the case of the manufacture of perfumed spirit in Bombay should be considered.

- (2) That without prescribing any fixed standards of quality, imported liquors (spirits, wines and beer) should be periodically

Paragraphs 114 and 116.

examined with a view to the exclusion of those that are impure or otherwise undesirable.

- (3) That control should also be exercised over the arrangements for the compounding and bottling of imported liquors. Such

Paragraphs 116 and 119.

bottling and licensing should not be permitted except by holders of licenses for the wholesale vend of imported liquors. These persons should, moreover, be required to carry on the operations in question in customs bonded warehouses or, in inland provinces, on authorised premises under the supervision of a responsible officer, and further to label all liquor bottled in India as so bottled.

- (4) That, to restrict the competition of cheap imported spirits with country spirit, the minimum strength at which foreign

Paragraph 116.

spirit should be sold should be fixed, as in England, at 25° under-proof for whisky and brandy and at 35° under-proof for gin.

- (5) That more efficient control should be exercised on the manufacture of beer in India and on its quality, the arrangements

Paragraph 114.

being on the lines now followed in Madras, and improvement in quality being secured by making it a rule that breweries should not be allowed to issue beer that will not pass a standard of quality as beer for general consumption. The fixation of this standard is a matter for expert advice; but the Committee suggest that one provision should be the requirement of at least two bushels of malt to every hogshead.

- (6) That the duty on rum supplied to troops should be paid by the supply contractors to the Excise authorities on issue

Paragraph 110.

of the article from the distilleries, and no free allowances should be given. The same procedure should be applied in regard to beer supplied to troops in Madras.

Subject to the following remarks, the Government of India approve these recommendations.

10. So far as cheap imported spirit is concerned, it is clear from Major Bedford's Report that there is no reason to prohibit its importation on the ground that it is unwholesome, since from a hygienic standpoint it compares quite favourably with the more highly priced imported liquors. Nor again, so long as such spirit bears due indication of the country of its origin, can it be criticised on the ground that it is a patent-still product falsely described as whisky, brandy, etc., since even the higher priced spirits are now very largely the products of patent-stills. The real objection to this class of spirit is that, owing to its extreme cheapness, it competes to an undesirable extent with country spirit; and that it promotes increase of consumption by natives of India through the position popularly assigned to it as being in essence the drink of the European classes. The recent increase of the duty on imported spirit, which has a proportionately greater effect in the case of a cheap article, should already have told against spirit of this nature; and the further proposals of the Committee that restrictions should be placed on bottling and compounding, and that the sale of imported spirit below the limits of strength stated in paragraph 9 (4) above should be prohibited will work still more strongly in the same direction, since the cheapness of the spirit in question is mainly due to the ease with which it is put on the market and the low strength at which it is sold.

11. With reference to the suggestion that there should be a periodical examination of all classes of imported liquors "with a view to the exclusion of those that are impure or otherwise undesirable", it appears to the Government of India that in the event of any particular brand of foreign liquor being found unwholesome, the simplest course would be to forbid its sale by licensed vendors.

12. The compounding and bottling of flavoured spirits and the assessment of duty thereon may be suitably carried on at the customs bonded warehouses at the seaport towns as suggested by the Committee, and in the case of inland towns at the general Excise warehouses the establishment of which is proposed in paragraph 63 of the Committee's Report. The insertion in the Excise law of Bengal of provisions to regulate the bottling of spirits has already been agreed to, and the question of their application to the provinces in which the Excise Act, 1896, is in force will be considered in dealing with Chapter XIV of the Committee's Report.

13. The Government of India entirely agree with the Committee that the lax system under which issues from breweries are at present permitted outside the Madras Presidency should be discontinued, and that the methods of supervision in force in Madras should be adopted in other provinces. Major Bedford will be asked to investigate the question of fixing a standard of

quality for beer and to suggest a suitable standard. Meanwhile, the Government of Madras has recently accepted as feasible and desirable the Committee's suggestion as to the requirement of at least two bushels of malt for the manufacture of a hogshead of beer, and the Government of India recommend the adoption of this provision in other provinces also. As suggested in paragraph 110 of the Report, the procedure in force in Northern India in regard to the levy of duty on beer supplied to troops before issue of the article from the breweries should be adopted in Madras, while the practice in force in provinces other than the Madras Presidency of granting free allowances in respect of the issues of such beer should be stopped.

14. As regards the procedure for the levy of duty on rum supplied to troops, it appears that at present the Supply and Transport Corps obtains the rum free of duty from the distilleries and eventually credits the duty to the Excise revenue after recovering it from the soldier consumer. The objections to the introduction of a system of prepayment of duty before issue of the rum from the distilleries are (a) that it cannot be applied to the case of rum imported by sea on account of Government, and (b) that, as some of the rum purchased by the Supply and Transport Corps is used for free issue, and not for sale, the system would cause complications in the accounts even in the case of rum manufactured in India. In these circumstances the Governor General in Council prefers to allow the existing procedure to continue.

15. With a view to the accurate determination of obscuration in imported spirits (*vide* paragraph 8 (5) above) the Government of India propose to instruct Major Bedford to prepare suitable working directions for use by Customs officers, and also (with reference to pages 166-168 of his Report) the necessary tables for reckoning the variations which are caused by local atmospheric conditions in the estimation of obscuration.

16. III.—*Regulation of imports by land and of transport.*—Liquors imported by land from Native States are treated generally as 'country' or 'foreign' according to the classification under which they would fall in the province of import. It is possible to tax them either at the tariff rate by a declaration that the exporting State is foreign territory under the Tariff Act, or to deal with them under the Excise law. The Committee consider the latter the better method of dealing with the import of country liquors and this is the course already adopted in the case of toddy imported into the Madras Presidency from Mysore, Hyderabad and Banganapalle. The other imports at present permitted are of whisky from the Shaikhawati Nizamat of the Jaipur State into the neighbouring provinces, of perfumed spirit from Navsari in the Baroda State into Bombay, and of wines, spirit and cider from Kashmir into different parts of India.

17. The only imports of consequence of what may be properly regarded as "foreign liquor" are the imports from Kashmir. In Northern India the taxation of Kashmir liquors is regulated under section 31 of the Excise Act, 1896, which was specially enacted with the object of dealing with them. In the Punjab, duty is levied at tariff rates on Kashmir *wines*, but at a rate of Rs. 5 only per bulk gallon on *spirits* as against a rate of Rs. 7 per *proof* gallon now leviable under the Tariff Act. Cider, again, is apparently subject to no taxation at all, at least in the Punjab. The Committee suggest (paragraph 115) that the Kashmir State should be notified to be foreign territory under section 5 of the Tariff Act, 1894; that duty on all liquors exported from that State to British India should be levied at tariff rates by a British Customs officer stationed in Kashmir; and that the liquors should then be allowed to proceed under passes granted by that officer to the place of destination, where they should be admitted, after verification, to all the privileges of foreign liquor.

The Government of India consider, however, that this course is unnecessary, and that Kashmir liquors should be dealt with in British India under the Excise law, wine and cider being taxed at the same rate as imported liquor of the same description, and similarly in regard to spirit made up so as to resemble imported liquor. Kashmir plain spirit might, if the Government of the Punjab thinks fit, be

admitted under the 'free supply' system in force in that Province to compete as country spirit with the products of the local distilleries, as plain Rosa rum now does. In contract distillery areas it would of course only be admitted in case a Kashmir distillery obtained the contract.

18. The imports of whisky from the Jaipur State, which appear to be quite insignificant, should also be dealt with on the principles explained above and should be taxed at the tariff rate, if this is not already the case. Perfumed spirits imported from Navsari into Bombay are, it is understood, already so treated.

19. As regards transport, the Committee suggest (paragraphs 114 and 133 of the Report) that the free interchange between provinces of all classes of "locally produced foreign liquors" (including beer as soon as steps have been taken to ensure that this article is of a proper quality and is manufactured under proper supervision) should be encouraged by the grant of facilities for transport in bond as an alternative to prepayment of duty at the place of manufacture. The object of the proposal is to give the manufacturers of "foreign liquor" in India an advantage corresponding to that enjoyed by importers using bonded warehouses at the ports of import, and at the same time to enable Local Governments to secure a larger share of the duty on the local consumption of such liquor by the grant to the trade of facilities in the shape of bonded warehouses, though they would have no power to prohibit the import of the liquor in question once it has paid duty in another province. It is further suggested that the warehouses proposed for use in the case of country spirit (paragraph 63 of the Report) could be used for "foreign liquors" as well as for other excisable articles.

As a corollary to these proposals the Committee recommend (paragraph 110 of the Report) the abrogation of the rule now in force in Bengal and Eastern Bengal and Assam, which requires foreign liquor in transit from a wholesale to a retail dealer to be covered by a pass. This rule, it is observed, has ceased to serve its original purpose and is now of no practical value.

20. The Government of India accept as suitable the arrangements proposed. With the introduction of the bonding system, however, the question of the allowance to be made for wastage in transit will require consideration, and it will be necessary, as suggested in paragraph 63 of the Committee's Report, to lay down for general adoption in all provinces a maximum scale of wastage according to the distance travelled by rail or road. Major Bedford will accordingly be asked to suggest a suitable scale for "foreign" as well as "country" liquors.

21. *IV. Vend Arrangements.*—The Committee's recommendations under this head are as follows :—

- (1) Wholesale licenses for the sale of foreign liquors should be granted on payment of fixed fees which should be sufficiently high to keep the business in respectable hands, but not so high as to hamper legitimate trade. Rates varying from Rs. 100 to Rs. 300 per annum according to local circumstances are suggested as suitable. Additional fees of Rs. 50 to Rs. 100 should be charged for the privilege of bottling, and of Rs. 250 to Rs. 500 for the privilege of compounding. The concession allowed by section 16 of the Bombay Abkari Act, 1878, under which no licenses are required for the sale of foreign liquors in original casks or packages should be withdrawn. (This will involve an amendment of the Act—*vide* paragraph 312 of the Report.)

- (2) Retail licenses for consumption off the premises should be granted to respectable persons on payment of fixed annual fees ranging from Rs. 50 to Rs. 100 in small towns, Rs. 250 in larger ones, and Rs. 500—1,000 in the case of considerable firms trading at

the headquarters of provinces. The Committee prefer a classification of this kind, coupled with a high tariff rate, to any attempt to assess fees with reference to the transactions of shops, though, as an exception, the fee might be assessed on the latter basis in cases where the business done at the shops is chiefly in single bottles, or in other words where such business competes with that of the holders of "on" licenses. To put a stop to the sale of flasks of one or two drams a piece, which is said to be becoming a common practice, they recommend that the minimum quantity to be sold under "off" licenses should be a full pint bottle corked and capsuled. They also suggest that a heavy penalty should be imposed if consumption on the shop premises occurs under such licenses.

- (3) Licenses for consumption on the premises should be kept within the narrowest possible limits.

Paragraph 121

They should be granted only in localities where there is a proved demand on the part of a class of drinkers who are accustomed to foreign liquor, and their number should be restricted by a high minimum fee which might ordinarily be fixed at, say, Rs. 100 a month. In such cases, where auctions are not retained, the shops might be disposed of either on fixed fees or on a system of settlements based on past transactions.

In pursuance of the above principles the Committee recommend the closure of all rum shops in Calcutta, a reduction in the number of beer taverns in Madras, the abrogation of the second paragraph of clause 5 of the license forms 13 and 13A in force in Bombay, and the prohibition of "on" sale under what are known as "first class" licenses in the Punjab and the Frontier Province.

- (4) Licenses for the sale of beer only, for consumption on the premises, should be granted on similar principles, and special regard should be had to restriction of their numbers in localities where a country fermented liquor is available.

Paragraph 122

- (5) In the case of hotel and refreshment room licenses, where sale for removal is allowed, the licensee should be required to take out a separate wholesale or retail license, or both, in respect of such sales. Provision should also be made (where it does not already exist) for the grant of separate "bar" licenses on payment of an additional fee where sale at bars is permitted. Where for special reasons the licensee desires to exceed the usual closing time for hotels and refreshment rooms, he should be required to take out a further "late closing" license (as is the case in Calcutta) on payment of a fee graduated with reference to the hour to which he is permitted to keep his premises open.

Paragraph 123

- (6) Care should be taken that holders of licenses for railway refreshment rooms, dining cars, steamers, proprietary clubs and co-operative stores, etc., confine their business to legitimate limits. For instance, a railway refreshment room licensee should not (as is often the case) be allowed to establish a bar for sale to persons other than travellers, or to conduct a wholesale and retail business in his refreshment room premises, except under a license of the class requisite to cover the business done.

Paragraphs 123 and 125.

- (7) Occasional licenses, that is, licenses for short periods for sale at entertainments, should not be granted as a matter of course, and should be strictly confined to the purposes for which they are granted.

Paragraph 124.

- (8) The sale of "foreign" and "country" liquors on the same premises, at present allowed in certain provinces should be prohibited.

Paragraph 110

22. The Government of India agree generally with these recommendations. As stated in paragraph 13 of their letter No. 3947 Exc., dated 13th July 1905, to the Chief Commissioner of the Central Provinces a copy of which is appended to this Resolution, it is expedient that vend fees on foreign liquor should usually be assessed by fixed fee rather than by auction, though where it may be found that foreign spirit shops are really competing with country spirit the fees should be very largely raised or else the auction system should be adopted.

23. The Governor General in Council is not, however, prepared to endorse any absolute prohibition of sales to persons other than travellers in railway refreshment rooms. These may sometimes be the only places at which Europeans and Eurasians can obtain locally "foreign" liquor of good quality. If, however, hotels or refreshment rooms are allowed to sell liquor to persons other than hotel residents in the one case, or to those who resort to the refreshment rooms for meals in the other, they should be charged the same fees as ordinary foreign liquor shops.

24. With reference to what is said in paragraph 6 above the sale of flavoured spirit not resembling imported liquor, which will be admitted to the market on payment of country spirit rates of duty, should be allowed under the ordinary country spirit license or under separate licenses disposed of in the same manner as country spirit licenses.

25. *V.—Enhancement of the existing rates of duty.*—Under this head the Committee recommend :

- (1) That the duty on rum supplied to troops should be raised from Rs. 2 to Rs. 4 per proof gallon.

Report, paragraph 110.

- (2) That the course of imports and of prices of foreign spirits imported by sea and of cheap ports and other wines should be

Paragraphs 130 and 131.

watched in view to a further enhancement of the duty thereon when necessary.

- (3) That the existing duty on beer (imported as well as locally produced) should be raised from 1 anna to 2 annas per gallon.

Paragraph 132.

26. The Government of India commend to the maritime Local Governments the suggestion of the Committee that the course of imports and of prices of foreign spirits and cheap wines of an unduly high strength should be watched in view to a further enhancement of the duty when necessary.

27. The proposals regarding the enhancement of the duty on rum supplied to soldiers and of the duty on beer are reserved for separate consideration.

28. As regards the proposals made in paragraph 113 of the Committee's Report with respect to denaturalised spirit, the Government of India are of opinion that there is no present necessity to exempt this spirit from the existing taxation at 5 per cent. *ad valorem*. The question of obtaining a more suitable denaturant for the production of such spirit is already under examination by Major Bedford.

ORDERED that a copy of the foregoing Resolution* be communicated, in

* With a copy of the Reports by Major Bedford and the Excise Committee, [and of his letter No. 358, dated the 30th July 1906, and of its enclosures.]

continuation of Resolution No. 2994 Exc., dated the 16th May 1907, to all Local Governments and Administrations, with the request that they will report, as soon as possible, the extent to which they will be prepared to adopt the recommendations of the Committee in so far as they have been approved by the Government

of India, to Major C. H. Bedford, I.M.S., with reference to paragraphs 13, 15 and 20; to the Foreign Department with reference to paragraphs 16 to 18; to the Army Department with reference to paragraphs 14 and 27; and to the Department of Commerce and Industry with reference to paragraphs 10 to 12, 15 and 28.

ANNEXURE TO RESOLUTION NO. 2995-EXC., DATED THE 16TH MAY 1907.

Extract paragraph 13 of letter from the Government of India, Finance Department, to the Honourable the Chief Commissioner of the Central Provinces, No. 3947 Exc., dated 11th July 1905.

13. In paragraphs 20 to 24 of his Resolution Sir F. Lely discusses the question of retail arrangements for the sale of foreign liquor. I am to observe in this connection that the system under which licenses for foreign liquor shops have generally been granted on payment of fixed fees instead of by auction is purely a matter of expediency, and rests mainly on the following considerations :

- (1) The duty on imported spirit was originally, and is still in large part of India, much higher than that on country spirit.
- (2) While the rates of duty on country spirit must vary largely according to different localities, and the auction system is very useful as an index showing whether these may be raised or rendered more uniform, the duty on imported spirit is uniform for all India, and the statistics relating to imports and to the taxation of country spirit provide sufficient indices as to the time when the duty may be enhanced.
- (3) The higher class vendors of imported spirit obtain it very largely direct from England, and would cease to do this to the disadvantage of the consumers, if they held their licenses subject to auctions at short intervals.

At the same time, in places where imported spirit of a low class has been found to compete with country spirits, the auction system has been resorted to, e.g., in respect to bazar shops in the Punjab, and the 'taverns' of Madras.

No. 2996-Exc.

The 16th May 1907.

This Resolution deals with Chapter VIII of the Report of the Excise Committee, on the subject of Excise arrangements in respect to *tari* or toddy.

2. In paragraph 17 of the Resolution of the Government of India, No. 5001 Exc., dated the 7th September 1905, the following instructions were given to the Committee in regard to their inquiries on this subject :

"As regards *tari* (or toddy), the Committee should consider whether the tree-tax system, which from a revenue point of view has been very successful in Madras, or any similar system, can or should be extended to other parts of India, due regard being paid everywhere to local conditions. In this connection it should be clearly borne in mind that, so far as present information goes, *tari* is the least noxious of all the forms of alcohol in common use in India, and that it would be a great evil to discourage its use if this result should be purchased at the cost of driving the people to more deleterious intoxicants. No considerations of revenue could be permitted to justify such a course.

"Another most important consideration is whether such a change of system, if held to be desirable in itself, can be effected without inquisitorial and harassing interference with the people and the employment of a large staff of low paid preventive officers. The Government of India are disposed to regard such a result as an evil only less serious than excessive drinking, and it must be justified, if at all, by other considerations than those of revenue."

The Committee were also asked (paragraph 14 of the same Resolution) to consider whether the extraordinarily high proportion of prosecutions and departmental cases in Madras, which had attracted the attention of the Government of India, was an inevitable feature of the local system of administration, or whether it could not be remedied by suitable arrangements.

3 The areas in which the greatest consumption of *tari* takes place are (paragraph 139 of the Report) the Bihar districts of Bengal; the Gorakhpur and Benares divisions, and the Farrukhabad district of the United Provinces; the whole of the Madras Presidency except the Nilgiris; the greater part of Bombay, the Nagpur, Wardha and Chanda districts of the Central Provinces and the adjacent districts of Berar and Coorg. The estimate which the Committee have made of the consumption per head and taxation per gallon of *tari* in certain portions of the above-mentioned provinces (with the exception of Coorg) shows that the consumption per head in Bengal and the Central Provinces is relatively large, and the estimated revenue per gallon low, as compared with Madras and Bombay. As was stated by the Hon'ble Mr. Baker in the debate on the Budget for 1907-08, the Committee have pointed out (paragraphs 137 and 141 of the Report) that *tari* is stronger than has sometimes been imagined; that the statements as to its relative harmlessness apply only to cases in which it is drunk fairly fresh and in moderate quantities, and that if it is consumed stale or to excess it acts to the detriment of the consumer. It seems to be clear that, in Bengal and the Central Provinces in particular, the consumption of toddy requires more adequate check, by improved Excise methods and enhanced taxation, than it has yet received. Moreover, the Government of India have, in accordance with the recommendations made by the Committee in Chapters III—VI of their Report, emphasised the desirability of adopting measures for the restriction of the consumption of country spirit by enhancement of taxation over large parts of the country. There will, therefore, be considerable risk of increased consumption of *tari* in such areas unless steps are taken to raise the taxation on it also.

4. The Committee hold that the best method of restricting consumption is the adoption of a tree tax system, which has the advantage of affording a tax roughly proportionate to the amount of toddy consumed. Such a system is already in force in Madras and Bombay, and that which the Committee would apply to other parts of India is described by them in paragraph 163 of the Report, as "one based on the principle of tree-tax, but with less variety than the systems of Bombay and less elaboration than that of Madras. * * * The main features * * * would be the levy of as much taxation as possible upon the tree, the free grant of domestic consumption licenses to tree-owners, the grant of comparatively numerous licenses for sale in the neighbourhood of the palm groves, an appreciable reduction of shops in towns and villages, especially in the former, the enactment of simple rules to cover transport and sale, and the employment of a moderate number of well-paid officers to check drunkenness, enforce the other license conditions, and prosecute directly for illicit tapping and sale."

5. Before referring to the question of the introduction of a tree-tax system where this is not at present in force, it will be convenient to consider the observations of the Committee as to the working of the systems now existing in the various provinces. Outside Madras and Bombay these all involve the disposal by auction of the right to produce and sell fermented *tari*. In some cases the right of vend of *tari* has been conjoined with that of country spirit, a very undesirable combination, in that it obviously tempts a vendor to push his sales of

spirit to the prejudice of the less expensive and less profitable *tari*. The disadvantages of this system have recently been pointed out by the Government of India in the case of Central India, and it has, as stated by the Committee, led to the cessation of the small amount of consumption of *tari* formerly existing in the Punjab and Ajmer-Merwara. The only area in British India in which the system at present prevails is the Chavakkat Deputy Tahsildar's division of the Malabar district of Madras; but here, where the spirit drunk is toddy spirit, the consumption of toddy has increased and not diminished; and it is observed that the Government of Madras have already taken steps towards better control.

Should any future demand for *tari* arise in the Punjab, it should be supplied by separate vend arrangements.

6. Outside the areas above-mentioned—under the Bengal system (which is that of Eastern Bengal also) the right of vend of *tari* is disposed of by separate shops; whereas in the United Provinces, the Central Provinces, Sind, and Coorg, the farming system has hitherto prevailed. But under the orders conveyed in paragraph 17 of the letter of the Government of India, No. 3947-Exc., dated the 11th July 1905, the Excise authorities in the Central Provinces are gradually working towards much smaller contract areas which it may be possible finally to resolve into separate shops.

The defects of the Bengal system have been pointed out by the Committee in paragraph 164 of their Report and are fully admitted in the Provincial Excise Reports for 1904-05 and 1905-06, while in the other provinces the methods adopted are, as the Committee observe, analogous to the farming of country-spirit monopolies.

7. A general description of the Madras tree-tax system is given in paragraphs 152 to 155 of the Report. Its financial success is indubitable, and the Committee have found evidence that its first introduction was followed by a decrease of drunkenness. The system has, however, been accompanied by a very high proportion of prosecutions—a fact to which the attention of the Committee was specifically invited.

The Committee have fully explained the historical reasons and other circumstances to which the large number of prosecutions is due, and have justly drawn attention to the reduction of drunkenness which the strict enforcement of the law has secured. The Committee, however, practically admit that the number of prosecutions has been unnecessarily large and could be reduced. In paragraph 286 of their Report they indicate that one contributory cause has been the unsatisfactory extent to which the Collector has been dissociated from the Excise administration, a matter which will be dealt with in reviewing Chapter XIII. In paragraph 260, again, they refer with regret to the decision of the Madras Government to confine sale to licensed shops, most of them away from the palm groves; and they point out that "not only is toddy when freshly drawn much less intoxicating than that which has fermented for some hours and been mixed in the shop with the stale refuse of the previous day, but the prohibition of sale at the tree-foot has created a number of offences of a technical nature and in many cases the concentration of drinking in towns has resulted in a public nuisance."

8. The Government of India concur that the number of Excise prosecutions is unjustifiably large as compared with other provinces (*vide* paragraph 281 of the Report) and especially as compared with Bombay, where the tree-tax system is also in force. They admit the considerations which mitigate the gravity of the evil: but the evil remains a serious one, which cannot be allowed to recur in any other province.

9. The Government of India are unable to accept the Committee's view that it is too late for the Local Government to retrace their steps in the matter of confining the sale of toddy to licensed shops. They would suggest to the Government of Madras that a trial should be made of tree-foot sales, concomitantly with a reduction in the number of licensed shops, in one or two districts.

and that if this experiment proves a success the system should be further extended. They consider also that landholders should, as suggested by the Committee, be encouraged to take out licenses for domestic consumption, particularly in the West Coast districts. It is further clear from the remarks made in paragraph 160 of the Report that it would be possible to reduce the number of prosecutions by the substitution of Assistant Inspectors for Sub-Inspectors on a lower rate of pay as the immediate preventive agency, and by an increase in the number of officers who are empowered to hold a preliminary enquiry into cases reported to them and to dismiss those which they think insufficiently proved, or in regard to which they consider that a warning against further malpractices would be sufficient.

10. The Government of India approve of the suggestions made by the Committee (paragraph 168 of the Report) in respect to the discrimination of sweet and fermented toddy areas, etc., save that they are not in favour of the proposal to grant shops on fixed fees. As indicated in paragraph 155 of the Report, the fixed fee system is already in force in respect of toddy shops in Madras Town and the Ganjam and Vizagapatam districts; but it should not, in the opinion of the Governor General in Council, be further extended. As in the case of country spirit shops, which will be referred to in reviewing Chapter X of the Committee's Report, an auction system is valuable as preventing the growth of vested interests in the shops, as avoiding office intrigue and chicanery in regard to their disposal, and as an index of the adequacy or otherwise of the existing rates of tree tax. The considerations adduced by the Committee, in paragraph 168 of the Report, in favour of giving the shopkeeper greater fixity of tenure could be met by extending the period of auction sale to three years, which would render cancellation of the vend license for misconduct a much more serious matter than it is now, while the suggested restriction of tapping for fermented toddy in particular areas could be made a condition of the vend license.

11. The Committee have found (paragraph 160 of the Report, *ad fin*) that the high proportion of vend fees to tree-tax, and the increasing consumption and the low price of toddy in some areas, indicate that the time has come when an increase in the tree tax should be made throughout the greater part of the Madras Presidency. The Government of India are glad to observe from paragraph 28 of the Madras Excise Administration Report for the year 1905-06 and from paragraph 10 of the Local Government's review thereof, that action in this direction is already being taken.

12. The Madras Government should consider the remarks of the Committee (paragraph 169 of the Report) as to the destructive character of the Madras system of tapping date palms. On the other hand, the Madras system of regulating the tapping of toddy trees on Government land is mentioned by the Committee with approval, and in other provinces where the matter is of importance the Local Governments concerned should consider the desirability of adopting similar restrictions.

13. In regard to Bombay the principal defects found by the Committee are the great diversity of systems and rates of tree-tax, and the want of an adequate controlling establishment. On the former subject, the Committee observe that "the general principle underlying the diverse forms appears to be that the taxation of toddy should be on the basis of its alcoholic strength as compared with spirit, and that the rate of duty (the tree-tax) should be a direct relation to the general productiveness of the trees in particular areas. Where toddy is in use as a distilling base, the rates of tree-tax are enhanced so as to cover the greater portion of the duty on the spirit, the balance being made up by a direct still-head duty. But in all cases toddy is more lightly taxed than country spirit in proportion to the alcohol which they respectively contain." Simplification and reform in these respects are very desirable, and will be rendered much more easy by the fact that it has been decided to accept the recommendation made by the Committee in Chapter VII of their Report that toddy should no longer be recognised as a base for the distillation of country spirit, and that the production of toddy spirit in the Presidency should be confined to a single distillery at

Dadar, where it should eventually be taxed at full tariff rates. The suggestion made in paragraph 6 (5) of the Resolution in this Department, No. 7057-Exc., dated the 18th December 1906, that, as circumstances permit, the specially low rates allowed on trees tapped for domestic consumption by the backward aboriginal classes should be raised, will also assist in the simplification of the Bombay system.

The second defect, the want of an adequate controlling establishment, should be largely remedied by the increased preventive establishments for the province which have recently been sanctioned by the Secretary of State.

14. The Government of India commend to the consideration of the Bombay Government the general suggestions for reform made in paragraph 151 of the Report, and would lay special emphasis on the desirability of increasing the tree-tax in Surat so as to diminish the high toddy consumption there, which amounts to two-fifths of that of the whole province, and is nevertheless accompanied by a very high rate of country spirit consumption (paragraph 149 of Report). It is significant in this connection that, as stated in paragraph 140 of the Report, toddy in Surat sells for 1½ annas a gallon or a little over, whereas the ordinary price in the rest of the province is between 3 and 4 annas. The Government of Bombay should also consider the desirability of allowing exemption from taxation to unfermented toddy when drawn in pots coated with lime, as is the practice in Madras. On the other hand, it would appear from paragraph 165 of the Report that there may have been some abuse of concessions allowed in the Surat district in respect of *tari* drawn for the manufacture of vinegar.

15. Where a tree-tax system is not at present in force, the Government of India desire to leave the question of its introduction to the entire discretion of the Local Governments concerned. They must, however, stipulate:

- (1) That the system should only be introduced where there is a preventive establishment sufficient to render it effective, and where the superior staff can be trusted to check malpractices or over-zeal on the part of subordinates, and to make a preliminary local investigation of cases in which prosecution is contemplated. The superior staff should have full discretion to release persons brought before them on failure of adequate proof or with a warning against repetition of the offence.
- (2) That the extension of the system should be gradual, so that advantage may be taken of the experience gained in the tracts in which it has already been applied, and the new areas taken up can be largely officed by men who have gained previous knowledge of the system elsewhere.

16. In the case of the particular provinces concerned the present position is as follows:

- (a) In Bengal, the Committee suggest (paragraph 164 of the Report) the experimental introduction of a light tree-tax system in a single district (Mozuffarpore). If His Honour the Lieutenant-Governor so desires, the system may be given a trial. But, for the reason stated in paragraph 10 above, the Government of India disapprove of the suggestion of the Committee that a system of fixed fees for shops should eventually be worked up to. It should also be borne in mind, as explained in the preceding paragraph, that an adequate and well supervised establishment is a *sine qua non* for the successful working of the system.
- (b) The Governments of Eastern Bengal and Assam and the United Provinces are considering the question of *tari* administration in those provinces, and the results of their deliberations will be awaited. If they should be in favour of a tree-tax system, the conditions indicated in paragraph 15 must be borne in mind.
- (c) In Sind the revenue from *tari* is insignificant, and here too the Bombay Government are inquiring into the matter.

- (d) In the Central Provinces, the experimental introduction of the tree-tax system in the Amraoti district of Berar has already been authorised, and if it succeeds there its extension to other portions of the province will follow.
- (e) As regards Coorg, the Chief Commissioner should consider, with reference to paragraph 164 of the Committee's Report, what reforms it is possible to introduce in the toddy administration there.

ORDERED that a copy of the foregoing Resolution be communicated, in continuation of Resolution No. 2995-Exc., dated the 16th May 1907, to all Local Governments and Administrations, with the request that they will report, as soon as possible, the extent to which they will be prepared to adopt the recommendations of the Committee in so far as they have been approved by the Government of India; also to Major C. H. Bedford, I.M.S.

No. 2997-Exc.

The 16th May 1907.

This Resolution brings under review the recommendations made by the Excise Committee in Chapter X of their Report which is mainly devoted to a discussion of the methods under which licenses for the retail vend of country liquor should generally be disposed of.

2. The disposal of similar licenses for the sale of foreign liquor has been considered in connection with Chapter VII of the Report, and, for the reasons explained in paragraph 22 of their Resolution No. 2995-Exc., dated the 16th May 1907, and the appendix thereto, the Government of India are of opinion that in that case a system of fixed fees is ordinarily expedient.

3. In the case of country liquor the general method of disposal of the right of retail vend is, as the Committee state, that of sale by auction. This is in accordance with the accepted policy of the Government of India, who have for some years past maintained the advantages of this method as against various proposals which have been made to them from time to time for the adoption of fixed fees. It will be convenient to reproduce here, as an example, the pronouncement on this subject made in paragraph 4 of this Department's letter No. 1668-Exc., dated the 24th March 1903, to the Government of the Punjab:—

"As at present advised, the Government of India are unable to agree with the Excise Commissioner in his condemnation of the auction system, and they think it possible that Major Parsons has failed to comprehend the principles on which the system is based. The system is a good and sound one, though it is possible that it is worked on wrong lines in the Punjab, and the Government of India think that it would be a retrograde step to seek to replace it generally by a system of fixed fees. The leading principle of the auction system is that as large a proportion as possible of the total revenue on country spirits should be derived from the fixed duty, but in addition to the fixed duty a subsidiary and variable revenue is drawn from the fees for licenses for retail vend which are sold by auction. The disposal of vend licenses by auction serves as a simple but sure guide to the local demand, and indicates whether the still-head duty is adequate or otherwise. In the opinion of the Government of India it is inadvisable to obtain more than a subsidiary amount of revenue from this source, and disproportionately large receipts from vend rents would indicate that the still-head duty was too small and might be raised, and not that the system should be changed. The objection to fixed vend fees is that experience has shown that it is practically impossible to fix such fees with due regard to the interests of the revenue, and that they generally tend to a level at which they yield large profits to the licensees, with the result that there are several applications for a single shop, constant and troublesome appeals from disappointed candidates, and the

ESTABLISHMENTS.

No. 649.

Simla, the 22nd May, 1907.

A TEMPORARY vacancy having occurred in the office of Lieutenant-Governor of the Punjab and its Dependencies consequent on the grant of leave for three months to the Honourable SIR DENZIL CHARLES JELF IBBETSON, K.C.S.I., the Governor General of India is pleased, under the authority vested in him by the 29th Section of the Act 21 and 22 Vict., Cap. 106, and subject to the approbation of His Majesty, to appoint the Honourable MR. THOMAS GORDON WALKER, C.S.I., Financial Commissioner, Punjab, to officiate as Lieutenant-Governor of the Punjab and its Dependencies during the absence of SIR DENZIL IBBETSON on the said leave.

The HONOURABLE MR. WALKER has this day assumed charge of the office of Lieutenant-Governor of the Punjab and its Dependencies.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901 :—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India

GOVERNMENT OF INDIA.
DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 9th May 1907.

NOTIFICATIONS.

No. 1734 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 6th May 1907 :—

- No. 233 of 1907.—Henri Herrenschmidt, industrial, residing at No. 10 Boulevard Magenta, Paris, in the republic of France. *Improvements in or relating to the extraction of metals and metalloids from their ores or compounds.*
- No. 234 of 1907.—John Marston Goodwin, mechanical engineer, a resident of the city of Mount Vernon, county of Westchester and state of New York, United States of America. *Improvements in dumping vehicles.*
- No. 235 of 1907.—J. Symington, medical officer, Koppa Medical Fund, Sallebile P. O., Kadur district, Mysore. *A perpetual motion or self-raising water machine.*
- No. 236 of 1907.—Khursedjee Sorabjee Jussawala, merchant, of Sea View Terrace, Colaba, Bombay. *A contrivance for developing continuous and even motive power both from tide and ebb waters.*
- No. 237 of 1907.—Reginald Aubrey Fessenden, electrical engineer, of 1737 Riggs Place, Washington, D. C., United States of America. *Improvements in electric signalling.*
- No. 238 of 1907.—John Ashford, member of the Institute of Mechanical Engineers, superintendent of the Central Workshops, Public Works Department, Amritsar, Punjab, India. *Improvements in and relating to conveyors.*
- No. 239 of 1907.—John Ashford, member of the Institute of Mechanical Engineers superintendent of the Central Workshops, Public Works Department, Amritsar, Punjab, India. *Improvements in and relating to conveyors.*
- No. 240 of 1907.—Henry Augustus Murtough, mechanic, 18 Metcalfe street, Calcutta. *Murtough's patent automatic signal wire adjuster.*
- No. 241 of 1907.—Alexander Whyte, a member of the firm of Burn and Company, at present residing at Raneegunge, India. *Improvements in tea pots, coffee pots and such like vessels.*
- No. 242 of 1907.—Robert Dawes, manufacturer of spinning and twisting machinery, of Trenton and Erie Avenues, in the city of Philadelphia, state of Pennsylvania, United States of America. *Improvements in spinning and twisting machinery.*
- No. 243 of 1907.—Harvey Ezra Brown, consulting engineer, of Beechcroft, London road, Norbury, in the county of Surrey, England. *Improvements in or relating to brake mechanism for railway and other vehicles.*
- No. 244 of 1907.—J. Stone and Company, Limited, and Alfred Henry Darker, engineers, residing respectively at Deptford, in the county of Kent, in England, and No. 49 Tresillian road, St. John's, in the county aforesaid. *Improvements in apparatus for purifying, treating, and attemperating air and for supply of same to railway carriages, ships, and other vehicles.*
- No. 245 of 1907.—Richard Ames, engineer, of 7 Victoria street, in the city of Westminster, England. *An improved apparatus for tarring roads.*
- No. 246 of 1907.—Herbert Henry Johnson, engineer, of Lachlan street, Forbes, in the state of New South Wales, and Edward Moin, saddler, of 737 George street, Sydney, in said state. *Improved apparatus for lighting and extinguishing gas lamps.*

No. 247 of 1907.—Dr. Johannes Bock, chemist, of Radebeul near Drésden, Saxony, Germany. *Improved manufacture of large crystals.*

No. 248 of 1907.—Xavier Eschaliér, chemist, of Rue des Fleurs, a Villeurbanne, (Rhône) France. *Process for strengthening cellulose and albuminoid bodies.*

No. 249 of 1907.—Antoine Charles Imbert, engineer, residing at No. 18 Bungalow, in the town of Vizianagram. *Improved compressing or baling machinery.*

No. 1735 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 484 of 1906.—Robert Schaellibaum, engineer, of 288 Dyer street, Providence R. I., United States of America. *Improvements in and connected with grids for openers, scutchers, and the like machines for the preparation of cotton and other fibrous materials.* (Specification filed 29 April 1907.)

No. 489 of 1906.—Albert Pipeino (known as Captain Albert Piperno), civil engineer, residing at the Continental Hotel, Calcutta, British India. *Improvements in grain driers for paddy and the like.* (Specification filed 30 April 1907.)

No. 490 of 1906.—Ernest Charleston, carriage inspector, Bengal Nagpur Railway, Shalimar, in Bengal, British India. *Improvements in the lubrication of axle boxes.* (Specification filed 24 April 1907.)

No. 506 of 1906.—John Vernon Griffin, executive engineer, Indian Public Works Department, Burma. *Connecting or disconnecting a single punkah or other member of a series in motion.* (Specification filed 2 April 1907.)

No. 508 of 1906.—Robert Harben Whitelegg, locomotive engineer, of Stuart House, Upton lane, Forest Gate, in the county of Essex, England. *An improved variable blast pipe arrangement for locomotive engines.* (Specification filed 25 April 1907.)

No. 26 of 1907.—Richard Wingfield Stuart, mining engineer, of Conrad, Hunter's Hill, near Sydney, in the state of New South Wales, and commonwealth of Australia. *An improved gas generator.* (Specification filed 16 April 1907.)

No. 103 of 1907.—Albert John Fortescue, manufacturer, of Arncliffe, near Sydney, in the state of New South Wales, commonwealth of Australia. *Improvements in sectional wheel tyres.* (Specification filed 25 April 1907.)

No. 150 of 1907.—Walter Gillett, builder, of 1 Acacia Grove, West Dulwich, London, S. E., and Max David Lehmann, merchant, of 23 Croxted road, West Dulwich, London, S. E., both in England. *Carburettor for internal combustion engines.* (Specification filed 24 April 1907.)

No. 1736 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 74 of 1896.—Charles Hodgson. *A method of ensuring safety in the working of railway points and signals and apparatus for that purpose.* (From 2 June 1907 to 2 June 1908.)

No. 272 of 1896.—Hugh Jorwerth Roberts. *A baling press.* (From 12 May 1907 to 12 May 1908.)

No. 261 of 1900.—Peter Cooper Hewitt. *Improvements in electric lighting.* (From 31 October 1907 to 31 October 1908.)

No. 70 of 1901.—Arthur Hoare. *Improvements in mechanical punkahs.* (From 23 May 1907 to 23 May 1908.)

No. 334 of 1901.—Jean Vincent Emmanuel Thiollier. *Improved means for fixing bolts, screws, and similar articles in soft substances such as wood.* (From 3 May 1907 to 3 May 1908.)

- No. 59 of 1902.—The American Machine Telephone Company, Limited. *Improved automatic electric exchange apparatus.* (From 7 May 1907 to 7 May 1908.)
- No. 80 of 1903.—Walter Lamont and David Kinloch Michie. *Improvements in and relating to tea-drying machines.* (From 6 May 1907 to 6 May 1908.)
- No. 93 of 1903.—Peter Cooper Hewitt. *Method of, and apparatus for, transforming electrical energy.* (From 8 October 1907 to 8 October 1908.)

No. 1737 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased:—

- No. 399 of 1901.—Edward Reginald Smith. *Improved safety receptacle for oil, spirits, or other liquids.* (Specification filed 30 January 1903.)
- No. 56 of 1902.—Frederick Henry Addis. *Improvements in collapsible boats.* (Specification filed 30 January 1903.)
- No. 67 of 1902.—William Griffith Williams and Herbert Henry Edwards. *An electric self-registering target.* (Specification filed 28 January 1903.)
- No. 231 of 1902.—The Patent Regenerative Furnace Company, Limited. *Improvements connected with boiler and other furnaces.* (Specification filed 30 January 1903.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs50 for each of the above inventions.

- No. 259 of 1900.—Henry Lyon and John Burrell Talbot-Crosbie. *Improvements in refrigerating apparatus.* (Specification filed 1 February 1901.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs50 for the above invention.

- No. 119 of 1895.—Edward Herbert Stone. *An improved point lever apparatus for working coupled points on railways.* (Specification filed 31 January 1896.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (h) After the expiration of the tenth year and before the expiration of the eleventh year from the date of the filing of the specification—

The sum of Rs100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not “designs” within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Invention
and Designs Act, V of 1888

SULPHATE OF QUININE AND SULPHATE OF CINCHONIDINE

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. Quinine is for sale only to Government officers. Cinchonidine is for sale to Government officers and to dealers. Both Quinine and Cinchonidine are for sale for cash only and may be obtained from the Superintendent, Royal Botanic Garden, Sibpur, near Calcutta.

PAY EXAMINER'S OFFICE, EASTERN COMMAND;
Calcutta, the 9th May 1907.

THE HONOURABLE THE RESIDENT IN MYSORE.

NOTIFICATION.

Bangalore, the 27th April 1907.

No. 23.—The following draft rules to regulate the possession and transport of carbide of calcium, which it is proposed to issue in exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), as applied to the Civil and Military Station of Bangalore and to the Railway lands in Mysore territory over which jurisdiction has been ceded to the British Government, and in supersession of all other rules on the subject, are published for the information of all persons likely to be affected thereby, and notice is hereby given that the said draft rules will be taken into consideration on or after the 1st July 1907.

Draft Rules to regulate the Possession and Transport of Carbide of Calcium in the Civil and Military Station of Bangalore and in the Railway lands in Mysore territory over which jurisdiction has been ceded to the British Government.

PART I.—OF IMPORTATION OF CARBIDE OF CALCIUM

Applicable to Maritime Provinces

PART II.—OF POSSESSION OF CARBIDE OF CALCIUM

1. No carbide of calcium shall be kept at any place, with or without a license unless it is "commercially pure," i.e., unless it contains no impurities liable to generate phosphoretted or siliciuretted hydrogen so as to render the gas evolved liable to ignite spontaneously.

2. No license shall be required for the possession of carbide of calcium (i) in any quantity not exceeding five pounds if it is kept in separate vessels, each containing not more than one pound, of the nature described in, and labelled as required by rule 1 of Part V; (ii) in any quantity exceeding five and not exceeding twenty-eight pounds where the following conditions are observed and the vessels containing it are labelled as required by rule 1 of Part V:—

- (a) the carbide shall be kept only in metal vessels hermetically closed at all times when the carbide is not actually being placed in or withdrawn from such vessels;
- (b) the vessels containing carbide shall be kept in a dry and well ventilated place;
- (c) due precautions shall be taken to prevent unauthorized person from having access to the carbide;
- (d) notice shall be given of such keeping to the licensing authority referred to in rule 8 of this Part, and free access shall be afforded to any duly authorised inspector to inspect the portion of the premises where the carbide is kept and the generator, if any, is situated.

Where a fixed generator is used on the premises —

- (e) full and detailed instructions as to the care and use of the generator shall be kept constantly posted up in such place as to be conveniently referred to by the generator attendant.

Where it is desired to keep a greater quantity or where the above conditions cannot be complied with, application must be made to the licensing authority for a license

3. Carbide of calcium in any quantity exceeding twenty-eight pounds may be kept only under a license to possess carbide of calcium granted under these rules. Every application for such a license shall be in Form A in the schedule, and, where the applicant proposes to engage in the manufacture of acetylene gas, the generating apparatus to be used by the licensee must if manufactured in the Civil and Military Station of Bangalore and in the Railway lands in Mysore territory over which jurisdiction has been ceded to the British Government, have been examined by such competent authority as the Resident in Mysore may from time to time specially authorize in this behalf, and certified by it to be suitable; or, if imported, must either have been so examined and certified or be of a type approved by the Committee on Acetylene Generators appointed by the Department of His Majesty's Inspector of Explosives, London.

4. Notwithstanding anything contained in rule 3 of this Part, carbide of calcium may, with the special permission of the Resident in Mysore, and on such conditions as may be fixed by him, be stored without a license in premises provided for the purpose.

Note.—This rule is intended to be applied only in the case of Port Trust and similar premises.

Situation of storage buildings.

5. Carbide of calcium shall be stored,—

- (1) if in quantities aggregating not more than four hundred and fifty pounds—in a suitable uninhabited building at least twenty feet away from any other premises: provided that quantities not exceeding two hundred and twenty-five pounds may be stored in place connected with a shop at a distance of at least ten feet from other premises;
- (2) if in quantities aggregating more than four hundred and fifty pounds and not more than three thousand pounds—in a suitable uninhabited building at least forty feet away from any other premises;
- (3) if in quantities aggregating more than three thousand pounds and not more than fifty tons—in an uninhabited building at least one hundred feet away from any other premises.

Not more than fifty tons of carbide of calcium shall be stored in any one building.

Construction of storage buildings.

6. Every building for the storage of carbide of calcium shall be—

- (a) constructed with stone, brick or iron walls, with terraced, tiled or iron roofs and with tiled, paved or cemented, or iron (or steel) floors raised at least a foot above the ground level, and
- (b) well ventilated and water-tight to the satisfaction of the licensing officer.

7. Carbide of calcium shall be stored only on racks or trestles standing at least one foot above the level of the ground, and no articles of an inflammable or combustible nature shall be kept in the same building.

Arrangements in storage buildings

8. Licenses to possess carbide of calcium shall be in Form B in the schedule, and may be granted by the District Magistrate or any Magistrate of the first class, or by such other officer as the Resident in Mysore may, from time to time, by an order in writing, appoint in this behalf.

Licenses for possession

Continuance of license
dates of issue:

9. Such licenses shall be in force for one year from the

Provided that the licensing officer may, at any time, for good and sufficient reasons, cancel any such license.

Fee for license.

10. The fee for a license to possess carbide of calcium shall be five rupees.

11. Every application for the renewal of a license to possess carbide of calcium shall be made in the same manner as an application for an original license.

Renewal of license.

12. Every such application shall be made at a date not less than fifteen days prior to the date on which the original license expires. The fee charged for the renewal of a license shall be three rupees.

Date of, and fee for, application for renewal.

13. Every retail vendor of carbide of calcium, selling any quantity exceeding half a pound to a purchaser, shall deliver it to him in an air-tight tin or drum, packed and marked in accordance with these rules, and bearing the name of the vendor plainly printed on the package.

Packing and marking on sale by retail vendor.

14. Every retail vendor shall keep his carbide of calcium in a receptacle which can be easily opened and closed again so as to be air-tight, and shall open for the purposes of sale, not more than one receptacle at a time.

Packing and opening by retail vendor.

PART III.—TRANSPORT OF CARBIDE OF CALCIUM.

1. No license shall be required for the transport of carbide of calcium in any quantity not exceeding five pounds if it is packed in separate vessels, each containing not more than one pound, of the nature described in, and labelled as required by, rule 1 of Part V.

Conditions of transport without license.

2. Carbide of calcium in any quantity exceeding five pounds may be transported only under a license to transport carbide of calcium granted under these rules, and shall not be deposited at any time during transit in any building other than a building fulfilling the requirements of rules 5 and 6 of Part II and shall not be stored in any such building except in accordance with the conditions as to storage prescribed by rule 7 of Part II.

Conditions of transport under license.

3. Notwithstanding anything contained in rule 2 of this part, carbide of calcium, while in the possession of a railway for transport, shall not be stored in any railway goods shed, but shall be stacked in the open under waterproof sheets and so placed as to prevent its getting wet.

Conditions of transport by railway.

4. All lights shall be kept away from carbide of calcium stacked as provided in rule 3 of this Part.

Special precautions.

5. If any carbide of calcium is wetted while in the possession of a railway for transport it shall be destroyed by immersion in at least twenty times its bulk of water.

Method of disposal if wetted in transit.

Note.—The fact of carbide of calcium having become wet will be indicated by the outward appearance of the drum, and probably by a disagreeable odour, showing a leakage of gas.

6. (1) Where carbide of calcium is transported by passenger train, no quantity exceeding four hundred and fifty pounds shall be carried by any one train and the vehicles shall be well ventilated and as far as possible water-tight.

Condition of transport by passenger train.

(2) In no circumstances shall a naked lamp or other unprotected artificial light be taken into a waggon, vessel or conveyance containing carbide of calcium.

7. Licenses to transport carbide of calcium shall be either general or special in Form C or Form D in the schedule, and may be granted by the District Magistrate or any Magistrate of the first class, or by such other officer as the Resident in Mysore may, from time to time, by an order in writing, appoint in this behalf.

Transport licenses.

8. A general license to transport carbide of calcium may be granted only to a person who holds an annual license to possess a quantity exceeding four hundred and fifty pounds of carbide of calcium.

Grant of general transport license

9. A special license to transport carbide of calcium may be granted to any person for a particular consignment at the discretion of the licensing officer.

Grant of special transport license.

Fee for general transport license.

10. The fee for a general license to transport carbide of calcium shall be three rupees.

Application for general transport license.

11. An application for a general license to transport carbide of calcium shall state—

(a) the number and date of the license to possess carbide of calcium held by the applicant; and

(b) the period of currency of that license.

12. A general license to transport carbide of calcium shall be in force for not more than one year, and shall in no case remain in force after the date on which the license to possess carbide of calcium held by the applicant expires.

Application for special transport license.

13. An application for special license to transport carbide of calcium shall state—

(a) the place from which the carbide of calcium is to be transported;

(b) the place to which it is to be transported;

(c) the number of drums or cases;

(d) the quantity in each drum or case;

(e) the name and address of the consignee;

(f) whether the consignee has a license to possess carbide of calcium sufficient to cover the amount transported; and

(g) the date on which it is proposed to despatch the consignment

14. A special license to transport carbide of calcium shall be in force for such period, not exceeding one month from the date of the grant of the license, as may be specified on the same.

Continuance of special transport license.

Fee for special transport license.

15. The fee for a special license to transport carbide of calcium shall be one rupee.

16. The holder of a general license to transport carbide of calcium shall, with each consignment conveyed under cover of his license, issue a pass in Form E in the schedule specifying—

Issue and contents of passes.

(a) the places from and to which the carbide of calcium is to be transported;

(b) the quantity of carbide of calcium covered by the pass;

(c) the name and address of the consignee; and

(d) whether the consignee has a license to possess carbide of calcium sufficient to cover the amount transported.

17. Carbide of calcium may be transported within the Civil and Military Station of Bangalore and the Railway lands in Mysore territory over which jurisdiction has been ceded to the British Government under cover of any license granted by the prescribed authority in any province in British India provided that the conditions of such license are observed throughout the period during which the carbide of calcium is in transit

PART IV.—OF INSPECTION

1. The District Magistrate or any Magistrate subordinate to the District Magistrate appointed by him in this behalf by order in writing, or any police officer of or above the rank of inspector appointed by the District Magistrate in this behalf by order in writing, or any other officer appointed by the Resident in Mysore in this behalf, may at any time enter any premises in respect of which a license to possess carbide of calcium has been granted, for the purpose of inspecting the same.

2. Any officer so inspecting may require a sample or samples to be delivered to him from any drum or case of carbide of calcium stored in the premises inspected

3. The licensee of any premises inspected shall personally or through a representative show to the officer so inspecting every place and every vessel in which carbide of calcium in his possession is kept, deliver any samples required, and give such assistance as that officer may require.

4. Where a license to transport carbide of calcium has been granted, any officer authorized under rule 1 of this Part may, at any time and on or before the arrival of the carbide of calcium at its destination, board any ship, or detain any conveyance, used for such transport, for the purpose of inspecting the license granted for the transport of the consignment or the pass issued by the licensee and seeing whether the provisions of these rules and the conditions of the license have been complied with

PART V.—GENERAL.

Description and marking of vessels

1. Where carbide of calcium—

- (a) is imported or kept at any place after seven days from the date of its importation, or
- (b) is transported, or
- (c) is sold or exposed for sale,

it shall be contained in substantial hermetically closed metal vessels each containing not more than two hundred and twenty-four pounds, having no copper in their construction and having attached to them labels stating in conspicuous characters the words—"Carbide of calcium—dangerous if not kept dry," together with the following caution:—

"The contents of this package are liable, if brought into contact with moisture, to give off a highly inflammable gas."

and with the addition.—

- (d) in the case of a vessel kept, of the name and address of the consignee or owner;
- (e) in the case of a vessel transported, of the name and address of the sender; and
- (f) in the case of a vessel sold or exposed for sale, of the name and address of the vendor

2. A licensing officer may, for reasons to be reported to the Resident in Mysore, refuse a license in any case, the reasons for refusal being communicated to the applicant if a request to that effect is preferred by him; and the Resident in Mysore may on receipt of such report, and of any representation made to him by the applicant, pass such orders on the case as he thinks fit.

3. Any explosion or accident occurring in connection with the importation, transport possession, or sale of carbide of calcium shall be reported, by the person in charge of the same for the time being without delay at the nearest police station.

4. Where a licensee dies or becomes insolvent or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Act or these rules for acting under the license during such time as may reasonably be

necessary to allow him to make an application for a new license in his own name for the unexpired portion of the original license. Such new license shall be granted on payment of one rupee.

- 5 Where a license granted under these rules is lost or accidentally destroyed, a duplicate may be granted on payment of a fee of eight annas.

Loss of license

6. The fees chargeable under these rules shall ordinarily be levied by means of impressed stamps. An application for the grant or the renewal of a license shall bear the proper stamp: provided that, if the application is refused, the value of the separate stamp (if any) which may have been already provided by the applicant for the desired license, or renewed license, *minus* the deductions prescribed by section 54 of the Indian Stamp Act, 1899 (II of 1899), as applied to the Civil and Military Station of Bangalore may be refunded to the applicant. An application should not be made on the stamped paper intended for the license or renewed license; but where this has been wrongly done, the value of the stamp may be refunded *minus*—

- (i) the value of the stamp which should have been affixed to the application, and
(ii) the deductions prescribed as aforesaid

Where the fees leviable under these rules have been made over to any Local body, the fees shall be paid in such manner as that Local authority may from time to time direct.

7. Any person holding a license or acting under a license granted under these rules shall be bound to produce the same when called upon to do so by any Magistrate or Police officer of or above the rank of an officer in charge of a police station

Production of license

THE SCHEDULE

FORM A

REGR No

Application to the

of

for a license to possess carbide of calcium.

Name in full of applicant with particulars of his residence.
If a firm or company, its name or that of its Agent or Secretary.

Situation of building for which the license is required

Quantity to be covered by license.

Is the carbide for use or for sale unopened in the vessels in which it is received, and, if not, what will be done with it?

In what vessels will the carbide be kept, what is the capacity of the same, how are they closed against moisture, and of what material are they made?

In what part of the building will the carbide be kept?

How are the premises constructed?

Are the premises used for other purposes, and, if so, for what purposes?

Is the carbide to be used for the manufacture of acetylene gas?

How is the generator constructed, and what is its capacity? Give sketch?

Give particulars as to the building in which the generator will be placed, and state whether it is detached from other buildings, and whether it is used for other purposes.

How is it proposed to dispose of the residue?

Will the generator be in the sole charge of a person competent to manage it?

Signature of applicant.

Postal address.

RULES.

[Here enter rules 1, 2, 3, 5 to 14 of Part II, 1 to 3 of Part IV, and 1 to 7 of Part V.]

CONDITIONS.

This license is given subject to the provisions of the Indian Petroleum Act, 1899 (VIII of 1899), as applied to the Civil and Military Station of Bangalore and to the Railway lands in Mysore territory over which jurisdiction has been ceded to the British Government and the above-mentioned rules for the possession and sale of carbide of calcium made thereunder.

2. If the licensing officer or any officer appointed under rule 1 of Part IV calls on the license-holder by notice in writing, to execute any repairs to the building licensed which may, in the opinion of such officer, be necessary for the safety thereof, the license-holder shall execute the repairs within such period, not being less than one week from the date of receipt of the notice, as may be fixed by the notice.

3. Subject to the provisions of rule 2 of Part II, the licensee shall not deliver any quantity of carbide of calcium exceeding twenty-eight pounds to any one who has not a license under section 11 of the Act or any quantity of such carbide of calcium exceeding half a pound, except in accordance with the rules as to the manner in which carbide of calcium is to be packed.

4. Vessels containing carbide of calcium shall be opened only for the time necessary for the removal of any quantity of carbide of calcium or for the refilling of other vessels. During such removal or refilling every reasonable precaution shall be adopted for preventing moisture being brought into contact with the carbide of calcium, as well as for guarding against the risk of ignition of any gas which may be liberated.

5. Every storage vessel of a greater storage capacity than two pounds shall be secured with a lock or be kept in a locked receptacle, so as to prevent unauthorised persons having access to the contents.

6. Due precaution shall at all times be taken for the prevention of accidents from fire, and no smoking, light, or fire in any form shall be permitted at any time within or near the building in which the carbide of calcium is stored.

7. If carbide of calcium is used for the manufacture of acetylene gas, the following precautions for ensuring safety shall be adopted:—

(a) The apparatus used must, if manufactured in the said Civil and Military Station, and Railway lands, have been examined by *— and certified by it to be suitable, or, if imported, either have been so examined and certified or be of a type approved by the Committee on Acetylene Generators appointed by the Department of His Majesty's Inspector of Explosives, London.

* *Vide* Rule 3 of Part II.

(b) Every apparatus for generating and storing acetylene gas other than a portable apparatus holding a charge of less than two pounds of carbide of calcium shall be placed in an outbuilding which shall be separated as far as may be practicable from any inhabited building and shall be well ventilated.

(c) No fire or such artificial light as would ignite inflammable gas shall be taken into or near the building, in which a gas-making apparatus is placed.

8. Every apparatus (including generator and gas-holder) used for the manufacture of acetylene gas shall, as far as practicable, be constructed and used so as to provide against special risk, that is to say:—

(a) Copper shall not be used in any part of the apparatus.

(b) The various parts shall be of adequate strength.

(c) The escape of gas from the apparatus shall be carefully guarded against.

- (d) Satisfactory provision shall be made against the dangerous development of heat.
- (e) Satisfactory provision against undue pressure shall be made by the employment of an adequate safety valve connected with a pipe discharging into the open air, and a suitable pressure gauge shall be attached to the apparatus.
- (f) Provision shall be made for the residue of the carbide of calcium being mixed with at least ten times its bulk of water on being removed from the apparatus.
- (g) No person shall have charge of an apparatus unless he has been properly instructed in its management.

* Exclusive of 70 of purchased silver brought on th; Mint premises but not yet received.

G. M. PORTER, Colonel, R.E.,
Master of the Mint.

His MAJESTY'S MINT;
Calcutta, the 10th May 1907.

**ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE
OF THE CALCUTTA UNIVERSITY.**

MATRICULATION EXAMINATION, 1910.

BENGALI.

Iswarchandra Vidyasagar—Sakuntala.
Rajkrishna Banerjee—Translation of the first six books of Telemachus.
Chandranath Basu—Vartaman Bangala Sahityer Prakriti, Second Edition.
Akshaykumar Datta—Oharupatha, Part II.
Chandranath Basu—Tridhara.
Dineschandra Sen—Behula.

PERSIAN.

University Selections to be compiled and edited by Shams-ul-ulama Ahmad and Shams-ul-ulama Mirza Ashraf Ali.

Persian Grammar.

The following books are recommended :—

Dastur-i-Parsi-Amoz, Part I,
or
Miftah-ul-Qawaid.

ARABIC.

University Selections to be compiled and edited by Shams-ul-ulama Ahmad and Shams-ul-ulama Mirza Ashraf Ali.

Arabic Grammar.

A book on Arabic Grammar to be published by the University for the Matriculation and Intermediate Examinations.

**ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE
OF THE CALCUTTA UNIVERSITY.**

INTERMEDIATE EXAMINATION IN ARTS, 1909.

LOGIC.

THE subject of Logic is to be studied as defined by the syllabus. Students are recommended to use one or more of the following books, or select portions thereof, with special reference to the course laid down in the syllabus :—

Carveth Read—Logic, Deductive and Inductive.
Bain—Logic (Deduction and Induction).
Keynes—Formal Logic.
Venn—Empirical Logic.

Preparatory Reading—Students are advised to read—
Jevons—Elementary Lessons in Logic

or
Jevons—Primer of Logic

before joining the regular class.

The following books are recommended for the guidance of teachers :—

Hamilton—Lectures on Logic.
Mill—System of Logic.
Jevons—Principles of Science.
Bradley—Principles of Logic.
Bosanquet—Logic.
Sigwart—Logic.
Ueberweg—System of Logic and History of Logical Doctrines.

PHYSICS.

Same as for the Intermediate Examination in Science.

PERSIAN.

University Selections to be compiled and edited by Shams-ul-ulama Ahmad and Shams-ul-ulama Mirza Ashraf Ali.

ARABIC.

University Selections to be compiled and edited by Shams-ul-ulama Ahmad and Shams-ul-ulama Mirza Ashraf Ali.

ARABIC GRAMMAR.

A book on Arabic Grammar to be published by the University for the Matriculation and Intermediate Examinations.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

B.A. EXAMINATION, 1909.

MENTAL AND MORAL PHILOSOPHY.

THE subjects of Psychology, Ethics, General Philosophy and Natural Theology are to be studied as defined by the Syllabus. Students are recommended to use one or more of the following books, or select portions thereof, with special reference to the course laid down in the Syllabus :—

PSYCHOLOGY (PASS AND HONOURS).

Höffding—Outlines of Psychology.
Wundt—Human and Animal Psychology.
Stout—Manual of Psychology.
Preparatory Reading.—Students are advised to read—
Stout—Ground-work of Psychology
before joining the regular class.

ETHICS (PASS AND HONOURS).

Seth—Study of Ethical Principles.
Martineau—Types of Ethical Theory.
Mackenzie—Manual of Ethics.
Preparatory Reading.—Students are advised to read—
Gizycki—Introduction to the Study of Ethics
before joining the regular class.

GENERAL PHILOSOPHY (PASS AND HONOURS).

Külpe—Introduction to Philosophy.
Marvin—Introduction to Philosophy.

NATURAL THEOLOGY (HONOURS).

Martineau—Study of Religion.
Flint—Theism, and Antitheistic Theories.
Tiele—Science of Religion.
Preparatory Reading.—Students are advised to read—
Knight—Aspects of Theism
or
Armstrong—God and the Soul
before joining the regular class.

HISTORY OF PHILOSOPHY (HONOURS).

The following books are recommended :—

Höffding—History of Modern Philosophy.
Erdmann—History of Philosophy.
Knight—Hume (Blackwood's Philosophical Classics).
Wallace—Kant (Ditto ditto).
Preparatory Reading.—Schwegler—History of Philosophy.

SPECIAL TEXT (HONOURS).

Descartes—Discourse on Method—and Meditations (Veitch).

The following books are recommended for the guidance of teachers :—

PSYCHOLOGY.

James—Principles of Psychology.
Ward—Psychology (Art. in the Encyclopædia Britannica).
Ladd—Elements of Physiological Psychology.
Herbert Spencer—Principles of Psychology.
Bain—Senses and the Intellect.
Bain—Emotions and the Will.
Sully—Human Mind.
Wundt—Outlines of Psychology.

ETHICS.

Green—Prolegomena to Ethics.
 Sidgwick—Methods of Ethics.
 Wundt—Ethics.
 Leslie Stephen—Science of Ethics.
 Janet—Theory of Morals.
 Paulsen—System of Ethics.
 Abbott—Kant's Theory of Ethics.
 Sidgwick—History of Ethics.

GENERAL PHILOSOPHY AND NATURAL THEOLOGY.

Green—Prolegomena to Ethics.
 Bradley—Appearance and Reality.
 E. Caird—Critical Philosophy of Kant.
 Sidgwick—Philosophy of Kant and other Lectures.
 Sidgwick—Philosophy, its Scope and Relations.
 Herbert Spencer—First Principles.
 Hegel—Philosophy of Mind (Wallace).
 Hegel—Philosophy of Right (Dyde).
 Lotze—Metaphysics.
 Pfleiderer—Philosophy of Religion.
 Caird—Introduction to the Philosophy of Religion.
 W. G. Ward—Philosophy of Theism.
 Janet—Final causes.
 Hegel—Philosophy of Religion (Spiers and Sanderson).
 Lotze—Outlines of the Philosophy of Religion.
 E. Caird—Evolution of Religion.
 James—Varieties of Religious Experience.

HISTORY OF PHILOSOPHY.

Ueberweg—History of Philosophy.
 Falckenberg—History of Modern Philosophy.
 Leslie Stephen—English Thought in the Eighteenth Century.

MATHEMATICS.

Same as for the B.Sc. Examination.

PHYSICS.

Same as for the B.Sc. Examination.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE
 OF THE CALCUTTA UNIVERSITY.

M.A. EXAMINATION, 1909.

MATHEMATICS.

Pure Mathematics.

1. Higher Algebra—
 Hall and Knight—Higher Algebra.
 C. Smith—A Treatise on Algebra.
2. Higher Plane Trigonometry—
 Hobson—Plane Trigonometry.
3. Spherical Trigonometry—
 Casey—Spherical Trigonometry.
 Todhunter—Spherical Trigonometry (Ed. Leathem)
4. Theory of Equations and Algebra of Quantics—
 Burnside and Panton—Theory of Equations.
 Grace and Young—Algebra of Invariants.
 Elliott—Introduction to the Algebra of Quantics.
5. Plane Analytical Geometry, including Higher Plane Curves—
 Salmon—Conic Sections.
 Salmon—Higher Plane Curves.
 Basset—Treatise on Cubics and Quartics.
6. Geometry of Surfaces—
 Salmon—Geometry of Three Dimensions.
 Frost—Solid Geometry.
7. Differential Calculus—
 Edwards—Differential Calculus.
8. Integral Calculus—
 Williamson—Integral Calculus.

9. Differential Equations—
Forsyth—Differential Equations.
10. Calculus of Variations.
Bolza—Lectures on the Calculus of Variations.
11. (a) Theory of Functions—
Forsyth—Theory of Functions, 2nd edition.
- (b) Theory of Groups—
Burnside—Theory of Groups.
Campbell—Theory of Continuous Groups.
- (c) Finite Differences and Calculus of Functions—
Boole—Finite Differences.
Carmichael—Calculus of Operations.
Herschel—Examples of Calculus of Finite Differences.
Babbage—Examples of Functional Equations.
Whittaker—Modern Analysis.
- (d) Vector Analysis and Quaternions—
Joly—Quaternions.
Tait—Quaternions.
Gibbs and Wilson—Vector Analysis.
- (e) Projective Geometry—
Cremona—Projective Geometry.
Scott—Modern Analytical Geometry.
Reye—Geometry of Position. Tr. Holgate.
Jessop—Line Complex.
Russell—Foundations of Geometry.
- (f) Theory of Numbers—
Matthews—Theory of Numbers.
Smith—Reports on the Theory of Numbers (Collected papers, Vol. I, pp. 38—364).

Mixed Mathematics.

1. Advanced Statics, including Theory of Potential—
Minohin—Statics.
2. Dynamics of a Particle—
Routh—Dynamics of a Particle.
3. Rigid Dynamics—
Routh—Elementary Rigid Dynamics.
4. Hydrostatics, including Capillarity—
Besant and Ramsey—Hydrodynamics, P. 1 (Hydrostatics).
5. Hydrodynamics—
Lamb—Hydrodynamics, 3rd edition.
6. Spherical Astronomy—
Newcomb—Spherical Astronomy.
7. (a) Theory of Elasticity—
Love—Theory of Elasticity, 2nd edition.
Todhunter and Pearson—History of Theory of Elasticity.
- (b) Advanced Dynamics—
Whittaker—Analytical Dynamics.
A. O. Webster—Dynamics.
Routh—Advanced Rigid Dynamics.
Hertz—Principles of Mechanics.
- (c) Higher Parts of Spherical Astronomy—
Chauvenet—Spherical Astronomy.
- (d) Lunar and Planetary Theories—
Adams—Lectures on Lunar Theory.
Airy—Mathematical Tracts.
Cheyne—Earth's Motion of Rotation.
Brown—Lunar Theory.
Cheyne—Planetary Theory.
Moulton—Celestial Mechanics.
- (e) Figure of the Planets—
Todhunter—History of the Theory of Attraction and the figure of the Earth.
Thomson and Tait—Natural Philosophy.
Airy—Mathematical Tracts.
Airy—Figure of the Earth. (Enc. Metr.)
Clarke and Radau—Figure of the Earth. (Enc. Britt., Vols. VII and XXVII.)
Pratt—Figure of the Earth.
- (f) Theory of Tides—
Basset—Hydrodynamics.
Darwin—Tides and Kindred Phenomena. (Murray, 1898.)
Darwin—Tides. (Enc. Britt., Vols. XXIII and XXXIII.)
Airy—Tides and Waves. (Enc. Metr.)

Mental and Moral Philosophy.

History of European Philosophy, Ancient, Mediæval and Modern. The following books are recommended :—

Ueberweg—History of Philosophy.
 Erdmann—History of Philosophy.
 Zeller—Plato and the older Academy.
 Zeller—Aristotle and the earlier Peripatetics.
 Zeller—Stoics, Epicureans and Sceptics.
 Höfding—History of Modern Philosophy.
 Falckenberg—History of Modern Philosophy.
 Hegel—History of Philosophy.
 Janet and Seailles—History of the Problems of Philosophy.

The following works should be studied as illustrating the history of philosophical speculation or as landmarks in that history :—

Plato—Phædo, Theætetus, Philebus, Politicus.
 Aristotle—Metaphysics (omitting Bk. IV).
 Descartes—Meditations and Discourse on Method.
 Kant—Critique of the Pure Reason—(Transcendental Æsthetic and Transcendental Logic only) as in 1908.

Outlines of Indian Philosophy.

The following books are recommended :—

Colebrooke—Essays on the Religion and Philosophy of the Hindus (account of the philosophical systems).
 Max Müller—Six Systems of Indian Philosophy.
 Deussen—Philosophy of the Upanishads.
 Rhys Davids—Hibbert Lectures on Indian Buddhism.
 Mrs. Caroline Rhys Davids—Psychological Ethics (Dhamma Sangani).
 Madhavacharyya—Sarvadarsana Sangraha (Cowell and Gough).
 [Charvaka, Bauddha, Arhata, Vaisheshika, Nyaya, Sankhya, and Patanjali Systems.]
 Sankara—Commentary on the Vedanta Sūtras, Second Adhyaya, Padas I and II only (Thibaut).
 Anand Bhatta—Tarkasangraha (Ballantyne and Bodas).
 Kusumanjali (Cowell).

(i) **PSYCHOLOGY.**

General Psychology, Physiological Psychology, Comparative Psychology and Child Psychology.

The following books are recommended :—

James—Principles of Psychology.
 Ward—Psychology (Art. in the Encyclopædia Britannica).
 Sully—Human Mind.
 Wundt—Outlines of Psychology.
 Herbert Spencer—Principles of Psychology.
 Bain—Senses and the Intellect.
 Bain—Emotions and the Will.
 Ribot—German Psychology of Today.
 Wundt—Outlines of Physiological Psychology. (Vol. I)
 Ladd—Elements of Physiological Psychology.
 Romanes—Mental Evolution in Man.
 Romanes—Mental Evolution in Animals.
 Lloyd Morgan—Comparative Psychology.
 Sully—Studies of Childhood.
 Preyer—Mind of the Child.
 Baldwin—Mental Development in the Child and the Race.

(ii) **LOGIC.**

Formal Logic, Epistemological Logic, Ontological Logic, Empirical Logic, Methodology of Science, Logic of Chance, Symbolic Logic.

The following books are recommended :—

Hamilton—Lectures on Logic.
 Kant—Transcendental Logic (Critique of the Pure Reason).
 Ueberweg—System of Logic.
 Lotze—Logic.
 Wallace—Logic of Hegel.
 Bradley—Principles of Logic.
 Sigwart—Logic.

Mill—System of Logic.
 Bain—Logic (Deduction and Induction).
 Venn—Empirical Logic.
 Jevons—Principles of Science.
 Pearson—Grammar of Science.
 Venn—Logic of Chance.
 Venn—Symbolic Logic.

(iii) ETHICS AND SOCIAL PHILOSOPHY.

Principles and Methods of Ethics, Psychology of Ethics, Metaphysics of Ethics, Sociological basis of Ethics, Philosophy of Right and of Law, Principles of Sociology.

The following books are recommended :—

Green—Prolegomena to Ethics.
 Martineau—Types of Ethical Theory.
 Sidgwick—Methods of Ethics.
 Wundt—Ethics.
 Paulsen—System of Ethics.
 Herbert Spencer—Principles of Ethics.
 Kant—Theory of Ethics (Abbott).
 Kant—Philosophy of Law (Hastie).
 Hegel—Philosophy of Right (Dyde).
 Jeremy Bentham—Principles of Morals and Legislation.
 Comte—Positive Polity—Social Statics and Social Dynamics.
 Herbert Spencer—Principles of Sociology (Vols. I and II).
 Giddings—Principles of Sociology.

(iv) PHILOSOPHY OF RELIGION.

Metaphysics of Religion, Theology and its Evolution, Science of Religion, Evolution Religion, Psychology of Religion.

The following books are recommended :—

Lotze—Outlines of the Philosophy of Religion.
 Hegel—Philosophy of Religion (Spiers and Sanderson).
 Bradley—Appearance and Reality.
 Herbert Spencer—First Principles—the Unknowable.
 Stirling—Philosophy and Theology.
 Martineau—Study of Religion.
 Ward—Agnosticism and Naturalism.
 Pfleiderer—Philosophy of Religion.
 Pfleiderer—Development of Theology since Kant (Part I).
 E. Caird—Development of Theology in the Greek Philosophers.
 Flint—Agnosticism.
 Paul Janet—Final Causes.
 Tiele—Science of Religion.
 E. Caird—Evolution of Religion.
 Seeley—Natural Religion.
 James—Will to Believe.
 James—Varieties of Religious Experience.
 Upton—Bases of Religious Belief.

(v) SOME SPECIAL BRANCH OF INDIAN PHILOSOPHY.

Any one of the three following groups :—

- (1) The Nyaya Sutras of Gotama with Bhashya of Vatsyayana.
 Vartika of Udyotkara and Vritti of Visvanatha.
 The Bhasha-Parichohheda with Siddhanta Muktavali.
 The Kusumanjali of Udayana with commentary.
- (2) The Sankhya Karika of Isvarakrishna with SanLhya Tattvakaumudi of Vachaspat Misra
 The Sankhya Sutras with Sankhya Pravachana Bhashya of Vijnanabhikshu.
 The Vedanta Paribhasha.
 The Hastamalaka with commentary.
 The Advaita Brahma Siddhi.
 Sankara's commentary on the Vedanta Sutras (the first four Sutras and Adhyaya II, Padas I and II).
 Ramanuja's commentary on the Vedanta Sutras (Introduction and the first four Sutras).
- (3) The Sutras of Kanada with Bhashya of Prasastapada and Nyayakandali of Sridhara.
 The Bhasha Parichohheda with Siddhanta Muktavali.
 Nagarjuna's Madhyamika Karika with commentary.
 The Nyayavindu with commentary.

SANSKRIT. ●

The course shall include the following :—

The books prescribed for the first four papers are common to all the groups.

Paper I.—(a) Ashtaka I of the Rigveda, with Sayana's commentary thereon.

(b) Sayana's Introduction to his commentary on the Rigveda.

Paper II.—Siddhanta-Kaumudi (whole).

Paper III.—(a) The general principles and methods of Comparative Philology, including the elements of Phonetics.

(b) The history of the Indo-European family of languages, with special reference to Sanskrit (Vedic and Classical), and Prakrit.

(c) Sabda-saktiprakasika (with annotations edited by Mahamahopadhyay Kamakhyanath Tarkabagis and Rai Rajendra Chandra Sastri Bahadur, M.A., to be shortly published by the University), and its bearing on the science of language.

Paper IV.—Two Essays, (a) dealing with some subject connected with the history of Sanskrit literature generally; (b) dealing with some subject connected with the history of the special Department covered by the group taken up.

Papers V, VI, VII and VIII.—One of the following groups to be selected by the candidate :—

A. (*Literature.*)

Paper V.—(a) Poetry texts :—

Naishadha Charita Cantos 15, 16 and 17, with Mallinatha's commentary.

Kamandakiya Nitisar ... (Jibananda's edition) Chapters 8, 9, 10 and 11 pages 37—62).

Sukra Nitisara ... (Jibananda's edition) Chapter 4 (pages 507—610)

Mahabharata ... Rajdharma, Santiparva, Chapters 56—60, 68, 69 and 86—88, Pratap Ray's edition.

Magh ... Cantos 14 and 15, with Mallinatha's commentary.

(b) Translation from English into Sanskrit.

Paper VI—(a) Drama texts :—

Vikramorvasi, Malati Madhava, Mrichhakatika, Venisanhara, Balaramayana.

Vararuchi's Prakrit Prakasa as is necessary for the appreciation of the Prakrit passages.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Prose texts :—Kadamvari ... Part I.

Harshacharita ... Chapters 5, 6 and 7.

(b) Unseen passages in Sanskrit Prose for translation into English.

Paper VIII.—(a) Rhetoric and Prosody, namely, Kavyaprakasa, Ekavali, Sarasvati Kanthabharana, Sahitya-darpana and Pingala's Chhanda Sutras with Halayudha's Vritti.

(b) Unseen passages in Sanskrit Poetry for translation into English.

B. (*Vedas.*)

Paper V.—(a) Yaska's Nirukta and Pingala's Ohhandasutras, with Halayudha's Vritti. Pratisakhya of the Rig-Veda, with the commentary of Uvata.

Paper VI.—(a) Aitareya Brahmana with Sayana's commentary.

(b) Simple unseen passages in Vedic Sanskrit for translation into Classical Sanskrit. [The interpretations of any recognised Indian School will be accepted.]

Paper VII.—(a) Vrihadaranyaka.. Chapters III and IV. Ohhandogya... Chapters V, VI, VII, VIII.

(b) Simple unseen Sanskrit passages from any Upanishad for translation into English.

Paper VIII.—(a) Grihya Sutra—Gobhila with commentary.

(b) Translation from English into Sanskrit.

C. (*Mimansa and Smriti.*)

Paper V.—(a) Mimansa Sutras with Sabara Bhashya, first six chapters.

(b) Simple unseen Sanskrit passages from any treatise or Commentary on the Mimansa Philosophy, such as the Sloka-Vartika and the Tantra-Vartika, for translation into English.

Paper VI.—(a) Jaiminiya Nyaya Mala Vistara and Mimansa-Nyaya-prakasa.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Mimansa Philosophy, such as the Mimansa-Balaprakasa, and the Tupteeke, for translation into English.

Paper VII.—(a) Manu Samhita with Kulluka's commentary.

Dharma Sutras of Apastamba and Gautama with Haradatta's commentaries.

(b) Grihya-Sutra—Gobhila.

Paper VIII.—(a) Yajnavalkya Samhita— with Vijnanesvara's Mitakshara.

Parasara's Institutes with Madhava's commentary.

(b) Translation from English into Sanskrit.

D. (Vedānta.)

Paper V.—(a) Vedāntasāra (Jacob's Edition), Panchadasi, Vedānta Paribhāṣa, Hastamalaka (with commentary), and Siddhāntaleśa.

(b) Simple unseen Sanskrit passages from any work on Vedānta Philosophy such as the Vivaraṇaprameya-Saṅgraha for translation into English.

Paper VI.—(a) Vedāntasūtras with Sankar Bhashya.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Sribhāṣya—Chapter I, Pt. I.

(b) Advaita-Brahma-Siddhi.

Paper VIII.—(a) Bhagavadgita and Ohhandogya as in Group B.

Munda, Mandukya.

Svetasvataraṇishad with Sankara's commentary.

(b) Passages for translation into English from the Anubhāṣya and the Saivabhāṣya.

E. (Sāṅkhya and Yoga.)

Paper V.—(a) Sāṅkhyasūtras of Kapila, with Vṛitti of Aniruddha.

Sāṅkhya-Kārika of Iṣvarakṛishna, with Bhashya of Gaurapada.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Sāṅkhya Philosophy, for translation into English.

Paper VI.—(a) Sāṅkhya Pravaṇhana Bhashya.

Sāṅkhya-Sāra and Sāṅkhya-Tattva-Kaumudī.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Yoga Sūtras of Patanjali, with Bhashya of Vyasa and Vṛitti of Bhoja. Yoga-Vartika of Vijnāna-Bhikṣhu.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Yoga Philosophy, for translation into English.

Paper VIII.—(a) Yoga Vasiṣṭha—Chapter on Nirvāna, Part II.

Sarbadarsana-Saṅgraha.

(b) Translation from English into Sanskrit.

F. (Nyāya and Vaiśeṣika.)

Paper V.—(a) Nyāyasūtras of Gautama, with the Bhashya of Vatsyayana, Vartika of Udyotkara, and Vṛitti of Viṣvanātha.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Nyāya Philosophy, for translation into English.

Paper VI.—(a) Nyāyamanjari of Jayanta Bhaṭṭa.

Khaṇḍana Khaṇḍa Khadya of Śrīharṣa—Chapter I.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Bhasha Pariṇheda Siddhānta-muktavali, Kusumanjali of Udayana charyya with commentary of Ruchidatta and gloss of Vardhamana.

(b) Translation from English into Sanskrit.

Paper VIII.—(a) Vaiśeṣika Sūtras of Kanada, with Bhashya of Prasastapada, Nyāyakandali of Śrīdhara, and Vṛitti of Jaynarain.

Saptapadārthi of Sivāditya with commentary of Yatindramadhava.

(b) Simple unseen Sanskrit passages from any treatise or commentary on the Vaiśeṣika Philosophy, for translation into English.

G. (General Philosophy.)

Paper V.—(a) Sāṅkhyasūtras of Kapila with Vṛitti of Aniruddha.

Sāṅkhya Tattva-Kaumudī.

Yogasūtras of Patanjali, with the Bhashya of Vyasa and Vṛitti of Bhoja.

(b) Simple unseen Sanskrit passages from any work on Philosophy for translation into English.

Paper VI.—(a) Nyāyasūtras of Gautama with Bhashya of Vatsyayana and Vṛitti of Viṣvanātha. Vaiśeṣikasūtras of Kanada, with Bhashya of Prasastapada, and Nyāyakandali of Śrīdhara.

(b) Translation from English into Sanskrit.

Paper VII.—(a) Vedāntasāra (Jacob's Edition), Bhagavadgita, Vedāntasūtras, with Sankara's commentary, Chapter I; Parts I and IV; Chapter II, Part II.

(b) Translation from English into Sanskrit.

Paper VIII.—(a) Nyāyaratnamala of Parthasarathi Miśra; Mīmāṃsa Nyāya Prakāśa of Apadeva. Upanishads—Iṣa, Keṇa, Katha, Prasna, Munda, Mandukya and Svetasvatara with Sankara's commentary.

(b) Simple unseen Sanskrit passages from any work on Philosophy for translation into English.

H. (Prakṛit.)

Paper V.—(a) Prasna Vyākaraṇa and Vipakasūtra.

(b) Translation from English into Sanskrit (or Prakṛit, at the option of the candidate).

Paper VI.—(a) Prakrit portions of the following dramas :—

Sakuntala, Vikramorvasi, Malavikagnimitra, Uttaracharita, Malatimadhava, Mahavira Charita, Mrihakatika, Mudrarakshasa, Ratnavali, Karpuramanjari, Venisanhara

(b) Translation from Sanskrit into Prakrit.

Paper VII.—(a) Setubandha ; Gaudavaho ; Kumarapala-charita together with a general knowledge of Prakrita Paingalam.

(b) Simple unseen passages in Prakrit for translation into English.

Paper VIII.—(a) Prakrit Grammar, as in Vararuchi's Prakrita Prakas (Cowell), Ohhandah's Prakrita Lakshanam (Hoernle), Hemchandra (Pischel).

Candidates are also expected to be familiar with the substance of Hoernle's Grammar of the Gaudian languages.

(b) Simple unseen passages in Prakrit for translation into Sanskrit.

I. (Epigraphy and History.)

Paper V.—(a) Rajatarangini and its continuations with Stein's Introduction and commentary.

(b) Unseen passages in Sanskrit for translation into English.

Paper VI.—(a) Inscriptions of Asoka.

(b) Early Indian Alphabets.

Paper VII.—Epigraphia Indica... Vol. I., Inscriptions, Nos. 1, 8, 11, 13, 35.
Vol. III, Nos. 8 and 17.
Vol. V, Nos. 2 and 19.
Vol. VI, Nos. 1, 14.
Vol. VII, No. 6.

Fleet's Corpus Inscriptionum.—Nos 1—18, 33—37.

Prachina Lekha mala.—The first fifty Lekhas as published in the Kavyamala Journal.

Paper VIII.—(a) Ancient Geography of India.

(b) Translation from English into Sanskrit.

ORDER BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

INTERMEDIATE EXAMINATION IN SCIENCE, 1909.

Physics.

THE scope of the subject is sufficiently indicated by the Syllabus, and no special text-books are prescribed. The books mentioned below, however, are recommended as showing the standard to which students will be expected to attain in the Examination :—

Aldous—Elementary Course in Physics.

Schuster and Lees—Intermediate Course in Practical Physics.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

B.Sc. EXAMINATION, 1909.

EXPERIMENTAL PSYCHOLOGY.

The subject is to be studied as defined by the Syllabus. Students are recommended to use one or more of the following books or select portions thereof, with special reference to the course laid down in the Syllabus :—

• Pass Course.

I.—General Psychology—

Hofding—Outlines of Psychology.

Wundt—Human and Animal Psychology.

Stout—Manual of Psychology.

Preparatory Reading—Students are advised to read Stout's Groundwork of Psychology before joining the regular class.

II.—Experimental Psychology—

Titchener—Outlines of Psychology.

Kölpe—Outlines of Psychology.

Scripture—New Psychology.

Laboratory Course—Titchener's Experimental Psychology, Volume I, Part I, and Volume II, Part I.

Honours Course.

- I.—General Psychology—Same as in the Pass Course.
- II.—Physiological and Comparative Psychology—
 Wundt—Outlines of Physiological Psychology (Volume I).
 Ladd—Elements of Physiological Psychology.
 Romanes—Mental Evolution in Man.
 Romanes—Mental Evolution in Animals.
 Lloyd Morgan—Comparative Psychology.
 Herbert Spencer—Principles of Psychology (Volume I).
- III.—Experimental Psychology—
 In addition to the books recommended for the Pass Course, the following:—
 Wundt—Outlines of Psychology
 Ladd—Elements of Physiological Psychology (select portions).
- The following books are recommended for the guidance of teachers:—
- General Psychology—
 James—Principles of Psychology.
 Ward—Psychology (Art. in the Encyclopædia Britannica).
 Ladd—Elements of Physiological Psychology.
 Herbert Spencer—Principles of Psychology.
 Bain—Senses and the Intellect.
 Bain—Emotions and the Will.
 Sully—Human Mind.
 Wundt—Outlines of Psychology.
- Physiological and Comparative Psychology—
 Loeb—Comparative Physiology of the Brain and Psychology.
 Foster—Text-book of Physiology.
 Helmholtz—Sensations of Tone.
- Experimental Psychology—
 Titchener—Experimental Psychology :
 Volume I, Part II ... } Instructor's Manual.
 Volume II, Part II ... }

MATHEMATICS

Pass Course.

The following books are recommended—

1. Higher Plane Trigonometry—
 Todhunter—Plane Trigonometry, edited by Hogg.
2. Plane Analytical Geometry—
 Loney—Elements of Co-ordinate Geometry.
 C. Smith—Elementary Treatise on Conic Sections.
3. Differential Calculus—
 Edwards—Differential Calculus for Beginners.
4. Integral Calculus and Differential Equations—
 Edwards—Integral Calculus for Beginners.
 Taylor—The Differential and Integral Calculus and Differential Equations.
5. Hydrostatics—
 Besant—Elementary Hydrostatics.
 Loney—Elements of Hydrostatics.
6. Astronomy—
 Parker—Elements of Astronomy.

Honours Course.

1. Higher Algebra—
 Hall and Knight—Higher Algebra.
 O. Smith—A Treatise on Algebra.
2. Elementary Theory of Equations—
 Hall and Knight—Higher Algebra.
 Cajori—Introduction to Theory of Equations.
3. Higher Plane Trigonometry—
 Todhunter—Plane Trigonometry, edited by Hogg.

4. Plane Analytical Geometry—
Loney—Elements of Co-ordinate Geometry.
O. Smith—Elementary Treatise on Conic Sections.
5. Elementary Solid Geometry—
O. Smith—Elementary Treatise on Solid Geometry.
6. Elementary Principles of Vectors—
Kelland and Tait—Introduction to Quaternions, 3rd Edition, edited by Knott.
Henrici and Turner - Vectors and Rotors.
7. Differential Calculus—
Williamson—Differential Calculus.
8. Integral Calculus and Differential Equations—
Williamson—Integral Calculus.
Murray—Introductory Course in Differential Equations.
9. Statics—
Minchin—Statics, Volume I.
10. Dynamics of a Particle—
Williamson and Tarleton—Dynamics
11. Hydrostatics—
Besant—Elementary Hydrostatics
Loney—Elements of Hydrostatics.
12. Astronomy—
Parker—Elements of Astronomy.

N.B.—Candidates who take up Mathematics at the B.A. or B.Sc. Examination are recommended to refer to Saxeby's Practical Mathematics. Candidates who take up Honours in Mathematics at the B.A. or B.Sc. Examination are recommended to refer to Cox's Mechanics.

PHYSICS.

The scope of the subject is sufficiently indicated by the Syllabus, and no special text-books are prescribed. The books mentioned below, however, are recommended as showing the standard to which the students will be expected to attain in the examination :—

Pass Course.
